HOLLY and ..GREEN

VAUGHAN'S XXX HOLLY.

We maintain the highest grade Holly Branches in the market. Every case personally inspected by our own representatives; men who gather and pack our Holly are well experienced. While other shippers sometimes handle as choice Holly as Vaughan's XXX Brand, yet ours has averaged THE BEST one year with another. Our price is about the same, while our values are more than **DOUBLE**. Per Case, \$5.00. For larger lots write. Burlap lined, for Pacific Coast shipments, 50 cents extra.

VAUGHAN'S BOUQUET GREEN AND WREATHING.

We are pioneer headquarters on this stock, controlling same from reliable first hands of long experience. We can save you money. Our stock this season, while in moderate supply only, is from best sources, largely Indian picked and all late picked, avoiding the warm drying weather in October. Write or wire for latest market prices.

Wreathing.

Beginning about December 1, we carry two grades regularly in stock in large lots, and will make closest prices in 20 yard coils. Per 100 yds., \$3.00 to \$5.00.

Providence, R. I.

TRADE DECLINES PREVIOUS TO THANKSGIVING.—CHRYSANTHEMUMS ARE GONE.—VARIOUS LOCAL NOTES.

With the exception of Thanksgiving, business has gradually declined in the past few weeks. Especially has this been true of design work. Chrysanthemums are gone. With few exceptions this has been a fine year for the chrysanthemum grower. For the holiday trade there remained some Eaton, Jones, Lincoln, Mrs. Murdock and Maud Adams. Carnations and roses were scarce and had been for some ten days. One large chrysanthemum grower states that he found a larger demand for a flower at \$1 per dozen, wholesale, and that beyond \$1.50 it was hard to interest the majority of buyers. Violets are in regular demand at 50 cents per hundred, wholesale. Carnations are quoted at \$1.50 to \$2 per hundred for extra good stock.

Macnair had a big lot of flowers on exhibition the Saturday previous to Thanksgiving but the heavy rain dampened his ardor and the public inclination also.

Ernst Carl is growing two pink seedling carnations extensively this fall. One is very much after the order of Thomas Cartledge for color. They are vigorous.

Alexander Millar, formerly manager of the Rhode Island Greenhouses, is reported to be again identified with that range.

M. J. Leach & Sons, of Pawtucket, have been having a heavy run of design work. They now grow most of their own stock.

Everybody has Lawsons this year, and they are sold many times at regular rates.

Mrs. Walter Nichol, who has been quite ill, is now out of danger.

Good galax leaves are in demand, but not easy to obtain. M. M.

LANSING, MICH.—The Secretary of State has licensed the incorporation of the Manistee Floral Company, of Manistee, capital stock \$5,000.

New Fancy Carnation "TIGER"

Color, orange, striped pink, effect of Sunrise rose. Size, 2½-3½-inch, stem 2-3 feet, straight as a wire. Habit, every shoot going to flower at once, dark green foliage; no supports necessary. Calyx, extra strong, seldom splits. Flower, type of Mayor Pingree.

Notes, it is an early, continuous and free bloomer. Shown and won prizes at Kansas City, New York and Baltimore this fall.

Be your own judge. Sample ½ doz for 50c prepaid. The 50c you can deduct from your first order. 12 for \$1.50; \$10.00 per 100; \$75.00 per 1000. 25 at 100 rate, 250 at 1000 rate. 10,000 ready Jan. 1st.

HENRY EICHHOLZ, Waynesboro, Pa.

Chrysanthemums

Large Strong Stock Plants From Bench.

Adrian, 35c each; \$3.00 per dozen. C. Holst, Honesty, Prosperity, Providence, 25c each, \$2.00 per 100. T. Columbus, O.

NEW FIRM HAS GOOD STOCK TO SHOW.—
VARIOUS NOTES.

It is a treat to any commercial florist to visit the Fifth Avenue Floral Company, of this city, a comparatively new plant of about 20,000 square feet of glass owned by J. D. Siebert, C. K. Siebert and G. H. Woodlow. While all three proprietors will be found hard at work, the management is left to J. D. Siebert. Upon entering this place one is confronted with a clean lot of vigorous stock, especially roses and carnations, and that these three boys are amply rewarded for their hard labor is quite evident.

Mr. Heller, of New Castle, Ind., was among the callers this week, bringing with him some cut blooms of the new yellow rose, F. Deegen.

There was a scarcity of stock for Thanksgiving, but a considerable quantity of late chrysanthemums helped out.

CARL.

Long Beach, Cal.

Mrs. C. C. Lowe, of the Alamitos Nursery, has built a house 20x100 for carnations for winter bloom. There is a propagating house along the north side and a boiler and potting shed at the west end. The plants are looking fine now and are beginning to give blooms with good stems. They grow a great many palms out in the field, also dracenas. Phoenix Canariensis is in great demand here. The city is experiencing quite a boom at present.

CORFU, N. Y.—Harry Fishell has fitted up his boilers for burning either natural gas or wood.

CARNATIONS Rooted
Cuttings

10,000 Ethel Crocker now ready; just
the right thing
for growing into plants for next summer's
bloom, \$10.00 per 1000.

I will be glad to quote prices on any of the following for January or later delivery. Please state how many of each variety are wanted and when they are to be delivered: Dorothy, Nelson, Cressbrook, Queen Louise, Alba, Lorna, Her Majesty, Apollo, Estelle, Adonis, Morning Glory, Higginbotham, Gaiety, Prosperity and Roosevelt.

After this batch of Crocker are sold I will root it only to order, at same price per 1000, and orders must be placed six weeks before stock is wanted.

GREENHOUSES, WESTERN SPRINGS, ILL.

Prepare Now

FOR CHRISTMAS SALES. You will find the following stock a good investment and just as represented. It is in need of a shift, and being short of room, we must sell at reduced prices.

ASPARAGUS SPRENGERI, extra strong field-grown, stored in frames. Has not been frosted. These plants are making new top and root growth. If potted now will be fine for Christmas. Plants large enough for 4-inch and 5-inch pots or pans, \$3.00 and \$5.00 per 100 respectively.

AOIANTUM CAPILLUS VENERIS, the best for fern dishes. Bushy 2½-inch pot plants, \$3.00 per 100.

CHINESE PRIMROSES, select strain. **Reading Scarlet**, best of its color. **Light Rose Pink**, no trace of magenta. Large plants from 3-inch pots, in bud and some bloom, \$4.00 per 10.

CINERARIA STELLATA, good for pot displays or cutting. Extra strong, from 3-inch pots, \$4.00 per 100.

CINERARIA GRANDIFLORA NANA, from 3-inch pots, \$3.00 per 100.

CYPERUS ALTERNIFOLIUS, large 3-inch stock, \$3.00 per 100.

JUSTICIA, flowers in loose panicles from December to March. Color, dark pink, almost purple. Of easy culture, adapting itself to varying conditions. Its lasting quality and freedom of bloom make it desirable for all kinds of decorating. Bushy, well formed plants in bud and bloom, from 7-inch pans, 30-cents; \$3.00 per doz.

GERANIUMS. The following standard varieties are from fall struck cuttings: **S. A. Nutt. Marvel**, **Sam Sloan**, from 2½-inch pots, \$2.50 per 10. **Jean Vlaud**, **Mme. Landry**, **Dryden**, **Little Pink**, from 2½-inch pots, \$1.00 per 10.

NATHAN SMITH & SON, Adrian, Mich.

STOCK 'MUMS Bonnaffon, Queen, Ivory, Appleton, Geo. Pitcher, Niveus, Eda Prass, Wanamaker, Yanariva, Geo. Conover, 4c each. Satisfaction guaranteed. **W. B. OVIATT, BRIGHTON, N. Y.**

REDUCED RATES FOR CHRISTMAS AND NEW YEAR HOLIDAYS.

The Nickel Plate Road will sell tickets December 24, 25 and 31, 1902, and January 1st, 1903, at rate of a fare and a third for the round trip, to any point located in Central Passenger Association territory, good returning to and including January 2nd, 1903. Pullman service on all trains. Individual Club Meals, ranging in price from 35c to \$1.00, served in dining cars. Address John Y. Calahan, General Agent, 113 Adams St., Chicago, for particulars. Chicago city ticket office, 111 Adams St.; Depot, Harrison St. and 5th Ave.

Pittsburg.

COLD WEATHER BRINGS GOOD INCREASE IN BUSINESS.—MOST STOCK UNDER THE DEMAND.—GOOD PROFITS IN CHRYSANTHEMUMS.—VARIOUS NOTES.

Cold weather has come at last and quite a rush of business with it. Activity in social circles is at its height and the demands made upon us for these and other occasions, keep us busy from morning until night. The supply of stock of all kinds seems to be short, especially in the case of roses and chrysanthemums. The latter have paid excellently this season and every grower in this section is satisfied with the general results. Now that the cold weather is here, it is likely that the few remaining blooms will bring very high prices. Home-grown roses are superfine and both good and poor stock is being shipped in. Both home-grown and shipped Beauties are all that could be desired. Double violets are a little lower in price and much better in quality. Carnations have advanced in price but move slowly. Purchasers prefer roses rather than pay big prices for medium grade carnations. Lily of the valley is very fine, but scarce. Gardenias and cattleyas are meeting with liberal sale.

Thos. Ulam is usually fortunate enough to secure a vacant storeroom for his Christmas stock, but it does not look as though he would get his wish this time.

John Sherron, for many years foreman of the Phipps Conservatories, in West Park, Allegheny, is ill with brights disease and in a very critical condition.

Supt. Hamilton, of the Allegheny parks, is in Mexico; he will return in the early part of December.

Sam. McClements has returned from the east and has a few novelties for the holiday trade.

John Wyland, of DeHaven, Pa., is highly pleased with the progress of his poinsettias.

Carl Klink is ill with fever at the Mercy Hospital, but is slowly improving.

Visitors: C. J. Watson, Philadelphia; Thomas J. Wade, New York.

New Orleans.

CHRYSANTHEMUMS SHOWN AT THE NOVEMBER MEETING OF THE SOCIETY.—EARLY FLOWERS WANTED.

At the last meeting of our horticultural society we had an informal chrysanthemum show, some excellent stock being on view. Supt. Baker, of Audubon Park showed a novelty in the shape of a sport from V. H. Hallock, a well developed flower of pale salmon color. J. St. Marc brought excellent blooms of Mrs. Cannell, Golden Wedding and Mrs. J. B. Crane. Paul Abele showed the largest collection, most of his flowers being very large and perfect, such varieties as Silver Cloud, Vivand-Morel and Mrs. S. T. Murdock. M. M. Lapouyade had large flowers of President W. R. Smith. R. Eichling reported that there is a new variety named U. J. Virgin shortly to be disseminated from the Mississippi establishment whence Mr. Virgin draws most of his supplies. Here in New Orleans we do not aim at a great variety of chrysanthemums but seek, rather, those which will give the greatest proportion of the flowers on November 1. We regret that here the public associates the chrysanthemum with the burying ground and we find the principal demand on All Saints' Day.

M. M. L.

GIBSON CITY, ILL.—Swan Peterson has opened a neat retail store at Decatur.

FORT DODGE, IA.—P. L. Larson has had a good season thus far. In the past year he has doubled the size of his place and the chrysanthemums did exceptionally well this fall.

HORTICULTURAL ENGRAVING & PRINTING

To Increase

our supply of up-to-date stock cuts we will make engravings of any subject desired and sell you electrotypes for thirty-five cents per square inch. This work will be our finest grade of wood engraving, giving the same quality that characterizes our work. Send us photographs, or sketches of your needs or the objects and we will make the engravings direct from them. We can supply at short notice and at list price any

Stock Electrotypes

sold by any house if you will send us the number, print or description.

For the Seedsman

who desires exclusive engravings we desire to say that we shall still adhere to our principle of protection and shall give his work the same careful attention as in former years. We make every style of engraving and do printing of every description to help the horticulturist to place his products before the buying public in an attractive manner.

NOTICE.

THE MODEL PLANT STAKE COMPANY, formerly of Brooklyn, N. Y., has removed to 208 Jersey St., Harrison, New Jersey, and is now The Parker-Bruen Mfg. Co.

The Model Extension Carnation Support.

Flushing, Long Island, Dec. 11th, 1901.

MR. THERON N. PARKER, Brooklyn, N. Y.

Dear Sir— I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE, La Fayette, Ind., July 8th, 1902.

MR. THERON N. PARKER, Harrison, N. J.

Dear Sir:— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season. We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly,
F. DORNER & SONS CO.

TRADE ACTIVE AND SHORT SUPPLIES PERPLEX THE RETAILERS.—QUALITIES GENERALLY DETERIORATE.—A VARIETY OF LOCAL NEWS NOTES.

Business is very good and is all that could be desired for this season, but with the scarcity in most lines of stock it is difficult to fill orders. Roses in all varieties have deteriorated because of dark weather. Meteors and Bridesmaids are very much off color. Brides are not nearly so good in the stem, nor so large in bud as a week ago, and Liberty has almost disappeared. A few Morgan and Perle are coming in. Carnations hold predominance in the cut flower trade at present, but have also advanced in price, \$3 and \$4 being asked for the better grades. It is a pleasure to handle the Princess of Wales violets at present on the market, fine large flowers, good dark color and very long stems. Doubles are also very good. Poinsettias are again making the florists' windows look attractive and, as there is very little available in blooming plants at this season, they find ready sale. A few cold storage longiflorums are noticed and lily of the valley is becoming much more plentiful.

Charles Turp has moved his establishment about three-quarters of a mile further west on Bloor street and now has a fine place, four houses of which are devoted to the better varieties of carnations and partly to violets. These two crops are usually quite successful with him, and this year are exceedingly fine. He also has a large shed in which he grows some elegant mushrooms.

At the last regular meeting of the Florists' and Gardeners' Club, President Chambers being away on business, Vice-president E. Collins was in the chair. Business was soon disposed of and cards and refreshments indulged in.

R. Jennings, of Brampton, is still sending in some very good chrysanthemums. Roses with him are a little off crop, but carnations and violets are doing splendidly.

Miss Lilley, of Dundas street, reports business very good. Chrysanthemums have done well at this place the past season.

W. T. Tidy has azaleas and Harrisii which are ready to flower.

Geo. Hollis has been busy installing a new boiler. H. G. D.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size ¾ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, ¾ and 1-in. **75,000 FEET** of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2½-inch.

VALVES and fittings of every kind. **BOX COILS** for heating purposes. **RADIATORS**, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

TWO 54x16 Horizontal Tubular.

FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.
"Gurney" Heaters
"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

CARNATIONS.

NOTES ON CHRISTMAS FORCING.

The near approach of Christmas, with its increased price of flowers, is always an incentive for the grower to employ every means by which he can get an extra dollar from his plants, nor can we censure him for being so inclined. While there are some things that can be done to make the crop more valuable on that occasion, the results obtained from the application of any stimulating agents will be in direct ratio to the amount of judgment used. Too often, however, we see the over-zealous defeating the very object for which they are working by overdoing a good thing.

Assuming that the plants have had the best of treatment, and are in as good physical condition as they can well be at this season of short days and little sunshine, a careful analysis of the conditions that are to be met during the few weeks before we expect to make a heavy draft upon the resources of our plants will enlighten us on several points that will not bear slighting. In the first place December 25 comes almost on the very shortest day of the year, when vitality is naturally very low. And again, we must consider that the plants have not yet thoroughly filled the soil with roots, nor by any means exhausted the nourishment contained therein, making any deviation from the most careful cultural methods extremely dangerous.

It behooves us therefore to use the utmost caution in anything that we do in the way of supplying extra plant food and heat. We have never resisted the temptation to begin applying some weak liquid manure or giving a light top dressing of bone and blood or sheep manure about four weeks before Christmas, although we know that if we consulted only the health of the plants January 1 would be early enough to start feeding. Ten days before Christmas we start to raise both day and night temperature 2° or 3° each night, until about seven days before Christmas we have the temperature 8° to 10° higher than normal, or about 60° at night, continuing at this temperature until the night of December 24, when we begin to decrease again 2° or 3° each night till we have it back to normal. Fortunate indeed do we consider ourselves if the weather happens to be clear and bright, for then we are able to supply a good part of the extra heat direct from nature, which is not nearly so harmful as artificial heat.

It will be evident to anyone that the

plants will have to be in the best of health to stand this forcing period without suffering a severe check. It is with the view of having your plants in just that condition that the writer refers to the matter at this time. The first essential to any plant before it is forced is a strong, vigorous root foundation, and the only way to obtain this is by judicious watering and ventilating from now on, and exercising extreme care that whatever nourishment is supplied will not be strong enough to injure in the least the most delicate root fiber. The plants should have an abundance of air on every favorable occasion to promote a firm and crisp growth. Water should be rather sparingly applied to promote as broad a root system as possible, of course, always being careful that the plants do not suffer in the least for want of moisture. Experience teaches us that plants, when over-watered, make few if any roots, and it is this condition that may determine success or failure later on.

As far as the quantity of the flowers is concerned it will not matter much how you treat them in the next few weeks—so long as you keep them wet and warm you will produce as many flowers from them as you would if you were careful, for every flower that you will cut between now and Christmas has the bud set and will surely develop. But the quality of the flowers that you will cut shortly before Christmas, and the condition that the plants will be in shortly after, will depend very much upon a strict observance of the points mentioned above.

You have often noticed that shortly after Christmas and Easter there is always a great deal of complaint about flowers being of poor quality and going to sleep before they reach the consumer. Do you ever hear of it at any other time? Now, the writer is convinced that most of this complaint is not due to "pickling," so-called. It is directly traceable in most cases to plants that are in an over-watered, over-fed and over-forced condition. These three conditions make a combination so perfect that it would be difficult to suggest an addition to them that would augment the evils directly traceable to them. How well it would be if, instead of having our best customers go back on us in disgust, we could supply them with at least some of the pleasure that they are justly entitled to, after paying two or three times as much for flowers as at ordinary times. It is the thing that too often is the cause of the unfriendly relation that exists

between the wholesaler and the retailer. Let each contribute his share to remove this evil and thereby make it more possible for all the branches of the trade to work in greater harmony. J.

RAISED BENCHES VERSUS SOLID BEDS.

ED. AM. FLORIST:—I am a young man, not old in the business, but anxious to learn as much as I can. One point on which I should like to be informed is as to whether raised benches or solid beds are better for carnations and why. The views of some experienced grower will be appreciated. II.

If you have money to spare for the renewal of your benches every three years, by all means use benches, as you have more control over your plants on a bench than in solid beds and if handled properly they will produce a few more flowers. Raised benches have the advantage over solid beds in that you can force a crop of buds into flowers on a bench by keeping them a little dry and warm, while on a solid bed the plants would be almost ruined. I have no plants on benches this season and think I am saving money, and therefore making it, for my experience has been that the difference in the number of flowers and the money received for them between the bench and the solid bed will not pay the interest on much of an investment in lumber. Where solid beds are expensively built, then it is best to use benches and have better control over your flowers, and for a beginner I would advise benches for two-thirds of the place and solid beds for the other third, as an experiment; then you can decide when the benches rot out which you will make the most money from, as difference in localities makes a difference in results.

ALBERT M. HERR.

BLOOMS DEVELOP SLOWLY.

ED. AM. FLORIST:—Our carnation plants are strong and healthy. They have been in bud for the last month but are very slow in developing blooms. The stems are long and strong. The plants were benched the first week in September. We have applied manure water once. The varieties are Marquis, Morning Glory

and Crocker in pink, Crane in red and Queen Louise, Norway and White Cloud in white. Where can the trouble lie and what is the remedy? S. & B.

One would have to see these carnations and the houses in order to give an intelligent opinion, especially as Morning Glory and Queen Louise are on the list. The other varieties might easily, with no fire heat and dark houses, be in the condition named but these two sorts ought to be in full bloom. There may have been some element in the fertilizer used that has a tendency to retard the development of the blooms. If so the only thing to suggest would be to try and starve them into bloom by withholding water until they are almost, but not quite, wilted and then keep them in this condition and run the houses 50° at night and 70° to 80° during the day on bright days, and 60° on cloudy ones. If the houses have any shading on get it off at once. A light coat of air-slaked lime, if there is any tendency to sourness in the soil, will help matters somewhat. ALBERT M. HERR.

NOTES ON MAKING CUTTINGS.

Cuttings will soon be in order, in fact are in order now, as it is a good plan to begin the propagation early in December of all the late blooming and slow growing varieties that are too good to discard. Take the variety Prosperity as an example. It stands alone in its class. It is a carnation that appeals to the taste of a large proportion of the retailers' customers and will always command a good price. Grown in the ordinary manner, that is, from cuttings struck the latter part of February or early in March, one would have to get 50 cents each for the blooms and then it is a doubtful proposition if it will pay to grow it.

A number of observant growers have hit upon the plan of propagating these cuttings and housing the plants early and the results obtained up to date give promise of the variety paying as a cut flower producer. What is true of Prosperity is, to a lesser extent, true of many varieties, but in working from this point of view one will want to be sure that the variety is late and that its lateness is not due to some fault in its culture.

Other varieties that are more profitable when propagated early are those that are slow of growth and need a long season to make a plant of normal size. Sometimes growers forget the fact that to get a good crop of flowers they need plants with fairly good numbers of shoots when brought in from the field, and the only way to get them in this shape is to propagate the cuttings in December and have them rooted early in January.

Varieties that are naturally early bloomers and good, strong growers under ordinary circumstances make better plants when propagated so that they are ready to take from the sand the last of February or very early in March, varying the time according to the locality. In this latitude, where we can usually plant them out very early in April, it is advisable to have them rooted not later than March 1, as the plants should have at least four weeks' growth before they are planted in the field.

Just what makes a good cutting is a matter on which some very good growers disagree. I am something of a crank on the subject and always take the cuttings from the base of the flowering stems. Where there are not enough of these we cut out the top cutting and get the branch to throw a nice lot of these side cuttings. They are not as nice looking cuttings as the larger ones used by some growers but they always give me better results as blooming plants, and results are what we are aiming at. If the large cuttings give you good results do not under any consideration follow this advice.

There is one point on which we all do agree and that is not to take cuttings from a plant that shows any sign of disease. By disease is meant all forms of stem rot, leaf spot and anything that tends to lower the vitality of the plants, with rust possibly excepted from this category, as rust and some of the fine newer varieties seem inseparable.

Given healthy cuttings and clean sand there should be a very small percentage of loss. The treatment of cuttings in the sand varies considerably as to the sand used. I never had this experience before but have had it very forcibly demonstrated with an early batch of cuttings this season. One lot of sand rooted almost 100 per cent by keeping the cuttings, or rather the sand, wet. The other lot was just the reverse and those kept wet were almost a total loss.

The main point to watch is to see that the cuttings never get wilted, either before or after putting in the sand, and while the cutting house should have an abundance of fresh air, care must be used so that no direct draught blows over the cuttings and melts them by the rapid evaporation it causes. Provision should be made to give them the full sunlight when they are rooted, as they make much better cuttings if they have a week of sun and plenty of air before they are taken from the sand.

ALBERT M. HERR.

SPOT ON CARNATIONS.

ED. AM. FLORIST:—I note the query of "M. J. M." on page 646 of the issue for November 29, with regard to spot. It is a disease brought on by too much moisture on the foliage over night. The only way to get rid of the trouble is to not syringe the plants except when necessary and in watering take care not to get the plants wet overhead. The affected parts should be pinched off. It may take some time, proceeding in this

ORCHID DISPLAY OF SIEBRECHT & SON, AT THE NEW YORK EXHIBITION.

way, to remedy the trouble, and the present crop is likely to be lost. After that all should be well if the foliage is kept dry.
W. F. SCHMEISKE.

DISEASE IN SOIL.

ED. AM. FLORIST:—I wish next spring to plant carnations on ground on which cabbages have been grown. Would any disease which attacks cabbages be dangerous to the carnations, in the way of introducing any form of stem-rot? Would a coating of air-slaked lime before planting be beneficial to prevent the spreading of any disease present?

C. F. H.

If the soil is in good condition, and the cabbages were not affected with club root, there should not be any danger in planting carnations in it next summer. If it is not frozen up too hard I would suggest that the land be plowed this fall and let lay in the rough without harrowing it and then in the spring give it a coat of air-slaked lime and another plowing and good working. The action of the frost over winter will sweeten it up and make it much better soil than if it is let lay uncovered without the plowing.

ALBERT M. HERR.

Another Sport From Rose La France.

This oldtime, sweet-scented favorite rose has a decided tendency to sport. Duchess of Albany was the first, I believe, and was very much darker in color than the original. Then came Augustine Guinoiseau, which was very nearly white, and later came a striped variety; and all retained, if I remember rightly, the same form of petal and flower as the original.

The one to which I desire to call attention at this time is a shade or so darker than its parent, with a brighter and more cheerful shade of delicate pink, without that tendency to a bluish cast which La France is wont too frequently to produce. This sport, which Jacob Becker, of Philadelphia, has registered as Becker's Ideal, has also a different manner of growth, but that to which I particularly desire to call attention is that the petals are different in form from its parent, inasmuch as they have a decided inclination to be cup-shaped, or incurved, whereas the petals of La France, as is well known, recurve or reflex, giving with its sometimes uncouth, knotty look, what some florists have playfully called the appearance of a "ragamuffin," while others have designated it as airily artistic.

One of the great faults of La France is not opening its flowers satisfactorily; especially is this the case in the dark, dull days of winter. It apparently delights in heat, as it has always been considered a good rose for summer time. Mr. Becker assures us that his Ideal is far superior to La France in its buds opening freely, without that tendency to stick in the center that the older variety has, which is brought about, I am inclined to believe, through the sport assuming a difference in the shape of its petal.

This fact brings to mind a controversy which took place in the columns of the AMERICAN FLORIST some time ago to the effect that while admitting that sports or bud variations in plants take upon themselves a difference in growth, as weeping trees and stronger and more rampant growths among roses, giving what the catalogue people delight to term "climbers," and the difference in color has long been admitted; but the

FRANZ DEEGEN, THE NEW YELLOW ROSE.

consensus of opinion at that time was decidedly opposed to the idea that old dame nature would ever think of changing, when in sportive mood, the form of a flower or a petal thereof.

If I mistake not, Benjamin Dorrance secured a sport from Rose Mme. Cusin, which was named Sarah Nisbit, and which assumed a different formed flower, as well as a more delicate tint in color, than is the variety from which it sprang. But to return to Becker's Ideal. All rose growers will watch with much interest how it continues to behave in the future, for La France still has friends among flower buyers and some dealers go so far as to state that high grade flowers of La France would sell well to-day if they could be secured in quantity. However that may be, the latest sport from that source certainly appears to possess qualities that upon better acquaintance will be more appreciated and will cause it to take a place in our somewhat limited variety of roses for cut flowers in winter and summer.

EDWIN LONSDALE.

White Grubs in Greenhouses.

ED. AM. FLORIST:—I have seen the answer to question asked by "J. B. J." in your issue of October 11, 1902, page 384, noted carefully both question and answer, but am still a little in the dark. Mr. May states: "When once taken into the house it is a very difficult matter to eradicate them except by killing them as they are working around the plants. There is no known remedy that I have ever found or ever heard of, that will destroy them without injuring the plants."

I have a lawn under my care about 500x600 feet in dimensions, and the grub worms have destroyed its beautiful appearance. The blue grass will most likely resist the action of some chemicals or solutions yet some chemicals or solutions will, as Mr. May states, injure the plants. If you can suggest something, it would save much time and labor, and will be greatly appreciated.
J. H.

In further reference to this matter, we reprint herewith some particulars regard

ing the grubs and remedies, from a recent bulletin of the Department of Agriculture:

"Nearly every florist is familiar with white grubs, but he may not know that there are several hundred different forms of these creatures, each representing a different species of the family scarabaeidae or lamellicorns. Fortunately only a small portion of the white grubs are of prime importance economically, the remainder not attacking living plants. The destructive forms subsist upon roots under sod and about weeds and various cultivated plants, and most of these, the typical white grubs, belong to the genus *Lachnosterna*. They are brought into greenhouses in pots of earth, and occasionally in manure, but as a rule the species which breed in decomposing matter, such as manures, are much less destructive than the species of *Lachnosterna*. The different species can be distinguished from one another only by careful study, and for practical purposes it will not be necessary to consider this subject in detail.

"The species of white grub shown in the accompanying illustration may be taken as a type of this class of insects. The grub itself, illustrated at *c*, is of large size, of soft consistency, and white or slightly yellowish in color. The body is wrinkled, covered sparsely with fine hairs, and the head is brownish and armed with strong mandibles. This, as well as other grubs of the same class, habitually rests in the curved posture illustrated. The parent beetle, shown at *a*, is a large species, dark shining brown in color, and like others of its kind, familiar to nearly everyone from its habit of flying into lighted rooms in late spring and early summer, where it buzzes and bumps about upon the ceilings until it drops sprawling upon the floor. The antennae or feelers are jointed and terminate in a club composed of seven leaf-like plates, folded closely together when the beetle is resting and expanding somewhat like a fan when the insect is active. The club of the male antennae is usually considerably longer than that of the female. The form figured, *Lachnosterna*

in April or later in May or June. The females enter the earth and there deposit singly their rather large whitish or gray-colored eggs, one of which is shown in outline at *e* of the figure, each in a separate cell, and usually at a depth of from two to four inches. The grubs hatch and feed upon the roots of grasses and similar plants—first upon rootlets and afterwards on larger roots—living in the earth, and slowly increasing in size for a period of two or three years. Transformation to pupa in a normal outdoor condition usually occurs from about the middle of June to September of the second or third year after hatching, the beetles developing in August or September of the same year. These remain in the earthen cells in which the pupal transformation took place until winter has passed; sometimes at a depth of a foot or a foot and a half below the surface, where protection from cold and frost is obtained. Hibernation may occur in two stages of the larva and occasionally in a third, as well as in the beetle state, and some variation as regards the insect's life economy is to be expected in the higher temperature of a greenhouse. White grubs are preyed upon by a host of natural enemies, including other insects, parasitic and rapacious, birds, mammals and batrachians. In the last class toads are the most efficient, and they are sometimes utilized for the purpose of destroying insects in greenhouses.

REMEDIES.

"The habit of white grubs of passing the greater part of their existence underground and at a considerable depth renders it a matter of difficulty to reach them with insecticides. Against some forms bisulphide of carbon, kerosene emulsion, and poisoned baits have been used with some success. For use in greenhouses the best remedy, everything considered, is the poisoned baits. Of these, one of the best is the bran-arsenic mash, which is prepared by combining one part by weight of white arsenic, one of sugar or a like quantity of molasses, with six of bran, and enough water to form a mash. This is spread about the

and some of these are at times troublesome, it is well to exclude such forms as experience has shown contain an excess of these creatures—as, for example, horse manure. They can be identified readily by disintegrating the material, and chickens and other fowls could be utilized in destroying them before the manure is used in the greenhouses."

CHRYSANTHEMUMS.

SOME NEW VARIETIES.

Mrs. R. W. Smith, which John N. May has been showing, is clear, shining ivory white, a bold handsome flower, symmetrical without being stiff or formal in shape. The blooms average six and one-half inches in diameter by five and one-half deep. The season is the end of November. The plants average four feet in height. Terminal buds are used.

Durbin's Pride, Prest. Smith × Mme. Carnot, is one of the E. G. Hill Company's Australian novelties, color a pleasing shade of pink, flower very large and deep, with broad, loose curling petals.

H. W. Buckbee, a seedling of Mrs. T. L. Park × Nagoya is an improved Nagoya, a little brighter in color and more dwarf in growth. The color is a very beautiful yellow. Smith & Son received the S. A. F. bronze medal for it at Chicago.

Minnie Bailey is a beautiful bright pink of the Perrin type, from which it is a seedling. It is not as large as some of the latest varieties but Smith & Son think it will hold its own as a commercial sort for many years to come.

Uwanta, one of John N. May's novelties, is a beautiful shade of amaranth and a bold, well-built flower of good substance. It is a free, vigorous grower, coming in just right for Thanksgiving. The flower is six inches in diameter; either bud. The plants average four and one-half feet.

Mrs. J. J. Mitchell, one of Nathan Smith & Son's set of novelties, is very high built, Japanese incurved, petals irregularly incurved. It is cream in color. It scored 89 points before the Chicago committee of the C. S. A.

Lord Hopetoun is an Australian variety bloomed by the E. G. Hill Company, Richmond, Ind., who pronounce it the best color yet produced in red and gold, the red being a near approach to scarlet, and the gold shining and bright like the metal. The form of the bloom shows both colors to the best advantage.

Ethelyn is a light pink, incurved Japanese. This is a fine seedling from Superba, much lighter in color and somewhat earlier flowering. Smith & Son have shown it a number of times this season and it has met with general favor.

Souvenir de Mrs. Durbin, color deep yellow, like Golden Wedding, with the form of Vivand-Morel, has odd elk's-horn petals in the outer rows. The flowers are of the largest size and the growers, the E. G. Hill Company, esteem it one of the best of their set of Australians.

Golden Chadwick, a Vaughan novelty, is a sport of the well-known and popular variety, W. H. Chadwick. It is identical in every respect with the white variety with the exception of color, it being of the same shade of yellow as the Bonaffon. The flowers are inclined to be larger and of more depth. It received first prize at the Kansas City flower show for the best new yellow and divided the honors with Yellow Eaton at the Chicago show, scoring 92 points before the Chicago chrysanthemum committee.

LACHNOSTERNA ARCUATA.

From Bull. 27, new series, of the Div. of Entomology, Dept. of Agriculture, by F. H. Chittenden.—*a*, beetle; *b*, pupa; *c*, egg; *d*, newly hatched larva; *e*, mature larva; *f*, anal segment of same from below—*a*, *b*, *c*, enlarged one-fourth; *c*, *d*, *f*, more enlarged.

arcuata, is a southern one, and common in a climate like that of the District of Columbia. Here these creatures occur from about the middle of April into June, being most abundant in May; hence the name of May beetles. Farther north they are more abundant in June, and are there called June beetles. They are familiar objects at electric lights in most cities.

"The life history of a white grub of the genus *Lachnosterna* may be given in general terms as follows: The sexes pair soon after their first appearance, whether

plants to be protected. In addition to the use of this mash, it is always advisable to pursue the cleanest of cultural methods, which includes the avoidance of fresh soil which might contain these creatures, the keeping down of all grasses in the immediate vicinity of greenhouses, and particularly in the soil in the greenhouse itself. The use of fertilizers is also advisable, as it enables plants to resist insect attack at the roots.

"Sterilizing the soil by means of heat or steam is also of value. As manures are frequently infested by white grubs,

SOME OF THE SEASON'S NOVELTIES IN CERTIFICATED SEEDLINGS AND IMPORTED CHRYSANTHEMUMS.

WITH THE GROWERS.

ALBERT F. AMLING, MAYWOOD, ILL.

One of the most novel of the various greenhouse establishments in the vicinity of Chicago, where there are many remarkable plants, is the new range for asparagus and smilax which Albert F. Amling erected last spring as an addition to his rose houses at Maywood. The new range includes eight houses running east and west, covering a ground area of 105x125. They are built west of a block of old houses and separated from them by a narrow cross house, where the camera stood for the photograph, reproduced herewith, showing the interior of the houses as it looked early in November.

The range is built on what is known as the Dietsch patent, with several short spans, instead of the large spans, which had been growing wider and higher during the recent years of improvement in greenhouse construction, until the present type came into vogue. Six of these houses are only thirteen feet wide, and the outside houses twenty-six feet, including slopes which are extended to come down to a height of about seven feet, where one house joins on to the old range alongside.

This asparagus house makes a remarkable showing, with its ridges eighteen feet above the ground and its gutters supported on 14-foot iron pipes. The structure was especially designed for asparagus growing and under each ridge an elevated walk, as will be seen in the illustration, has been suspended twelve feet above the ground, to facilitate the stringing and cutting. The space under the gutters is further utilized for baskets of Asparagus Sprengeri, of which there are 500 in the house.

The security of the houses against strong winds is amply provided for, as they are trussed both ways, north and south and east and west, but without obstructing the walks. The glass used is 16x24, laid the 24-inch way and butted. At first sight it might appear

feet wide, in the new range. The walks are eighteen inches wide. Before planting the stock early last spring Mr. Amling excavated to the depth of two feet and laid 4-inch drain tiles under each bed, with elbows reaching up out of the ground at each end to provide for thorough ventilation and drainage. He then filled in with a good rich compost and set the plants fifteen inches apart one way and sixteen inches the other. It took 6,000 plants to stock the houses. For stringing ordinary No. 8 thread is used. The stock has made an excellent growth, the height of the houses allowing for strings twelve to fourteen feet or more in length. Mr. Amling is now beginning to reap a reward for his effort.

There are, in addition to the big asparagus houses, three houses of smilax on the place, and one house from which the chrysanthemums were recently cut out and which will now be given to sweet peas and Harrisii lilies. Five houses of Bride and Bridesmaid roses are grown and good results are regularly obtained. There is also one house of Kaiserin which is carried dormant through the winter and started up in season for summer bloom. The plants are now in their fourth or fifth year and this house has regularly proven one of the most profitable on the place.

The establishment was built in 1889 by Mr. Amling and his brother, E. C. Amling. They bought two acres of ground and built three houses for a starter. These structures have long since been pulled down to make room for more modern buildings. In 1896 E. C. Amling sold his share in the place to the present proprietor, to go into business as growers' selling agent. In the past two or three years A. F. Amling has rebuilt the whole place and added largely to it. He is one of the solid men of Maywood, being a director and vice-president of the Maywood State Bank.

MINNEAPOLIS FLORAL CO., MINNEAPOLIS.

One of the largest and most modern

ASPARAGUS HOUSES OF ALBERT F. AMLING, MAYWOOD, ILL.

that this house would require a great deal of heat, but thus far in the season Mr. Amling has found it much easier to handle than his older structures. He uses steam and last season deepened his boiler pit by several feet and put his apparatus in first-class shape. He has found that the new high houses require ventilation earlier in the morning than the old houses alongside, although shaded somewhat by the latter.

In all there are eighteen beds, each five

places in the Twin Cities is that of the Minneapolis Floral Company, at Thirty-sixth street and Calhoun boulevard, Minneapolis. At the time of my visit, a few weeks since, it was especially interesting, as the chrysanthemum season was at its height and the endless array of varieties displayed was one of the best flower shows ever seen. But it is not alone in chrysanthemums that success has been achieved by this progressive concern, for a look through the establish-

ment reveals everything in the line of plants and flowers in a most flourishing condition.

The houses are 155 feet in length and are built on a side hill, an ideal location for greenhouses. For convenience I will begin at the first house, which is planted to violets. There are two benches containing about 3,000 plants, from which the proprietor expects to realize \$3,000 during the season. The plants were literally smothered in blossoms and buds and were by far the finest plants I have ever seen. The varieties grown here are Marie Louise, Lady Campbell and Swanley White. They were planted in the benches in July in ordinary good soil and have not been fed.

The next three houses are planted with carnations. Many of these were affected by stem rot, the diseased ones having been thrown out. All the leading varieties are grown, but Prosperity and Lawson are the main crop here. This concern was one of the first to plant Prosperity and still considers it one of the most profitable to grow. Lawson does well here and is considered a profitable variety. Queen Louise is a most productive sort as seen here, the flowers being extra large, of fine form and substance. Norway, Lorna, Estelle, White Cloud, Mrs. Joost and many others are grown in lesser quantity.

The next house contained Begonia Gloire de Lorraine, celestial peppers in 4-inch and 5 inch pots, nicely colored for Christmas trade, also palms, ferns and so forth.

In the next houses, twelve in number, the roses are in great luxuriance. These houses are built with steep roofs to the south, the eaves being seven feet six inches from the ground. Garland gutters are employed and 16x24 butted glass used in their construction. Butted glass has not proven satisfactory, however, and will be relaid and lapped as rapidly as possible. The benches in these houses are built under the gutters, so there is but little waste space, every foot being utilized to good advantage.

Quite a number of varieties is grown but the principal crop is Bride, Bridesmaid, Meteor, Liberty and Beauty. A bench of Queen of Edgely was in fine condition but is not particularly profitable. Sunrise is seen here in good form and is a most fitting companion to Sunset, which is grown here also.

At the time of my visit Helen Gould was in crop but the flowers were not at all uniform in color, some being as light as La France while others were nearly as dark as Liberty. When its requirements are fully understood it will become a valuable variety, as it is one of the freest bloomers I have ever seen. Liberty has done fairly well at this place though it is not as profitable as Meteor, the chief trouble being its short stems. Golden Gate, Carnot, Kaiserin and Testout are also grown.

The next house lead into the forest of chrysanthemums before mentioned. Of all varieties grown here, and their name is legion, Eaton seemed to be the best in size and form as well as in texture. Col. Appleton, Golden Beauty, Mrs. Elmer D. Smith, Adele, Mlle. Faure, Chadwick, Rieman, Major Bonnaffon, Mutual Friend and many others caused me to wonder if this year's introductions would be any improvement over these.

Another house contained over 1,000 azaleas, several hundred being 24-inch heads, well budded. A range of sash houses contained California and Princess of Wales violets, primroses, cyclamens and

VIEW IN THE RANGE OF ASPARAGUS HOUSES OF ALBERT F. AMLING, AT MAYWOOD, ILL.

many other interesting plants. One mammoth house extending north and south up the hill is filled this year with carnations.

This large place is owned jointly by a banker and John Monson, the latter being general superintendent. Nearly 90,000 square feet of glass is in the present range and preparations are under way for erecting another large range this winter. FELIX.

The Florists.

The following is a synopsis of the response to a toast, by J. W. Dunford, Jr., president of the St. Louis Florists' Club, delivered at the annual Shaw banquet to gardeners and florists, at St. Louis, November 19:

This is rather a large subject for an ordinary grower, who only calls himself a carnationist on Sundays and holidays. Give me a wholesale man or an up-to-date retailer and I will show you a man who knows how to talk. It is part of his stock in trade. Notice how modest and retiring an ordinary grower always is. He is obliged to read you all his thoughts, fearing lest he forget.

This subject naturally resolves itself into three distinct headings, past, present and future. This is no time to worry you with statistics; I merely wish to call your attention to the wonderful growth of an industry that none of us need to be ashamed of, and to make a few predictions, wise or otherwise, that some of us may live to see fulfilled. Do you remem-

ber anything about the small beginnings of the florists' trade, when a house built of hot bed sash, with 8x10 glass, heated by a flue was considered plenty good enough to raise fine carnations and roses? Fine, yes if they had been much finer, particularly the carnations, you couldn't have seen them at all. These were the times when a house 100 feet long was considered a monster. Compare the houses of to-day with those of fifteen years ago. Now we have them as long as 700 feet, as wide as sixty-five feet, built of iron, glass 24x36, with automatic ventilators, and a small addition to one of the larger of our growing establishments would be anything from 25,000 to 50,000 feet. The retailer who used to be satisfied with a small corner in some one else's store in an out of the way place where rent was cheap is not now content unless he has a place of business that is a little better, and a little more artistic, than the other establishments.

The wholesaler is a young man yet, but an indispensable one. He has not far to look back but keeps up with the procession. He has within the last few years vastly improved his methods of shipping flowers and taking care of them. He is, and ought to be, a great factor in keeping the grower posted as to the market needs and fluctuations.

The grower of the future won't believe in the ordinary, wooden raised benches of to-day. If he does his greenhouse doors will be wide enough to wheel out the benches in small sections to empty

them. He will use automatic stokers and automatic ventilating machines, with the ventilating sash balanced in the middle instead of being hinged at the top or bottom, as we now see them. He will use a self-registering thermometer so that he can keep track of his night fireman and keep the record for future reference. The time may come when we shall see him utilizing his steam pipes to carry and distribute cold air or some other cooling medium in summer. Subirrigation will be a back number, but the benches will have an arrangement so they can be watered from the top by just turning on a valve at the end of the house.

The coming specialist in raising cut flowers will not believe in sterilized soil except that purified naturally by the elements, sun, rains and frosts. He will have seen enough experimenting with the different styles of houses to know absolutely which is the best kind for any particular purpose.

The carnation in the near future will be six inches in diameter on a six-foot stem and I hope not quite so stiff looking as some of the new ones we see now. The chrysanthemum of the future will not be too large to get through an ordinary door, nor too tall to be beyond an ordinary person's vision. We shall have a greater variety of roses, some that will keep a week or two in warm weather. Our violets will be under control so that we shall not get a big crop of leaves when we are looking for flowers.

The retail man will be an expert electrician and artist, well versed in lighting

and color effects. He will turn up his nose at the ordinary delivery wagon of to-day, using an auto in its place; his drivers and delivery boys will be in livery, and among other things he will be able to guarantee safe carriage of flowers to almost any distant point, using some absorbent to wrap around the stems, and covering the box with material that is a nonconductor of heat.

The wholesale man will employ a talking machine for each large consignment of flowers, telling the buyer about the individual merits of that particular lot, their freshness, lasting qualities and cheapness. He will keep the grower posted daily over the 'phone as to the market conditions, prices and so forth. He will have no trouble in making collections, will look out for the grower's interest before his own, generously sharing with him the net profits of his business at the end of the year, for he well knows that the more money the poor grower gets, the more greenhouses he will build.

A Minneapolis Establishment.

E. Nagel is one of the veterans in the ranks of the Twin City florists, and Nagel & Company have one of the neatest stores in Minneapolis as well as one of the best ordered ranges of greenhouses. The accompanying illustration is of the interior of the store, at 818 Nicollet avenue, where Fred. Nagel is in charge. The greenhouses are at 1118 W. Lake street and most of the stock produced goes out through the down-town store.

There were two houses of fine chrysanthemums this season, much to Mr. Nagel's satisfaction. Among the sorts were Glory of Pacific, Vivian-Morel, Mrs. Jerome Jones, Mutual Friend, G. W. Childs, Timothy Eaton and Mrs. H. Robinson. The blooms were as early as any in the vicinity and the quality excellent. Two houses are given to roses and carnations, few roses and more carnations, including such sorts as Mrs. Lawson, Mrs. Joost, Marquis, Sunbeam and G. H. Crane.

The remaining three houses are partly given to violets, Marie Louise and Princess of Wales, and to pot plants. Azaleas are flowered here and there are some good palms and ferns, particularly noticeable being some Bostons and some pterises, the latter raised from seed. Room is also found for Asparagus Sprengeri and A. plumosus nanus. The greenhouses are in charge of Fred. Stoltenburg.

Mr. Nagel's favorite recreation is target shooting and he has his own private gallery in the potting shed, where the trade visitor is always invited to try his hand. It is seldom that the venerable host is worsted with the rifles.

C. F. R.

VAN WERT, OHIO.—C. W. McConahy died November 27. Mr. McConahy attended the Chicago flower show and was then apparently in good health.

FARGO, N. D.—Shotwell & Graver report that Thanksgiving brought a fitting close to a good chrysanthemum season and the prospects are for a busy month and a big Christmas.

SYRACUSE, N. Y.—Henry Morris is in receipt of an autograph letter from Lord Beresford, admiral of the British navy, thanking him for naming his new gunna after him. Mr. Morris is a native of County Kilkenny, Ireland, and the Beresford family is one of the most distinguished in Ireland.

Specimen Chrysanthemum Plants.

BY T. D. HATFIELD, WELLESLEY, MASS.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13 1902.]

The first chrysanthemums I remember grew beside our front porch. This was when I was a boy in the north of England. They were pompons. I liked them at all seasons for the pungent aroma they gave out on the touch, and the smell in my nostrils to-day carries my thoughts and mind's eye back to that front porch. There is no doubt these recollections have much to do with my persistent regard for them now; for in spite of resolves, taken again and again, that I would

E. NAGEL.

grow less next year, and wouldn't exhibit again, I have more varieties than ever, and am still saying the same thing. There is nothing so hard for me to do as to throw an old favorite away. I have now varieties which are twenty-five years old, and some may be older. I take pleasure in keeping representatives of all the types, and adhere strictly to the old characteristics. No Japanese incurved will take the place of Mrs. Rundle, Mabel Ward, Beverly, Venus and Jardin des Plantes.

The first exhibition of chrysanthemums I saw was held in the town hall at Birmingham, in England, about twenty-five years ago. The first plants I had the care of were at Martin's Nursery, near Hull, England. These were what we would call decorative plants. They were grown four in a 10-inch pot, with very little stopping. Twenty stems were as many as the pots carried, and each disbudded to one flower. Some of the varieties I remember were George Glenny, Dr. Sharpe, James Salter, Fair Maid of Guernsey, Hero of Stoke Newington, Lord Derby and the pink and white Christines. I don't say these were models of perfection, but I remember them with more distinctness than many of more recent introduction.

The exhibition in Birmingham was not an extensive affair. The specimen plants numbered less than two dozen. All were low specimens, on wire frames, much spread out. The cut blooms were on boards, with short stems, and very taking they looked. (Long-stemmed chrys-

anthemums with foliage are gorgeous when fresh, but depressing to look at when wilted.) I don't remember any of the large Japanese, as we know them to-day. They were mostly Chinese "incurved" and "reflexed." The anxiety for large blooms among the incurved has brought in a number of doubtful parentage, and in our exhibitions to-day considerable latitude is allowed. Ivory is included frequently, but it is a Japanese variety.

Chrysanthemums have been exhibited in this country at infrequent intervals for about seventy years, though no regular exhibitions have been held longer than thirty-four years, the first in the Massachusetts Horticultural Society's halls in 1868. The recent popularity dates from about the time of the introduction of the famous Neesima set by Fewkes & Fottler. Hallock and Thorpe and Waterer had made some importations some years previously. These only paved the way. Mrs. Alpheus Hardy was the most noteworthy of this set. I question if any excepting W. H. Lincoln is in existence to-day, certainly not in general cultivation. It was unfortunate but unavoidable, as the onrush of introductions, mostly of American seedlings, completely swamped them. President Hyde came out about the same time and proved an excellent variety for specimens. Latterly, however, it seemed to lose constitution and we gave it up.

We have constantly been changing our list of varieties suitable for specimen plants. It is one of the things I cannot understand, why we do so, and still we make very little headway. The explanation I believe lies in a desire to keep up with the novelties. It has proved a mistake, as varieties selected almost wholly because of some special merit, either size or color of blooms, are seldom suited for specimen plants; and among our best to-day, scarcely any are found which make good specimen blooms. Red Warrior does not, neither do Louis Boehmer, Fisher's Torch, The Bard or Phœbus. I often wish we could get Fair Maid of Guernsey, Belle Hickey, Jeanne Delanx, Jardin des Plantes or Lady Selborne.

At the show of 1888 in Boston there was considerable excitement. The Neesima set was on exhibition. Manda had bought Mrs. Alpheus Hardy for a fabulous sum. Elijah A. Wood, of West Newton, was a prominent exhibitor. He was a leader at that time in novelties, and later took honors at Madison Square Garden, New York. My employer was particularly enthusiastic and requested me to visit Mr. Wood with the object of buying cuttings. This, however, was out of the question, buying, and on leaving Mr. Wood's place I was the proud possessor of about forty varieties, many of which were novelties of the time and accordingly much prized. They were all grown to specimen plants and I think I had in all 120 plants and about eighty varieties. A temporary structure was erected for flowering time.

These were happy days, but not without some anxiety. Staking was a considerable task, but somehow we did not feel so unkindly toward the work as we do now. We led for a while, but John Barr, our neighbor, pushed us hard and, latterly, has had the field to himself, and now he is being pushed. This is the way things go; every man, or dog, has his day. We grew nice specimens then, and do now, but we never grew so many as John Barr, or grew them as large, or finished them as well. This is real progress.

Years ago we did not grow our plants altogether indoors, as we do now. They were grown outdoors from the first of May until September. We avoided some insect pests but encountered others. In those days red spider and green fly bothered us little. They had their own enemies in other insects, but the chinch bug came and struck us in a vital spot. Blighted and stunted growth was the result, so we took to growing them indoors and even then we had to keep a sharp eye, and many were the schemes and devices to combat the pest. Now the chinch bug is a rarity on chrysanthemums. The dahlia is his favorite flower. Then there was the "ants' cow," a big white root aphid which ants "farmed." This gave us lots of trouble. We could easily have finished the aphid, but the ants were persistent and soon had another stock.

Indoors our worst enemy is red spider. It is an insidious pest and very liable on account of its small size to be overlooked until it gets a strong hold. We have tried about all the nicotine compounds, both by fumigating and as a spray, but none will kill them outright. There is nothing so good as water, and we are forced to continue spraying right up to exhibition time. I have tried it upon plants with the flowers expanded and it has done no harm when the day is bright enough to dry up all moisture before evening. There is always the danger of getting the plants water-logged, especially when they have been potted a long time.

I may go back to cutting time, and this begins right after the exhibitions. There are always plenty to get then, and often it is easier than later. At any rate, we make sure of all new and scarce varieties, and if we can get nothing better we can do very well with leaves. We have hunted high and low for new things and, dog-in-the-manger like, we neither wanted to give them away, or throw them away, even when we saw we had too many, and sure enough it would have been better if we had done both with many of them. I feel sure the first plants I grew of W. H. Lincoln and President Hyde were stolen, but I didn't steal them. We used to beg all the seedlings we could of the late H. A. Gane, of West Newton, Mass., who will be remembered as the raiser of Mrs. Jerome Jones. Yellow Ball is a relic of these times.

Sometimes we took our early cuttings over again, as we thought they made better specimens when started in February, but often we did not resist the temptation to grow the originals on account of their size, hoping to make larger specimens, but seldom they did. We have tried growing old plants a second year. It is not worth the trouble, but I may mention a plant of Mrs. Alpheus Hardy which won a silver medal in Boston and a cup in New York the next season.

Cuttings will stand considerable saturation and must be kept close for a few days. When rooted they are potted in small pots, using light soil. We usually put in four cuttings and pot off two, saving one of each variety to put in boxes for emergencies. These may make just as good plants as those carefully potted. One can hardly go by the size of the cuttings, still, I should always prefer a strong one. They are stopped as soon as nice young growth is made, and when well rooted put into "fours," later into "sixes" and stopped frequently. For the next and, in most cases, our final potting, we pay more attention to the soil. After trying various kinds, our preference

THE RETAIL STORE OF E. NAQEL & CO., MINNEAPOLIS, MINN.

is for light loam. There is less danger of getting the plants water-logged, a serious condition.

A good rich soil with a moderate proportion of lime, in some available form, is the best. We have used Clay's fertilizer as an ingredient with excellent results. It stays with them to the end. For a liquid there is nothing better than horse urine when carefully used, say at the rate of half a pint to a two-gallon can, once or twice a week. But this should not be given until the plants show the need of it, which should not be a difficult matter for the ordinary practitioner to decide. More judgment is required to know when not to use it. It is easy to overdo. All this applies to plants which have had their final shift, but I meant to say, when making it, that they should be potted only moderately, and not too full, as the root development is liable to fill the pots up, and if potted quite firmly, too hard to allow of the free passage of water. With some of our plants, at this writing, November 1, it takes half an hour for them to soak, and one at least that I depended upon became so hard that I had to punch holes through the ball with a stout piece of wire, but it is injured beyond recovery. It is hard, too, to tell when sick plants want water. They will wilt when the sun shines and it requires the greatest restraint not to apply it. A sure test is to damp the floor and walls thoroughly and if they don't recover they need water.

Staking is in a great measure a matter of taste; I mean as to how and when to do it. It is easier to do it all at once. I can get a more shapely plant. I feel sure such wholesale work is injurious, although it is not decidedly apparent. And if it is done piecemeal, part in August and finished in October, there will be considerable re-arrangement of the shoots, untying and re-tying. I tried a wiring plan some years ago; we made some nice looking specimens, which were photographed for the AMERICAN FLORIST. But it was almost useless to try to carry them in town. They took up too much room. E. M. Wood, of Waban Rose Conservatories, was very enthusiastic over this idea, and the concern, with Alex. Montgomery at the head, exhibited six plants in Boston finished in this way,

but it took a box car to carry them in. The advantage of staking with pliable stakes like willows consists in being able to draw the plants together so that there will be no friction. We first fill the plants all about the flowers with tissue paper and then draw them in with bands of cotton cloth.

I wish to say a few words about unusual varieties, old and new, which we use for decorative purposes, for cutting and massing. Say what you will, a specimen plant is of no use except for exhibition: Its formal character is revolting if seen too often. A number of small plants grown in 7-inch and 8-inch pots, from one to two feet in diameter, mixed together, any way, gives a variety of form and color we never get in specimen plants. No attempt is made by us to train them, only stakes enough are inserted to keep the shoots together. This informality is charming. All types are represented, pompons, pompon anemones, large anemones, incurved and reflexed; even the larger flowering Japanese, when grown in this way, would hardly be recognized. The Mizpah type, single flowers, originated with E. D. Smith, Adrian, Mich. They have a distinct beauty. We are often asked if they are marguerites; we would rather compare them to single pyrethrums in form of flower. Grown in 6-inch and 7-inch pots, they are hardly more than a foot high and models of neatness. This season we have added some new colors and a slight variation in type—seedlings of ours, raised from Mrs. Filkins—one of the feathery ones, of the Golden Shower type. We would suggest an addition to the schedules of chrysanthemum societies, which would give these dwarf forms a chance to be seen. "Specimens in 8-inch pots, not more than eighteen inches high."

Though hardly in line with this essay, a little matter, at least interesting to me, is the fixing of sports. This can seldom be done by taking cuttings from the base of the plant which sports. As generally happens, it is only part of a branch, and shoots below, may bear normal flowers. Oriental Glory, a satiny pink, sported golden bronze last autumn, and this has been fixed by leaf cuttings. This season it has sported again, clear yellow, with

a wedge of pink. Oriental Glory is probably not known to many, but I will ask those who have it if it has sported. It is a common thing for a plant to sport in several places at one time. This has happened with Louis Bochmer and often with the Queen of England type of incurved.

In conclusion, I wish to commend the new system of points adopted by the society and to thank it for doing me the honor of this invitation. I am sorry I cannot be with you in person.

Chicago.

STATE OF THE MARKET.—ROSES MORE PLENTIFUL AND CARNATIONS SHORTEN UP.—SHIPPING BUSINESS CONTINUES GOOD.—ALARM OVER RUMORED ACTION OF EXPRESS COMPANIES.—NO MORE LIABILITY FOR FREEZING.—DOINGS OF GROWERS, WHOLESALERS AND OTHERS.—NOTES AND VISITORS.

Since Thanksgiving trade has continued brisk and prices have been well maintained, rather more above than under the holiday quotations. The general tendency has been toward a weakening in the lower grades of roses and stiffening in the lower grades of carnations, but on Wednesday this latter item lost much strength. The conditions prevailing at Thanksgiving have been practically reversed, although the change has not been a sharp one. Now the supply of roses is on the increase, and the cut of carnations has been declining. Beauties have continued practically out of the market. The receipts of all the houses combined have not been more than what any one of the big shippers handled a month ago. As a consequence there has been a great deal of disappointment on the part of those ordering these goods without a full knowledge of the market situation. There seems to be a better call for white roses than for others, and as a result most of the houses are selling the lower grades of Bridesmaid somewhat under the value of Bride. The Liberty crop also seems to be off with most of the growers of this specialty. The receipts of carnations were not so large this week as had been anticipated and shippers on several days billed out the lower grades somewhat above the printed list. Violets were very scarce at the beginning of this week, a condition unprecedented this season. Prices ranged up to \$2 per hundred and some days it was impossible to supply the call at that figure. What few chrysanthemums still remain are very poor. Poinsettias are coming along steadily now and are seen in most of the retailers' windows. The price of ferns has advanced to \$2 per thousand.

Considerable perturbation has been the result of the announcement that express companies, on December 12, double the rate on cut flowers, except where the shipper releases the company from liability in case of freezing. The Wholesalers' Association took up the matter at its weekly dinner at the Bismarck on Tuesday and appointed a committee consisting of Peter Reinberg, L. Coatsworth and C. L. Washburn to see what can be done in the matter. The association had no authoritative notice of the intention of the carriers, news of the intended move having been received in a letter of warning from Nathan Smith & Son, of Adrian, Mich., whose attention was called to the matter by the agent of the U. S. Company several days before anything was heard of it in this market. It is also under-

stood that the express companies will shortly decline to pick up empties. Heretofore the wholesale flower trade has enjoyed a special privilege in this particular, the express companies having for years required the South Water street dealers and other large shippers to deliver empties at the respective depots. The present rumor that after January 1 the privilege will be withdrawn is therefore not a surprise. The association appointed G. H. Pieser to get the facts.

Little is being said by the promoters of the new flower market but it is heard on the street that three-fourths of \$5,000 capital stock has been subscribed by some twenty-three parties and that Emil Buettner will accept the presidency of the corporation when formed. It is also stated that none but those who will sell their own stock on the floor of the exchange are being accepted as stockholders and that the sentiment is against opening in the immediate neighborhood of the present cut flower houses.

Mat. Weber, who was foreman of the carnation department at Peter Reinberg's, died November 28, of pneumonia. He was 35 years of age and leaves a wife and three children. Mr. Weber had been with Mr. Reinberg for seven years and was esteemed as one of the best men Mr. Collins ever had in his force. His family are left with a comfortable home and \$3,000 in life insurance.

Now that Thanksgiving is far enough past to afford the proper perspective, it seems evident that the demand was something above that of previous years, but that the shortage of Beauties and the poor quality of the remaining chrysanthemums served to cut down the aggregate of sales to a figure under the total of a year ago.

The Horticultural Society of Chicago offered this autumn the largest sum in premiums in its history and the proportion of premiums won to those offered was much larger than usual. The society, owing to the favorable rental at the Art Institute, will be in good financial condition for the coming year.

Sam. Pearce is marketing large quantities of excellent Paper White narcissi and has a large stock of healthy and vigorous Harrisii and longiflorum lilies to bloom after Christmas. The azaleas at this place are also very fine, a large number being brought on for the holidays.

E. E. Pieser calls attention to the fact that every article of one's daily needs, food, fuel, apparel and all the luxuries except cut flowers, are from fifteen to forty per cent higher than a year ago. In cut flowers there has been a decline in value on the average.

J. D. Thompson goes to Richmond, Ind., to-day to see the sights. He has been figuring up and finds that he has up to date cut more than two blooms per plant from Enchantress, while Lawson, in splendid condition, has given one and a half.

George Reinberg is in the market for about two car-loads of glass, planning to put up a range of thirteen houses 26x265 early next spring. He has been negotiating for the Schater property adjoining his, but the deal is off.

August Jurgens has a heavy stock of poinsettias, large and small, and is picking his usual supply of lily of the valley. Mr. Jurgens has been making some changes about his place and has nearly completed a new office.

Weber Brothers have moved 4,500 longiflorum lilies into the space recently

occupied by their chrysanthemums. Their Brides and Bridesmaids are again coming on in fine shape.

The Retzer-Fuchs establishment, it is reported, will be resold, the necessary funds to cover proper legal settlement not having been paid in by the purchaser.

Both C. L. Washburn and O. P. Bassett are at Alma, Mich., this week, at the bedside of Mrs. Washburn, whose life is despaired of.

Wietor Brothers had a fine lot of carnations for Thanksgiving and their roses promise well for Christmas.

The first car of holly for the season was received by Vaughan's Seed Store on Monday.

Miss Bessie Hortop, of Denver, Col., passed through the city this week, returning home.

Sam. Pearce on Wednesday became the happy father of a very lusty baby boy.

It is reported that the West Park gardeners are trying to form a union.

N. J. Wietor has welcomed a new boy, eleven pounds, into his home.

A. C. Kohlbrand is again doing duty at Amling's, after an illness.

Edgar Sanders is steadily improving in health.

Visitors: George Hunt, Terre Haute, Ind.; J. W. Hulsizer, Grinnell, Ia.; John Burton, Philadelphia; John N. May, Summit, N. J.; O. L. Baird, Dixon, Ill.; Chas. Chadwick, Grand Rapids, Mich.; Hester A. Getz, Cleveland, O.; H. E. Philpott, Winnipeg, Manitoba; Wm. Bentzen, of the Bentzen Commission Company, St. Louis.

Boston.

BUSINESS TAKES A BRACE.—NO COMPLAINTS ARE HEARD.—ALL LINES OF THE TRADE ENJOY A PROSPEROUS PERIOD.—VALUES ADVANCING.—VISITORS FROM HERE AND THERE.—A GOOD SEEDLING CARNATION.—VARIOUS LOCAL AND OTHER NEWS NOTES.

It is very pleasant to be able to record this week a welcome variation from the reports of trade condition as given for a number of weeks past. Business is acknowledged generally to be good and this information is given by the wholesalers with an illumination of the features which fully vouches for its sincerity. As to the retail storekeepers, their idea of what constitutes good business runs somewhat counter to the views of the growers, as a rule, but it needs no assurances from them to indicate that everything is prosperous with them also, despite the very serious setback they suffered from the stormy weather of Thanksgiving. Indeed, the retailers have had nothing to complain of all through the fall. They have secured their flowers at low figures, have had pretty nearly their own way as to choice of material and have been able to keep the usual number of clerks a-going. Naturally they do not take kindly to the advancing values of choice grades of stock and more or less skirmishing is going on, the scarcity of coal and the proximity of the holidays furnishing a double incentive to the sellers. The change in quality of stock coming in since the advent of wintry days is remarkable. Roses have improved greatly and already carry that crisp and sturdy bearing characteristic of mid-winter crops. The color, also, in Bridesmaids has been much enhanced by the favorable weather conditions. Carnations are plentiful and prices moderate.

Among the distinguished callers last week was D. B. Long, of Buffalo. Dan's card represents him to be a publisher, but

the gentleman is much more than that—he is an inventor. P. Welch's advice to him to keep on inventing until he has struck something with "millions in it" is being assiduously followed, it would seem. This time it is a line of useful "plant clothing" that he spreads before the eye of the prospective buyer. Another very welcome visitor was "Tom" Williams, foreman at John H. Taylor's place at Bayside, N. Y. Mr. Williams didn't stay long enough, arriving Saturday morning and departing Saturday night, which, considering this was his first introduction to the Club, was much too hasty an exit. He managed to take in the Waban Rose Conservatories, however, in his tour of inspection and was duly impressed with Mr. Montgomery's grafted roses. Paul Berkowitz is with us this week. He is sure to go away with a good book full of holiday orders, for Paul is popular in Boston. E. J. Harmon, of Portland, was a visitor on Monday, sizing up the Christmas prospects.

The new white carnation *The Queen*, which is about to be disseminated by the Little South Floral Company and S. J. Goddard, gives every evidence of its ability to fill the long-felt want for a thoroughly good commercial white. As seen growing at the Little South Floral Company's greenhouses, where there are 4,000 plants in the benches, it is a sight well worth inspection. In all the desirable points of size, build and fragrance of flower, length and strength of stem it is well equipped and the most notable feature is its rapidity of growth and profuseness of bloom as compared with other whites of good repute growing under identical conditions in the same houses. All the carnations at this place are in excellent shape but *The Queen* is decidedly in the lead. Having been grown for six years, its qualities have had time to become permanently fixed. The parentage is *Daybreak* crossed with a seedling from Scott and Nicholson.

Begonia Gloire de Lorraine will be the flowering plant par excellence again in this market for the holidays. Not only is it vastly superior to all other begonias in keeping qualities after its transference to the dwelling house, but as grown in this section, at least, it is the best in this respect in the whole line of plants usually grown for dwelling house blooming, giving a length of abundant and continuous inflorescence that nothing else can rival. If the experience elsewhere has been different the cause must be looked for otherwise than in the traits of the variety.

One of the special prizes which has not been competed for as it should be, at the Boston exhibitions, is that for plants and flowers of the various seedling chrysanthemums raised by the late H. A. Gane. It is very appropriate that the man who originated the peerless Mrs. Jerome Jones should have his work commemorated as was contemplated by his daughter, for whom this variety was named, when she donated the prize fund, and it is hoped that next year may see a full display of Mr. Gane's productions.

The annual exhibition of children's herbariums under the direction of the committee on school gardens was held at Horticultural Hall last week. As usual the exhibits were of a high order of merit and very interesting. Nearly 1,000 sheets of specimens of New England native plants were displayed.

MONONGAHELA, PA.—James A. Keeney is adding a vegetable forcing house to his equipment. The new structure will require 6,000 feet of glass.

Philadelphia.

BUSY WEEK FOLLOWS THE DAY OF THANKSGIVING.—GOOD STOCK IN DEMAND AND PRICES MOVE UPWARD.—ALL ABOUT SUPPLY.—THE CLUB MEETING.—NEW CHRYSANTHEMUMS.—VISITORS AND NOTES.

The past week has been the busiest of the season. There was the usual large demand for Thanksgiving day and again on Saturday the demand swept the market bare. The annual foot ball game between the Annapolis and West Point teams, which is played on Franklin Field, brings many visitors, people of note, from out of town, and the many dinners and other functions given in their honor, together with the flowers for the game, taxes our facilities to the utmost. Violets, particularly, were in favor and there were not near enough to go around. Prices advanced to \$1.25 per hundred. Beauties range higher, from 50 cents to \$1 per dozen being added to each grade. Teas are also higher, \$4 to \$10 per hundred, and the best grades very scarce at the price. Bridesmaids are now of good color and the specials can be offered without fear of criticism. Carnations are in good demand; in fact, where there was a glut two years ago there is now a scarcity and the sidewalk fakirs are getting 40 cents per dozen, which for the quality is a good store price. Chrysanthemums are about over. Golden Wedding was a great seller last Saturday; in fact, all choice flowers were quickly picked up at from \$2 to \$2.50 per dozen. Here is a pointer for the growers: Have a house of Golden Wedding for Thanksgiving week. Fred. Ehret has had some fine Mrs. Chadwick which have sold well at from \$2 to \$2.50 per dozen. Valley has sold well. S. S. Pennock handles the bulk of the stock in this market and has a large shipping trade.

The last club meeting was favored with "a review of the newer chrysanthemums," by Edwin Lonsdale, whose opportunities as secretary of the C. S. A. and in other respects, are exceptional for summing up the points of the various novelties introduced in recent years. John G. Esler, of Saddle River, N. J., was at the meeting and told us about the prosperity of the Hail Association and the increase of his local trade, which now enables him to dispense with the valued and ever to be esteemed aid of the commission man, as he now uses up all he grows at home. The feature of the January meeting will be a smoker, the details of which have been left in the hands of the house committee, with the entertainment committee added. Robert Craig & Sons exhibited a vase of their new carnation, *Adonis*, which was favorably reported on by the committee, and showed a distinct improvement in size and quality over the exhibit of a month ago.

The market is moving along nicely and is already a factor in the wholesale business. The offices are now about completed and additional telephones have been put in. If you have the Keystone system and desire to call the store, all is well, but to use the Bell telephone it takes a dime in the slot. In these days of competition it is a crime to pay it. Leo. Niessen is on the spot with greens of all kinds. Several growers now have their stalls decorated with foliage plants and others in flower. This feature, if kept up, will be a great convenience and eventually work up trade on the lines of the Covent Garden, of London.

Preparations for the holidays are now in order. The indications are that there will be plenty of holly and other Christ-

mas greens, and from the advance samples the quality will be about as usual.

K.

New York.

MARKET IN FAIR SHAPE AND PRICES WELL MAINTAINED.—VALUES ON EXCEPTIONAL MATERIAL FAR ABOVE A FAIR REPRESENTATION OF CONDITIONS.—CHRYSANTHEMUMS ARE PRACTICALLY OUT.—NOTES.

This week started out with a fairly active flower demand and only a moderate supply of really fine material. Prices have held up well to the Thanksgiving day scale and the views generally expressed by wise judges of the market are that it would be better in the long run to go slowly on any attempt to inflate values further until toward holiday time. The middle of December usually sees a discouraging slump, this feature having been a regular thing for a number of years past. It is hoped that by prudent nursing the very amicable relations existing between the public and the growers as to flower values at the present moment may not be disturbed and the outlet kept peaceably open. Some instances of seemingly high prices are on record for the past few days but in every case it is also recorded that these were for very exceptional grades of flowers. Violets are a good example of this, the limited highest grade of the top-notch grower being sold at from \$2.25 to \$2.50 per bunch of 100 blooms, while the general run of good violets scarcely brings half those figures and a very large proportion of the lower grades are well sold if they bring 50 cents a hundred. A limited number of choicest *Bride* and *Bridesmaid* roses were sold at Thanksgiving at \$12 to \$15 per hundred and *American Beauty* at 75 cents each, but these figures do not fairly represent the normal market values. Chrysanthemums are now narrowed down principally to Mrs. Jerome Jones and Major Bonnaffon and there are but few really good specimens of these. Ford Brothers show a good line of Bonnaffons every afternoon.

John Harrison has entered the ranks of the introducers once more and will present a new white carnation the coming spring, named *White House*.

Alex. S. McLennan, gardener on the estate of Bayard Cutting, at Oakdale, Long Island, died on Sunday, November 30.

M. A. Hart has sold out his wholesale cut flower business at 48 West Thirtieth street to James Purdy.

Visitors: J. T. Butterworth, South Framingham, Mass.; Ed. McMulkin, Boston.

DECATUR, ILL.—The thirteenth annual meeting of the Central Illinois Horticultural Society will be held here December 11-12.

DES MOINES, IA.—The thirty-seventh annual meeting of the Iowa State Horticultural Society will be held here December 9-12.

CHEROKEE, IA.—J. H. Palmer has built up a nice business. During the past summer he added several new houses to his facilities.

MARSHFIELD, WIS.—Robert I. Macklin is having a prosperous season and his stock, principally miscellaneous plants, is in fine condition.

IRON MOUNTAIN, MICH.—G. F. Flowman has installed a new boiler at the Sunnyside Greenhouses and contemplates adding largely to the plant next season.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.
Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

WHAT is the difference between Yellow
Chadwick and Eclipse chrysanthemums?

It is stated that the *Horticultural
Trade-Advertiser* has discontinued publi-
cation.

ONE of the first bills introduced in the
present session of congress provides for
the removal of the duty on window glass.

ADIANTUM FARLEYENSE is being success-
fully grown by James S. Wilson, at
Vaughan's Greenhouses, Western Springs,
Ill., in pots containing only fine coal
ashes.

ONE competent to judge in such matters
says that the holly wreath on the front
cover of the Christmas number of the
Ladies' Home Journal was worth at
least \$5,000 to the florists' business.

GEORGE HOPP, of Grand Rapids, Mich.,
is growing a new rose, claimed to be a
seedling of Bridesmaid and Mme. Caro-
line Testout. It shows very little of the
character of the former variety, but is
said to bloom more freely than either of
the foregoing.

THE retailers will serve not only their
own interests but those of the whole
trade if they will refrain from telling the
newspapers the not infrequent stories of
high prices on cut flowers for Christmas.
Instead let them expatiate on the excel-
lent qualities and popularity of the
medium-priced grades.

Chrysanthemum Society of America.

At the exhibition of the C. S. A. held
jointly with the Horticultural Society of
Chicago, November 11-15, 1902, the fol-
lowing varieties were exhibited:

Yellow Eaton, exhibited by the E. G.
Hill Company, Richmond, Ind., scored
89 points commercial scale. R. E. Rich-
ardson, by same exhibitor, pink, scored
92 points. Columbia, also by same
exhibitor, pink, scored 90 points.

Golden Chadwick, exhibited by
Vaughan's Seed Store, Chicago, Ill.,
scored 89 points.

Nathan Smith & Son, Adrian, Mich.,
exhibited the following; H. W. Buckbee,
yellow, which scored 92 points; Mrs. J. J.
Mitchell, cream color, scored 90; Minnie
Bailey, pink, scored 90.

The judges were Messrs. John F. Cowell
and Emil Buettner.

Chicago, November 22.—Jacob Schulz,
Louisville, Ky., exhibited a sport from
Merry Christmas, dull white, tips of
petals yellow, incurved, which scored 60
points commercial scale.

EDWIN LONSDALE, Sec'y.

Cut Flower Insurance.

The express companies are going into
the insurance business. The December
rate sheets contain the following new
classification:

CUT FLOWERS:—Double Merchandise rates.
When a release has been signed by regular ship-
pers, exempting the express company from all
loss or damage from freezing, their shipments of
cut flowers may be charged for at merchandise
rates. In effect December 10, 1902.

Of course, in mild weather, no one will
think of paying the double charge, but in
periods of extreme cold will it not be
cheap insurance?

Greenhouse Building.

Noroton, Conn.—J. Phelps Stokes,
house 60x125.

Monongahela, Pa.—Jas. A. Keeney,
vegetable house.

Lapeer, Mich.—W. H. Watson, house
22x200.

Seattle, Wash.—Woodland Park Floral
Company, range of houses.

Chicago, Ill.—George Reinberg, range
of 50,000 feet.

East Mansfield, Mass.—Duston & Sons,
vegetable house 20x100.

American Carnation Society.

The Chicago Carnation Company,
Joliet, Ill., registers the name *Fiancee* (no
description of the variety given).

W. N. Rudd, Mt. Greenwood, Ill., regis-
ters *Phyllis*, color Daybreak style, per-
haps a little more on the salmon and
even throughout; high built, fringed, fra-
grant, good stem and early and continu-
ous bloomer.

Dailedouze Bros., Flatbush, N. Y.,
register *Fragrance*, color a bright satin
pink, size medium, stem good and long,
calyx best we have yet seen, fragrance
full clove and very powerful; a good,
steady bloomer, strong and healthy; has
been shown as *Blush Seedling*, also as
No. 3.

John G. Sholl, Burlington, N. J., regis-
ters *Success*, color light pink, shade of La
France rose, without a trace of blue or
purple, strong and rapid in growth, pro-
ducing stiff-stemmed flowers of large
size; calyx never bursts; an early and
tremendous bloomer.

ALBERT M. HERR, Sec'y.

The Secret of Western Success.

ED. AM. FLORIST:—Comparing recent
notes on exhibitions given in eastern and
western cities, Kansas City, with its popu-
lation of only 200,000, may well feel
proud of its recent flower show. They
may call it a passing fad, nevertheless
this was the second successful attempt
and both have been record-breakers as
far as attendance was concerned, and
with a liberal amount of printers' ink
backed up by a flower show in a true
sense, the attendance next year will, I
believe, be even larger. The liberal and
broad minded policy of our Kansas City
papers is in the greatest measure
responsible for the success of the show.
Column after column of good reading
appeared in all our daily papers from six
weeks to two months previous to the
show and during the week of the show
a special man was detailed from each
paper to keep things hot. I venture to
say that the percentage of Kansas City's
population who are true lovers of flow-
ers equals, or is even greater than, that
of any other city of its size in this coun-
try. If this is not true why are our
shows so well patronized? It would

appear to me that those who write
their views and beliefs of our exhibition
would find conditions much different
were they to pen them from a more
advantageous point of view. Incident-
ally the show was not given for reve-
nue only, but mainly for the flower-
loving public, at the nominal admission
of 25 cents. W.

Sweet Pea Certificates.

I note S. B. Dicks' correction regard-
ing the above and much regret the error.
I am not on the committee, so of course
was not present when the varieties were
submitted, but I certainly had it on good
authority (or what I believed good) that
they did gain the awards mentioned in
my notes. And since reading Mr. Dicks'
correction I have referred to the Eng-
lish papers and find the same error has
occurred. With regard to Mr. Dicks'
further information respecting Dorothy
Eckford, he omits to state that this was
submitted to the committee under the
name of *White Queen* and that it was in
Messrs. Dobbies' collection but was after-
wards proved to be identical with Eck-
ford's variety. There was a good deal
of discussion regarding this variety, as it
had appeared among seedlings of Miss
Willmott in several different places. It
afterwards turned out that the seed had
been accidentally mixed by the raiser, by
which means several growers secured it
before the raiser was offering it. H.

Spiraea Aruncus Kneiffii.

This is a veritable gem for a cool,
moist, shady spot. In foliage it is quite
distinct from all other spiraeas and it is
very pleasing, with its finely-divided fern-
like leaves, which are surmounted by a
very dense, feathery mass of creamy
white flowers on stems some two or
three feet high and very much branched.

If planted in the open the foliage is
very apt to burn before the flowers
appear, the brown color detracting very
much from its beauty. Neither should it
be planted by strong surface rooting
trees or shrubs, such as maples, for two
years' experience has proved this course
detrimental. Its main requirements seem
to be a partially shaded position and a
good deep, rich, moist, open soil.

HERBERT GREENSMITH.

Acetylene Gas.

In a recent bulletin of the New Hamp-
shire Experiment Station, Prof. F. W.
Rane gives details of some experiments
with acetylene gas light in greenhouses,
showing its effect on plant growth, from
which the following deductions have
been made:

1. That the acetylene gas-light has a
marked effect upon greenhouse plants.
2. That no injurious effects resulted
from the use of the acetylene gas-light.
3. The light has a stimulating influ-
ence on most plants, and appears to be
beneficial to some plants that are grown
for foliage, such as lettuce. The lettuce
stood more erect and weighed more.
4. Most plants tend toward a taller
growth under the light.
5. It is doubtful whether this light can
be used in the greenhouse from an eco-
nomic standpoint for growing plants
alone. While its effect is marked in the
dark days of winter, little difference
seems to be shown at other seasons of
the year, when there is more sunshine.
6. There are many points about the

acetylene gas-light that make it desirable for lighting greenhouses. It is not expensive, is easily piped, and comparatively simple to run.

Detroit.

THANKSGIVING TRADE MEETS ALL EXPECTATIONS.—A LITTLE AHEAD OF LAST YEAR.—CARNATIONS THE ONLY PLENTIFUL ITEM.—CLUB HAS GOOD SESSION.—NEW RANGE PLANNED.

Thanksgiving trade was fully up to the expectations of the local dealers and in many cases surpassed that of a year ago. Purchases were confined almost exclusively to cut flowers for, although there was quite a stock of blooming plants, they met with rather slow sale. Roses were short in supply and the quality not up to the standard. Beauties sold well and the demand for them exceeded the supply. Violets were in good demand, but they, too, were short in supply. They wholesaled for \$1 and \$1.50 per hundred and retailed for \$2.50 and \$3, and at the latter figure most the stock was disposed of. Some apprehension was felt in the early part of the week about the supply of carnations but it developed that there were sufficient for the trade and it was with difficulty that the retail prices were maintained in proportion to the wholesale prices prevailing, which were \$3 and \$4 per hundred. Chrysanthemums were much in evidence and sold better than at any other period of their season. At present no special activity in retail circles is noted, but violets are still selling well and the supply is hardly equal to the demand.

The club meeting Wednesday evening was well attended and the proceedings full of interest. The question box furnished material for lively discussions. A vase of Enchantress carnation sent by J. D. Thompson, Joliet, Ill., was on exhibition. As many of the growers present have ordered largely of this variety, much interest centered upon it. A petition was circulated for signatures, to be forwarded to Washington, urging the removal of the tariff on glass, as proposed by the bill introduced in congress, December 1, by Representative H. C. Smith of this state. S. S. Skidelsky gave a review of the newer carnations as seen on his travels. At the next meeting consideration will be given to the matter of a flower show for next year.

G. H. Taepke has purchased two acres of land on McClelland avenue, near Gratiot, four miles from the City Hall and just inside the city limits. In the spring Mr. Taepke proposed to build a dwelling and several greenhouses and will grow only cut flowers, retaining his present houses on Elmwood avenue for pot plants.

John Carey, of Mt. Clemens, is again having trouble with his roses, resulting from the use of the mineral water of that place. He is now engaged in building cisterns to collect rain water.

Miss Anna J. Schulte was recently married to Wm. Schiffman. She will continue her business as previously.

Geo. A. Rackham is suffering from a painful injury resulting from the fall of a heavy valve on his head.

John Breitmeyer's Sons are doing some extensive decorations at Saginaw this week.

Wm. Dilger is on a business trip to Bay City and Saginaw. J. F. S.

DOYLESTOWN, PA.—Winfield J. Schmutz was married Thanksgiving day to Christiana Van Meran, of Camden, N. J.

Buffalo.

NO COMPLAINTS TO BE MADE AT THE STATE OF TRADE.—A BUSINESS CHANGE.—PERSONAL AND TRADE DOINGS.

Trade for Thanksgiving was about all that could be expected. Roses of good quality were scarce. Chrysanthemums held on until Thursday, when the quality took a big drop. Violets were plentiful, with only a moderate demand. Carnations were plentiful and good. Primrose plants sold well in single pots and pans. One store had a number of poinsettias, which sold well.

The store formerly conducted by W. A. Adams, and late by W. F. Bullock & Company, has again changed hands. It is now run by Thomas Coleman, window decorator for the H. A. Meldrum Company, who also is an adept at dinner table work. W. H. Grever is manager.

Palmer had the Goodyear wedding this week, which was quite an elaborate affair. In the decorations about twenty-five cases of wild smilax were used, also a big lot of the best flowers.

Mr. Schnell, the manager of Palmer's branch store, puts in some very neat windows and every vase shows to good advantage in the store.

Funeral work is rather quiet and only a limited number of receptions are scheduled for this week.

S. A. Anderson took a trip to Jamestown Monday. BISON.

EAU CLAIRE, WIS.—A. F. T. Lauritzen has been in business here but a brief period but he found trade so good that last summer he added largely to his glass. Business is good now.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED—By rose propagator; 24 years' practical experience. Winter grafting a specialty. Address PROPAGATOR, 415 South Main St., Los Angeles, Cal.

SITUATION WANTED—By boy 16 years old, with 1½ years' experience in floral business; willing to work out. L. BECKERS, 272 W. North Ave., Chicago.

SITUATION WANTED—As working foreman; roses, carnations, 'mums and general stock; married, no children; none but a first-class place wanted. Address WORKER, care American Florist, Chicago.

SITUATION WANTED—By 1st or middle of April, as working foreman in a large retail place, by a man of large experience, where full charge is given and results expected; can show you a few things. GERMAN, care Am. Florist.

SITUATION WANTED—As working manager, by a man of push and energy; grower of All Beauties, teas, carnations, 'mums, violets decorative and bedding plants. Only a first-class, large retail place where things are done right and good wages paid. B B, care Am. Florist.

WANTED TO RENT—Greenhouses of 20,000 to 25,000 feet of glass; wanted by early spring; no old stock wanted. Address P W, care American Florist.

WANTED—Good all-around cut flower grower, single, for a place near Kansas City. Good pay to the right party. Address GROWER, care American Florist.

WANTED—By young business man with a few hundred dollars, correspondence with prosperous florist who will sell working interest. Address H M J, P. O. Box 233, Erie, Pa.

WANTED—Single man, German preferred, with some experience in carnations and general bedding stock. References required. Salary \$25 per month, board and room. Jos. F. KLIMMER, Des-plaines Ave. and Harrison St., Oak Park, Ill.

WANTED—Thoroughly competent gardener and florist, of foreign descent, to manage on shares a fine ten acre garden, and use of 4,000 feet of glass. Trade well established. Best references required. Address P M A Fayetteville, N. Y.

WANTED—A good experienced man to work in retail department of a Western Seed House. Must be intelligent and have a thorough knowledge of garden and flower seeds, bulbs, etc. State salary expected. Address SEEDS, care American Florist.

WANTED—A man who understands the growing of 'mums, carnations and roses, and has a general knowledge of gardening; one with a small family preferred. The position is on a private estate, and the right man will have a permanent home and good pay. Address, giving references, F. P. DAVIS, Mobile, Ala.

WANTED—An active man of business ability, who is a first-class grower of roses, 'mums, carnations and general stock. Must be able to manage help and competent to run the business. To such a man with \$2,000 in cash a partnership is offered in long established and flourishing business in Philadelphia. Address CONFIDENTIAL, care American Florist.

WANTED—A married man without children, German-American preferred, to take charge of nursery where the growing of small stock for transplanting is made a specialty. Must understand the propagation of hardy shrubs and evergreens from cuttings, be sober, industrious and well recommended; \$50 per month and a house. A permanent position to the right party. Address Jos. W. VESTAL & SON, Little Rock, Ark.

FOR SALE—Horizontal tubular boiler 48x15 with plug hat dome and with 39 3/4-in. flues, very suitable for heating hot houses. Apply to WISCONSIN BOX CO., Wausau, Wis.

FOR SALE—An old established greenhouse business; entire plant rebuilt; steam heat. With all the ground or part; also with or without residence. Situated in Cleveland, O. A bargain. Address O K, care American Florist.

GREENHOUSE For Sale, also Residence Property. 1,100 feet of glass, hot water heater; good prosperous city, population 8,000; no opposition; good location for experienced man. Good reasons for selling. For full particulars, write E. GREENWOOD, LINTON, IND.

SITUATION WANTED

AS HEAD GARDENER, on private place, by a thorough, competent, reliable, all-around man of 22 years' experience on largest establishment in England, 9 years as head, last 3 years head gardener and rose grower to member of National Rose Society; age 36, married, two children. Copies of testimonials and references on request. Address F H, care American Florist.

WANTED.

A general gardener for private residence with small greenhouse, located in south western state. A married man with small family, or without, preferred. A good and lasting position for the right party. Address K O, care American Florist, Chicago.

Wanted, Devine or Kroeschell Boiler SECOND HAND.

Myers Bros. 116 So. 17th St. Philadelphia, Pa.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAOE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

JAPAN lilies, auratum, rubrum and album, are arriving later than usual.

ONION sets are requiring considerable overhauling, the mild weather increasing the liability to rot and sprouting.

T. W. WOOD, of Richmond, Va., has the sympathy of the seed trade in the loss of his wife, who died November 27.

VISITED CHICAGO: James McHutchison, of McHutchison & Company, New York; L. F. Jones, Grand Rapids, Mich.

CARTHAGE, MO.—Among recent visitors were Chas. P. Braslan and wife, San Jose, and John R. Horne, representing the Cox Seed Company, San Francisco, Cal.

ERNST SCHMIDT, founder of the firm of Haage & Schmidt, in Erfurt, Germany, died November 3 at Dresden and was buried at the former place November 8.

B. W. DULANEY, representing J. Chas. McCullough, Cincinnati, has returned from an extensive trip in western territory and reports very satisfactory business in grass and clover seeds.

THE holly situation is not in the best of shape, lack of cars, congestion of heavy traffic, rain in the cutting district and a scarcity of well berried stock combining to seriously affect the outlook.

RED WETHERSFIELD onion seed, reported short in September, has not advanced much in price, seedsmen who are moderately supplied evidently being disposed to wait rather than accept an advance in price now.

TUBEROSE bulbs are being dug and curing will be pushed along this month, foreign buyers being always in a hurry for early deliveries. Careful growers always insist on a fairly dry condition of the bulbs before barreling for export.

BERSEEM, the most valuable forage crop of the Nile Valley, is being tested by the Department of Agriculture with a view to its introduction as a fodder crop in this country. The plant is botanically known as Trifolium Alexandrinum and is also commonly called Alexandrian or Egyptian clover.

B. F. BROWN, of the Brown Bag-Filling Machine Company, who has charge of the papering of the seeds for the government seed distribution, reports seeds on hand for the southern and other early states, one section to be covered December 20 and one December 31. Later distributions will be made to northern states during January, February and March.

THE bouquet green outlook remains about as indicated in these columns November 29, but the holders are inclined to shade prices to some extent. The bulk of the surplus, which is considerable, is still in the north and is coming down slowly. Besides the reluctance of the holders to part with the stock at a loss, the railroads are very slow in supplying large cars and in moving the cars when they are loaded. The price for shipment December 8 to 10 is about \$35 per 1,000 pounds, with a possibility of lower prices later. There will hardly be time, of course, to make wreathing of the late stock.

We are in receipt of an advance copy of the report of Secretary James Wilson, Department of Agriculture, for 1902, in which we find the following with regard to congressional seed distribution: "With a view to making this work of more value to the country and encouraging the legitimate seed trade, plans have been inaugurated whereby the Department will gradually substitute new or little-known seeds, such as specialties or novelties, for the more common sorts heretofore distributed. Seedsmen are now co-operating with the Department in furnishing these specialties and novelties, and the Department will distribute them possibly only one year, dropping them then and allowing the demand, if demand there be, to be met by the regular trade."

Lowell, Mass.

BAD WEATHER CUTS DOWN THANKSGIVING TRADE.—LAST SEASON'S RECORD IS ECLIPSED NEVERTHELESS.—ALL ABOUT MARKET CONDITIONS.—PERSONAL NOTES. On Thanksgiving morning it rained furiously, putting a damper on trade. Although handicapped, as business was,

it went away ahead of last year. Stock was plentiful, with the exception of chrysanthemums, which are about done. Bonnafion was more popular than Eaton. Carnations took a jump in price, the fancies selling as high as \$6 per hundred. The retailers scrambled for Fairmaid. Roses were good, with the supply just about enough to meet the demand. Violets of good quality, both single and double, were to be had, but with such a demand for them the supply was soon exhausted. Many of them come from Comley's, at Lexington, and were excellent. The Princess of Wales are as fine as can be produced anywhere. Paper Whites have made their appearance.

Several well-grown pineapple plants, all fruited, seen in Patten's window, have attracted considerable attention. They were grown by Frank Sladen.

Mr. Campbell, of Manchester, N. H., was in town last Saturday, looking hale and hearty after several years' absence.

A. M.

CEDARHURST, N. Y.—The Lawrence Cedarhurst Horticultural Society cleared a net profit of \$350 on the recent show.

SEND FOR OUR
NOVEL, HANDY
ORDER SHEET.

OUR STRAIN is unequalled by any other in the market to-day; it is made by mixing the choicest California, German and French strains, and has produced superb plants wherever grown. The flowers of great size, with large eyes and vivid colors. We send the seed in separate colors—scarlet, white, pink or blue or with all these colors mixed. Price 50 cents per quarter ounce; \$1.50 per ounce.

The following testimonials of our Verbena Seed speak for themselves:

THE GEORGE H. MELLECO., of Springfield, Ohio, write under date of November 6, 1902: "Seed from you last November was fine and we want more just like it. This is for our own sowing."

THE MICHEL PLANT & BULB CO., of St. Louis, Mo., under date of November 5, 1902: "We purchased from you last year some Verbena seed, as follows: * * * It was satisfactory. If you have the same strain this year duplicate the order."

Carnation Bands.

Our Carnation Bands are the best in the market and prove an actual necessity to all growers of the Divine Flower. "A stitch in time saves nine." Get our Bands and slip them on now. 10,000 of these Bands for \$1.00; 7,000 for 75c; 4,500 for 50c; 2,000 for 25c; 1,000 for 15c.

J. C. SCHMIDT, BRISTOL, PA.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEABER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE Michigan Central Railroad will next spring plant sixty acres of catalpas for post and tie timber.

THE Eastern Nurseries, of Boston, have bought eighty-five acres of very desirable land at Holliston, Mass.

THE nurseries making a specialty of strawberry plants report an unusually large business with the south this fall.

THE horticultural authorities of the State of Washington are putting an embargo on nursery stock from certain firms in New York because of woolly aphids on recent shipments of apple trees.

AT Watonga, O. T., November 28 thieves dug up and removed stock to the value of \$500 which nursery agents had stored on a vacant tract awaiting delivery. Stark Brothers, of Louisiana, Mo., lost \$125 and the Star Nursery, of Ottawa, Kan., \$225.

THE ALBERTSON & HOBBS nursery at Bridgeport, Ind., is now under the management of the second generation and has grown out of all semblance to the original establishment, founded fifty years ago. A large packing and storage shed adds greatly to the facilities for the present season.

THE eighteenth annual meeting of the Northwest Iowa Horticultural Society will be held at Nora Springs, Floyd county, December 16-18, when the citizens of the town will provide free entertainment to all accredited members who may desire it. C. H. True, Edgewood, Ia., is secretary.

THE New York State Fruit Growers' Association will hold its annual meeting at Buffalo, January 7-8. It is expected the attendance will be 1,200 and there will be a large exhibition. The president of the association is Lucien T. Yoemans, of Walworth, and the secretary F. C. Dawley, of Fayetteville.

Springfield, Mass.

RETAILERS ALARMED AT THANKSGIVING BUT CLEAN OUT WELL.—TRADE GOOD IN ALL LINES.—LOCAL NOTES.

The weather for Thanksgiving was anything but favorable for business and with a large stock on hand it looked as though the store men would be at a great loss. However, I find almost everything was sold, except a few large chrysanthemums that later did good service for window decorations, making a last farewell for this season. We are glad to see them come and also to see them go. Roses, carnations, lily of the valley, violets and cut orchids were in good demand. In pot plants poinsettias, cyclamens, primulas and Begonia Gloire de Lorraine sold well. Now we are ready for the Christmas rush and, from reports, stock will be in good shape and about right.

C. F. Fairfield made a nice display of plants, cut chrysanthemums and carnations and reports the Thanksgiving business good.

H. Merrick, formerly with Hodgson, of New York, has taken a position with Mark Aitken.

Wm. Schlatter & Son handled a nice clean lot of pot plants. A. B.

St. Louis.

THANKSGIVING TRADE HEAVY.—A QUIET PERIOD FOLLOWS.—STOCK EQUAL TO ALL DEMANDS.—PRICES REMAIN FIRM.—VARIOUS LOCAL NOTES.

The Thanksgiving trade was of the best and every section of the city reports good business for that day, but since then demands have fallen off considerably, although stock is very good. The first killing frost was experienced just before Thanksgiving. Receipts are light, but owing to the light demand there is considerable stock to be seen on hand in the wholesale houses. The prices received are up to the standard, however.

Will Sanders, formerly with H. G. Berning, has returned from a trip in the country, near Cuba, Mo., where he found good hunting and fishing. He is thinking of going into the retail business.

Frank M. Ellis reports that this is his best year, his Thanksgiving receipts being just double last year's.

No carnations excel the Guardian Angel that Fred. Anmann, of Edwardsville, is sending in. R. J. M.

Denver.

BUSINESS BRISK AT THANKSGIVING.—ALL STOCK SOLD OUT.—HIGH PRICES A BAR TO SOME ITEMS.—PROSPECTS GOOD.

Thanksgiving day trade was good. Tuesday and Wednesday were busy days, handling the out of town trade, while the city trade Thursday morning was better than ever. Stock ran short, with the exception of chrysanthemums, of which some of the best of the season were offered. The best sold at \$4 per dozen, while a few Eatons brought \$5. Beau-

ties were scarce and sold readily at prices ranging from \$3 to \$8 per dozen. Good teas and Liberties sold generally at \$1.50 to \$2, with the best Liberties at \$3 per dozen. The supply of carnation was not equal to the demand and Thursday morning found them very scarce, selling at 75 cents and \$1 per dozen. Violets were in fair supply; in fact, the price put on them made the supply equal to the demand, for \$3 per hundred at this season is too high for brisk business. Paper Whites and Romans were plentiful but went rather slow. A few good cyclamens and Gloire de Lorraine were brought in and took well. This week stock is scarce, particularly roses and carnations, and business is good, with things looking bright between now and Christmas.

B.

BARNARD'S CROSSING, N. Y.—E. H. Ruestow & Company have used hydrocyanic acid gas for aphides on carnations, chrysanthemums and a general line of bedding plants with pronounced success.

CLEVELAND, O.—Hester A. Getz, for eight years in business at Columbus, has formed a partnership with Anna L. Westman and Westman & Getz will open a first-class retail store at 502 Euclid avenue.

GLENWOOD, MICH.—The venerable father of E. H. Hitchcock, the dealer in greens, was accidentally killed, on November 25, by falling from a train at Dowagiac while enroute home from his birth place at Hatfield, Mass., where he had not been for thirty years. He was in his seventy-second year and was highly esteemed in the community.

Almost half a century of fair dealing has given our products that prominence which merit deserves. We still offer everything of the best for

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At Philadelphia.

November has been a busy month on the Florists' Club alleys. Every afternoon and evening, with few exceptions, has witnessed keen contests improvised between whoever happened to be around, and several matches with outside clubs have also been run off. Captain Moss is rolling in good form at present and has hopes that his team will land in first place in the City League contest, which comprises some six or eight of the strongest clubs in the city. The averages for November are as follows:

Moss	168	Connor	147
Westcott	158	Craig, G.	146
Watson	157	Polites	140
Harris	155	Falek	139
Yates	153	Gibson	138
Adelberger	153	Anderson	133
Starkey	149	Dunlap	127
Kift	148	Baxter	113

Among the associate members Hamilton leads with an average of 185, with Dunham and Moore close seconds. The last contest in the City League took place December 4, on the home alleys, against the Alexis Club.

At Chicago.

The following is the record of the play in the Chicago Florists' Bowling League on Tuesday evening, December 2:

WEATHER UNFAVORABLE FOR LOCAL CUT FLOWER TRADE.—ROSES ARE ACCUMULATING.—A GOOD DECORATION.—VARIOUS NOTES.

The dark, dreary weather of the past week has put a damper on business. It is pretty hard to move flowers when we have snow, sleet and rain and the wholesale houses have to depend upon their shipping trade to get rid of stock. Carnations, however, are scarce, also violets and Beauty roses. There is a nice lot of teas coming in, which are accumulating

in the ice boxes. Some very good chrysanthemums are still to be seen. George & Allan are sending some very good lily of the valley and Harris lilies, which sell at \$4 and \$15 respectively.

Frank W. Ball & Company had a very handsome table decoration at the Queen City Club last Tuesday, using Beauty and Golden Gate roses and lily of the valley. It was a very pretty combination. They have a very pretty window this week, draped with winter berries and a large vase of Timothy Eaton in the center.

Albert McCullough is spending his vacation off the coast of Florida. He states in his letter the fishing is excellent, and proposes to stay a whole month, returning about December 15.

Louis Kyrk, who started in the wholesale commission business a few weeks ago, reports everything going along smoothly and is very well satisfied with business to date.

Wm. Murphy states that on Murphy's White carnation cuttings, he has orders for 60,000 for January delivery.

James Allan, who has been visiting his parents near Boston, has returned.

J. A. Peterson is on the sick list. D.

Minneapolis.

STOCK NOT IN ABUNDANT SUPPLY.—GOOD VALUES LIKELY TO BE MAINTAINED.—LOCAL NOTES.

Thanksgiving did not show the scarcity of flowers that was expected, as large numbers of chrysanthemums were held back, and about the same with carnations. The only shortage was in tea roses, Beauties and violets. The prices on carnations ranged from \$2.50 to \$3.50 per hundred, on tea roses from \$5 to \$8 per hundred, while Beauties sold at not less than \$1.50 per dozen, wholesale. Violets were wanted at \$1.50 per hundred. From the outlook there will not be much of a decline in the value of flowers for a few days unless supply increases considerably. From orders booked for wild smilax, there will be some fair-sized decorations this month.

Northrup, King & Company's new flower store is about completed and is a beauty, about the finest in the city as well as one of the finest in the northwest. John Degnan, formerly of Chicago, is in charge.

Thieves broke into the greenhouses of R. G. Mendenhall, at Minnehaha Park and some very choice blooms of chrysanthemums were taken.

A. S. Rice, of Rice Brothers, has returned from Delaware, where he inspected the loading of two cars of holly. C. F. R.

Montreal.

WEATHER AFFECTS THE ROSE CROP.—CARNATIONS PLENTIFUL.—A GOOD SEEDLING.—PERSONAL AND TRADE DOINGS OF VARYING INTEREST.

For the last few weeks the weather has been very cloudy but also wonderfully mild. Trade has been booming but it fell off for awhile just before Thanksgiving. Chrysanthemums, not mentioning the white ones, are very plentiful and prices keeping firm, the best bringing from \$7 to \$10 a hundred. Pennsylvania and Golden Wedding are still the leading yellow here. Roses are scarce, but carnations are plentiful and fill in when roses are wanted. A new carnation seedling is of the same shade, but a stronger grower and larger flower than its parent, Roosevelt. It originated with Walter Wilshire, manager of C. Campbell's place.

P. McKenna & Son's carnations are in the pink of condition. They are cutting some fine bouvardia and some grand smilax.

S. S. Bain is offering the first lilies of the valley and Romans in this city. He had the decorations for the St. Andrew's ball.

E. Bourbonniere has opened a second store on Notre Dame street, west. He is doing plenty of funeral work.

C. A. Smith, of Lachine, was the exhibitor of the good chrysanthemums shown at our last meeting.

The Lachine Horticultural Society has decided to hold its annual dinner on December 13.

Logan Girdwood is showing some nice orchids and very good violets. G. V.

Lapeer, Mich.

W. H. Watson is developing a big plant with great rapidity; he had only neared the completion of four new houses when he started on another, this one 22x200, and ordered a new steam boiler. He is making a specialty of carnations and has upwards of 35,000 plants on the benches, all the latest and most popular varieties, and looking as well as the stock of many widely celebrated growers. He is beginning to propagate, for the rooted cutting business has grown to be a large item with him and he proposes to push it harder than ever this season.

PAXTON, ILL.—Andrew Peterson is building up a nice business in mailing plants.

GOOD BUSINESS FOR THANKSGIVING.—CUT FLOWERS ALL SELL WELL.—A VARIETY OF NEWSY NOTES.

The weather here for the last two weeks has not been very favorable to the growers, having been wet and cloudy most of the time, but Thanksgiving day came out clear and warm and brought a big demand for cut flowers. The supply being far short, almost everything was cleaned out, and most of the stores closed early. Chrysanthemums were in demand and brought good prices, ranging from \$3 to \$5 a dozen. Carnations were scarce and fairly good. Roses were a luxury, with not a violet to be had. There were a few Paper White narcissi which sold readily at 75 cents a dozen. Pot plants were not much in demand, the only thing that sold in that line being cyclamens, fairly good plants selling at \$1 each.

Malmö & Company had a very fine lot of Mrs. Jerome Jones and Yellow Jones chrysanthemums for Thanksgiving. Their new place, at Broadway and Pike, is attracting much attention for its convenience and the health of the stock.

John Holze has his new place at Thirteenth and Madison in good running order. He has a fine lot of carnations and his show house is in excellent shape, his kentias being especially good.

A. L. Aabling, late of Everett, has bought out the Evergreen Floral Company, at 912 Second avenue, and is building up a good business. He will build a large addition next summer.

The Woodland Park Floral Company has taken in another partner, Gus. Berkman, and has started to build a new range of greenhouses, having taken out a permit for \$10,000.

Fred. Smith, of Tacoma, was a visitor in town last week. He put up a range of glass last summer and reports business good. J. C. R.

BIRMINGHAM, ALA.—James H. Stevens has opened a cut flower business at the store of Fox Sons & Smith Company, Fourth avenue and Nineteenth street.

The Longest Stemmed and Most Fragrant Carnation in Existence

Stems measure from 3 feet 6 inches to 4 feet. Flowers are of a beautiful pink shade, similar to a well colored Bridesmaid rose and average 3 to 3½ INCHES. Continuous bloomer when once started and calyx cover bursts. Will be distributed the coming spring. Prices—\$2 per 12; \$10 per 100; \$75 per 1000; \$500 per 10,000. Orders booked for FEBRUARY delivery from now on.

FICK & FABER, SAN MATEO, CAL.

SEEDLING CARNATION, President MCKINLEY.

Winner of the \$100 prize at Kansas City Flower Show in 1901 and 1st on vase of 100 dark pink at Kansas City in 1902. This is what Edwin A. Kanst, one of the awarding judges, said of it: "President McKinley is a splendid flower, the petals are perfect and it is well built. The color is deeper and brighter than the Lawson, and the coloring is more distinct. The peculiar purplish tinge in the Lawson is absent from the President McKinley. It will become a favorite carnation."

This variety, like its parent, Dorothy, is wonderfully free, also very early and an excellent keeper and shipper. Rooted cuttings ready Jan. 1, 1903. Price, \$2 per doz; \$12.00 per 100; \$100 per 1000.

EARLY STRUCK CUTTINGS of all the leading varieties of Carnations; also Chrysanthemums and Roses. We guarantee our stock to be satisfactory. Write for price list.

E. T. GRAVE, Richmond, Ind.

GOV. LOWNDES.

- COLOR, pure white.
- SIZE, 3 to 3½ inches in diameter.
- CALYX, spreading at the top, making it practically non-bursting.
- FORM, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated, and beautifully arranged, forming a full, rounded center.
- ODOR, is very sweet and particularly pleasing.
- STEM, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect.
- HABIT, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties.
- PRODUCTIVENESS, extremely free flowering. More productive than any other large white. A profitable and high grade commercial variety.
- PRICE, \$2.50 per doz; \$12 per 100; \$100 per 1000. 50 at 100 rate; 500 at 1000 rates.

Providence, R. I.

BAD WEATHER KEEPS THANKSGIVING DOWN TO THE LEVEL OF A GOOD SATURDAY.—ALL ABOUT STOCK AND THE PRICES.

The consensus of opinion seems to hold Thanksgiving trade in the light of a good Saturday's business, yet it has seemed that this holiday grows steadily in importance and, properly coached by the florists, is destined to become a business-bringer. This year we had the misfortune of rainy weather beginning the Saturday previous and including the following Wednesday, thereby considerably damaging the chance of Thanksgiving becoming a record breaker. The next day was cold and misty and brought out small numbers. Needless to comment on the general disconsolation among the trade. But everyone reports a good sale, comparatively, and this is gratifying. Stock was scarce, excepting chrysanthemums. These flowers were in abundance at from \$1 to \$2 per dozen, wholesale, one retailer alone stocking up with 3,000 blossoms, which brought from 10 cents to 30 cents each, although the general call was for flowers at from \$1.50 to \$2 per dozen retail. The Appletons were mostly soft. The Eaton, Jones, Murdock and Maud Adams were in the majority. Carnations were in fine wholesale demand at \$1.50 and \$2 per hundred, but were short crop, and this condition still prevails. Violets brought 75 cents per hundred and sold well. Roses were exceptionally scarce, with but a moderate demand. They brought \$3 to \$5 for fair stock. M. M.

WASHINGTON, IA.—E. C. Keck has just completed three new houses, 7,000 feet of glass, and an office within one block of the center of town, where his retail business will be handled. He has also bought eight acres of land at the edge of town and put up 10,000 feet of glass there for wholesale trade. In the spring he will move his old range of 15,000 feet to the new location. He proposes to handle a line of seeds the coming season.

STOCK Chrysanthemum plants, strong and healthy, full of young growth, of the following varieties: Fitzzygram, white and pink Glory of Pacific, Monrovia and Robt. First-class balls, 5 inches in diameter..... 2.00 per doz.; 15.00 per 100

HENRY A. DREER, 714 Chestnut Street, PHILADELPHIA, PA.

Worcester, Mass.

THIS CITY SHARES THE GENERAL INCLEMENCY OF WEATHER FOR THANKSGIVING.—BUSINESS FAIRLY SATISFACTORY.

Thanksgiving is again a thing of the past, and though the increase in the amount of business over that of last year was not great, it was satisfactory, taking everything into consideration. The inclemency of the weather had a detrimental effect on business. Wednesday and Thursday were very disagreeable days and hurt the transient trade very much. Flowers, as a rule, were plentiful. Bridesmaids of the better grades were short and we could have handled more Liberty. Chrysanthemums cleaned up by Thursday noon and make good prices. Yellow shortened up by Wednesday night and was the color most in demand. Pink moved slower than white, bronze or red varieties. Carnations were in fair supply and cleaned up by Thursday noon at fair prices, Lawson being most in demand. Violets were plentiful and cleaned up well Wednesday, but Thursday's supply moved very slowly. There was very little call for plants, although good cyclamens, oranges, ferneries, and so forth were displayed in many of the stores. Thanksgiving might be called the cut flower day of the year.

An unusual rush of funeral work this week has shortened up flowers in all lines, and at this writing stock is very scarce, with the probability of remaining so for some time. Although we have had a slight fall of snow, the weather remains very warm. A. H. L.

Columbus, O.

WEATHER TAKES A FAVORABLE TURN.—TRADE AND STOCK BOTH IMPROVED BY FROST.

We are now having the first cold weather of the season. Every grower is glad to see a stiff frost, for it improves business and stock. Thanksgiving trade was largely affected by rain. While some of the craftsmen report business as good as usual, it is generally claimed that the demand was cut short. While chrysanthemums are now about cleaned up, there was a good supply on hand for the Thanksgiving trade and there was a good demand for them. Narcissi are now making their appearance and are selling well. CARL.

Cyclamens IN BUD and BLOOM.....

See what others say of my Cyclamens: "The Cyclamens came through in splendid condition, in fact better than any I have ever received. Very respectfully, Mrs. EDGAR HALL, Austin, Texas." Five days on the road and in splendid condition: so is all my other stock. X 4-in., \$10 and \$12 per 100; 5-in., \$18 and \$25.

PRIMROSES, in bud and bloom, 4-in., \$8.
CINERARIAS, frame grown, fine stock, 3-in., \$5.
Field-Grown ASPARAGUS SPRENGERI, \$3, \$5 and \$7 per 100. CHRIST WINTERICH, Defiance, O.

Ficus Elastica 4 and 5-in. Pots,

Latania Borbonica and Kentias 3 and 4-in. pots

I have a fine stock of the above which is offered to the trade at a bargain. If you have room a large profit can be made on these plants in a short time. Write for prices; they are too low to quote here. W. W. COLES, KOKOMO, IND.

Prepare Now

FOR CHRISTMAS SALES. You will find the following stock a good investment and just as represented. It is in need of a shift, and being short of room, we must sell at reduced prices.

ASPARAGUS SPRENGERI, extra strong field-grown, stored in frames. Has not been frosted. These plants are making new top and root growth. If potted now will be fine for Christmas. Plants large enough for 4-inch and 5-inch pots or pans. \$3.00 and \$5.00 per 100 respectively.

ADIANTUM CAPILLUS VENERIS, the best for fern dishes. Bushy 2 1/2-inch pot plants, \$3.00 per 100.

CHINESE PRIMROSES, select strain. Reading Scarlet, best of its color. Light Rose Pink, no trace of magenta. Large plants from 3-inch pots, in bud and some bloom, \$4.00 per 10.

CINERARIA STELLATA, good for pot displays or cutting. Extra strong, from 3-inch pots, \$1.00 per 100.

CYPERUS ALTERNIFOLIUS, large 3-inch stock, \$3.00 per 100.

JUSTICIA, flowers in loose panicles from December to March. Color, dark pink, almost purple. Of easy culture, adapting itself to varying conditions. Its lasting quality and freedom of bloom make it desirable for all kinds of decorating. Bushy, well formed plants in bud and bloom, from 7-inch pans, 30¢ each; \$3.00 per doz.

GERANIUMS. The following standard varieties are from fall struck cuttings: S. A. Nutt Marvel, Sam Sloan, from 2 1/2-inch pots, \$2.50 per 10. Jean Viaud, Mme. Landry, Dryden, Little Pink, from 2 1/2-inch pots, \$3.00 per 100.

NATHAN SMITH & SON, Adrian, Mich.

\$2.50 PER 1000. This offer good two weeks only to make room. Bargain.

GIANT PANSIES, fine stocky plants, in varieties equal to any.

REG BEXONIAS, 15 varieties, fine, 2-inch, \$3.50 per hundred.

DOUBLE DAISIES Snowball, Giant, Longfellow. Satisfaction Guaranteed. Cash.

LAST MONTH'S BUSINESS AFFORDS NO CAUSE FOR COMPLAINT.—ROSES SHORT BUT CARNATIONS PLENTIFUL.—NOTES.

November business was good enough to make all rejoice and unusual activity in all branches of the trade is using up available stock. Everyone is clamoring for roses, but unfavorable weather has kept down the supply of choice blooms. Meteor and Liberty are decidedly short and, with Beauties, the outlook for a crop for the holidays is not very bright. Carnations are very plentiful, of very high grade and an elegant supply is promised. Violets have shortened up considerably and prices vary in consequence.

Manton Brothers have been handling some very fine conifers this season. This city has only awakened to the beauty of these hardy specimens.

Grobba & Wandrey have been bringing in some very good poinsettias, which find ready sale. Their azaleas are the first of the season.

Jno. H. Dunlop has some Gloire de Lorraine begonias in full bloom.

H. G. D.

Albany, N. Y.

QUIET BUSINESS BEFORE THE STORM OF HOLIDAY ORDERS.—STOCK SCARCE.—FLORIST FINDS NURSERY STOCK PROFITABLE.

Dealers report a considerable falling off in business during the past two weeks, due in a large measure to the dark weather, which has made stock scarce. The orders received are mostly for minor decorations and small weddings. The trade is waiting for the holidays and the opening of the state legislature the first week in January.

Louis Menand, at Cemetery Station, reports that his sales of nursery stock this fall have gone far beyond his expectations. The demand was for evergreens, and hardy trees and shrubs. As a result of the season's sales, Mr. Menand will go more extensively into nursery stock in the future.

R. D.

Plants FOR THE Holidays

ARAUCARIA EXCELSA. We have the largest stock in the country. May importation, raised from top cuttings only. 5 1/2 to 6-inch pot plants, from 20, 22, 23, 24 and up to 26 inches high, 3, 4 and 5 tiers, 70c, 75c, 80c, 90c and \$1 each. Our specimens are perfect beauties, as broad as they are high. 6-inch pots, 5 to 6 tiers, very large, prices very low, for we must move them to make room for Easter plants, \$1, \$1.25, \$1.50 to \$1.75 each.

A BIG MISTAKE you make if you try another firm, because we are specialists and are large importers and carry strictly the largest and cheapest stock of Araucaria Excelsa.

AZALEAS for Christmas, in bud and bloom, are showing color now and will be right for Christmas. Only large, healthy plants, which will force successfully, no small ones. Vervaneana, Simon Mardner, double pink; Deutsche Perle, double white. 60c, 75c and \$1 each.

KENTIA BELMOREANA and **FORSTERIANA**, 6-inch pots, first-class stock only, 3 to 4 years old, from 25 to 36 inches high, only 75c to \$1 each.

FICUS ELASTICA, 6-inch pots, \$3, \$4 and \$5 per dozen; specimens 36 inches high, \$6 per dozen.

CHINESE PRIMROSES, very bushy, in bloom and bud, only \$1.80 per dozen; 1-inch, also large and bushy, at the rate of \$5 per 100.

CALLA LILIES, 6-inch pots, 25 inches high, 20c; **DRACAENA BRUANTI**, 25 inches high, green and full of leaves from top to bottom, \$5 per dozen.

BEGONIAS in variety, 6-inch pots, \$3 per dozen; 1-inch pots, \$1.20 per dozen.

Cash with order please. To save express mention if pots to be taken off.

ESTABLISHED 1841.

The GARDENERS' CHRONICLE has been FOR OVER SIXTY YEARS THE LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$4 20 per year. Remittances to be made payable to H. G. COVE. OFFICE:—

41 Wellington St., Covent Garden, London, England.

THE NICKEL PLATE ROAD

will afford its patrons an opportunity to take advantage of low rates for Christmas and New Year holidays, by selling tickets at a fare and a third for the round trip to all points on their line, December 24, 25, 31, 1902, and January 1, 1903. Return limit including January 2nd, 1903. Through service to New York City, Boston and other eastern points. Chicago passenger station, Harrison St. and 5th Ave. For further information, address John Y. Calahan, General Agent, 113 Adams St., Chicago. 66

Washington.

SOCIAL SEASON BEGINS WITH THE CONVENING OF CONGRESS.—TRADE NOW ACTIVE AND PROSPECTS BRIGHT.—A DEATH.—OTHER NOTES.

J. Louis Loose had the decoration for the Swayse-Edwards wedding. The drawing rooms were beautiful with chrysanthemums so arranged as to harmonize with the permanent decorations of the rooms. American Beauties were used in the dining room.

Trade has taken a turn for the better. Since Thanksgiving day it has been very good and stock seems to be equal to the demand. With the convening of congress and the return of most of the entertainers the florists find their hands full.

Mrs. C. Strauss, for a number of years in the florist business, but who retired some time ago and was succeeded by the American Rose Company, died November 29, at her residence on the Bladensburg road.

J. H. Small & Sons and A. Gude & Brother each sent several wagon loads of floral designs to members of congress on the opening day.

At Richard R. Townsend's funeral there were a large number of beautiful designs, the bulk of which were furnished by J. H. Small & Sons.

John Shine has returned to Washington, and is now with George C. Shaffer, who reports a good Thanksgiving business. P. G.

Newport, R. I.

The floral display at the funeral of George Pierce, a well-known railway official, was never equalled in this city. It required one car to transfer the various pieces, fifty-nine in number, to Chelsea.

Axel Magnuson has accepted the position of gardener to George M. Black, at Manchester-by-the-Sea, while Thomas Kirlichen, formerly with Mrs. Coleman, is now gardener for Mrs. J. Amory Codman, in this city.

Hard coal holds at \$9 per ton but the weather is mild. C. J. M.

WARREN, PA.—B. Scheller has just completed another house 16x60 for bedding plants.

 Dec. 11th, 1901.
MR. THERON N. PARKER,
 Brooklyn, N. Y.
 Dear Sir — I have used
 your Wire Carnation Sup-
 port the last two years. In
 all about 12,000. They fill
 the bill in every particular.
 Nothing could be more
 satisfactory and would
 give me a great deal of
 pleasure if I can bespeak a
 good word for you to the
 trade and you are at liberty
 to refer to me at any
 time.
 Very truly,
A. L. THORNE,
 La Fayette, Ind.,
 July 8th, 1902.
MR. THERON N. PARKER,
 Harrison, N. J.
 Dear Sir: — After using
 your Model Carnation Sup-
 port in two of our houses
 the past winter, we have
 come to the conclusion that
 it is perfectly adapted to
 supporting carnations, and
 shall use them on all our
 plants the coming season.
 We were much pleased
 with the simplicity,
 strength and neat appear-
 ance of the support
 Yours truly

New Bedford, Mass.

GOOD PRIVATE RANGES IN NEARBY TOWN.— A STIMULANT TO TRADE.— FUNERAL WORK PLENTIFUL.

About a mile from New Bedford, across the Acushnet river, lies the town of Fairhaven. This cuts some figure floriculturally, from the fact of there being two private greenhouse establishments there that are of much interest to the flower loving public. The one belonging to W. P. Winsor is presided over by Peter Murray, a young Scotchman, who has the faculty of growing things a little better than the rest of us about here. They have the only house of orchids in this part of the state. Along in March, when the houses are the best, they are thrown open to the public and crowds of people visit them. This is a benefit to the commercial growers for it stimulates the demand for fine plants and flowers. The other place is that of Henry H. Rodgers, of the Standard Oil Company, whose birthplace and summer residence are in Fairhaven. His greenhouses are also presided over by a Scotchman, Mr. Garthley, who also has the happy faculty of making plants grow to perfection. If anybody can make figs grow on thistles, it must be a Scotchman. Mr. Rodgers is now building several new houses and will have a fine range when they are completed.

Owing to a dismal rainstorm, Thanksgiving trade was not so good as last year. Some of the retailers had a good many flowers left over, especially carnations. There was a special demand for yellow chrysanthemums for golden weddings. The local growers had sold about all their stock before Thanksgiving, so everybody had to send out of town for supplies.

Carnations are blooming quite freely just now, especially Lawson and Scott. Cressbrook is not doing anything so far. Jahn's White is a beauty, large flowers and an early bloomer. A. B. H.

SPRINGFIELD, ILL.—A. C. Brown is preparing for a large holiday business in holly and green. Cut flower and plant trade promises to be very active before Christmas. Chrysanthemums are all gone and carnations are in excellent demand at good prices. A. C. Canfield's roses and carnations are doing finely and he finds a good market for them in St. Louis.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:
100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in.

75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

CROP INSURANCE.
 Life insurance is valuable because it guarantees the outcome.
"Gurney" Heaters
 "BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

Notes and Comments.

In "Random Reflections" made in New York, exception is taken to some of the "Notes and Comments" which appeared in a recent issue of the AMERICAN FLORIST, and in connection therewith, from an entirely different quarter, I am advised and assured that the stand made by "E. L." is all right, and to substantiate same he is reminded that the method adopted by those in authority and who had charge of the Plant Breeding Conference, held last fall in the city of New York, is along the lines advocated, for those wise men did not scatter that valuable information broadcast, showing distinctly that some other people have the same opinion that I have. I have frequently noticed that wise people think the way I do. Whether all the papers prepared for that conference are obtainable or not, I do not know. I hope they may be. It frequently happens when anything of value is secured easily, or at too low a cost, it is not so fully appreciated as when it is valued more nearly according to its intrinsic worth.

No one could object now to paying \$1 to become a member of the Chrysanthemum Society of America and to be entitled to all those valuable papers prepared for the meeting held at Chicago when printed and put into pamphlet form, including the discussions which followed the reading of the papers. At the present time there is encouragement to solicit membership dues because there is something to offer in exchange for the dollar requested. Until the present time nothing but sentiment and altruism was our stock in trade—nothing more tangible to offer for the membership fee—and the evidence of the beneficent work done by the novelty committees.

The C. S. A. was not self-supporting from the membership dues alone and not until 1894 was it so, when the society adopted the system now in operation of inviting the exhibition of novelties, charging an entrance fee of \$2 for each chrysanthemum seedling, sport or imported variety examined by each committee. It has now accumulated a snug little sum which is in the treasury.

It perhaps would be better, as suggested by your New York contemporary, for the secretary of a society to review the papers prepared to be read before a given society, national or otherwise, because he would be more likely to be in closer touch with the subjects treated than the editor and it would be far less trouble for the editor. I cheerfully

accept the amendment. Such indications are an evidence, I take it, that the New Yorkers are beginning to think the same way I do, consequently there is hope that everything may yet be all right. Let's hope so.

A year or two ago a very prominent grower of roses made a statement somewhat to this effect, that the retail florists were to blame for the paucity of varieties of roses offered over the counter for sale to the public, for they would not buy, or bought reluctantly, any but American Beauty, Bride and Bridesmaid.

In conversation recently with A. B. Cartledge, one of the firm of Pennock Brothers, Philadelphia, he denied that the dealer was to blame. To prove his statement he pointed to the supply they carried, which consisted of American Beauty, American Belle, Queen of Edgely, Liberty, Meteor, Bride, Bridesmaid, Ivory, Golden Gate, Sunrise, Mme. de Watteville, La France, Becker's Ideal, Safrano, Isabella Sprunt and Bon Silene. I forget whether Perle des Jardins or Sunset were among them or not. Neither Perle nor Sunset are grown to any great extent about Philadelphia. What has become of Mme. Rene Gerard which figured so prominently a year or two ago for a "bud's" or debutant's bouquet?

In conversation with Eugene Dailedouze a short time ago he stated that his firm, Dailedouze Brothers, has abandoned the idea of disseminating the seedling carnation exhibited by them at Philadelphia before the Pennsylvania Horticultural Society in November, 1901, and which won the Craig cup for the best seedling carnation not yet disseminated, because said variety has developed some very bad traits since that time which entirely precludes the idea of sending it broadcast over the land. In that case, what should become of the cup? Should it not be put up for competition again to be awarded to a variety that would prove good enough to be disseminated? Submitted without comment.

In the annual report of the National Chrysanthemum Society of Great Britain for 1892, there are two "papers" published therein on chrysanthemum sports, one by the Rev. Prof. G. Henslow and the other by Norman Davis, and I feel sure the readers of the AMERICAN FLORIST will be glad to welcome the facts therein contained, thereby adding valuable information to the chrysanthemum literature of America, to-wit:

"Chrysanthemum sports may be grouped under the two heads of color

and form. First, with regard to colors. Botanists are pretty well agreed in their belief that yellow was the primitive color of true flowers which were first evolved in the missing links between gymnosperms, i. e., firs and their allies, and angiosperms, which include all other flowering plants. When, therefore, a colored or white chrysanthemum sports to yellow, which is frequently the case, it may be regarded as a reversion to the typical or original color indicated by the name chrysanthemum, or golden-flower. Hence it is not surprising to find such reversions to be common; but Mr. Davis remarks that a yellow never sports to white."

We do know that the white Timothy Eaton has sported to yellow in more than one place, so also W. H. Chadwick has likewise been guilty of sporting to yellow, namely, Eclipse, with Grove P. Rawson, certificated in 1898, and the present year certificated as Golden Chadwick, exhibited by Vaughan's Seed Store. It is more than gratifying to note that the AMERICAN FLORIST editorially asked in the last issue, "What is the difference between Yellow Chadwick and Eclipse chrysanthemums?" That is the correct spirit and it is to be commended. These sports need watching. The variety Chadwick, though considered in the white class, has some delicate pink markings through its petals, thus giving it a blush tint, has sported to a much darker shade and a different form, but our expert chrysanthemum friend, Elmer D. Smith, can produce data to prove that this variety is quite prone to vary through a difference of the time of propagation, time of planting and time when the bud is taken.

Now, as to form, Prof. Henslow goes on to say: "Besides the color, the form of the flower may be more or less completely altered in the sport. For example, Mr. Maries, of Lytham, met with a case in which a sport appeared on Souree d'Or, half the flower head consisting of spreading, flat, canary-yellow-colored ray florets, while the other half of the flower head was composed of recurved, dark golden-bronze florets with revolute edges."

Another illustration. Mr. Molyneux speaks of George Glenny (itself a yellow sport from the white incurved Mrs. Rundle) sporting to a true reflexed type of the same color, in the garden of Mr. Horril, at Havant. This variety is known as Mrs. Horril. Again, a true anemone sport occurred from the reflexed variety King of Crimson, and called Mrs. R. A. Mudie.

Mr. Gallier, of Edgbaston, records how "a completely tasselled Japanese variety, with pale pink or flesh-colored florets, which were long, narrow and very full, arose as a sport from the fine incurved pink, show variety, Miss Mary Morgan."

The above extracts, will, I feel sure, set at rest any further doubts as to the inclination of sports to change the form of petals and flower in addition to the color so long recognized. Hitherto only a change in color of flower was looked for in a sport, now we have abundant proof that change in form also takes place. E. L.

LOOMIS, CAL.—The California Carnation Company expects to root not far from a million carnation cuttings in 1903. They are planning to establish a branch somewhere near Chicago.

A Valuable Adiantum.

The fern depicted in the accompanying illustration is undoubtedly one of the finest productions of recent years for florists' cut flower trade. It is said to have originated in the greenhouses of Peter Crowe, at Utica, N. Y., where some thirteen years ago it appeared among a lot of *Adiantum cuneatum* of the ordinary type, the stock of which had been obtained from Alex. Montgomery, Natick, Mass., seven years previous. During the interim the fern has been locally known as *Adiantum Bardii*, but Mr. Crowe proposes to give it his own name hereafter. As shown in the illustration, the fronds grow to a height of two feet and upwards. They ripen very quickly and keep well and the plant has given satisfaction grown in the dwelling house. During the time it has been growing with Mr. Crowe, he states that it has never produced any seedlings, although the fronds appear covered with spores. He cuts heavily for the New York market, where the demand for the fronds is very great.

A Mixed Border.

The illustration given herewith shows an excellent manner of obscuring the view of a vegetable garden and at the same time giving a brilliant and always interesting aspect to a garden walk. The back row in the border is of tall growing cannas, such as Florence Vaughan, Chas. Henderson, Kate Gray, Italia, Austria and Crimson Bedder. Next in front of the cannas come *Salvia Bonfire*, *Pennisetum Ruppellii* and *Abutilon Souvenir de Bonn* planted in masses. *Phytolacca variegata*, *Centaurea gymnocarpa*, *acalypha*, *irises*, *archyranthus* and *geraniums* in variety comprise the third group, while the immediate foreground is made up of low growing subjects such as *Ageratum Blanche* and *Blue Perfection*, *Begonias Vernon* and *Erfordii*, *Zinnia Haageana*, *Centaurea candidissima* and sweet alyssum. Abundant watering and constant trimming, weeding and so forth are of course indispensable and all these details are carefully followed up by Mr. Wengert, the gardener at the estate of Selmar Hess, Seabright, N. J., where the photograph reproduced was taken and which at all seasons of the year is a good example of the skill of a painstaking and careful gardener.

The *pennisetum* above mentioned is worthy of more general cultivation. Seed may be sown in January, in shallow boxes, transplanted into 2-inch pots and planted out of doors in May.

Christmas Plants and Packing.

The holiday season is not only a season of profit to the plant grower, but is also a time of much anxiety, for with the delays in growth and maturing of various plants that may be caused by unfavorable weather, the difficulties in the way of transportation and the risks from severe weather while the plants are in transit, it seems no wonder that there are an abnormal number of gray heads among our ranks.

But these are matters of detail that present themselves every season, and we ought therefore to become quite used to them and also to make some preparation in advance. Owing also to the great rush of business with which the express companies are deluged at this time it is best to ship all orders just as early as possible, and to pack everything as

A VALUABLE ADIANTUM, GROWN BY PETER CROWE, UTICA, N. Y.

MIXED BORDER AT SELMAR HESS ESTATE, SEABRIGHT, N. J. A. J. WENGERTER, GARDENER.

securely as lumber and nails will allow, for one must admit that the expressman has not much time to be careful under such conditions.

The past autumn has been an unusually favorable one for plant shipments, there having been scarcely any cold weather before December 1, but from this time forward the transportation of tender stock becomes very risky business, and one can hardly be too cautious in the matter of packing, even though it does add quite a percentage to the expense account. Flowering plants are especially risky subjects to ship, for a slight chill will often make the flowers drop, even though the plant itself may not show much injury.

One of the first requisites in packing a plant in flower is to have it firmly tied to a stiff stake. A bamboo is one of the lightest and strongest stakes for this purpose, and where the plant is likely to rub much against the stake the latter should be wrapped with a strip of tissue paper. Large sheets of waxed paper are the best to use for the first wrap, over the flowers of an azalea for instance, the paper being drawn in and tied to the stake at top and bottom.

If the weather is very cold and the plants are to be shipped to a distance, it then becomes necessary to cover the waxed paper with a layer of cotton wadding, and this in turn with more paper, the pots also being well wrapped in excelsior and paper. It is also a good practice to allow the stakes to project a few inches above the top of the plant so that when they are cleated into the box these stakes may rest on a strip that has

been nailed across the center of the box, and to which the stakes should be firmly tied, thus preventing the tops of the plants from threshing around in the box under rough handling.

For express shipments, and no other way is safe at this season, all boxes should be made as light as they reasonably can be, with due regard for their strength, and they should also be made large enough to allow for an abundance of packing material in addition to the lining of paper felt that forms a great protection to the contents.

The plants having been thoroughly wrapped with several layers of paper, or paper and cotton, the interior of the box completely surrounded with excelsior and felt paper, and the cover tightly nailed down, we have a package that will be reasonably secure in cold weather, unless it may be one of those exasperating cases that appear from time to time in the experience of every large shipper, where the thoughtful express agent leaves such a package out on the platform for a few hours at some junction point in order that it may be ready for the next train.

The plants in fruit that are included among the Christmas stock, and of which the ardisias, oranges and solanums are the most popular examples, need packing in much the same manner as the flowering plants, one of the most important matters being the proper staking and tying of these plants to prevent the fruit from being shaken off in transit.

When any plants are received from a distance in frosty weather it is much the safer plan to open the packages in a cool

place, for example in a temperature of 40° to 45°, and then thaw them out gradually if any show signs of freezing, at the same time protecting the plants from the light until all are gradually warmed. By taking these precautions it is often possible to save the plants even though they have been slightly frost-bitten.

Foliage plants are generally easier to pack than those in flower, for in most instances the leaves may be drawn up and readily bound in place with stripes of paper. With many palms it is best to draw up the young leaf in the center first and, after covering that with paper, bring up the remaining leaves around it and then cover the entire plant with several layers of paper, but if all the leaves happen to be fully developed it is not necessary to make an extra wrapping for the center.

In all cases one should be careful to cover the entire plant thoroughly from top to bottom, for it is not much of a protection to put a lot of paper over the leaves and then to leave a portion of the stem uncovered, the latter being almost equally susceptible to the cold.

There are occasionally other tender foliage plants to be packed for shipment, and with some of the broad-leaved ficus, aloecasias, dieffenbachias and other easily injured subjects, the old-fashioned method of putting a light stake in each side of the pot with a cross stick tied to the tops of the other two, in order to keep them apart, is still a practical way of making a protective framework between which the leaves of the plant may be tied. With such a framework it is comparatively easy to tie the leaves perfectly flat by

means of long strips of tissue paper, after which the whole plant may be covered with heavier paper, or paper and cotton, and ultimately cleated into a well lined box.

One of the most important things to be remembered in the packing of all plants is to tie them up tight enough to allow of but very little movement after they are boxed up. But at the same time avoid cutting or creasing the foliage by careless tying, as such an injury is liable to become more prominent after the plants have been unpacked for a time.

The question of a scale of charges for boxes and packing seems to have become quiescent again, though many seem to think it would be a proper step for the trade to take, but like many other reforms it seems as though most people would prefer to have the other fellow reform first. W. H. TAPLIN.

WITH THE GROWERS.

GEO. M. KELLOGG, PLEASANT HILL, MO.

The establishment of Geo. M. Kellogg, at Pleasant Hill, is one of the largest greenhouse plants west of Chicago and comprises over 250,000 feet of glass. Built on a gentle slope to the south and in the most modern style, with good soil, it affords the most favorable conditions for the production of a first-class quality of cut flowers. All the leading varieties of roses and carnations are grown and an extensive shipping trade in cut flowers is carried on throughout the western states, about one-half the product being wholesaled in this way. The balance is disposed of in Kansas City. Only a few pot plants are handled. *Asparagus plumosus* is grown quite extensively; 125,000 bulbs of various kinds are grown. The *Harrisii* are looking extra fine; not much indication of disease. Paper White narcissi are grown in large quantities and pay more per square foot than any other variety of bulb grown.

Several 300-foot houses are planted to Golden Gate rose and are looking remarkably well; some are in their fourth year. The same may be said of Bride and Bridesmaid. Heretofore it has been customary to rest these two later varieties during the summer. This rule was reversed this season and the plants kept moving right along. The plan has proven so satisfactory and the plants have given such good results that this method will be adopted altogether hereafter. The plants certainly look strong and vigorous. Perle, Sunrise and Ivory are grown in about equal proportions and are healthy and strong, with plenty

of buds in sight. Liberty is also grown, with not very satisfactory results, but Mr. Kellogg avers he will stick to it until success crowns his efforts. Four houses are planted to Meteor and the plants promise to render a good account of themselves.

Four large Beauty houses came in for special attention. Not many flowers are being cut from them at the present time but the outlook for a large cut about the holidays is very encouraging. The plants are all in solid beds and are remarkable for their strong and healthy growth, some plants having as many as twelve strong canes, and all showing indications of strong breaks from the bottom.

Carnations occupy eight houses 250 feet long. All the leading varieties are grown and are in prime condition, clean and healthy, with a splendid crop of buds and bloom on. The old variety Day-break is done here in fine shape.

A number of houses are devoted to violet culture and look in fairly good shape.

Osage orange is used for posts in the construction of the houses, and has proven superior for lasting qualities to any other. The glass is all butted. Mr. Kellogg thinks the houses are more easily heated when glazed in this manner.

Considerable difficulty was experienced last year with the water question. During the drought it was necessary to lay over two miles of pipe to obtain sufficient water for the houses. Mr. Kellogg has overcome that difficulty effectually this year by filling in a ravine and creating a reservoir of water twelve acres in extent, with an average depth of twenty-eight feet. He also constructed a new roadway over a mile in length at a cost of over \$6,000. When any improvement is needed on this place cost is a secondary consideration.

The total extent of the place is 120 acres, about two-thirds being farmed. When visiting this place one is impressed with the enterprising manner in which it is conducted. Echo.

Notes on Orchid Growing.

ODONTOGLOSSUMS.

Odontoglossums revelled in the fine, cool, moist summer we experienced this year and, could we but be certain of two or three more years free from abnormally high temperatures, such as were recorded in 1901, we could with some degree of confidence feel an ability to produce plants which would compare favorably with those seen in European collections.

It is somewhat disheartening to find the plants lose in one or two forrid weeks what has taken as many years to build up, but aside from these discouragements there is no question but that *odontoglossums* can be fairly well grown in this part of America if given the right sort of structure and proper treatment. A north house and some shade in summer are necessary. From September to March the plants are benefited by having all possible sunlight; the leaves may be lighter in color than where shading is used, but they will be much stiffer in texture and the plants will flower much more satisfactorily.

Some orchid cultivators try a few of these plants in too warm houses and, of course, having no success with them, discard them and assert that they cannot be grown in the United States. Their culture is certainly more difficult than that of cattleyas and lalias, which, with *cypripediums*, form the staple of most orchid collections, but some growers have very fair success with them and there is no reason why others cannot do likewise. *Odontoglossums* are by long odds the most chaste of all orchids and a well-grown and flowered plant of *O. crispum* is a more striking evidence of cultural skill than any huge mass of cattleyas or lalias. Furthermore, no collection can be called complete with *odontoglossums* omitted; as well might we strike ericas from the list of hard-wooded flowering greenhouse plants and expect to have a representative collection.

In the autumn months we give our plants a night temperature of 45° to 50° and keep them quite moist at the root. Plenty of bottom and top ventilation is necessary. There are few nights in the year when some side ventilation, in the walls below the benches, cannot be given. The plants seem to do well in either pots or baskets; if anything, we prefer the latter. In a compost of chopped fern root, leaves and sphagnum moss, if the moss can be kept growing on the surface of the pots or baskets, it may be taken as a good sign. In England leaf mould appears to be the popular potting compost. We have difficulty in securing the right quality of leaf mould here, but half rotted leaves with a little fern root added seems to suit the plants, while some have done well in pure leaves. Much depends on careful watering. We have no time to give special treatment in this respect, always using the hose.

Of course the king of *odontoglossums* is *O. crispum*, and if only one variety is to be grown this is the sort to have. There are a host of named forms of this

VIEW IN A ROSE HOUSE AT THE ESTABLISHMENT OF GEORGE M. KELLOGG, PLEASANT HILL, MO.

GREENHOUSE ESTABLISHMENT OF GEORGE M. KELLOGG, AT PLEASANT HILL, MO.

popular orchid. Some of the best known are *virginale*, *Ruckerianum*, *guttatum*, *reginae sulphureum*, *Veitchianum* and *fastuosum*. Some of the large flowered and heavily spotted forms are very valuable and fetch higher prices than any other orchids. Other *odontoglossums* worthy of culture in the cold house are *O. Andersonianum*, a natural hybrid between *crispum* and *gloriosum*; *O. cordatum*, *O. Hallii*, *O. Pescatorei* (like *crispum*, a New Grenadan species), *O. luteo-purpureum*, *O. Uro-Skinneri*, *O. Rossi majus* and *O. triumphans*. The following varieties prefer a temperature 5° higher in winter and should be given the warm end of the house; they should also be kept drier at the root when growth is completed until flower spikes show: *O. cirrhosum*, *citrosium*, *pulchellum majus*, *Edwardi* and *Kramerii*. The well-known Guatemalan species *O. grande*, better known as the "baby orchid" is of comparatively easy culture and is one of the best fall flowering orchids grown; it does well in shallow pans hung near the roof of the cold house.

COELOGYNES.

Coeogyne cristata and its varieties are very useful florists' orchids and of easy culture, growing and flowering satisfactorily in almost any house where other plants will thrive. Plants grown in frames in the open air we find made up their bulbs quicker and showed flower spikes earlier than those grown in the house. With these, again, too much summer shade is a great mistake; these grown in a strong light flower far better than the dark green plants produced in shade. These plants do not take kindly to forcing; a night temperature of 55° to 58° is ample in the fall. We find that the varieties *C. cristata alba* and *C. cristata Lemoniana* last much better cut than the type. As all are of equally easy culture this point is worth considering by cut flower growers. The principal objection raised to *C. cristata* has been that it is not a good keeper in water. This is very true, but we find the other two forms named keep thrice as long. There would appear to be some shy blooming varieties of this *coeogyne*. As a rule the round-bulbed varieties flower sparsely as compared with the long-bulbed ones.

LÆLIA ELEGANS.

Lælia elegans is one of the most magnificent of the Brazilian summer flowering orchids. It is not a plentiful orchid in cultivation and as it is practically extinct in its native habitat it is likely to always remain somewhat high priced.

The sepals and petals in the various forms are either white, rose, rosy purple or carmine, lip deep rich purple or crimson and very broad. There are some striking forms of this magnificent *lælia*, some of the finest being *Schilleriana*, *Littleana*, *Lindeni*, *Turnerii*, *Paraleuchos*, *Statteriana prasiata* and *Marlboroughiana*. As a rule this *lælia* carries four to six flowers on an erect scape; one of our plants of *L. elegans Lindeni* this season carried a scape with eighteen flowers. This beautiful *lælia* succeeds best under pot culture and, being a long and strong-bulbed variety, quite large pots are required for specimen plants. A light position in the cattleya house with compost and general treatment similar to cattleyas and other robust growing *lælias* suits it.

DENDROBIUMS.

Dendrobium nobile and its varieties, with many of the hybrids, should have a rather cool, dry and airy structure, raised well up to the light, in which to thoroughly ripen the bulbs. The past summer was not so favorable as usual for ripening the bulbs on *dendrobiums*, *lælias* and *cattleyas*, so it was well to give the plants quite strong light in the autumn to assist the proper maturing of the bulbs. Some of the *dendrobiums*, such as *Wardianum*, *splendidissima*, *Ainsworthii*, *dulce*, *chrysodiscus* and some forms of *nobile* had the flower nodes showing quite prominently on the pseudo-bulbs. A spraying on bright afternoons helps to swell out the nodes, but the plants should be kept dry at the root even to the extent of partial shriveling of the pseudo-bulbs, to secure thorough ripening and satisfactory flowering.

Dendrobiums are less gorgeous than *cattleyas*, but a well flowered collection is more pleasing and satisfying than one of *cattleyas*, their lasting qualities are much better and we have noticed that visitors who were impressed momentarily by a glare of *cattleyas* found keener delight in inspecting a collection of *dendrobiums*. As a rule *dendrobiums* require plenty of heat and moisture while making their growths, a small, steamy house suiting them to a nicety. After the resting period and when it is evident the nodes will produce flowers and not growth, more warmth and moisture can be given. *D. nobile*, although one of the oldest orchids grown, is still one of the best and a specimen plant of it will beat any *cattleya* or *lælia* in competition. Some of the best forms of *D. nobile* are *nobilis*, *Amesiae*, *Murthirianum*, *vir-*

ginale, *Sanderianum*, *Backhouseana*, *Arnoldianum*, *Burfordense* and *Wallachianum rubrum*. A few of the finest hybrids are *D. Cybele*, *chrysodiscus*, *euryalus*, *Edithæ*, *dulce*, *Ainsworthii*, *Amesiae grandiflora*, *Schneiderianum* and *Luna*.

The two most satisfactory florists' fall flowering *dendrobiums* are *D. Phalaenopsis Schröderiana* and *D. formosum giganteum*. Both require warm treatment to do well. *D. Wardianum* is perhaps the most gorgeous of all *dendrobiums*, flowering early in the new year. Fresh importations are necessary of this, as it seems to deteriorate after two or three years' culture. It is an inexpensive and popular sort. Among the numerous other *dendrobiums* grown, a few of the best, worthy of culture in any collection, are *D. Dalhousianum*, *thyrsiflorum*, *chrysotoxum*, *Devonianum*, *Pierardi*, *fimbriatum oculatum*, *Falconeri*, *bigibum*, *crassinode*, *densiflorum* and *Farmeri*. The foregoing varieties will give a succession of bloom throughout the year.

MILTONIA VEXILLARIA.

Miltonia vexillaria is one of the most beautiful of summer flowering orchids, which is, however, rarely met with in good condition in collections. It succeeds well grown in the *odontoglossum* house during the hot summer months, but in autumn is better moved to a slightly warmer house. We placed our plants in a house where *coeologynes* are grown, with a night temperature of 55°, where they are well up to the light, yet not exposed to strong sunlight, and this position suits them. A surfacing of live sphagnum was given and from then on a lessening supply of water will be in order until spring, when the new growths and flower spikes appear almost simultaneously. Thrips are very partial to *miltonias*, more especially during the summer months; dipping or sponging with tobacco water is the best preventive. Nothing can exceed the grace and beauty of these orchids, either grouped separately or with other varieties. There are some beautiful forms of *M. vexillaria*. Some of the most handsome are *Fairy Queen*, pure white; *H. E. Milner*, rubella; *Joseph Godseff*, *Amesiana* and *Augusta Victoria*. From three to four flowers are usually seen on a spike, but strong plants will produce spikes carrying double that number. *Miltonia vexillaria* grows best in pots in a compost of fern fiber and sphagnum, we tried some in leaf mould last season, but they did not take kindly to it.

W. N. CRAIG.

ROSES.

THE MAKING OF CUTTINGS.

The time is now drawing near when we shall have to do our propagating. The rose cuttings will root very easily from now until the sun again becomes stronger and, of course, if your stock is struck at a time when root action is easily induced the plants will be the better for it. You will also want to have your stock for next spring's planting composed of large, strong plants, and in order to secure this they should be from early cuttings, which have been shifted several times before planting.

Although the propagation of roses is not a very difficult matter, it nevertheless requires careful attention. Your propagating bench should be so arranged that you will be able to supply shade, but I do not approve of shading by staining the glass, as in this way you are apt to allow the cuttings to become too soft. You should only have the cuttings shaded when the sun would shine on them, and as soon as the sun is off the shade should be removed. As soon as the cuttings have formed a callus and the roots commence to appear, the shade should be kept off altogether, thereby assuring strong stock.

The cutting bench should be so arranged that the temperature of the sand may be held up to 60°, which will induce root action quickly. Although the cuttings will root quicker with a still higher sand temperature, I should not advise this course, as you will be liable to make the cuttings soft and then when you pot them you will be likely to lose a great many.

The outside temperature for your cuttings should be about 56°, the main thing to be looked out for and avoided being sudden changes. It is an easy matter to keep the sand warmer than the outside temperature if a strip of cloth be nailed along the front of the bench, thereby holding the heat underneath.

As soon as the cuttings are rooted they should be potted. They should not be allowed to remain in the sand at all after they are rooted, as they are only weakened thereby. When the cuttings

are first placed in the sand they should be kept quite wet, until they have a callus; after this the water should be gradually withheld. The main point to work for now is to harden them. Remove the shade gradually until they are able to stand the sun without wilting. After potting, shade for a few days again and then remove the shade altogether, when they should be in a growing condition.

R. I.

CARNATIONS.

AS TO CARNATION DORA.

The carnation, Dora, as advertised by me, has for some unknown reason failed to come up to the standard for keeping the past month and I feel that, while it is steadily improving, it is not, as it now stands, what I felt it was. All other points are above the average, but without keeping qualities a flower is worthless. Last winter Mr. Muth, of S. S. Pennock, reported that they used it in filling orders in Florida and it carried well. I will root but few more cuttings of it than I wish to use myself, for I shall try it again, but I will furnish pips if desired as advertised. Marion is proving all I claimed for it, an improvement over Hill, business from early to late and does not burst its calyx.

ISAAC A. PASSMORE.

FORCING AND FEEDING.

ED. AM. FLORIST:—Regarding the article on Christmas forcing of carnations, over the signature "J." in your last issue, such advice is calculated to do a vast amount of harm. There may be a few varieties, under exceptional conditions, which will go through a week in the latter part of December at a night temperature of 60° without lasting injury, but for the average grower who has a house of carnations in good condition and producing good blooms, the raising of the night temperature 10° above normal during this season can only be considered suicidal. It is questionable whether the increased cut will make up in money value for the damage to the quality, even

for the week in question, while the damage to the plants and consequent decrease, both in quality and quantity, of the subsequent crop, is often appalling.

Complaints are yearly made by wholesalers everywhere, of what is called the salting or pickling of stock, but I believe that a large part of the stock that is classed as "pickled," is simply the flabby, flimsy, stemless rubbish produced by "J.'s" forcing process.

Although, practically, "J." admits that early feeding is wrong, he in effect advises it. The man who first, last, and all the time "consults the health of his plants" is the man who comes out with the best bank balance at the end of the year.

The writer confesses freely, that often in the past he has sinned, both in the matter of heat and feed, but he has repented in sack cloth and ashes.

The whist maxim, "When in doubt take the trick," won't do in carnation culture. A large sign on the door of the greenhouse reading, "When in doubt don't do it" will save many and many a dollar. The writer is firmly convinced that nine times out of ten the house which receives absolutely no feed until after January 1, and in which the temperature has been carefully maintained at normal, will show, for the year, greater cash returns than would the same house in which "J.'s" advice had been followed, even if not to the extent recommended by him.

W. N. RUDD.

CHRYSANTHEMUMS.

SOME NEW VARIETIES.

The yellow sport of Timothy Eaton which the E. G. Hill Company exhibited at Boston as Dr. Oronbyatekah, scoring 91 points, is similar to the parent in every quality except color. It is a fine shade of light yellow.

Algoma is a light pink incurved, the style of The Queen. The form and habit are described as all that could be desired of a commercial variety. It is one of Nathan Smith & Son's set of certificated seedlings.

Mrs. Harry V. Casey is the latest novelty of Wm. Paul Binder, Rider, Md., who has introduced many which are now standard sorts, including Willowbrook, Lady Harriett, Robert Halliday and others. The Mrs. Casey is a clear pink, incurved Japanese, of fine stem and foliage. The flowers are large and do not show a center. The plant grows about three or three and one-half feet tall and the blooms are ready early in November. It has been shown many times and been the subject of much favorable comment.

ECLIPSE AND GOLDEN CHADWICK.

Answering the inquiry which appeared in the issue for December 6, "What is the difference between Golden Chadwick and Eclipse chrysanthemums," will say that when the Eclipse was sent out in 1898 we bought a number of plants, thinking it would be a good thing if it was a true yellow Chadwick. After giving it a thorough trial we found that the foliage was identical to W. H. Chadwick and the color a light lemon shade. But a large percentage of the flowers came reflexed, with tubular petals, and smaller as to depth and substance than the W. H. Chadwick, in fact, inferior to the white one in every respect.

The Golden Chadwick sported with us two years ago. We have found it to be identical with the white variety in every respect, with the possible exception of

BRIDESMAIDS GROWN BY BENTHEY & CO., AT NEW CASTLE, IND.

Algora.

THREE OF THE SEASON'S CERTIFICATED CHRYSANTHEMUM NOVELTIES.

the flowers coming larger and of more depth, and if anything a handsomer bloom than the parent. The color is also two or three shades darker than the Eclipse, often showing a bronzy tint. The Golden Chadwick has been examined by a number of experts at the flower shows and pronounced far ahead of Eclipse in every respect, in fact you can hardly find a chrysanthemum grower to-day who is growing the Eclipse and almost every one of them is growing W. H. Chadwick on account of its fine form, large flower and habit of growth, and it does not look reasonable that if the Eclipse had proved as good a flower that they would have discontinued growing it.

JAS. S. WILSON.

Oil Versus Coal as Fuel.

In all probability, more has been written about fuel-oil during the past six or twelve months than ever before. But as yet only the outer crust of the subject has been touched. There are so many conditions that must be considered before oil can be accepted as a fuel throughout the world that it will be a long time before coal, and the many other fuels that are now used, will be supplanted by it. But that the change will eventually take place is seemingly beyond question, if we may judge the future by recent years.

Under certain conditions, oil is decidedly cheaper than coal at any price, but under many conditions it is apparently very much more expensive than coal at its normal price. To simplify the subject, it is well to divide it into two general classes, namely, commercial and domestic.

Experience has taught the western states that, both for commercial and domestic uses, oil is vastly cheaper than coal. But it must be remembered that the west uses bituminous coal almost entirely, anthracite coal being so scarce there as to be practically prohibitive.

With bituminous coal, therefore, at an average price of \$8 per ton, it can readily be seen that oil-fuel is greatly superior, in the actual cost as well as in the greater convenience obtained.

Taking the commercial side of the question first, a very interesting array of statistics is encountered. In round figures,

three and one-quarter barrels of crude oil is equal to one ton of soft coal. Placing the price of the petroleum at \$1 per barrel (in many places in California, especially in the Kern river district, the price is often as low as 50 cents per barrel), the cost would be \$3.25, as against \$8 for coal, showing a saving of \$4.75. Now to this saving must be added the greater economy in labor hire. With oil as fuel, one man will accomplish the same amount of work that requires six men when coal is used. Here, therefore, is a saving of five men, at \$2 per day, or an annual saving of \$3,000 in labor. There being no ashes or cinders to dispose of, a considerable amount of money is saved in this respect. It will be seen, therefore, that oil is not only cheaper than coal in its first cost, but it also does away with the many comparatively small expenses that foot up a considerable total annually.

The *United States Journal for Investors*, under date of November 8, is responsible for the following statements:

A Chicago official of the Atchison road writes, with reference to the economies that have been made during the past year by the use of oil as fuel in its locomotives: "On our Gulf division alone the saving being made is at the rate of \$300,000 per annum, and, with the steady increase in the number of locomotives equipped for oil burning, we expect during the coming year to secure an economy on this division alone of over \$500,000."

"For our California lines we have a long-time contract for crude oil with the Kern River companies, at a price considerably below that now quoted for oil. Besides this, the development of our own oil property is progressing satisfactorily, and our savings on the coast lines will be as much or more than that on the Gulf division. The service that has been secured by the use of oil has, for the most part, greatly exceeded our expectations, and it would not surprise me if oil ultimately became the fuel of the entire system."

In this connection it is reported from San Francisco that the Southern Pacific Company has expended \$5,000,000 for the purchase of oil lands, tanks and for the conversion of 500 of its 1,400 locomotives into oil burners, and it is estimated that the saving in fuel expenses for the company will be at the rate of \$150,000 per month, or \$1,800,000 annually. The saving on every 100 miles run by using oil is estimated to range from \$16 to \$20.

After these statements it would seem

hardly necessary to advance further argument in favor of petroleum as fuel. The conservative policies of railroad corporations are so well known that the fact of their having become so convinced of the superiority of any one fuel that they are taking steps to install it exclusively on their systems possibly precludes all further arguments. But, when their decision is corroborated by the steamship lines that ply on both the Atlantic and Pacific oceans, it would seem that all arguments against this article of fuel must cease. Even the United States navy, acting under the order of Admiral Melville, is installing oil-burners in many of its boats, in the face of the fact that some of the subordinate officers, who have been associated with the commission that has been conducting a series of experiments with oil, were not very much in favor of the change.

Thus it will be seen that, commercially, in the east as well as in the west, where soft coal is used to generate power, fuel-oil is cheaper and better. Naturally the saving is not as great in the east, because soft coal here is sold at about \$3 per ton. But the incidental savings are just as large, besides giving greater and quicker control of the power. It has been proven that a given pressure of steam can be raised by using oil for fuel in one-third of the time that soft coal requires, as well as making it possible to keep an absolutely even pressure.

This in itself is a vital point. Oil is so easily managed as a heat producer that it is possible to increase or decrease the pressure of steam at will, the same as with gas. With coal, however, this is impossible, for when combustion has taken place its heating power cannot be quickly reduced. As soon as oil is ignited, its full heat is obtained, but coal requires considerable time to develop its heat.

When the domestic side of the question is taken up, however, a somewhat different state of affairs is seen. For domestic purposes the cheap crude oil is impossible, for many reasons. Oil in its crude state is such a thick mass that it is necessary to break it up into small particles in order to mix it with the air that is necessary to complete combustion. The finer the particles the better are the results

obtained, as the necessary amount of oxygen is more easily and completely combined with it.

On October 26 the New York *Sun* published the following excellent article:

The different forms and patents of burners for use with coarse crude or fuel-oil are an army in numbers. But they may nearly all be classed as atomizers, and the chief difference between them is in the medium used for atomization.

There are three principal atomizing agents in use—steam, compressed air and low pressure air at about two pounds pressure. Of these, the atomizer using low pressure air seems the most popular and economical.

By atomizing is meant the breaking up of the oil into atoms, and the principle of this performance is the same as is found in the familiar spraying devices for the application of medicinal liquids to the nose and throat.

By thus dividing the oil into extreme fineness, it is possible to mix much more advantageously with the air necessary to complete combustion. Each part of carbon must have two parts of oxygen. It is a pretty difficult matter with any fuel to select two particles of oxygen and bring them in contact with each particle of carbon. Thus it is, in order that combustion be as smokeless as possible, we have to introduce to the furnace an extra large amount of air.

In the case of oil it will be seen from the above that the finer we can divide the oil, and the more widely we can separate it, the easier will each particle find its two particles of oxygen in the air which is introduced and, therefore, the less quantity of cold or comparatively cold air will be introduced into the furnace. This explains the action of the atomizer.

In addition to a good design of burner, the fire-box must also have careful thought and design, in order to place the incoming air where it will do the greatest amount of good with the least quantity.

It will be seen, therefore, that an apparatus of such a comparatively com-

the amount of oil that such a burner would consume per hour, the figures would show a larger amount than anthracite coal would cost. But such a reckoning is unfair, as well as almost impossible. Assume that a burner of sufficient size to heat a good-sized house consumed three-fourths of a gallon of oil an hour, this would be eighteen gallons a day, at 4 cents per gallon, or \$21.60 a month. If the same house required two tons a month of hard coal to heat it, at \$7.50 per ton, it would show that oil is \$6.60 a month more expensive. But such would not be the case. The full amount of heat being obtained immediately upon the lighting of the oil, the burner is not kept in operation every hour of the twenty-four; in fact, by reason of the above condition, the burner is kept lighted hardly more than ten hours a day, and a goodly portion of this time hardly more than one-half of its capacity is used. Hence it is found that about seven and one-half gallons of fuel is used, costing \$9 per month. This is as near as it can be approximately reckoned on paper, but actual experience proves that it rarely costs more than \$6 or \$7 a month. Adding the convenience of being without ashes or dirt, leaving out all question of expense, oil as a household fuel becomes a decidedly popular, important factor.

Here again, the western states have a big advantage over the east, for their

supply of oil is assured, and is readily obtained at low prices, whereas here we must depend upon the Texas and Louisiana fields for our supply. It is likely to be some little time, therefore, before a good distillate is sold in the New York market direct to the consumers at a cost of about 4 cents per gallon.

It is true that ordinary kerosene oil can be used, but it is by far too expensive, nor does it contain the number of heat units that the distillate does.

The public mind is now thoroughly awakened to the enormous possibilities of oil-fuel, and the progress that will be made along this line during the coming years will be very much greater than during the past years. The recent coal strike has acted as a great stimulant, besides proving many heretofore unknown facts, that the business instincts of the people will consider thoroughly.

As was said in the beginning of this article, oil can be made to appear as being more expensive than coal, but when the manner of working and using oil is investigated these assertions are found to be wrong.

Several have said that crude oil-fuel burns out the machinery, etc., but this also has been proven false. We refer once more to our esteemed contemporary, the *United States Journal for Investors*, of November 8:

In reporting on the effect of petroleum on boilers when used as fuel, F. C. Bitgood, the chief boiler inspector for the southern district of the Hartford Steam Boiler Inspection and Insurance Company, states that when oil-fuel was first taken up the inspectors were cautioned to exercise special vigilance, to the end that its effect on the boilers might be ascertained as quickly as possible. Thus far the scrutiny has failed to reveal any deleterious effect where proper care was exercised in installing the oil-burning apparatus and in its operation afterward.

It was also found that, by reason of too great a concentration of the oil flame upon certain parts tubes were bent and shell plates overheated, a danger easily overcome. Some apprehension was felt that the amount of sulphur contained in the crude oil might be sufficient to cause more rapid deterioration from pitting and corrosion than has been experienced in coal. This fear has been so far proved groundless, no extraordinary pitting of tubes and shells having been noted since the introduction of oil as fuel. This may be accounted for by the fact that the amount of sulphur liberat d per thousand heat units is less with oil than with coal.

The wear and tear upon the boiler structure is probably less than with coal. Much of this wear and tear with coal is due to strains produced by the sudden frequent rushes of cold air against the hot plates and heads while the surface doors are open for firing, resulting of en in a leakage at the seams and ends of the tubes, and small fractures of the boiler plates. These are almost

ESTABLISHMENT OF JOHN BAUSCHER, JR., FREEPORT, ILL.

licated arrangement is unsuited for use in the ordinary household, unless a man is engaged especially to run it. And, again, it becomes a question as to whether the insurance companies would permit such an apparatus to be installed, for no power being generated that can be used for the spraying purpose, a retort or something of a like nature must be used to furnish the spraying force. A very decided element of danger enters thereby to which the insurance companies, as well as the householder himself, objects.

Consequently, a distillate must be used. A distillate is a crude oil, from which the base and all hazardous substances, such as naphtha, gasoline, etc., have been removed, leaving a volatile fluid of great heat-producing power.

By the use of this distillate, the necessity of spraying is obliterated, making possible a burner that is simple in construction as well as easy of manipulation.

But a refinery product, such as distillate, is from three to four times more expensive than the crude petroleum. By reckoning the twenty-four hours to the day and the thirty days of the month by

CARNATION HOUSE OF JOHN BAUSCHER, JR., FREEPORT, ILL.

HOUSE OF CARNATION ENCHANTRESS PHOTOGRAPHED OCTOBER 25, AT THE J. D. THOMPSON CARNATION CO., JOLIET, ILL.

entirely avoided by using oil-fuel; the doors are never opened, and the temperature remaining practically even, there are no injurious contractions. In some cases where constant trouble has been experienced with coal from these causes, there was a marked improvement when oil was introduced; the annoying leakages and fractures ceased, thereby lessening repair bills and the frequency of stoppages.

Thus it will be seen that, although its detractors do all they can to discourage the use of oil for fuel, its superiority is so great that in spite of its traducers it is forging to the front with mighty, unblockable strides.

Some time in the near future a burner will be invented in which the raw crude oil can be utilized, of so simple a design that it may be used in every household. When this is accomplished the cost of fuel for cooking and heating will be reduced to such a low figure that it will be utterly impossible for any other fuel to compete with it.

After the siege of soft coal smoke and dirt, that we are just beginning to emerge from, any fuel that will do away with such monumental annoyances will be welcomed with open arms. Therefore, our eyes having been thoroughly opened to the possibilities of oil-fuel, it simply remains for the proper apparatus to be invented and a slight prejudice to be overcome to place "King Oil" upon the throne that has been occupied so many years by "King Coal."—*American Mining News*.

[In this connection it is worthy of note that John Breitmeyer's Sons, Mount Clemens, Mich., after burning oil successfully for several years, are abandoning their apparatus and tanks to resume the use of coal for heating their greenhouses, as a matter of economy.—Ed.]

LANSING, KAN.—Ben. Fox, formerly of Onaga, Kan., is now located here.

A Successful Illinois Establishment.

John Bauseher, Jr., at Freeport, Ill., has made very extensive improvements in the past two years. He first started in the poultry and vegetable business and about three years ago ventured into the growing of flowers. Since that time he has developed about 48,000 feet of glass and devotes same to the growing of carnations and roses. He has a very large shipping and retail trade. The flower industry has crowded out the vegetable business entirely, and cut the poultry business to about one-half its former size. Mr. Bauseher built a very fine residence the past summer and expects to add extensively to his greenhouses the coming season. C. W. S.

Notes on Christmas Plants.

With the near approach of the holidays it is important at this time to have all our plants for Christmas sales in good growing condition. Different requirements in temperature, moisture, fumigating and so forth must be carefully attended to in detail. In these days of little sunshine of course no shading is required for any of the plants we usually have in bloom at this season of the year.

If you are forcing azaleas they require careful treatment now. A temperature of 70° at night, syringing once or twice a day according to the amount of sunshine we have, with plenty of water at the roots, ought to bring them along quite rapidly now. As the buds begin to swell and show color on the extra early sorts, such as Deutsche Perle, Vervaneana and Simon Mardner, they should be removed to a lower temperature, say 10° less than the forcing temperature. Later, if they show signs of developing too rapidly they may without injury be removed

to a temperature of 50° at night. Keeping them cool a week or two before they are sold will add much to the strength of the plants and materially improve the texture and durability of the flowers, which naturally give better satisfaction to the customer. Syringing must be discontinued when this stage of development is reached. They should at all times have the fullest light and be given plenty of room to allow a free circulation of air between the plants.

Of all the plants for Christmas sales the cyclamen may well be said to head the list. A well-grown plant in a 6-inch to 8-inch pot, with its handsome foliage and mass of blooms makes a most acceptable Christmas plant. Add to this its great keeping quality as a house plant, which makes it safe to recommend to every customer, and we may justly call it the most valuable winter blooming plant for the retail florist. A night temperature of 55°, careful watering, no syringing where the plants are full of bloom, and regular fumigation to keep down aphid are important details that must be observed. It is well to place them on inverted 5 inch or 6-inch pots, bringing them nearer the glass, and permitting a free circulation of air. They must be given plenty of room, so as to permit a symmetrical development of the plants.

The different varieties of primulas, *P. Sinensis*, *P. obovata* and *P. Forbesi*, better known as the baby primrose, require practically the same treatment. A night temperature of 50° will suit them well. The soil should be well drained, allowing the water to pass through freely. Overhead watering should be dispensed with at this time of the year, as it tends to rot the flowers. Fumigating will not hurt the

primulas, but as they are rarely troubled with pests of any kind, it is hardly ever necessary to fumigate them.

Poinsettia pulcherrima is perhaps the most showy of all the Christmas flowering plants. Its large, fiery red bracts, and handsome foliage attract attention everywhere, which makes it a most valuable plant for decorative purposes. But nothing is more unsightly than a poinsettia with its foliage turned yellow, or with no foliage at all, which is something we often see. This defect is usually attributable to one of two things, and sometimes to both: Too low a temperature, which should never be below 60° at night, or impoverishment of the soil, in which case a stimulant in the shape of weak liquid manure will be found beneficial. Syringing must be regularly attended to to keep down mealy bug, and fumigation must not be neglected.

Begonia Gloire de Lorraine, the most valuable addition to the list of winter flowering plants in recent years, is in the height of its glory now. An ordinary rose house temperature will suit it. The soil, which should not be of too heavy texture, must be well drained. This beautiful little plant is sometimes troubled with aphids, but as fumigating discolors the flowers, the better way to fight this pest is to scatter tobacco stems between the pots. Although the *Gloire de Lorraine* is not an ideal house plant by any means, owing to the fact that it does not readily adapt itself to the conditions of the dwelling house, still its great beauty at the time when flowering plants are mostly in demand more than overbalances this defect in the estimation of the average customer. It is mainly on short festival occasions that this little wonder finds the greatest demand. G.

[This contributor's opinion of *Begonia Gloire de Lorraine* seems to be exceptional; it is generally regarded as adapting itself to dwelling room conditions with remarkable facility.—ED.]

Forcing Etherized Plants.

Whether through lack of enterprise, or for some other reason, commercial growers on this side of the Atlantic do not seem to have taken advantage of this new method of hastening and bettering the flowering of forced shrubs. In France, Holland, Belgium and Germany many experiments have been made, not only by professional experimenters, but by commercial growers as well, and the general results of all these experiments indicate that the new method will be of great value commercially in many cases.

The bulk of the work has been done with the lilac, but one can not avoid speculation as to whether it may not be applicable to lily of the valley; in fact one German experiment resulted quite successfully with lily of the valley pips. It seems possible that by this method new pips may be forced for Christmas, and the expensive and risky method of retarding by cold storage be rendered unnecessary. It would be at least worth a careful test on a small scale.

According to *Le Jardin*, Fredrie Harris a large commercial grower, of Hamburg, has used the method with remarkable success with lilac in his establishment. The plants—in full flower and ready to cut December 14—were etherized on November 24, while others etherized December 4, were just opening their flowers. Charles X was the variety grown.

By the use of ether Mr. Harris not only

gained ten days in the forcing process, but states that he secured more than three times the usual number of flowers from each plant, that the blooms were larger and better and the foliage was much more abundant and deeper colored.

The shrubs are etherized in a hermetically sealed box. A large shallow dish is suspended in the upper part of the box, into which the ether is poured by means of a funnel, through a small opening in the top of the box, which is of course immediately closed as soon as the ether is poured in.

The reason for suspending the ether receptacle near the top is that ether fumes are much heavier than air. It should be borne in mind that ether is a highly inflammable substance when in a state of vapor and even a lighted pipe or cigar brought into the vicinity is likely to be disastrous.

About 400 grams of ether are used to a cubic meter of air in the box, for early forcing. By the end of December a much less amount is needed. As the ether fumes are very penetrating and it is not desired to have them reach the roots, the plants should be in quite a dry state and their roots should be well covered with sand.

At the freezing point the ether has no effect, while at 86° the plants are ruined. The proper temperature is from 63° to 66°, dropping to 57° at night. The lilac already referred to remained in the box forty-eight hours, but some varieties required a longer time. After being etherized the shrubs are put into the forcing house and handled as usual.

The Blue Color in Hydrangeas.

Soon after its introduction by Sir J. Banks from China and Japan in 1790, it was noticed that some plants of *Hydrangea Hortensia* produced blue flowers, and of course an explanation was at once required. Almost the first reason given was that of the presence of salt or salt-peter in the soil; this was followed by the oxide of iron theory, and that the loam of some districts enjoyed this indefinable property of producing the blue color; then it was surely peat, turf ashes, and particularly the ashes of the Norway spruce had a turn; applying alum water during the previous year also had a vogue. But to establish either of these theories one vital point was lacking—their application did not "fix" the blue color. Latterly in our own days of exact science, botanical and horticultural authorities have become more cautious, and have chiefly confined themselves to saying by what artificial means this blue color may be produced. And, in fact, the almost universally adopted theory is that it is "something" in the soil.

Quite recently I read in a contemporary of a gardener seriously advancing as proof of this iron in the soil theory, the fact of numbers of bushes growing in the open air producing blue flowers, while plants raised from them and grown under glass only bore pink flowers because there was no iron in the soil in which the pot plant was growing! But by potting some plants in the soil from around one of the blue-flowered hydrangeas, how easily he could have proved or disproved his theory. For my own part, I do not believe that in the generality of cases the nature of the soil has anything to do with this blue color. In these gardens there are growing some enormous bushes which freely produce pink, blue and white flowers on the same plant, and frequently on the same branch—very erratic pro-

ceedings when viewed from the "iron in the soil standpoint."

In my opinion it is above and not below that we must look for a cause which will satisfactorily explain this phenomenon of blue hydrangea flowers. To me it seems to be a question of light, for I have particularly noted that those flowers which open earliest in the season, and consequently when the sunlight is strongest, are always of the normal pink color; while those on the same plant, which expand later are usually blue. And I have found, not only here but elsewhere, that the shrubs growing in shady positions, and facing northwest or due north, in which positions the amount of sunlight must of necessity be small, and the period of flowering late, produce a far greater proportion of blue flowers. It must be borne in mind that the corymbs which appeared first are now, by reason of their weight, hanging down, and in many cases mixed up with the later ones.—A. C. Bartlett in the *Gardeners' Chronicle*.

Chicago.

COLD WEATHER CUTS OFF DEMAND.—NOBODY STIRRING AND STOCK ACCUMULATES.—NOTHING SCARCE THIS WEEK AND AVERAGES GO DOWN.—GOOD PROSPECTS FOR CHRISTMAS.—EXPRESS RATES GO UP FIFTY PER CENT.—FIRES DO DAMAGE.—VARIOUS NOTES.

The week began with the first cold spell of the season and the sudden change to zero weather shut off the buying without working any perceptible decrease in receipts. On Monday there was a fair amount of shipping business, but Tuesday found the market practically dead and Wednesday was very little better. Stock accumulated in all departments and even the choicest material was moved with difficulty where an effort was made to maintain seasonable values. Items which had been in pronounced shortage were above the demand, and all orders have been filled to the buyer's full satisfaction this week. In the last few days business has improved somewhat, but the week will go on record as very unsatisfactory for the producers. Beauties, which have been very much under the demand for several weeks, began to pile up this week for the first time, particularly the shorter lengths. There are varying reports as to the crop conditions. Some growers report their crops now at the height and going off for Christmas, while others think they will be just in their prime for the holidays. Tea roses are showing a decided improvement in quality but the supply has been so heavy this week, as compared with the light business, that the growers can see little profit in the improving grades. Clean-up sales are on record at very low figures. Carnations seem to have held up the best of anything in the market. Receipts are ahead of demand, but the better qualities have continued to realize fair prices, the loss coming in the lower grades, as is always the case. Violets are not coming in particularly heavy but the decreased demand served to ease the market, the prices this week having ranged fully twenty-five per cent under a week ago. However, there is always a lull before the Christmas business. It seems probable that this season will see a larger holiday trade than ever before. The general opinion is that supplies will be comparatively large, but whatever the condition of the crops, if the growers wish to realize the full value of their stock, they must not hold back too much.

It may be all very well to save up something for a holiday, but over-ripe stock is never salable. Prices for several days before Christmas are sure to be up to the highest average and he who holds back his cut beyond December 23 will be the loser. Anything that reaches this market on December 22 and 23 is pretty sure to be well sold, for advance inquiries were never heavier.

The committee of the Wholesalers' Association which was appointed to interview the express companies with reference to the new tariff, finds the condition somewhat different from what was expected. Instead of following the announced programme as to liability for freezing, the companies have put into effect a tariff one and one-half times the regular merchandise rate, to apply on all cut flowers. The general agents interviewed admit that the raise was arbitrary and without due notice, and they assured the committee that they would afford every assistance in the effort which will be made to present the matter to the traffic officials with the view of securing a return to the former rate.

The second meeting of the florists and gardeners was held December 10, at 49 LaSalle street, for the purpose of starting a florists' union. There were forty present, including representatives from parks, cemeteries, private gardens and retail and wholesale commercial growers. The association was given the name of the Chicago Gardeners' and Florists' Union, and a committee of nine was appointed to draft constitution and by-laws to be presented at the next meeting, which will be held at 49 LaSalle street, on the evening of December 17. Representatives of the International Federation of Labor made addresses at the meeting.

On Friday night, December 5, fire destroyed the barn at the greenhouses of Wieter Bros., consuming not only all the wagons, tools and other supplies, but also seven head of the best horses on the place. One team which was lost was bought only a few weeks ago for \$475. There was an insurance which will cover a portion of the loss.

The regular meeting of the Florists' Club was held December 10, but the attendance was not as large as could be desired. However, the enthusiasm and good work of those present made up for the lack of numbers. It is believed that the forthcoming meetings will be of great interest and benefit to the members.

Last Sunday evening fire destroyed the residence and greenhouse of Wm. E. Beaudry, 5411 Woodlawn avenue. Mr. Beaudry and family were awakened only in time to escape from the building in their night clothes. The loss is estimated at \$4,500, covered by insurance.

Albert Fuchs has now taken complete possession of the Retzer place, the disputed claims of the receiver's auctioneer having been adjusted and everything is in business shape again. Mr. Fuchs expects to spend some \$4,000 to make it an A. No. 1 place.

Mrs. C. L. Washburn has been making a brave battle all this week, for she has been very low. Both Mr. Washburn and her father, O. P. Bassett, have been at her bedside constantly at Alma, Mich.

Kennicott Brothers Company are figuring that Christmas will see all the stock required except Beauties and Liberty.

Miss Emmett, who is bookkeeper at Deamud's, is under the weather but expects to be at her desk soon again.

Bassett & Washburn have received

5,000 rooted cuttings of Lillian Pond carnation from S. J. Reuter.

McKellar & Winterson have had very fine poinsettias this week, but one lot was frosted.

Weiland & Risch are cutting Mrs. Lawson in even better shape than usual with them.

Fleischman has had a vase of the new rose Franz Deegen in his window this week.

At E. H. Hunt's they report a very heavy business in the line of holiday supplies.

Walter Kreitling is 40 years old, and it is said that he is a Wurtenburger.

Deamud is still getting in good white chrysanthemums.

Visitors: H. M. Altick, Dayton, Ohio; Myer Heller, New Castle; J. E. Hancock, Philadelphia; Andrew Bather, Clinton, Ia.

New York.

CLUB ELECTS OFFICERS.—TROY THE NEW PRESIDENT.—WANT DUTY TAKEN OFF OF GLASS.—HANDSOME EXHIBITS.—TRADE SOMEWHAT QUIET.—NOTES ON SUPPLIES.—THORNE PLACE IN FIRST CLASS SHAPE.

The meeting of the Florists' Club on Monday evening, December 8, was attended by about forty members, a gratifying number considering the fiercely cold weather prevailing. The election of officers was the principal business. It resulted in the selection of the following ticket: President, J. H. Troy; vice-president, Frank H. Traendly; secretary, John Young; treasurer, C. B. Weathered; trustees, W. F. Sheridan, John Birnie and C. H. Allen. The other nominees for president and for treasurer withdraw their names in favor of the above mentioned candidates for those offices. President-elect Troy, being called upon, expressed his thanks and appreciation of the honor conferred, promising his time and best energies to the service of the club. Frank H. Traendly, John Young, C. B. Weathered, John Birnie and W. F. Sheridan also made remarks appropriate to the occasion. F. Bertanzel contributed, of the premiums won by him at the recent exhibition, \$25 toward the guarantee fund, and this generous action was duly recognized by a vote of thanks from the club. The guarantee fund is being rapidly paid in, already more than one-half of it being in the treasurer's hands. A petition was circulated among the members, to be sent to congress urging a repeal of the duty on greenhouse glass. The club was treated to an oratorical feast on this topic, such as it rarely enjoys, Treasurer Weathered contributing an address both earnest and forcible. It was observed that only one member sat unmoved and unconvinced during his earnest appeal. On the exhibition table was a vase of the Chicago Carnation Company's handsome crimson carnation Harlowarden, to which the award committee gave ninety four points, and Jas. Harshorne, who made the exhibit, was invited to address the club, which he did in a very entertaining manner. Lager & Hurrell also contributed a nice display of orchids. The death of Alex. McLennon being announced, a committee was appointed to prepare resolutions thereon. Four new members were admitted.

Business in the cut flower line is rather quiet and values, as a rule, are unchanged from last week. Notwithstanding the frigid weather, there does not appear to be any shortening up in the supply and as trade has at the same time fallen off its effect has been felt, particularly in the lower grades of roses. The price of

American Beauty shows weakness also, although there are no more in market now than there were a week ago, but they are coming into good crop with some growers and no immediate scarcity is anticipated. Our notes last week on the situation as regards Bride and Bridesmaid roses, violets, and so forth, hold good this week. Lily of the valley is in rather light supply. Orchids are in good demand at prices heretofore quoted, white ones being scarce. Carnations alone seem to have felt the effect of the cold wave and are reduced in quantity but do not yet make any material advance in value. The retailers' windows are brilliant with decorative plants, such as poinsettias, ardisias, solanums, oranges and Lorraine begonias and other evidences of the approaching Christmas season are seen in the holly, ilex and other appropriate material, made into wreaths and bunches in which scarlet ribbon appears in accustomed profusion.

A recent visit to A. L. Thorne's establishment, at Queens, revealed the fact that Mr. Thorne can reasonably count upon a full crop of good roses to be just at its height for the holidays. The big side-hill house, filled with Brides and Bridesmaids, one-year and two-year-old, never looked more promising than now. The carnation houses are, however, fully as interesting to their owner as are the roses. A house of Genevieve Lord and a large number of Cranes will give especially good results for Christmas. Some Scotts are being grown here but it is their last year, as the constitution of this once-popular variety seems to have gone to pieces. Mr. Thorne's cherry-colored seedling, known heretofore as Ballahoo Girl, has been named Le Brun and, although a somewhat small flower, is exceedingly profitable because of its great yield. Lorna and Prosperity are doing well. Norway is somewhat irregular. Manley has developed a peculiar rot in the flowers, evidently of fungous nature. Viola Allen and Floriana are all that could be desired and Cressbrook is doing rather better than expected. White Layde is a stunner. The flowers are of fine form and fragrant and in size they excel Prosperity as grown in the neighboring bench.

Siebrecht & Son's remodeled establishment on Fifth avenue is the best equipped place in the city and considering its location is, on the whole, unrivalled on this continent. In the rear of the spacious store is a conservatory filled with show plants, an elaborate rockery and grotto in the rear. Out of this lead two plant houses stocked with decorative material and connected therewith are ample work-rooms, packing sheds and other conveniences for the carrying on of an immense and rapidly expanding city business.

James King, an up-town florist whose former training in the wholesale district should have equipped him to withstand the wiles of the bunco man, is said to have purchased a few days ago, a bundle of ordinary bricks under the representation that the package contained floor tiles.

Gus Bergman, formerly with John Young, who was compelled by failing health to give up work last year, died on Sunday, December 7, and was buried Tuesday.

The Rosemary Roseries, having greenhouses at Glenbrook, Conn., has opened a retail store on Fifth avenue between Forty-second and Forty-third streets.

John Reimels, of Woodhaven, lost one of his greenhouses by fire on the night of November 27. Loss \$1,000, fully insured.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, **only on consecutive inser-**
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines *only*.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

DON'T "pickle"; stale stock won't fill
the bill at Christmas prices.

A YEAR'S subscription to this journal
would make a very acceptable Christ-
mas present for a faithful employe.

CUSTOMS officers at Detroit have
recently seized consignments of Dutch
forcing stock because of undervaluation.

FREDERIC W. TAYLOR, of the St. Louis
World's Fair, was a visitor this week
and stated that plans for the horticultu-
ral display are progressing favorably.

GOOD cuts are on for Christmas, but
there is never too much good stock for
the holidays; the weakness is in the lower
grades if in any.

THE course of Isaac A. Passmore in
stating the defect found in one of his new
carnations is worthy of the highest com-
mendation. It is an example which
might well be followed by others.

FIANCEE, Dorner's new carnation
recently purchased by the Chicago Car-
nation Company, is being hard pressed
for exhibition honors by the latter firm's
Harlowarden, which was scored ninety-
four points by the New York Florists'
Club last Monday night, December 8.

Write Your Congressman.

House bill No. 15,373, introduced in
congress, December 1, 1902, by Henry C.
Smith, of Michigan, and referred to the
committee on ways and means, provides
for the removal of the duty on window
glass. Every florist should write his
congressman urging its passage.

Broad and Comprehensive.

ED. AM. FLORIST:—I very gladly enclose
\$1 to renew my subscription to your
valuable paper. Frequently there appears
in it a single article well worth more
than the year's subscription. The broad
way in which your writers handle their
subjects gives me pleasure.

Philadelphia. EDW. JONES.

Express Rates.

At the last moment the express com-
panies reconsidered the matter of double
merchandise rates on cut flowers, with
single rate to apply when the shipper
released the carrier from liability for
freezing. Instead they put out a new
tariff making the rate on all cut flower
shipments one and one-half times the
merchandise rate, taking effect Decem-
ber 10.

Greenhouse Building.

Detroit, Mich.—G. H. Taepke, range of
houses.

Secaucus, N. J.—Otto Grundmann, house
24x150.

Dorchester, Mass.—Mrs. E. S. Whitten,
one house.

Noroton, Conn.—Jas. Raymond, one
house.

Groton, Conn.—M. F. Plant, range of
conservatories.

North Pembroke, N. Y.—Wm. Coniber,
one house.

Hopkinton, Mass.—John S. O'Brien,
range of houses.

The Price of Glass.

Window glass of greenhouse size is now
quoted at from "90 and 5" to "90 and
10" off the list, for immediate shipment,
f. o. b. Chicago. The list on 16x24 A is
\$45.50; B, \$41.50. There is a possibility,
but not a probability, of a lower price.
The jobbers' association has declined the
terms recently proposed by the American
Window Glass Company for supplies for
the next few months and the glass trade,
as a consequence, is in a somewhat
demoralized state. There is, however,
little likelihood of a lower price, for the
manufacturers have wages up to an
unprecedented figure, partly due, no
doubt, to the fact that there are in this
country now a total of not far from
4,000 pots with not over 2,300 opera-
tives available. Naturally, there is com-
petition for help.

The Jeremiades of "Job."

The Ginger Jar man has had his atten-
tion called to the latest effort of "Job,"
which undertakes to defend Messrs.
Smith and O'Mara from the condiments
of the season. The prophet may possess
his soul in patience. The Ginger Jar man
and Messrs. Smith and O'Mara under-
stand each other very well and, more-
over, even if it were not so, these gentle-
men are amply able to take care of them-
selves, either with spade or pen. The
Ginger Jar man may not know as much
about growing plants as W. R. Smith,
but "Job" should reflect that it would be
time enough to call the culprit to account
after he had made such a claim, and not
before.

As for the help that aestheticism is to the
growing of plants—which would "Job"
rather do if he wanted to hire a man to
grow plants and he had the choice of
Oscar Wilde or John Ruskin on one side
and on the other such matter-of-fact,
unæsthetic, but successful individuals as
George Anderson or John Burton? The
answer is not so hard as "the lady or the
tiger" question of sacred memory, and it
puts in a nutshell the contention of the
Ginger Jar man on the subject.

The trouble with Patrick is that he
gets intoxicated by the flood of his own
eloquence at times and we should not
take all his remarks too seriously. The
trouble with William is an exuberance of
warm and ardent enthusiasm for lovely
things which puts him out of patience
with those unfortunates who have to
chase nimbly after the dollar. Once upon
a time there was a tramp with a large
bump of ideality and tenderness. Some
one sang, "Oh, Woodman, Spare That
Tree," and ever after that the said tramp
refused to cut wood. The merit of that
tale, of course, lies in the application of
it. There's such a thing as being too
Ideal!

G. C. WATSON.

Bad Business.

The Pittsburg *Leader*, of December 7,
under a "scare" heading, "Beauties at
\$3 Apiece; Enormous Advance in Flow-
ers Expected at Christmas Time,"
printed the following:

The statement was made the other day by an
East End florist that Christmas flowers are
likely to be much dearer this year than last.
Always the price of cut flowers soars high about
the time of Christmas, as the demand is extraor-
dinary and the supply inflexible, but this prophe-
cy was that it will be much higher this Christ-
mas than it has been for several years.

"American Beauty roses that last year sold for
\$24 a dozen will go up from their present price,
\$12, to \$24 a dozen, and in the week before Christ-
mas to \$36 a dozen," said an employe of Randolph
& McLements, in their East Liberty store the
other day. "The Christmas trade has grown
more and more every year, and the supply is not
nearly equal to it, and consequently the prices for
flowers on Christmas day are likely to be very
high this year."

There is more than a column in the
same strain. It may be interesting read-
ing, but it's bad business, even if J. B.
Murdoch does, in alleviation, say a word
as to the relative value of the stock hand-
led by the stores and the street sales-
men. This talk of high prices never sold
a flower at Christmas; but, on the other
hand, it has kept many a prospective
buyer out of the stores, needlessly fright-
ened away.

It is, of course, understood, if one gives
it a thought, that in no line of merchan-
dising is anyone engaged in holding bar-
gain sales in Christmas week, but it is a
fact that many retail florists find them-
selves compelled to sell at a smaller per-
centage of profit at that time than at any
other. Particularly is this true of those
numerous ones who cater to a steady
trade of not the highest class. In every
store the sale of long Beauties is a very
small part of the Christmas business; the
real demand on Beauties is always for
the medium lengths, but not a word is
said about them to the interviewer, and
there are other popular and cheaper
roses.

Newspaper publicity of the right kind
is always to be desired for the flower
trade, but those who talk for publication
should exercise a care. Bear in mind
that there are many things which can
be told the public to advantage. Talk
of the high quality of the stock this year;
point out the popularity of the medium-
priced boxes of cut flowers; show the
plants which are sold at a dollar or two;
above all, preach early buying, for early
ordering, more than any other thing,
will help the Christmas trade.

American Carnation Society.

The Chicago Carnation Company,
Joliet, Ill., registers Crusader, color
bright scarlet, produces two-foot stems
by October 1, is an extra early blooming
and healthy variety, never having shown
any signs of disease. The same firm
registers Chapron, color pure white, a
large full flower the form of which is per-
fect, slightly fringed, an early, free and
continuous bloomer.

Fiancee, registered last week without
description is described as follows: Color
a lively, bright, clear pink, a shade unap-
proached by any variety of carnation at
this time. Growth strong and healthy,
with no superfluous grass, every break
making a rapid advance and producing a
long-stemmed flower. Size from three
and one-half to four inches, with a depth
of two inches. Form nearest to Bradt
but with much greater depth. Stem
always sufficiently strong to hold up the
large flower, average length two feet.

Calyx perfect, of the Albertina type. Blooming qualities the earliest of all, free and continuous throughout the entire season.
ALBERT M. HERR, Sec'y.

Boston.

ZERO WEATHER INTERFERES WITH BUSINESS.—CUTS ON THE INCREASE.—GOOD PROSPECTS FOR CHRISTMAS.—SUPPLY BUSINESS BRISK.—HORTICULTURAL SOCIETY'S PRIZES.—VARIOUS LOCAL NOTES AND A FAILURE.

Boston is experiencing a touch of very wintry weather at present and with the mercury reposing at anywhere from 10° to 16° below zero, as it is to-day, the lot of the flower grower is not an enviable one, even if the coal troubles were not in existence. Receipts of flowers have not shortened up to the extent one would expect considering the temperature of the past few days and the natural inference is that a heavy crop, especially of roses, is about to materialize. If so, then there will be no famine for Christmas. Boxes arriving by express at the wholesale establishments to-day (Tuesday) are more or less damaged in their contents by freezing. This is not always the expressman's fault, as is readily seen when one notes the method, or lack of method, rather, some growers use in packing their flowers. A single thickness of newspaper lining in a plain wooden box is a poor protection against zero weather, yet that is all there is in some instances and if the flowers are ruined the grower has only himself to blame. Business, as a rule, is fairly good, the demand from out of town being fully up to the mark. Portland was a large buyer on Monday on account of the funeral services for the late Speaker Reed.

Outside of the straight cut flower trade the wholesale dealers are very busy. One of the most salable articles just now is cotton wadding and a bundle or two of this useful material goes out with nearly every country order. Shipping cases and other necessary equipments for the holiday trade are being received and stored and the calls for sundry supplies for Christmas use are heavy. Holly is coming in in limited quantity and is unexpectedly good so far. The discouraging reports from the holly districts this season have led to the fear that no good stock would be obtainable, but if the shipments are of the same quality shown in the advance lots then surely nobody can have reasonable cause for complaint.

The last meeting of the Massachusetts Horticultural Society for 1902 was held on Saturday, Dec. 6, at Horticultural Hall and was devoted to the presentation of the annual reports of the several committees. It was announced that the H. H. Hunnewell triennial premium for best-kept estate of not less than three acres had been awarded to C. H. Tenney. The John A. Lowell prizes for best house of chrysanthemums with decorative plants and best house of benched chrysanthemums were won by E. S. Converse, D. F. Roy, gardener. The Edward Hatch prize for best house of fruit was awarded to Mrs. J. C. Whittin. First for house of grapes went to Miss E. J. Clark, and for house of carnations to Patten & Company.

James M. Tuohy, of Everett, East Boston, and 192 Washington street, city, has filed a petition in bankruptcy; assets \$710, liabilities \$1,734.33, the latter being mainly to wholesale florists and cut flower market dealers.

The greenhouse of E. R. Lowe, West Roxbury, was damaged by fire on the

night of December 1, to the extent of about \$800.

Visitors: H. S. DeForest, representing Hitchings & Company, New York; David Gindra, Poughkeepsie, N. Y.

TOPSFIELD, MASS.—A. L. Schwoerbel is leaving shortly for a visit to Germany.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED.—By an A I rose grower. 5 years' experience. Best of references. Chicago preferred. E. care American Florist.

SITUATION WANTED.—By experienced and successful propagator; best of references. Address at once. EXPERT. care Am. Florist.

SITUATION WANTED.—By a good all-around grower of plants and cut flowers, single, 21 yrs. experience. Address C F, care Am. Florist.

SITUATION WANTED.—As good all-around man by good grower of cut flowers; married, steady. Chicago or vicinity preferred. C C, care American Florist.

SITUATION WANTED.—By a young man 25 years of age, single, to take care of a section of greenhouses; place in Chicago preferred. J E, care American Florist.

SITUATION WANTED.—As a traveling salesman for a reliable house in the florist line, the east preferred. Address SALESMAN, care American Florist.

SITUATION WANTED.—By young florist with life experience, good grower of cut flowers and plants, orchids a specialty. German nationality. EMIL BEHNKE, 912 Sheffield Ave., Chicago.

SITUATION WANTED.—As head gardener or foreman, German, 30 years of age, married, A No. 1 references. Neighborhood of New York preferred. Address J. KRAMER, care J. Blair, Ogden Mills, Staatsburg, N. Y.

SITUATION WANTED.—To take charge of a retail place. Good grower of roses and general cut flowers. 12 years' experience; single; age 33. A thoroughly reliable man. Ind., Ill. or Kentucky preferred. Address FOREMAN, care American Florist.

SITUATION WANTED.—As working manager, by a man of push and energy; grower of All Beauties, teas, carnations, mums, violets decorative and bedding plants. Only a first-class, large retail place where things are done right and good wages paid. B B, care Am. Florist.

WANTED. A first-class retail seed clerk, address with recommendations. OTTO SCHWILL & Co., Memphis, Tenn.

WANTED AT ONCE. A good grower to take charge. Steady position to right man. Roses, carnations, violets and plants. Address S H, care American Florist.

WANTED.—Good all-around cut flower grower, single, for a place near Kansas City. Good pay to the right party. Address GROWER, care American Florist.

WANTED. A competent man by Jan. 1 or a little later, to take care of rose section. Must be first-class man and come well recommended. PASTORIA FLORAL CO., PASTORIA, O.

WANTED.—Variation grower; a fine place to the right man, married or single. Answer quick if you mean business. State experience, wages and references. THE MIAMI FLORAL CO. 21 North Main St., Dayton, Ohio.

WANTED. A good experienced man to work in retail department of a Western Seed House. Must be intelligent and have a thorough knowledge of garden and flower seeds, bulbs, etc. State salary expected. Address SEEDS, care American Florist.

WANTED.—A married man of small family, of general experience, capable of taking charge of 12,000 feet of glass, general line grown. House furnished. State wages wanted and give references. None who get drunk wanted. Address JAMES FROST, Greenville, Darke Co., Ohio.

WANTED.—A married man without children, German-American preferred, to take charge of nursery where the growing of small stock for transplanting is made a specialty. Must understand the propagation of hardy shrubs and evergreens from cuttings, be sober industrious and well recommended; \$50 per month and a house. A permanent position to the right party. Address JOS. W. VESTAL & SON, Little Rock, Ark.

FOR SALE.—Horizontal tubular boiler 48x15 with plug hat dome and with 39 3/4-in. flues, very suitable for heating hot houses. Apply to Wisconsin Box Co., Wausau, Wis.

For Sale or Exchange.

Fully stocked greenhouses, 20 miles from Chicago, 25,000 feet of glass; steam heat; paying well; part cash, balance good real estate or time to right party. Address V J 95, care American Florist.

SITUATION WANTED

As Head Gardener, on private or commercial place, by a thorough, competent, reliable, all-around man of 22 years' experience on largest establishment in England, 9 years as head, last 3 years head gardener and rose grower to member of National Rose Society; age 36, married, two children. Copies of testimonials and references on request. Address F H, care American Florist.

WANTED.

A general gardener for private residence with small greenhouse, located in south western state. A married man with small family, or without, preferred. A good and lasting position for the right party. Address K O, care American Florist, Chicago.

GLASS FOR SALE!

We have 350 boxes direct from manufacturer, 16x18 D. S. A., more than we shall use this fall at \$4.50 per box. F. O. B. Grand Rapids, Mich. Will sell all or any part. Address

CHAS. CHADWICK, Lock Box 11, Grand Rapids, Mich.

A PROFITABLE BUSINESS FOR SALE.

Well equipped greenhouse establishment, half hour drive from best plant and flower market on continent. Sold last year 185,000 small ferns. Seven years established. Good reasons for selling. Establishment consists of eight iron-frame houses and four wooden-frame, heated by one ten-section Weathered, one nine-section Furman and three smaller Weathered boilers. Fire proof boiler room, stable, potting shed, eight room dwelling, horse and wagon. Electric lights throughout dwelling and greenhouses. Kerosene engine for pipe-threading and sawing wood. One year's supply of pots on hand. One house of young Kentias, other houses filled with ferns, various sizes, in perfect condition. One and three-quarter acres of land goes with houses. Trolley cars pass door every five minutes. Address J L, care W. J. STEWART, 79 Milk St., Boston, Mass.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAOE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

VISITED CHICAGO: C. R. Kimberlin and Wm. J. Fosgate, Santa Clara, Cal.

THE shortage of red onion seeds is having some effect on the contract prices for 1903.

THE catalogue men are now crowded day and night, completing the copy for 1903 editions.

THOS. J. GREY & COMPANY, Boston, have just installed a handsome tier of the Heller seed cases.

L. L. MAY, at St. Paul, is entertaining his visitors with bobsled rides down the St. Paul hills, a delightful sport.

BEAN deliveries are growing from bad to worse. Many of the scarce wax varieties are held now at \$6 per bushel.

R. H. SHUMWAY, Rockford, Ill., will embellish the title page of his 1903 catalogue with a fine portrait of himself.

VISITED SEDALIA, Mo.—John R. Horn, representing Cox Seed Company, San Francisco; Earl H. Fry, of Rush Park Seed Company, Independence, Ia.

SOME eastern seedsmen report that the use of untrue sorts in the public distribution of vegetable seeds has hurt their catalogue demand for the genuine types.

THE government is reported in want of two good expert seed handlers. They took in some 18,000 pounds of cucumber at a price of about 18 cents in the summer.

IT is reported and believed that the aphid which has proven so destructive to the cucumber vines will not soon be gotten rid of in those sections where it has prevailed.

SANTA BARBARA, CAL.—The number of pampas plumes gathered this season is very much less than for several years, owing principally to low prices and high price of labor in harvesting.

HAGEMANN & MEYER, New York, have dissolved partnership and the business will hereafter be conducted by Mr. Hagemann. Mr. Meyer will form a partnership with Chas. Schwake, who has been for some time in the employ of the old firm.

AT Indianapolis, Helen C. Vail sued S. J. Vail, her brother, for an accounting and dissolution of partnership, later filing a petition for the appointment of a receiver for the Vail Seed Company. The Union Trust Company was named and took possession December 10.

THE labor question is an important one with the California seed growers, the advance being 30 cents to 40 cents per day. The Portuguese laborers get \$1.50 per day, against \$1.40 for the Chinese, while the latter are much more careful seed gatherers. Laborers during the prune picking season received \$1.75 to \$2 per day.

CALIFORNIA growers and their customers are discussing the equities involved in cases where volunteer crops of novelties have been produced and put on the market by the grower without the knowledge or consent of the original owner of the stock seed. The introducing seedsmen is disposed to claim that in case seed should volunteer to grow on fields where his novelty has been grown

he should have the right to order the same plowed under and destroyed and the grower should not let the same grow and produce a crop to compete with the introducer without the latter's consent.

IN RECENT YEARS there have never been too many GOOD FLOWERS for Christmas. Almost always there are too few. We want to impress upon flower buyers, however, that there is no other place where one can be more certain of getting what he wants. We are agents for some of the best and largest growers tributary to the Chicago market. We handle everything in cut flowers in season and our force is ample to handle every order promptly.

We shall have large supplies in all lines for Christmas, no doubt of that, but inquires were never more numerous nor advance orders heavier. Better give us an insight as to YOUR needs. Better write to-day. But if you find you're running short, don't hesitate to send a late telegram or, better yet, call us up on the long distance telephone. Two of them, Central 1999 and Central 1977.

CHICAGO.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

CLARENCE WEDGE, of Albert Lea, has been elected president of the Minnesota State Horticultural Society.

VISITED CHICAGO: Robert George and J. H. Dayton, of the Storrs & Harrison Company, Painesville, Ohio.

AN Illinois concern recently shipped \$6,000 worth of large nursery stock to customers in the vicinity of New York city.

THE large amount of work in progress on private estates is reflected in the call for trees and shrubs of a size for immediate effect.

RAILROAD work has become a not inconsiderable part of the business of many nurseries. The movement toward beautifying station grounds is spreading rapidly.

CALIFORNIA privet, twelve to eighteen inches, advertised in this department by Henry Eichholz, Waynesboro, Pa., was quoted at \$9 per hundred when, of course, \$9 per 1,000 was intended.

THE prospect is almost a certainty for a closer clean-up next spring than has heretofore been known in hybrid perpetual roses. Already several large handlers are sold out on some leading sorts. Prices are advancing.

Big Trees in California.

A determined effort will be made by a number of public spirited organizations in the west to get a bill through congress at this session for an appropriation to purchase the Calaveras big trees in California and have the tract containing these wonders of nature turned into a national park. The preparatory step in this matter was taken at a meeting called by the members of the California Club, at San Francisco, December 8.

At this meeting it was decided that no time should be lost, and it was decided to invite a number of local organizations to appoint from their muster rolls a delegate each, to form a central committee to see that no stone shall be left unturned in endeavoring to get the appropriation through. The big grove of sequoias is on what is known as the Sperry tract, and comprises 2,300 acres of land. Should congress pass the bill, that calls for an appropriation of \$200,000, Robert B. Whiteside, the present owner of the property, would be tendered the money, and should he refuse to accept such a sum condemnation proceedings would at once be instituted.

Philadelphia.

COLD WEATHER AND THE APPROACH OF CHRISTMAS MAKE PRICES JUMP.—GOOD BUSINESS USES UP ALL STOCK IN SIGHT.—BOX PARTY AND DINNER FOR FLOWER HANDLERS.—HELP WANTED.—VARIOUS NOTES.

Winter set in in earnest the first of the week, with a fall of four inches of snow and a fall in the temperature to 18°. This made great holes in the coal piles, small enough at best, but although the expense was great, we hear of no damage from frost, as thus far coal enough has been obtained. The prices of all

grades of flowers have taken a great jump the past two weeks. Special Beauties are now \$6 per dozen, while anything worth having brings \$2. The quality is fine. Teas range from \$6 to \$12 per hundred, with from \$15 to \$18 asked for the best Liberties. Carnations move well at from \$2 to \$5, the latter price for the select Lawsons. Many carnations coming in of late seem to be soft and become sleepy the second day. What is the cause? Violets are getting scarce. In fact they move so quickly that one has to be on the alert to get enough for orders, without thought of stock. Singles range from 50 cents to \$1 per hundred, doubles \$1 to \$1.50. Mignonette sells for from \$3 to \$4, bouvardia \$2 to \$2.50. Valley is in good demand at from \$3 to \$4; it has nearly all to be cut too soon to supply the great demand for it. Cattleyas are much sought for at 50 cents each.

The box party given at Keith's theatre by Pennock Brothers to the employes of the growers and commission men with whom they do business, and the dinner which followed, was quite a success. After the dinner speeches and songs were in order. Those in attendance were Lidden Pennock, host; Edgar Upton, Ralph Shrigley, Edward Smith, William Thompson, Charles Smith, Samuel Lily, John McIntyre, Ernst Frame, W. J. Moore, E. Bernheimer, Wm. Stephens, Paul Klingspooon, "Billy" Anderson and Benjamin Starkey. This is surely a city of brotherly love and now, since H. H. Battles has taken care of the commission men with a dinner and Pennock Brothers have gone him one better, with a box party in addition, it will be in order for

the rest of the retailers, the "also rans," to take the growers in tow and give them, well, let's see, yes, a ball for them and their families, with decorations, music and plenty to eat, with a light brew of John Westcott's punch to settle it. Let everybody get out his dress suit, for nothing will be too good for this occasion.

Wanted a receipt for placing a white, waxy protuberance, delightfully fragrant, of a more or less irregular shape, on the end of a branch with glossy green leaves; when complete it is commonly called gardenia, but without the protuberance aforesaid it has been called by various synonyms generally mentioned sub rosa. Apply to Robt. Craig & Son, W. K. Harris and Robt. Scott & Son, all of Philadelphia. A liberal reward is waiting, with special inducements on the side. P. S.—The offer is to be withdrawn after February 15.

The prospects for Christmas are very bright. Already all the choice stock has been booked and the growers will not have much to do but see that it is safely delivered. Messrs. Craig and Harris both say they have never had such an advance sale. Godfrey Aschmann says his Christmas stock is fast going and it promises to be his best year.

The chrysanthemums are all gone. They sold out pretty clean this season and, while all are glad they are out of the way, they will be anxiously looked for in the fall of 1903.

Things are moving nicely at the market, the list of growers is gaining and those who were timid at first are now glad they made the move.

Kift	158	153	168	479
Total	731	772	782	2285

Alexis Club.....2298

The Florists' team is now tied for first place with the Pan-Americans. The next match will be with the Eagles, December 16. Dunham broke the record on the home alleys December 6, with a score of 274, the best previous record for two alleys being 259. W.

At Chicago.

On the evening of December 8 the pride of the McKellar & Winterson team, hitherto undefeated, was humbled by the retailers, who beat them two out of three, but the vanquished team had the satisfaction of winning on total pins for the three games. Following is the complete score:

RETAILERS.	1st	2d	3d	T'l
Hauswirth	148	2 2	174	524

Mrs. Brady	65	35	66	167

On Sunday morning, December 14, at 10 o'clock, there will be a meeting at McKellar & Winterson's, which all bowlers are urged to attend. It is for the purpose of making arrangements for the Milwaukee contest.

Shooting at Philadelphia.

The third shoot of the series for the Florists' Gun Club officers' trophy, December 9, was well contested and developed some good scores. Anderson, Dorp and Winchester were high men. The conditions were fifty targets, twenty-five

over the Sargent system and a like number over the Magautrap, handicap added to the score. The scores follow:

Name.	Sargt.	Mag.	Hde.	Total
Massey	17	18	12	47
Sanford	22	20	1	46
Bell	10	17	13	40
League	13	15	14	42
Clark	15	19	9	43
Baugh	3	5	8	8

Anderson	22	22	8	52
Westcott	17	20	10	47
McMaster	18	20	8	46
Winchester	22	24	4	50

Following the contest the Board of Governors held a special meeting, at which the officers were appointed to arrange details for the 1903 tourney of the Pennsylvania State Sportsmen's Association. The committees appointed were: Programme, George Anderson, A. H. Fox, Will. K. Park; trophies, V. V. Dorp, W. Tillinghast; grounds, J. K. Starr, A. L. Whittaker; corresponding secretary, W. L. Colville. The new flag pole at the club house at Wissinoming has been erected and a committee appointed to arrange for a complimentary dinner to the donor, C. J. Renear. W.

St. Louis.

MARKET ERRATIC.—STOCK GENERALLY VERY GOOD.—NOTES OF DOINGS HERE AND THERE.—VISITORS.

The market is somewhat quiet for this time of the year, although some very good stock is sent in. American Beauties are choice and as high as \$5 is paid occasionally, but the majority of the stock is sold at from \$2.50 to \$4 per dozen. Some very fine Golden Gates, Meteors, Brides and Bridesmaids are seen and the fancies are all found in these four varieties; \$3 to \$8 per hundred is received for them. In carnations there is quite a list of fancy stock; \$1 to \$3 is the range of prices. Violets still remain very scarce and are bringing from \$1 to \$1.50 per hundred. Narcissi and Romans are on the regular list now and bring from \$2 to \$3. Some fine smilax has been in evidence of late.

The Michel Plant and Bull Company has some very fine Gloire de Lorraine begonias and a fine lot of young rubbers. They have some very fine young holly trees in pots that make a fine show. They are doing a great deal of landscape work this year and have a nice lot of shrubs and trees on hand to do it with.

Holly is to be seen at some of the stores and it is very fine. It is selling at \$5 per case. A great deal of lycopodium can be had at low figures.

E. W. Guy and G. W. Grossart, of Belleville, report business as having been very good.

F. W. Weber, late with Geo. M. Kellogg, at Kansas City, is back in St. Louis.

Visitors: Geo. M. Kellogg, Pleasant Hill; John Schnabel, Columbia; L. R. Allen, Murphysboro, Ill. R. J. M.

Newport, R. I.

HORTICULTURAL SOCIETY CHOOSES NEW PRESIDENT.—COLD WAVE.

At a meeting of the Newport Horticultural Society the following officers were elected: President, Robert Laurie; vice-president, James Sullivan; second vice-president, Colin Robertson; secretary, David McIntosh; financial secretary, Joseph Gibson; treasurer, Andrew T. McMahon; executive committee, James McLeish, Sr., Arthur Griffen, James Boyd, James Robertson, Bruce Butterton, Alexander Fraser, James Sullivan and Alexander McLellan.

Some of our oldest residents do not recollect a cold spell within fifteen years equal to the present, the temperature having been 5° below zero. Coal is up again, to \$11 a ton. C. J. M.

TAUNTON, MASS.—Ed. Powell, who has for several years held the position of head gardener for W. J. Clemson, has resigned and gone to Redlands, Cal., on account of ill health.

LENOX, MASS.—The Lenox Horticultural Society at its last meeting elected the following officers: President, E. Lundberg; vice-president, S. Carlquist; secretary, Fred. Hermans; treasurer, A. J. Loveless.

Chinese SACRED LILIES FOR 1903.

We beg to announce to the trade, that notwithstanding rumors to the contrary, we shall continue to handle this article and unless the next crop is a failure, which was not the case this season, we shall guarantee **FULL and COMPLETE DELIVERY** of any and all orders our friends may favor us with, the same as we did this fall.

CORRESPONDENCE INVITED.

For Christmas Decorations

I HAVE A SPLENDID CROP OF

Asparagus Plumosus Nanus

GOOD HEAVY STRINGS, 50c EACH.

W. H. Elliott,

Brighton, Mass.

Grand Island, Neb.

BUSINESS GOOD AND PROSPECTS NEVER BETTER.—STOCK DOING WELL.—GOOD CUTS ARE ON.

From one house of carnations with 1,800 plants, Brewster & Williams have picked, from October 1 to December 8, 5,113 blooms. Joost is the leader in pink, with Genevieve Lord a good second. Crane leads for red, White Cloud for white and Gomez for dark.

Thanksgiving trade was the best on record, everything cleaned up. Brewster & Williams keep increasing their planting of single-stem chrysanthemums every year, but it was the same story this year, all sold, and it means a few hundred more next year.

We have had some pretty snappy weather for the last week, quite a snowfall with the temperature down to 8° below zero. It caught Ellsworth Brothers napping.

The outlook for Christmas trade is good, and by the looks of things there will be enough stock to go around.

Ed.

Orange, N. J.

The annual election of officers of the New Jersey Floricultural Society was held at the December meeting. Those chosen were the following, all being unanimously elected: President, George Smith; vice-president, Wm. Bennett; secretary, Joseph A. Manda; treasurer, Malcolm Macrorie. A larger attendance than usual was present, attracted in part by the entertainment provided, which consisted of a stereopticon exhibition of flowers and views in celebrated gardens of England, France and Germany, with explanatory remarks by J. B. Davis, chairman of the entertainment committee. The slides were largely the work of John McGowan, who is an expert in photography as well as floriculture. All were greatly pleased and expressed the conviction that no better feature can be provided than such as this for progressive society meetings.

Eric, Pa.

Real winter is here and it presents many difficulties to the greenhouse manager. Trade is very good and it looks as though the holiday season would be a record-breaker.

S. Alfred Baur has purchased twenty acres of land adjoining his place and will, in the spring, erect an additional 50,000 feet of glass. There will be eight houses 30x200 feet, which will give a total of 125,000 square feet available for growing.

SECAUCUS, N. J.—Otto Grundmann is adding another house 24x150, of best cypress, 16x24 glass and steam heated. Emil Dubelbuss, of West Hoboken, is doing the work.

Paper White Narcissus,

Providence, R. I.

TRADE QUIET.—ZERO WEATHER SHUTS OFF TRANSIENT BUSINESS.—HOLLY TRADE IN HANDS OF PRODUCE DEALERS.

The week of December 1 found trade easing off, Friday and Saturday being particularly quiet days. The sudden severe cold since then has suspended the loose flower demand and increased the call for funeral designs. Stock continues scarce, especially carnations and violets. John Macrae was about the last to clean up on chrysanthemums, but they were moved with a rush when the trade needed them for designs. J. G. Jensen still holds over a good lot for Christmas sales.

Good holly is now on sale at various produce dealers' at fair rates. These people handle a good quantity of Christmas greens and have greatly diminished the shipment of holly from the New York and Boston wholesale florist houses. In a way they have also cheapened the call for it, and the retail profit is not satisfactory. M. M.

Minneapolis.

STOCK SCARCE AND PLENTIFUL ITEMS SELL WELL.—LOCAL NOTES OF VARYING INTEREST.

Stock has been limited the past week, except carnations, which are about in goodly numbers but find ready sale on account of other shortages. Tea roses are showing the effect of the dark weather, their color being very inferior, and Beauties and violets are hardly to be had. The call for greens has commenced.

A. S. Swanson had a very attractive display of maidenhair ferns and Roman hyacinths in his window last week.

H. Dunn, of Chicago, is here to take charge of the cut flower store of Northrup, King & Company.

H. E. Philpott, of Winnipeg, Manitoba, was in the city buying supplies for Christmas. C. F. R.

BELLEVUE, O.—I. Husbands has his stock in particularly fine shape this year, a house of carnations being especially noticeable.

CONNELLSVILLE, PA.—P. R. DeMuth & Sons have a nice stock and are building up a good trade, both locally and in surrounding towns.

SALT LAKE CITY, UTAH.—The city council has authorized the solicitation of plans and estimates for a new greenhouse at Liberty Park to cost not more than \$5,000.

NEW FANCY CARNATION "TIGER."

Color. orange, striped pink, effect of Sunrise rose.
Size. 2½-3½-inch, stem 2-3 feet, straight as a wire.
Habit every shoot going to flower at once, dark green foliage; no supports necessary.
Calyx, extra strong; seldom splits.
Flower, type of Mayol Pingree.

Notes. It is an early, continuous and free bloomer. Shown and won prizes at Kansas City, New York and Baltimore (this fall).

Be your own judge. Sample ½ doz. for 50c prepaid. The 50c you can deduct from your first order.
12 for \$1.50; \$10.00 per 100; \$75.00 per 1000. 25 at 100 rate, 250 at 1000 rate. 10, 0 ready Jan. 1st.

Washington, D. C.

COAL FAMINE IS RELIEVED.—REGULAR BUT LIGHT SUPPLIES NOW ARRIVING.—PERSONAL AND TRADE NOTES.

Wm. F. Gude was instrumental to a great extent in breaking up the coal blockade, visiting Philadelphia twice in the last few days, but the retailers are still holding up the prices and only dealing out fuel in homeopathic doses. Anthracite is cheaper than bituminous. The former is now coming in at the rate of fifty to seventy-five carloads a day.

A new flower store, The Rosery, incorporated, has been opened at 1110 F street N. W., adjoining the Columbia Theater. It has been fitted up very neatly and from all appearances will make a good stand. C. W. Wolf is in charge.

December 5 the first snow storm of the season passed over Washington and the following few days were cloudy, followed by a cold wave.

Fred. W. Miller, with A. Gude & Bro., is at Garfield Hospital, suffering from typhoid fever.

Visitors: Geo. W. Park, Libonia, Pa.; B. Eschner, of M. Rice & Company, Philadelphia, Pa. P. G.

Lowell, Mass.

BUSINESS GOOD.—SUPPLIES SHORTENED BY COLD WEATHER.—FUEL STILL VERY SCARCE.—FAMOUS OLD PLACE TO CLOSE.

The most important event of the past week was the change in the weather, from about summer heat to zero, with plenty of snow. It has hampered business a great deal, especially those who had palms out on decorations. Some of the growers were caught napping and in some instances it was necessary for growers to help others to prevent them from freezing up. Some are still burning wood, being unable to buy coal.

The greenhouses established more than a quarter of a century ago by Edwin Sheppard will soon be a thing of the past. It was once the finest commercial place in all New England, but the houses are being dismantled and preparations being made to close them up.

The extremely cold weather has affected the price of stock, shortening up the supply considerably. Business has been good, owing to many funerals. The green goods men are very much in evidence. A. M.

SEDALIA, Mo.—The Archias Seed Store has made preparations for a much larger Christmas trade than usual.

BATAVIA, N. Y.—Ruestow Brothers, in the town of Greece, lost \$2,700 on November 30 by the explosion of a boiler.

NIAGARA FALLS, N. Y.—The King Construction Company has closed a contract for four new houses in Denver and is already shipping the material.

Indianapolis.

SOCIETY MEETS AND PLANS DOUBLE SESSION.—EXHIBITS TO BE REWARDED.—A VISIT TO NEW CASTLE.—VARIOUS NOTES.

The December meeting of the State Florists' Association was very sparingly attended. Wm. Billingsly, John Heidenreich and John Hartje were appointed a committee to make preparations for the annual meeting of the association, which will take place in January. The meeting, as usual, will be held in two sessions. Between the sessions the members will be entertained at supper. Connected with the meeting an exhibition will be held, at which a silver and bronze medal of the Society of American Florists will be awarded for the two most meritorious novelties. Other worthy exhibits will be awarded the certificate of the S. F. A. I. At the last meeting Baur & Smith showed a fine vase of their new pink carnation, Indianapolis.

Nineteen Indianapolis florists visited New Castle December 2. As the weather was very unfavorable, the party visited only the South Park Floral Company. They are full of praise of their treatment there. Carl Sonnenschmidt visited Bentley & Company and says he feels well repaid for braving the rain.

Bertermann Brothers' poinsettias are very fine this year. They also issued a very artistic booklet telling their customers about house plants and cut flowers, how to keep them, when they are in season, and so forth.

The Indianapolis Flower and Plant Company finds that the roses make more blind wood than usual this season. The carnation houses are in very good shape.

Roses are coming on in good shape. Violets are rather scarce, but of very fine quality. Carnations of the best grade are not too plentiful.

H. W. Riemann is having fine success with cyclamens and cinerarias this year. He also has the best looking Cypripedium insigne in this city.

J. J. B. Hatfield is making exploring expeditions around this city in search of a ten-acre plot for a country home.

P. Conway, during an afternoon's hunting trip, bagged twenty-three rabbits and several squirrels.

A. Wiegand & Sons have several hundred Begonia Gloire de Lorraine that could not be better.

Visitors: J. A. E. Haugh, Anderson; Vernon D. Grave, Richmond. H. J.

PLEASANT HILL, Mo.—A. Larsen welcomed a big baby boy into his home last Sunday.

If cuttings not satisfactory on arrival, return immediately when money will be refunded.

WESTERN CARNATION CO., Loomis, California.

Carnation Gov. Lowndes.

Color, pure white. Size, 3 to 3 1/2 inches in diameter. Calyx, spreading at the top, making it practically non-bursting. Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated, and beautifully arranged, forming a full, rounded center. Odor, is very sweet and particularly pleasing. Stem, 19 inches to 2 1/2 feet during the season, and always strong enough to carry the large flower erect. Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily, and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties. Productiveness, extremely free flowering. More productive than any other large white. A profitable and high grade commercial variety. Price, \$2.50 per doz.; \$12 per 100; \$100 per 1000. 50 at 100 rate; 500 at 1000 rate.

Before You Come Too Late!

Flowering and Decorative Plants for Christmas and New Year.

Azaleas, in bloom, 75c, \$1.00, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00 and \$4.00 each; also by the dozen, 50 Standards of Vervaneana at \$5.00 each; very fine.

Primula Obconica, in bloom, \$1.50 per dozen. Erica Vilmoreana, exceptionally fine, flowered this year, 50c, 75c, \$1.00, \$1.35, \$1.50, \$1.75, \$2.00, each; also by the dozen. Some ready now.

Erica Regerminans, new, very fine, white, tinted lavender, sweet scented, 25c, 50c, 75c and \$1.00 each; also by the dozen and 100. Some ready now.

Erica Fragrans, white with brown center, 75c, \$1.00, \$1.50, \$2.00 and \$2.50 each; also by the dozen and 100. We grow for Christmas this season two 100-foot houses of Ericas. We have a limited stock of Erica Regerminans in full bud which can easily be grown to bloom for Christmas. They are showing color already. For the Japanese little fancy pots, etc., miniature fellows, 3-inch pots, at \$10.00 per 100.

Jerusalem Cherries, well berried and colored, fine bushes, \$1.00 and \$5.00 per dozen. Selected stock, \$6.00 per dozen.

Araucaria Glauca, each \$1.00, \$1.25, \$1.50; also per dozen. Public calls them Christmas trees.

Araucaria Excelsa, each, 75c, \$1.00, \$1.25; also per dozen. Public calls them Christmas trees.

Large Daisy Plants, in bloom, each \$1.50 and \$2.00. Good for filling Conservatories. Also by the dozen.

Boston Ferns, 50c, 75c, \$1.00, \$1.25, each. Fruit-d Orange, only a few at 25c, 75c, \$1.00 and \$1.50 each. Not by the dozen.

SPECIAL NOTICE.

As we have to pack exceptionally carefully to prevent freezing, add one dollar to your order for case and packing up to \$25.00; over that add \$2.00.

Cash must accompany all orders.

Dormant plants of all the above flowering stock can be had also, for parties wishing to grow plants into bloom themselves for later sale. For these we make no charge for packing.

Write for illustrated catalogue, which we will send free of charge.

Palms in all sizes by the 100. Ericas a Specialty.

Rose Growing in Hawaii.

Donald MacIntyre, superintendent of the Moanalua Gardens, at Honolulu, Hawaii, writes that he has been cultivating roses under glass for four years with quite satisfactory results. Mr. MacIntyre says: "The flowers are finer in texture, larger in size and better colored than those growing out of doors. In a properly constructed glass house during the greater part of the day the temperature is lower than out of doors. The atmosphere can be controlled, the plants protected from wind and rain storms and are beyond the reach of the Japanese beetle.

"It is a well-known fact, however, that roses (teas, not hybrid perpetuals) could be well grown out of doors in the Hawaiian islands were it not for the ravages of what is known as the Japanese beetle, a species of chelolanthe, which will completely strip large rose bushes in two or three nights, and will stand by to take the young leaves as they appear." Mr. MacIntyre further says that his rose house is beetle proof, the roses are grown in pots and do well, LaFrance being one of the leading varieties grown.

GEORGE MORRISON.

Evolution of the Tuberous Begonia.

In the year 1864 Pearce sent home to Messrs. Veitch & Sons, Begonia Boliviensis, in 1866 Pearce followed, and Veitch in the same year, says the *Journal of Horticulture*. Shortly afterwards John Seden (of Veitch's) raised the first hybrid, a cross between B. Boliviensis and B. Veitchii, which was named after him—Sedeni. Chelsoni was another of the earliest hybrids. B. Gloire de Lorraine appeared in 1884 from crossing B. Socotrana with B. Dregei. B. Socotrana and the tuberous begonias have given rise to the winter-flowering race.

WINCHENDON, MASS.—Thomas White has rented the greenhouses of Sidney Fairbank, on Central street, and will conduct his business there this winter.

CARNATIONS

ROOTED CUTTINGS.

- ETHEL CROCKER\$10.00 per 1000
- DOROTHY, NELSON, CRESSBROOK, ENQUIRER, QUEEN LOUISE, ALBA, LORNA, HER MAJESTY, APOLLO, ESTELLE, ADONIS, MORNING GLORY, GAITY, MRS. HIGINBOTHAM, PROSPERITY, ROOSEVELT.

Let me estimate on your orders, and please state how many of each variety will be wanted and when they are to be delivered.

ALBERT M. HERR, LANCASTER, PA.

Miss Louise

Faber

The Longest Stemmed and Most Fragrant Carnation in Existence

Stems measure from 3 feet 6 inches to 4 feet. Flowers are of a beautiful pink shade, similar to a well colored Bridesmaid rose and average 3 to 3½ INCHES. Continuous bloomer when once started and calyx never bursts. Will be distributed the coming spring. Prices—\$2 per 12; \$10 per 100; \$75 per 1000; \$500 per 10,000. Orders booked for FEBRUARY delivery from now on.

FICK & FABER, SAN MATEO, CAL.

SEEDLING CARNATION, President MCKINLEY.

Winner of the \$100 prize at Kansas City Flower Show in 1901 and 1st on vase of 100 dark pink at Kansas City in 1902. This is what Edwin A. Kanst, one of the awarding judges, said of it: "President McKinley is a splendid flower, the petals are perfect and it is well built. The color is deeper and brighter than the Lawson, and the coloring is more distinct. The peculiar purplish tinge in the Lawson is absent from the President McKinley. It will become a favorite carnation."

This variety, like its parent, Dorothy, is wonderfully free, also very early and an excellent keeper and shipper. Rooted cuttings ready Jan. 1, 1903. Price, \$2 per doz; \$12.00 per 100; \$100 per 1000.

EARLY STRUCK CUTTINGS of all the leading varieties of Carnations; also Chrysanthemums and Roses. We guarantee our stock to be satisfactory. Write for price list.

E. T. GRAVE, Richmond, Ind.

BUSINESS GOOD AND STOCK IMPROVING ALL ALONG THE LINE.—COAL QUESTION STILL A DIFFICULT ONE.—DOINGS OF THE GROWERS AND OTHERS.

We are now in the midst of our usual winter business, enjoying good, steady trade and very cold weather. Stock has improved both in quality and quantity. Brides and Bridesmaids have attained their winter standard and from now on will be well worth the money asked for them. The new price list just issued classes these, with Meteor and Morgan, at \$12 per 100. Beauties have also been picked up and are quoted at \$30 per 100. Carnations continue in good supply. Lawson, with its fine color and rigid stem, is in greatest demand but Prosperity seems favored by the lady customers. This variety has been very productive this season and is no longer an enigma to the growers. Other varieties are all doing well and the plants in full bud much resemble fields of timothy before the mower has been through. Lily of the valley is doing well. Callas are becoming more plentiful and bulbous stock is helping out for funeral work.

Hard coal at \$10 per ton, and only procurable in half-ton lots, is not making things easy for the small grower, with the thermometer at 7° below zero. Most of them are using soft coal slack, which they claim melts away, besides keeping them up all night.

John Burton, of Philadelphia, and John N. May, of Summit, N. J., are visitors here and well pleased with the progress of Canadian establishments, pronouncing the stock in this vicinity the best seen in their travels, which have been extensive of late.

From the appearance of the roses grown by W. L. Lindsay, of Tilsonburgh, he is making rapid strides in this branch of the business. His Liberty, Brides and Bridesmaids are very well grown, having good stems and fine buds.

Carnations from London, from Fred. Dicks, are seen in the city. One of his own seedlings, Rosy Morn, a deep cerise in color, is well liked. His Marquis and Flora Hill are extremely fine.

Louis I. Vair is still shipping some good late varieties of chrysanthemums. Mrs. Jerome Jones, as he grows it, with a good healthy blush, is very desirable and sells on sight.

E. Grainger, of Deer Park, has opened a branch store in Yonge street arcade. It is rather an out of the way place but he expects his good reputation to bring him customers.

There will be a meeting of the Florists' Club in St. George's Hall on Tuesday evening next. This will be an important meeting, for officers will be elected for the coming year.

Harrisii are not yet coming in and there will be very few around for the holidays. Gloire de Lorraine begonias are also scarce and eagerly sought after.

The College Flower Shop is the new name at 445 Yonge street.

Visitors: R. H. Wright, Ottawa, Ont.; Wm. Breitmeyer, Detroit, Mich., and E. Walker, Hamilton, Ont. H. G. D.

Cincinnati.

SYMPATHY FOR A CRAFTSMAN IN SORROW.—TRADE GOOD AND STOCK SHORT OF THE DEMAND.—A FINE DECORATION.—NOTES.

Mrs. John Lodder, of Hamilton, O., passed away on Monday, after a lingering illness. The funeral took place Wednesday and quite a number of the craft from this city attended. Mrs. Lodder was always interested in anything that pertained to gardening and nothing was too much for her, if it helped to elevate the business. Much of Mr. Lodder's success is due to her efforts, and her loss is a sad blow. The floral tributes at the funeral filled an entire room. The Cincinnati Florists' Society sent a fine crescent wreath and bunch.

Trade is very good and there is not enough stock for orders. The demand is for roses, carnations and violets, of which there are not near enough to go around. The stock received, however, is very good in quality. Bulbous stock is plentiful, such as Romans and Paper Whites. Lily of the valley was a little scarce, owing to the fact that George & Allan were rushed on orders for it. This firm has also been sending in some exceptionally good *Harrisii* lilies, which are always sold in advance.

A. Sunderbruch's Sons had a large dinner at the Queen City Club last Saturday, using 1,400 American Beauties, which of course had to come from Chicago. Good judges say that it was the finest decoration ever put up at this fashionable club.

J. A. Peterson left for Washington Tuesday. He intends to visit Baltimore, Philadelphia and New York before returning.

Martin Reukauf, of Philadelphia, was in town this week. D.

MOUNDSVILLE, W. VA.—The greenhouse and attached workroom at the penitentiary were destroyed by fire December 6.

SPRINGFIELD, MASS.—Hitchings & Company are building a fine iron frame conservatory here for Dr. Perrine.

Plants FOR THE Holidays

ARAUCARIA EXCELSA. We have the largest stock in the country, May importation, raised from top cuttings only. 5½ to 6-inch pot plants, from 20, 22, 23, 24 and up to 26 inches high, 3, 4 and 5 tiers, 70c, 75c, 80c, 90c and \$1 each. Our specimens are perfect beauties, as broad as they are high. 6-inch pots, 5 to 6 tiers, very large, prices very low, for we must move them to make room for Easter plants, \$1, \$1.25, \$1.50 to \$1.75 each.

A BIG MISTAKE you make if you try another firm, because we are specialists and are large importers and carry strictly the largest and cheapest stock of *Araucaria Excelsa*.

AZALEAS for Christmas, in bud and bloom, are showing color now and will be right for Christmas. Only large, healthy plants, which will force successfully, no small ones. *Vermiana*, Simon Mardner, double pink; *Deutsche Perle*, double white. 60c, 75c and \$1 each.

KENTIA BELMOREANA and **FORSTERIANA**, 6-inch pots, first-class stock only, 3 to 4 years old, from 25 to 36 inches high, only 75c to \$1 each.

FICUS ELASTICA, 6-inch pots, \$3, \$4 and \$5 per dozen; specimens 36 inches high, \$6 per dozen.

CHINESE PRIMROSES, very bushy, in bloom and bud, only \$1.80 per dozen; 4-inch, also large and bushy, at the rate of \$7 per 100.

CALLA LILIES, 6-inch pots, 25 inches high, 20c.

ORACAENA BRUANTI, 25 inches high, green and full of leaves from top to bottom, \$5 per dozen.

BEGONIAS in variety, 6-inch pots, \$3 per dozen; 4-inch pots, \$1.20 per dozen.

Cash with order please. To save express mention if pots to be taken off.

First-class balls, 5 inches in diameter..... 2.00 per doz.; 15.00 per 100

HENRY A. DREER, 714 Chestnut Street, PHILADELPHIA, PA.

Pittsburg.

TRADE ACTIVE AND STOCK IN GOOD SHAPE. —GREENS DELAYED BY FREIGHT CONGESTION.—A VARIETY OF PERSONAL AND TRADE DOINGS.

Cold weather and good business are what we have been wishing for and they are here. Debutant parties are daily affairs and each succeeding debutant receives more flowers than the one of the previous day. This custom brings a great deal of profit to the florists, for each individual investment ranges from \$5 to \$50. Liberty, Beauty, Maid and Morgan are especially fine at present. Harrisii lilies are very scarce. Cattleyas, cypridiums and gardenias continue in demand. Violets are the surest seller we have. Valley is having its run, also, and we have to draw on the east for our supplies of both.

The market stands are packed with holly, laurel and ground pine. Those who handle Christmas trees may have difficulty in securing their consignments, as the great freight congestion still exists at Pittsburg.

John Bader has a fine lot of Gloire de Lorraine begonias and will have a number of azaleas for the holidays.

Loew & Koehrig have secured two buildings for the display and sale of holiday greens.

W. R. Mambeimer, late of Chicago, has taken a position with Mrs. Williams.

Howard Carney is again with the Pittsburg Cut Flower Company.

William Diamond has taken charge of L. I. Neff's Homestead store.

Koerbel Brothers, of Jeannette, Pa., have completed their new house.

Charles Koenig will have a large cut of Harrisii for Christmas.

Sidney Gibbs has re-opened his store in Carnegie. E. L. M.

TROY, N. Y.—On December 9 fire did \$700 damage at the greenhouses of John V. Robbins.

THE Gardeners' Chronicle.

A Weekly Illustrated Journal.
ESTABLISHED 1841.

The GARDENERS' CHRONICLE has been for over SIXTY YEARS the LEADING JOURNAL of its class. It has achieved this position because, while specially devoting itself to supplying the daily requirements of gardeners of all classes, the information furnished is of such general and permanent value that the GARDENERS' CHRONICLE is looked up to as the STANDARD AUTHORITY on the subjects of which it treats.

Subscription to the United States, \$4.20 per year. Remittances to be made payable to H. G. COVE. OFFICE:— 41 Wellington St., Covent Garden, London, England.

NOTICE.

THE MODEL PLANT STAKE COMPANY, formerly of Brooklyn, N. Y., has removed to 208 Jersey St., Harrison, New Jersey, and is now The Parker-Bruen Mfg. Co.

The Model Extension Carnation Support.

Flushing, Long Island, Dec. 11th, 1901.

MR. THERON N. PARKER, Brooklyo, N. Y.

Dear Sir— I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER, Harrison, N. J.

Dear Sir:— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support
Yours truly

SEASON A PROSPEROUS ONE.—STOCK IN VARYING SUPPLY.—GOOD PROSPECTS FOR CHRISTMAS.—VARIOUS NOTES.

All things considered, a glut at one time and a shortage of flowers at another, business has been up to the average, with good prospects for a brisk Christmas trade. Chrysanthemums sold well, the medium sized ones being principally in demand. E. W. Guy has his place in fine condition, his carnations, of which he makes a specialty, doing particularly well. Joost is still the favorite here, being ahead of its rivals in that class. Crane and America are likewise grown profitably, while Flora Hill, White Cloud and Queen Louise are the dependable whites. With the additional two houses built during the past summer, Mr. Guy is well equipped to grow carnations.

A. S. Halstead, of the St. Clair Floral Company, has purchased Wm. L. Hucke's range of houses, which, in addition to his own extensive place, will enable him to grow stock on a large scale. While growing a general stock for the retail trade, carnations receive special attention. Among the different varieties I noticed a white seedling which is a decidedly fine producer, the flowers being pure white and of fine form. Another thing that attracted my attention was the new pink geranium, a seedling of J. M. Garr, and Queen of the West, which from all appearances, bids fair to be a welcome acquisition.

Carnations at Henry Emmons' do not seem to show the effect of the hard times they passed through in the field, having picked up since being housed in a way to surpass all expectations. While the crop, under the circumstances, has not been as heavy as it might have been, they will yield well for Christmas. White Cloud is the favorite here among whites and certainly does remarkably well.

A. G. Fehr reports a good, steady trade. His general stock has never been finer and from all indications he will have a good crop of roses for Christmas. Mr. Fehr grows quite a quantity of Asparagus plumosus plants for the wholesale market.

NOTES.

PURCELLVILLE, VA.—A. B. Davis & Son have their range of 40,000 feet of glass in excellent shape. The carnations never looked better.

THE HOSE CONNECTION CO., Kingston, R. I.

New Castle, Ind.

PARTY FROM THE METROPOLIS INSPECTS ROSE-GROWING PLANTS.—WELL PLEASED.

On December 2 a party of nineteen Indianapolis florists accepted the invitation of the Messrs. Heller and spent a day in New Castle. The weather was most unfavorable but the party was hospitably entertained, although the tour of inspection was cut short, only one or two of the visitors braving the storm to see the Reinberg & Weiland, Bentley and Dittman places, each of which would well repay a visit, particularly at this season.

The range of the South Park Floral Company was never in better shape. The usual methods of growing have been somewhat departed from this season, with the result that the big autumn cut has been retarded, to come in mid-winter it is hoped, and present indications are very favorable. Of course there was much interest in the new yellow rose, Franz Deegen, which looks a winner.

At noon the visitors were taken in carriages to the hotel, for dinner, followed by a session at pool, billiards and cards.

Buffalo.

BUSINESS BRISK AND STOCK NOT IN LARGE SUPPLY.—PERSONAL AND TRADE DOINGS OF LOCAL INTEREST.

After a hard tussle the B. F. C. had a meeting and outside of a little business the usual seven talked it over and wondered why the attendance was not larger. It could, or should, be answered. Why not make it a subject for a meeting?

Trade is very fair and stock is scarce, for the weather is unfavorable. Violets seem to show the effects of cold and darkness very much.

Miss R. M. Rebstock had a large wedding decoration last week and of course acquitted herself creditably.

L. H. Neubeck has a good lot of stock that will be very salable for Christmas.

J. H. Rebstock is making a fine display of Gloire de Lorraine begonias.

Funeral work has kept the down town stores busy this week.

Recent visitors: Messrs. Walker and McLean, Youngstown, Ohio. Bison.

SANDUSKY, O.—Henry Matern reports that the season finds a brisk demand for floral designs of all kinds.

American Florist Advertisements Work Every Day.

CROP INSURANCE. Life insurance is valuable because it guarantees the outcome. "Gurney" Heaters. "BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: THEY GUARANTEE THE CROP. First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them. GURNEY HEATER MFG. CO. 74 FRANKLIN STREET, BOSTON. 111 FIFTH AVE., NEW YORK CITY. Western Selling Agents, JAMES B. CLOW & SONS, Franklin and Harrison Street, Chicago, Ill.

"PIERSON" BOILERS WATER AND STEAM. The Most Complete and Perfect line of Horticultural Boilers OVER 100 SIZES AND STYLES. Iron Frame Conservatories, Palm Houses and Greenhouses, Red Gulf Cypress Greenhouse Material, Ventilating Apparatus, Plans, Specifications and Estimates. Prompt Shipments. THE PIERSON-SEFTON CO. Chrysanthemum Sports.

Under heading of "Notes and Comments," signed "E. L.," I notice reference is made to a report of the National Chrysanthemum Society of England relative to chrysanthemum sports. The writer of that article and myself are the best of friends and agree upon most points, but have been at variance for some years on the question of chrysanthemums sporting in form.

From the illustrations given it would be foolish to doubt men so eminent in this branch of the profession. In looking over the catalogue of the National Chrysanthemum Society, I find but one of these varieties mentioned, namely Mrs. K. A. Mudie. I feel it my duty, however, to say a few words in defense of the position I have taken and to show how easy it is to be mistaken in these matters. Good and competent men make mistakes in this country, and it is presumed they do on the other side of the Atlantic.

In the spring of 1901 a new chrysanthemum was disseminated under the name of Golden Beauty, supposed to have been a reflexed sport from H. W. Rieman. It now appears that the gentleman with whom it originated admits it is the same as Mrs. E. Buettner. Emil Buettner, of Park Ridge, Ill., who disseminated the last mentioned variety in the spring of 1896, says these two varieties are identical. I do not call attention to this mistake with the thought of throwing reflection upon those interested, but simply to show how easily these mistakes can occur. It also shows how soon varieties are forgotten, provided they are not immediately accepted as commercial improvements. The gentleman with whom this variety originated is most conscientious and I am sure he was firm in the belief that the variety H. W. Rieman had really sported to a reflexed form, and the disseminators accepted his word the same as anyone would, without the least intent to do injustice. It was simply a mistake.

I do not think it would be wise for the Chrysanthemum Society of America to accept this theory of chrysanthemums sporting in form, or to permit the committees to pass upon such sports until the variety has been grown in various localities and under varied conditions. We all know that chrysanthemums vary greatly in form. I understand that William Duckham, of Madison, N. J., grew some very fine blooms of Miss Florence Molyneux, a variety of English origin, and some of those blooms were

so closely incurved that they could be classed as true incurved; and yet the variety is described as a Japanese, and, as far as I have seen it, it is a rather loose-formed flower. Many incurved varieties when propagated and planted late will produce reflexed flowers. It would be wise to have all sports thoroughly tested to determine that the new color or form is fixed so that others will secure like or similar results.

In speaking of sports, it may be well to take up the matter of color. There are very few sports which are constant; for example, Pink Ivory; there are few growers who can depend upon getting it pink year after year. Now let us consider the sports from Vivian-Morel. We have Mrs. Ritson, Lady Hanham, Chas. Davis and Lady Anglesey. Mrs. Ritson is the only one that I have found to be constant. Chas. Davis varies in shade from light to deep bronze, and the same may be said of Lady Hanham. Lady Anglesey, as known in this country, appears nearer related to Chas. Davis than it does to Vivian-Morel, as it possesses more of the bronze coloring.

This variety was disseminated by W. Wells & Company, of England, and was described as a yellow sport. Here is what this firm says of this variety in their supplementary descriptive catalogue for 1899 and 1900: "We are sorry to say this has all gone to Chas. Davis. We felt confident of its being fixed, for we bought stocks which were pure yellow on large sprays and many saw them at our nurseries. However, we are quite willing to make up the value in any other variety. We must be more careful in the future." From this we conclude that the variety being grown in this country is not Lady Anglesey, but simply a sub-variation from Lady Hanham or Chas. Davis.

I notice in your eastern contemporary an article referring to a pink sport from Wm. H. Chadwick. Those who visited the Chicago exhibition can vouch for my correctness in saying that the largest blooms of Wm. H. Chadwick shown in the collections were pink, and possessed so much pink that one would not show them in a class which called for white. This variety is prone to go pink under certain conditions. What these conditions are I am unable to say, but our entire crop this season was pink. We do not consider it a sport at all, for, when grown under other conditions, it will produce white flowers. This we know to be the case, for the stock from which we propagated produced white flowers

last year. The same conditions exist with Mrs. Jerome Jones. All who viewed the beautiful vase which won first prize at Chicago remember that the flowers had a decided pink cast. They were grown for H. W. Buckbee by Chas. Johnson, but I do not think that Mr. Johnson will ever exhibit this variety before the committees claiming that he has a pink sport.

Several of our southern patrons have complained about pink varieties not coming true to color, particularly those which they term early and which are in perfection by November 1, or All Saints' day. Why this is so I am unable to say, unless it is from extreme heat. All of us cultivating chrysanthemums under glass know that very bright weather has a decided effect to reduce the colors, particularly the pink ones.

I well remember my first experience in exhibiting seedlings, which occurred in the fall of 1890. They were exhibited at Indianapolis. The judge was John Lane. They did not receive certificates, but I saw a great many varieties new to me and possessing marvelous form and great beauty.

"In the race for best twenty-five varieties, six blooms of a kind, Fred. Dorner was first with splendid blooms of Emily Dorner, John T. Emlen, Mrs. Wm. Bowen, Mrs. W. Sargent, L. B. Bird, L. Canning, Violet Rose, Mrs. Burpee, Mary Wheeler, W. H. Lincoln, G. F. Moseman, Mrs. Fottler, Henry Cannell, Puritan, Excellent, Mrs. Carnegie, H. E. Widener, Mrs. Langtry, Geo. Pratt, Mrs. Morton, Sunnyside, Marvel and Mrs. T. C. Price. M. A. Hunt was second, Henry Riegan, third. Among others who received their share of honors in the chrysanthemum classes were E. G. Hill, Walter W. Coles, Bertermann Brothers, and John Hartje." —AMERICAN FLORIST, November 20, 1890, page 202.

Among the seedlings was a magnificent golden yellow, ranking with Lincoln and Widener, which was awarded a certificate of merit under the name of Mrs. A. Rogers. This seedling was acquired from its owners by a prominent western wholesaler and disseminated the following spring at \$1.50 each. At flowering time this newcomer proved identical with H. E. Widener, which had been sent out the previous spring. As I remember this supposed seedling, it showed some traces of bronzy coloring; but it matters little how it appeared. We must admit the judge and the competent gentlemen (above referred to) present, did not detect this error, or, at least as far as I know it was not detected until it had been sent out.

In an English catalogue mention is made of White Clinton Chalfant. From this we would think they have either forgotten that Clinton Chalfant was a yellow sport from Joseph H. White, or have not grown the latter variety.

It is possible to give many other illustrations showing how easy it is to be mistaken in the identity of varieties or how apt we are to appropriate new names to old varieties.

The judges and C. S. A. committees who inspect seedlings and sports should not be severely criticised for their work. It is a thankless task at best and it is impossible for anyone to be or keep in touch with all the varieties now in commerce. There is one way in which they can protect themselves to some extent, and that is by being careful how they express their opinion upon sports, even though the flowers may appear larger

and more perfect or possess greater depth than similar varieties.

Would it not be better to protect the members of these committees by a code of rules relative to sports, or, better yet, furnish each committee with a list of varieties which have produced sports, giving name and color of both the sport and parent, and then apply the code of rules to regulate their action when a variety is presented which has the appearance of being a duplicate?

In conclusion, I will say, it has evidently required the past hundred years for our English cousins to put on record the few cases referred to and, as we are unable to find that more than one of them has been cultivated, it may be this case is only another error. Had not Mr. Buetner purchased stock of Golden Beauty we would have reason to believe that the variety H. W. Riegan did really

JOHN B. NUGENT.

produce a reflexed sport. From the foregoing conclusions I see no reason why I should change my views on this subject. Seeing is believing, and, when this time arrives, I will be prompt to admit that my belief was false and gladly apologize to my worthy friend.

ELMER D. SMITH.

An Octogenarian Florist.

John B. Nugent, whose portrait appears herewith, is the oldest florist engaged in active business in New York city. He is 81 years of age and as nimble as many men of a much younger age, genial, companionable and highly respected. Mr. Nugent first worked as a florist at his native place near Dublin, Ireland, in 1837, when 16 years old, and went into business for himself ten years later. He came to New York in 1872, being at that time in very precarious health, and started a flower store within one block of his present location in Park avenue. Six years ago Mr. and Mrs. Nugent celebrated a happy golden wedding; three years later Mrs. Nugent died. Of five sons and six daughters born to them, but two sons and two daughters remain. One son is in business with the old gentleman and the other is of the wholesale firm of Young & Nugent.

Notes and Comments.

I am reliably informed that arrangements are being concluded for the publication of the entire proceedings of the Plant Breeding Conference in full, and that it is estimated it will make a book of 700 pages and that the cost will be about \$5.

In reference to charges of express companies, one of the bright lights among the retail florists in Philadelphia says: "What is needed is better service, not cheaper rates." This applies when the companies are handling cut flowers, and not plants. He would be willing to pay an advanced rate if more careful handling, prompt and safe delivery were insured. He said further that when the florists are in convention they are after mealy bugs and red spiders, which are trying to make an honest living, instead of making an effort to improve the service of those large corporations, the express companies.

Referring again to sports in plants, I am reminded that Warren R. Shelmire secured a sport from old Carnation Buttercup which he disseminated as H. M. Stanley. In color it was very distinct from its parent, being a tawny yellow splashed with red, but in addition to the sport being distinct in color it was also more fragrant than Buttercup, from which it sprang.

In this connection, when on the Briarcliff trip a few weeks ago, F. L. Moore, of Chatham, N. J., with whom the Bridesmaid rose originated, stated that he at one time secured a sport from Meteor which was fragrant, but did not undertake to work up a stock of it as he did not believe fragrance alone would make the newer sport popular enough over the older Meteor to make it profitable.

An interesting note is going the rounds of the agricultural press to the effect that Secretary Wilson, of the U. S. Department of Agriculture, is to supply the children of the public schools throughout the country with flower seeds. It looks as though the idea is a good one. It seems to be a step in the right direction and towards nature study, which is now receiving so much earnest attention by many of the bright minds of this and other civilized countries.

It would be interesting to know whether there is any difference between the yellow sports from Chrysanthemum Timothy Eaton that we learn are in existence. The ones which were exhibited by the E. G. Hill Company and Robert Craig & Son are believed to be identical, as they were exhibited before the New York and Boston committees of the Chrysanthemum Society of America and at the Philadelphia chrysanthemum show. The one which has been announced through the horticultural papers by W. R. Pierson was not exhibited before any of the committees of the C. S. A. This is to be regretted, as there may be some distinction between the two sports, and then again they may be practically identical.

If I remember rightly, there were some distinctions between the several yellow sports of Mrs. Jerome Jones, as President Graham, Henry Nanz, Mrs. Geo. F. Baer and others, the names of which I cannot recall. During the present season another sport from the same source has appeared and has been named Chautauqua Gold, but whether it will prove sufficiently distinct from the others to entitle it to that name remains to be seen.

Referring to Begonia Gloire de Lorraine

APPROACH TO CONSERVATORY IN J. F. SULLIVAN'S NEW DETROIT STORE.

as a house plant, we have kept them in our home for months in excellent condition, and Mrs. George Burton has had one in her home ever since a year ago last Thanksgiving day, and it is a beautiful plant to-day, full of bloom. Pennock Brothers speak well of Lorraine begonias for Christmas trade. They handle none but the light pink variety and last Christmas not a complaint was received by them.

As a grower, H. H. Battles is justly proud of his success as a producer of poinsettias. I forget the exact number he has planted, but they run up into the thousands. At a fashionable wedding last week, of the floral part of which Mr. Battles had charge, he sent the ladies in waiting down the aisle with the long stems crowned with brilliant scarlet, which, to use an expression by an onlooker, was "daringly original." We are assured that, with the white gowns of the ladies and their Gainsborough hats decked with white ostrich plumes, and the bright-colored poinsettias, it was a stunning sight and not soon to be forgotten.

Robert Kift is so busy these days he hardly has time to talk to people in the ordinary walks of life, that is to say, if they are not bent on buying something or giving an order for Christmas, or have not something good to sell. He still believes in the Parisian baskets of living plants for Christmas gifts, believing that they give more general satisfaction than cut flowers. E. L.

A Model Floral Establishment.

J. F. Sullivan, of Detroit, has demonstrated once again that whatever is worth doing at all is worth doing well. His most recent achievement is the re-fitting of his Woodward avenue store, making it a model of its kind. A brief description of the place will be of interest.

The store proper covers 20x100, three-fifths of which constitutes the show room, while the remaining forty feet, is used as a work room, the partition between being a fine curtain which enhances the general effect. The large, French plate show window, with its green-tiled platform, is in proportion to the rest of the establishment. Nothing seems to be out

of harmony. The fine refrigerator in no wise surpasses in beauty or attractiveness the show cases alongside and opposite it, while the marble-topped counters and tables correspond well with both. "Alba superba" is the color of the ceiling and walls and the numerous incandescent lights proclaim Mr. Sullivan as a believer in the value of abundant light in an up-to-date flower store.

Right over the workroom is the conservatory, which is reached by easy stages, via the grand stairway. By "easy stages" I simply mean the ease with which one ascends the flight of steps leading to the midway platform and thence to the offices on either side and to the conservatory. The equipment of the latter is decidedly ingenious. Concrete walks with grooves carrying all moisture into a pipe leading to the sewer, are used, just as one is accustomed to see in conservatories built upon the ground.

The structure rests upon heavy iron beams, supported on either side and in

the center by iron posts, strength and durability thereby being fully insured. The three tables, holding palms, ferns and all sorts of decorative plants, are equally interesting features. The center one represents a solid mass of concrete, lined all around with zinc, while those on either side are raised, the walls below, like the roof, being lined with heavy ribbed glass, thus affording a splendid light in the workroom underneath. Pea green is the color in this section and several arc lights make things bright as day for evening trade.

Not the least interesting feature is the cellar, running the entire length of the building. A part of it is partitioned off for flower boxes, while another part holds wire designs and so forth. There is a place for everything and everything is in its place. Hot water is the system of heating and the best apparatus has been installed. NOMIS.

CARNATIONS.

CARNATION SOUVENIR DE LA MALMAISON.

ED. AM. FLORIST:—Will you kindly inform me through the columns of the FLORIST if there was a yellow carnation grown twelve years ago by the florists in this country, named Souvenir de la Malmaison. The carnation in question was totally different and distinct from the Souvenir de la Malmaison grown in pots and was grown along the same as any variety of to-day, such as Lawson or Crane. P. B. R.

[We have no record of this variety, but perhaps some reader may remember it and will send us particulars.—ED.]

STORING, PACKING AND SHIPPING.

If properly grown and handled the cut blooms of carnations may be safely stored for three or four days before being consigned to the retailer. It is simply a question of having them in the right place and keeping the water fresh and the ends of the stems open.

The fully developed flowers should be cut every morning, before the sun is bright, and placed in water before the cells at the cut ends of the stems have a chance to shrivel and partly close up. Do not bunch the flowers in bunches of

CHRYSANTHEMUMS AT OPENING OF J. F. SULLIVAN'S NEW DETROIT STORE

twenty-five, as was the custom in former years, but put in pots or buckets, just as you would roses, being careful not to crowd, so that each flower can find its place naturally beside the others, and have a free circulation of air around it. The stems in the water should also be arranged loosely. The pots should be deep enough to bring the water two-thirds of the way up the stems. This will not only assist nature in keeping the blooms charged with water but will hold the flowers erect, keeping the stems perfectly straight, allowing the water to pass through them more freely than it would through a stem partly strained by being compelled to support a heavy flower. It will be well to have a certain number in each pot, twenty-five, fifty or 100, as the case may be, to avoid handling as much as possible. Change the water each day and cut a half-inch off the ends of the stems before putting back into the water.

The ideal place to store the flowers is a cool, dry cellar, where the temperature is about 45°. Carnations should never be put into an ice box, and no ice should ever be near them. The cellar should be well ventilated, but strong draughts should not be admitted. A cool room, where the same conditions can be maintained, will answer the purpose equally well.

For shipping, light wooden boxes a

foot wide, six inches deep and three feet long are the most convenient. These will hold two layers of carnations, laying the flowers at the two ends of the box and the stems overlapping in the center. The flowers should be neatly arranged in rows, about four rows deep, with a strip of wax paper for the heads to lie on, keeping the flowers from contact with the stems below. When the bottom layer is completed, cover with a sheet of wax paper and proceed with the second layer. It is not well to have them more than two layers deep. When the box has received its full quota of flowers fold up a wet newspaper so it will cover a foot square and place over the stems in the center of the box and fasten down securely by means of two light cleats held in position by small nails driven through the sides of the box. No ice should be used and no water, except that which naturally clings to the stems when taken out of the pots.

The box should be but thinly lined with paper on the inside, reserving all heavy lining for the outside of the box, which can, of course, be used as thick as necessary, according to the severity of the weather. Have your employes handle the boxes as carefully as possible. The expressman will shake them up thoroughly enough by the time they get to their journey's end.

I might add that when the flowers reach the end of their journey they should

have a half-inch cut off the ends of the stems before being placed in water. J.

Two Good Wichuraiana Hybrids.

Herewith are presented two views in the rose gardens of the noted specialist, M. H. Walsh, at Wood's Holl, Mass. In one of them appears also a characteristic picture of Mr. Walsh. Sweetheart is a hardy climbing rose, the product of Wichuraiana crossed with Bridesmaid. The clustered white and pink-tinted flowers are full double, the individual blooms about two and one-half inches in diameter and fragrant. Debutante had for its parents Wichuraiana and Baroness Rothschild. This is also a hardy climber, flowers pink, double and fragrant and, as shown in the illustration, comes in generous clusters.

Florists' Plant Notes.

CINERARIAS.

Your cinerarias for Easter should now be ready for a last shift into their flowering pots, a 5-inch or 6-inch. A good, sandy soil, with one-quarter well rotted cow manure and some leaf mould added, with plenty of drainage, will do. They must always be given plenty of room to allow their large, handsome leaves to develop properly. No plant responds more readily to proper treatment and care than does the cineraria. An occasional sprinkling over the foliage on bright days will be beneficial. The greatest enemy of this plant is the aphid, or common greenfly, but fumigating is a dangerous expedient, for it is apt to burn the foliage. A light smoking may not hurt the cineraria; neither will it hurt the fly. A far better and safer method is to scatter stems between the pots, which must be renewed at least once every month.

STEVIA.

Do not fail to save a few stock plants of stevia, which is now nearly past its flowering season. A dozen plants will give you all the cuttings you want, which should be struck in March for the following season.

SWEET PEAS.

If you neglected to sow sweet peas for early flowers last September, it is well to sow some now. We prefer to sow in 4-inch pots, seven or eight seeds to a pot, and when two or three inches high plant along the north edge of a carnation bench, a potful next to each iron post supporting the purlin. This method of planting along the carnation bench is not at all beneficial to the carnations near the peas, for the latter always manage to absorb all the nutrition in the surrounding soil, resulting in starvation to the carnations. Therefore, unless an entire bench or a part of a bench can be devoted to their culture, which is, to be sure, by far the better way, it simply resolves itself into a question as to which is the more profitable, the sweet peas or the few carnation plants destroyed. A top dressing of rich, two-year-old cow manure after the peas have made some growth will partly make up for the loss of nourishment sustained by the carnations next to them. Blanche Ferry for pink, Emily Henderson for white and Countess of Radnor for lavender, are the best forcing varieties.

HYDRANGEAS.

Easter falls on April 12 this coming year, and if you are forcing *Hydrangea Otaksa* for this occasion, it is time to give

M. H. WALSH AND HIS HARDY CLIMBING ROSE, SWEETHEART.

ROSE DEBUTANTE GROWING ON WIRE TRELLIS AT M. H. WALSH'S, WOODS HOLL, MASS.

them your attention now. Since they last so well when in flower, it is better to have them a little early rather than too late. We set them up into a temperature of 60° the first of the year, which, as Easter falls on a comparatively late date, will be sufficient heat to force them into flower nicely. The pots will soon be filled with roots and they must never be permitted to wilt for want of water. After the buds are set it is well to water once a week with liquid manure, to give size and color to the flower. The temperature may be raised to 65° or 70° at night, if thought necessary to force them into bloom on time, or it may be lowered a few degrees if they are too forward. The more forward ones should be placed in a cooler house for a week or two before they are offered for sale, to harden them off. They must never suffer for want of light and room, else the plants will grow long and weak, and lose their lower leaves. Those plants held back for Memorial day should be placed in a temperature of 45° or 50°, where just enough water is required for the first month or two to encourage a firm and sturdy growth, after which, copious watering is necessary. No forcing will be necessary to have them in bloom at this late date. The cuttings for the next season may be struck any time during January and February.

EASTER LILIES.

Your *Lilium Harrisii* for Easter should now be about six inches high. A temperature of 60° at night will bring them along fast enough. Unless you are growing them in quantity, and can devote a whole house to them, where the temperature may be raised or lowered at will,

you will likely find it necessary to move them several times into different temperatures before the flowers open, but great care must be exercised to avoid extremes of heat and cold. They should never be kept cooler than 50° at night while the plants are growing and the buds developing, nor more than 70°, unless, perhaps, during the last few weeks before the buds are open, when extreme forcing may be found necessary to have them on time. There is always a greater or less proportion of diseased bulbs among the *Harrisii*, and it will be time and money saved to dump them at once, for they never will outgrow the disease.

The longiflorums are less susceptible to the disease, and for this reason many growers prefer them to the *Harrisii*. They require more heat to force them into flower for Easter than the latter, but otherwise the same treatment will do for both varieties. Keep a sharp lookout for green fly, which gets down into the crown of the plant, among the young and tender leaves, from which it is difficult to dislodge them with tobacco smoke. Use about a thumb-potful of rose leaf extract of tobacco to a gallon of water and apply with a syringe once every two weeks to ferret out the green fly in its snug retreat, or water in which tobacco stems have been soaking over night, applied in the same manner, will also serve the purpose. Many a batch of lilies is ruined at this stage of growth by permitting the fly to bring in its work, puncturing the undeveloped buds deep down in the crown of the plant; for this reason, regular fumigation and syringing with tobacco water must not be neglected. B.

Pompon Chrysanthemums.

BY JOHN N. MAY, SUMMIT, N. J.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

That these little gems are steadily becoming more popular is quite apparent. One only need look at the gardens, of every class, during the late fall, when nearly every other blooming plant has been killed or the flowers, at least, destroyed by early frost and heavy rains, to see the pompon chrysanthemum flourishing in all its glory. A few degrees of frost does not mar its beauty, hence it is the one flower that everyone can enjoy when all others are past.

The three or four old varieties of artemisia which our ancestors planted in their gardens, in many sections, can still be seen growing luxuriantly after half a century or more in the same position. From these have sprung the greatly improved forms and almost every shade of color known in the chrysanthemum to-day.

One of the reasons that this flower is coming to the front so fast is that it is of the easiest possible culture. In fact it might be justly said that it needs no special culture whatever. All that is necessary is to take a young, healthy plant from a 2-inch pot in May. Plant it out in any position in the garden, not directly under the shade of trees. If the weather is dry give it one or two good waterings. Keep the weeds clear of it till it gets a fair start.

After that it will outgrow almost every kind of weed. Then about all the attention it will require will be in September, after the buds are set and the top becomes heavy, when a little support,

by putting three or four short stakes in around the plant and tying a piece of stout string all around it, will prevent its being broken by strong winds, heavy rains and so forth. With the above treatment a great show of flowers can be had at a very little cost.

But if you want to see the pompon in its best form it will well repay the additional care necessary to obtain it. To do this select an open spot in your garden, away from the shade of any trees or vines, but protected somewhat from strong winds. Plant out young, healthy plants from small pots as early in May as is safe. When they have started to grow fairly well take a sharp knife and stop the main leading shoot back to within seven or eight inches of the ground. In a short time it will throw out quite a number of shoots. These should be allowed to become six or eight inches long. Then reduce these to seven or eight, leaving, of course, the strongest, and in thinning them out leave them so that the plants have about an even amount on all sides. These shoots that are left, and which are to form the main basis of the plant, should in turn be shortened back to five or six inches.

After this the plant will make very rapid growth and the weak lateral shoots should be carefully cut away and the stronger ones allowed to grow on till the buds are all set. If these details are watched carefully, a large bush, two feet or more through, will be nicely formed. At this stage staking and tying sufficiently to prevent storms breaking the branches will be necessary. After the buds are set, thin by carefully pinching out all except five or six from each shoot of the larger flowered varieties, but for the small button-flowered kinds eight to ten buds can be left on each shoot. This will allow the individual flowers to develop to perfection and be much larger and of better color than when all the buds are left on the plants.

A shoot with a stem from twelve to eighteen inches long, having from five to ten nicely developed flowers, makes an exceedingly attractive spray. For this purpose the earlier blooming varieties are especially desirable, as the above treatment will generally bring them into full flower before there are many of the larger chrysanthemums in bloom, though all the varieties are equally benefited by the little additional care.

The above method of culture is applicable to all who do not possess a glass structure of any kind. For those who are fortunate enough to have cold frames or cool greenhouses in which to protect their plants from storm and frost, their season can be extended till the end of November or later, by making a selection of both early and late-blooming varieties. For growers so situated the best method will be to grow only the very earliest varieties planted out in the open ground and for the later varieties grow them in pots or boxes.

For this method of culture take plants of the same class as for the open ground, pot them into a larger size, using a good loamy soil, with only a small amount of fertilizer added for this shift. Cut the leading shoot back to four or five inches above the soil. When it has started side shoots one or two inches long, shift into another pot two sizes larger than the one it occupies. As soon as the roots get a fair start into the new soil they can be stood outside on a bed of coal ashes and grown on steadily, attending to the thinning out of shoots, and so forth, as advised above.

By the first week in July they will be ready for their last shift. For this last potting a somewhat richer compost will be necessary than for the earlier stage. The smaller or weaker-growing varieties should not have more than a two-inch larger pot than before, while the stronger and more robust growers can be put into pots three or four inches larger than the size they were occupying. But in each case the pots should be well drained with broken potsherds or similar material.

After this potting considerable care must be exercised not to overwater them till the roots have taken possession of all the new soil. In fact they should never be allowed to get too much water during the entire season, or they will lose most of their larger leaves and get a severe check. As soon as bad storms are due in

SPRAY OF GYPSOPHILA PANICULATA FLORE PLENO. Flowers Full Size.

the fall they should all be removed from their open air position, either to a cool greenhouse or cold frame, where they can be protected. In all other respects they should be treated as described for the better class of plants in the open ground. Plants grown this way will make nice ornaments for any decorative work.

The varieties of pompons are now so many and so varied in their general size, color and form that to enumerate varieties would only be superfluous. Take the earliest for the open-air culture and whatever colors strike your fancy for the pot culture. They are all exceedingly attractive and beautiful and will well repay anyone for the little time and attention required to produce them in abundance. For selling as cut flowers grown in the open ground, the following I have found very desirable:

Oneita, yellow; Vera, white, La Purite, small white; Little Pet, small yellow; Delicatissima, white and bluish pink; Caritas, shaded pink; Julia, deep shaded red; Mr. Astic, soft yellow; Angelique, pure white, and one of the oldest varie-

ties known to cultivators. Bob should still find a place in every collection.

This list could be extended almost indefinitely and the enthusiast cannot make a mistake by adding any or all the varieties to his collection, as the taste is undoubtedly greatly on the increase for these little gems for late autumn decoration of the garden, the conservatory, and the homes, generally, of the rich and poor alike. This is one of the few flowers that can be enjoyed by everyone having a plot of ground a few feet square.

New and Rare Plants.

GYPSOPHILA PANICULATA FLORE PLENO.

D. S. Thompson & Sons, of Wimbledon, Surrey, England, exhibited *Gypsophila paniculata flore pleno* before the Royal Horticultural Society on July 30, 1901, and received an award of merit. It is perfectly double-flowered, pure white and serviceable for conservatory decoration or cutting. The plants attain a height of about three feet and it is perfectly hardy. One of the accompanying illustrations shows a specimen plant, the other a spray with the flowers full size.

ASTILBE DAVIDII.

Astilbe (Spiraea) Chinensis var. Davidii is a strong-growing perennial with foliage similar to that of the well-known *Spiraea Japonica*, but larger, and has tall spikes of deep rosy purple flowers densely borne on stems six feet in height. The flowering rachis is more than two feet in length and covered with a thick brown tomentum while the stem below is glabrous. It is perfectly hardy in England and when established in the garden forms one of the most striking of recent introductions. The plant is a native of central China and was sent to Veitch & Sons, London, by E. H. Wilson, one of their collectors. Seedling plants of it flowered for the first time in their Coombe Wood nursery in July, 1901. The Royal Horticultural Society gave it a first-class certificate August 5, 1902.

Lonsdale on Greenhouse Management.

John Hamilton, Secretary of Agriculture of the State of Pennsylvania, in giving a list of the publications which his department has been instrumental in giving to the interests of agriculture, horticulture and floriculture, names one which florists should all be glad to get a copy of, namely that on "Greenhouse Management," by Edwin Lonsdale. It was originally an address before the State Board of Agriculture and has now made its appearance in the form of a pamphlet of forty-two pages and will no doubt be greatly appreciated by those interested in greenhouses, not only in Pennsylvania, but in other parts of the country. Mr. Hamilton says in his preface to the work:

Mr. Lonsdale has had large experience in this work and was chosen for the preparation of a bulletin because of his success in this direction and his eminent fitness for the discussion of the difficult questions which confront the growers of flowers and ornamental plants, whether for home adornment or general market. Few men in the midst of active business, as is Mr. Lonsdale, are willing to take the time to write out their experience, in readable form for public use, and all who are interested in floriculture, or in the cultivation of decorative plants, can, therefore, well be thankful that the author has sacrificed, for their benefit, his hours needed for rest and recuperation.

Those who know Mr. Lonsdale as do the readers of the AMERICAN FLORIST will heartily endorse the words of Mr. Hamilton. I am informed that the complete pamphlet can be procured from the Department of Agriculture at Harrisburg.

Astilbe (*Spiraea*) *Chinensis* Var. *Davidii*.*Gypsophila paniculata* *Flore Pleno*.

TWO OF THE INTERESTING NEW EUROPEAN PLANT NOVELTIES.

free of charge, by any one who writes for same.

Among other interesting things which we learn from Mr. Lonsdale's pamphlet is the fact that along about 1880, twenty-two years ago, he was interested with Mr. Burton in growing smilax and making \$1 per square foot out of that crop, and shipping it, not only to Philadelphia, but to New York and Washington. What a change since those happy days!

The first chapter is devoted to a general review of the greenhouse business, the various glass structures and the varieties of plants that are grown therein. Roses naturally take up a large amount of attention in that connection and the ever interesting story of the American Beauty's origin is given, in the author's most popular style. Considerable space is given to the discussion of the merits of the other roses, among them being the Jacqueminot, Perle, Golden Gate, Mme. Cusin, Mrs. Oliver Ames and others. Mr. Lonsdale explains the reason for treating roses so fully in his pamphlet as follows:

It has been deemed advisable to thus treat upon roses at length, because if roses can be grown in his greenhouses, the operator thereof need not hesitate to undertake to grow any other plant, as roses are among the most difficult plants to grow and bloom successfully.

The question of temperature is treated so concisely and clearly that the paragraph is worth repeating here.

The question of temperature in the growing of roses is one of the most important, and nearly all

the sections mentioned need a few degrees difference at night if we would achieve the greatest success. For instance, we have found that the Meteor must have 5° higher at night, namely 65° to 68°, than American Beauty, Queen of Edgely and American Belle require, which to do their very best must have from 60° to 62°; kept as nearly the first named number of degrees as possible is the better. Bride and Bridesmaid 56° and 58°, and Bon Silene, Safrano, Isabella Sprunt and Papa Gontier, 54° and 56°, and Golden Gate 58° to 62°. Perle, Sunset and Sunrise from 6° to 62°.

And a similar state of affairs exists with carnations though not quite to the same extent. Twenty-five years ago, from 40° to 45° was considered about right for these popular flowers, but it is found now that for best results with the greatly improved varieties now grown, a temperature about the same as that recommended and in use for roses at the same period is now in use for carnations, namely, about 55°.

A short chapter is given to ventilation and another to the water supply. Drainage receives quite a large amount of attention and the AMERICAN FLORIST is complimented by being liberally quoted from. On the mooted subject of sub-irrigation the author sums up as follows:

Sub-irrigation is being experimented with to some extent, but so far a cheap method of constructing a bed where sub-irrigation could be practiced to advantage has not been adopted to any extent. It promises well, I am inclined to think, but just the right plan of operation has not so far been hit upon.

A short chapter is devoted to aspect and another to heating. This latter subject is gone into in a clear and convincing style that anybody can understand. The merits of steam and hot water are debated and the conclusion stated in very few words. The author's ideal heating system is summed up as follows:

The very best because offering the least trouble

and expense after the first cost, that I have heard of, is an establishment located in Helena, Montana, which is incorporated under the name of the State Nursery Company, the greenhouse department of which is heated by natural hot water. The hot water is conducted through the greenhouses in pipes, as is done when a boiler is used, excepting that no provisions are made for the water to return, flowing on after it has done its duty, apparently going so waste. The springs from which the water is taken are about half a mile away from the greenhouses, and the water is conducted through a wooden pipe under the ground and has a fall of 10 feet, which registers about thirty pounds pressure. The temperature of the water is 130° when it reaches the greenhouses, so that it takes more lineal feet of pipe to insure the atmosphere in the greenhouses being raised to the desired temperature than it does when the heating is done by the ordinary methods of steam or hot water as practiced in Pennsylvania. This item of information is introduced incidentally to indicate the advantage that some florists have over others, especially out in far away Montana, when the question of heating is under consideration.

A long chapter is devoted to diseases which the greenhouseman has to fight, including mildew, black spot, stem rot and carnation rust, the most accepted remedies for these conditions being mentioned. The chapter on insects is not long, but it fully covers the ground and conveys a great deal of information in very small space. A chapter is given to soil and propagating respectively and the pamphlet winds up with a list of annuals for winter blooming. In this list are included mignonette, sweet peas, nasturtiums, salpiglossis, brachycome and schizanthus.

Scattered through the publication are many hints which will be useful, not only to the younger members of the craft, but

also to those who are old in the business. Mr. Lonsdale is not only a keen observer but has an inventive mind and has introduced several wrinkles to the trade which are worth being largely adopted. The present publication, being a state document and published free of charge, should be freely availed of by all who are interested. When a florist of experience decides to put his knowledge into book form he generally charges from \$1 to \$5 a copy to his brother florists. It will therefore be seen that Mr. Lonsdale's case is a unique exception, and no doubt many will be glad to get this publication while the supply lasts. I understand there are only some 5,000 copies available for outside distribution. Those who desire a copy should address the Hon. John Hamilton, Sec'y of Agriculture, Harrisburg, Penna.

GEORGE C. WATSON.

Forcing Branches of Hardy Shrubs.

A writer in *Moller's Gartner-Zeitung* gives some very interesting notes on the forcing of the branches of flowering shrubs and trees, some of which force easily and quickly and develop their flowers either in a cold or warm house, and in that way furnish very beautiful material for cut flower work and decorations.

Among others, *Prunus Amygdalus* (*Amygdalus communis* fl. pl.), the double-flowering almond, takes a prominent place. The branches may easily be brought into bloom for Christmas. For that purpose they should be cut towards the end of November; any size of branch, no matter how big or little, will answer.

The severed branches are put into a barrel of water in a warm house and an occasional sprinkling with lukewarm water should then be given, perhaps once a day. As soon as the flowers open this sprinkling must cease, otherwise the

Christmas, while the ribes will develop its flowers within five weeks if treated like the almond. If *Ribes sanguineum* is used, the clusters of flowers are of the same shape and size as if the flowers had developed out of doors, only the color is somewhat paler.

Particular attention is drawn to the hardy magnolias, the culture of which is extremely easy and the results very pleasing. In order to get magnolias into bloom for Christmas, the branches are cut about four weeks before and they are treated like those of the almond at a temperature of 58° to 66° F. The white flowering kinds produce flowers of a much finer and more satin-like texture than those produced out of doors.

One of the principal qualities of these magnolia flowers is their durability. If placed in water they will remain in perfect condition for eight to ten days after the development of the flowers, even in the dry atmosphere of the dwelling room. The writer advises the planting of numerous hardy magnolias and other blooming shrubs for the very purpose of cutting branches, as described above, for forcing in the house in winter.

A Prosperous Establishment.

Adam Laub and his sons, Robert and Alexander, began business in a modest way, at Hughsonville, N. Y., in 1892 and have a record of ten years of uninterrupted prosperity and development. They started with one house 16x75 and in 1894 had made progress to warrant another structure, 15x55. Then in 1896 two more houses were built, one 10x100, the other 16x100. Since then the development has been faster and the houses better built, the latest improvements being incorporated. There is now 20,000 square feet of glass. Most of the place is devoted to carnations and violets. Last season 80,000 carnations were shipped

the stock believing that, as one of the firm says, "When the people once find you out you never have any difficulty getting rid of the stock." The plant is heated by four boilers in three different locations. A reservoir on a hillside holds 20,000 gallons of water, pumped from a well eighty-six feet deep by a Rider engine. There is a fall of forty-one feet from the reservoir to the greenhouses.

Chicago.

WEEK UNSATISFACTORY TO GROWERS AND WHOLESALERS.—AVERAGES MUCH BELOW THE SEASONABLE FIGURES.—QUALITIES ON THE DOWN GRADE.—PROSPECTS FOR CHRISTMAS.—ADEQUATE SUPPLIES PREDICTED.—ADVANCE ORDERS COME HESITATINGLY.—NOTES OF DOINGS BY GROWERS AND OTHERS.—DEMISE OF MRS. WASHBURN.—OTHER MATTERS.

The market has been slow this week and many have been the complaints. It is the season of high values, but only the very small percentage of strictly fancy stock brings anything like a reasonable price. Receipts are not heavy, for the weather has been unpropitious, but demand seems light all through the wide territory served by this market. The same causes which have produced light cuts have also served to take the quality out of the roses. There is a most discouragingly small part of the receipts which is up to the requirements of the shipping trade and, as there is comparatively little doing locally, clean-up sales are on record at figures probably never duplicated at the season and which afford little consolation to the growers who are shoveling high priced coal. Bridesmaid naturally shows the deterioration in quality more than any other rose. Beauties have suffered, but there has been enough good stock for the orders. Carnations are holding the quality very well and, too, are bringing better prices, relatively, than roses; good carnations are worth \$3 and fancies \$4. Violets are in short supply and are well sold, with the usual relation between quality and price. Much of the business being funeral work, white flowers frequently have the call and this makes an outlet for bulbous stock. Green goods are moving slowly just now, for the young people are too busy buying Christmas presents to have time for marriage, and it is wedding work that makes the market for much of the smilax and asparagus. The general report among the wholesale growers is that they have a fair proportion of orders and inquiries which promise to take up all the available stock for Christmas. The commission houses have not booked so large an amount of business, perhaps because they can not be so certain as to the extent of their supplies. At the present time it looks as though there would be enough stock for all, except medium length Beauties, red roses and perhaps red carnations. There probably will not be enough first-class roses, which may lead to some complaint as to either grades or prices.

C. L. Washburn and O. P. Bassett have the deepest sympathy of each one in their wide circle of friends and trade acquaintances in the demise of Mrs. Washburn, who passed away at Alma, Mich., on the evening of December 12. She was the only child of Mr. Bassett. Mrs. Washburn had been in poor health for several years and for the past few months it was feared that the end was near. Both father and husband were constantly at her side during the last ten days. Interment was at Hinsdale

PANSY FIELD OF WILLIAM TOOLE, BARABOO, WIS.

(From photograph taken October 23, 1902.)

bloom will suffer. The flowers are fully developed after about five weeks and such a branch will attract more attention either in the florist's window or on the Christmas table than almost anything else, since the flowers appear in such vast numbers.

The same method of treatment can be applied to forsythia and ribes. The former requires a little more time for forcing than the almond, if they are wanted for

to the New York market and 425,000 violets, besides what were disposed of at home. Of carnations the principal varieties are White Clond, G. H. Crane, Mrs. Bradt, Frances Joost, Cressbrook, Prosperity and Mrs. Potter Palmer. The firm has been steadily working up a business in rooted cuttings, last season shipping some 75,000 violet plants and good quantities of carnation cuttings. They have given especial care to the quality of

on Sunday and many in the trade were in attendance.

Fritz Bahr's home at Highland Park was destroyed by fire early Monday morning, December 15, and the members of the family had a narrow escape. It was due to Mr. Bahr's exertions that the children were saved, but to do this it was necessary to drop them from the second-story windows to the ground, where they were safely caught by a party of rescuers. The residence was totally destroyed. The insurance of \$2,000 will not nearly cover the loss.

The Garfield Park Floral Company has holiday plants in large quantity and unusually fine quality this season, including *Primula Sinensis*, *P. obconica* in variety, *P. Forbesi*, *Asparagus plumosus nanus*, *A. Sprengeri*, *Begonia Gloire de Lorraine*, cyclamens, peppers, ficuses, Boston ferns, azaleas and so forth. The dwarf poinsettias in pans at this place are the best seen this season. Lilies promise well for later bloom.

There were about ninety in attendance at the meeting of the Gardeners' and Florists' Union, Wednesday evening, December 17. The proposed by-laws and constitution were read the first time, there being two more readings to follow at later meetings. The next meeting will be held at 49 LaSalle street Saturday evening, December 27, when all competent gardeners and florists are invited to join as charter members.

The Flower Growers' Company is perfecting its incorporation and intends to establish a flower growers' market in the large quarters on the second floor of the Fairbanks building, on the northwest corner of Wabash avenue and Randolph street. F. R. Hills is treasurer pro tem. About fifteen stands have been engaged to date.

As William Kalous, of Kalous Bros., was driving down Milwaukee avenue last Saturday night his wagon was set on fire by the charcoal heater which he uses to keep the stock from freezing. The fire department near by came to his rescue and saved the vehicle from total destruction.

McKellar & Winterson have an additional source of supply on poinsettias this year, a new grower who has 3,500 for Christmas week. They also have a big lot of ilex berries in fine shape. Wienhoeber is using twenty-five cases of them for Christmas.

Weber Brothers are repeating their previous seasons' success with their carried over Brides and Bridesmaids. The buds are large and of splendid substance and the growth strong. Amling is handling the cut this year.

Of course white carnations held back cannot lose color, but they can lose value. White carnations have been worth more in this market the past week than pickled stock is ever worth, and white is not the Christmas color.

At Kennicott's they are now counting on enough Christmas stock in all lines except violets, which are already in short supply, but this is not a shipping item, practically the entire receipts being sold locally.

H. N. Bruns has a large quantity of lily of the valley in prime condition for the holidays. Some Proserpine tulips which he has forced along sell well, although they are still very short in stem.

Emil Buettner has a house of White Cloud carnations which recently have been a revelation as to the flowering quality of this variety, the plants being almost a solid mass of bloom.

A CARNATION HOUSE OF A. LAUB & SONS, HUGHSONVILLE, N. Y.

(From photograph taken November 1, 1902.)

P. J. Hauswirth moved into his new Michigan avenue store December 15. He has not yet received his new fixtures but has ample room to handle the Christmas trade.

There will be no meeting of the Florists' Club next week, the usual night falling on Christmas eve. The next meeting will be January 14.

The bowlers will take a respite until after New Years, when they will begin in earnest in the preparations for the Milwaukee contest.

At the Schafer place on Balmoral avenue they are again in good shape, after their narrow escape from freezing when a boiler gave out.

The J. D. Thompson Carnation Company reports having already delivered 50,000 rooted cuttings of *Echthra* carnation.

Sam. Pearce has been marketing tulips for the past ten days.

Visitor: Henry Baer, of Peoria, Ill.

New York.

BUSINESS OF THE WEEK PRINCIPALLY PROSPECTIVE.—GOOD SUPPLIES FOR HOLIDAY ARE ASSURED.—LOW GRADE MATERIAL NOT LIKELY TO REALIZE LARGE RETURNS.—TOO MANY VIOLETS.—PLANT NOVELTIES.—PERSONAL AND TRADE NOTES.

The cut flower people are busy preparing for the approaching holidays and speculating on the problem of the nature and extent of the demand that will have to be met and this constitutes a good proportion of the present week's work, for otherwise very little is being done. To the fact that the weather has been most unpropitious may be ascribed largely the escape of this market from a serious overstock and embarrassing depression of values, a condition that has characterized mid-December business in most years for a long time. It would seem that an average good crop of roses is safely in sight for Christmas, thus precluding any danger of a holiday famine and, while gilt-edged, selected stock can undoubtedly be floated at customary Christmas prices, it does not seem likely

that the main product will command values that are in any degree sensational. Carnations at present are holding their own well, considering everything, and as in the case of the roses, may be expected to show some good-sized figures for preferred fancy varieties and grades, while the main crop will do very well if it maintains present prices. Violets are of very fine quality generally and so heavily in overstock as the extensive increase in the number of producing establishments would lead us to expect. Bulbous stock increases daily and we have now, besides the usual Paper Whites and Roman hyacinths, a sprinkling of yellow narcissi and tulips, the latter being both ill-timed and of miserable quality. Poinsettias are in evidence in large quantities on all sides and are usually large and handsome.

Poinsettias in pans, low-grown, are among the most showy goods offered by the plant growers. In flowering plants the Lorraine begonias take the lead, those in wire baskets to be suspended in the window being the most popular. The local supply of this popular plant is likely to be augmented by shipments all the way from Cincinnati, for J. A. Peterson, of that city, is here this week to take orders therefor, and as the samples he shows are very fine there would be no difficulty in placing them all were it not for the doubt as to the possibility of transporting them safely. Among the choicest things in flowering plants are neat little specimen camellias well set with buds and bloom. Imported English holly in handsomely trained pot plants and loaded with berries are among the most effective decorative material seen in the pretentious Fifth avenue stores.

"Phil.", Daillouze Brothers' well-known driver, met with a severe accident in a collision with a trolley car while driving to market last Saturday morning, sustaining a broken nose and other painful injuries.

A. S. Burns, Jr., is sending to John I. Raynor, from his new greenhouses at Spring Valley, some Flora Hill carnations of remarkable perfection.

Louis Roessel, the well-known manu-

facturer of artificial flowers, died at his home in Brooklyn, December 10, aged 72 years.

John Hennessy, 74 years of age, father of J. S. Hennessy, of Roslyn, L. I., died December 11.

Alfred Dimmock sailed for England on Wednesday, December 17.

Visitors: J. A. Peterson, Cincinnati, O.; Geo. E. Fancourt, Wilkesbarre, Pa.; S. H. Moore, New Haven, Conn.; Ed. Seecy, Paterson, N. J.

Philadelphia.

TRADE FAIR FOR JUST BEFORE THE HOLIDAYS.—STOCK SCARCE AND INDICATES PICKLING.—ALL ABOUT THE PRICES.—WEATHER MODERATES.—STORES FIXING UP.—A NEW PRODUCING ESTABLISHMENT.

Business is good for the season, the stock in almost all lines keeping scarce. As usual at this time of year the pale, washed out stock is beginning to appear. The weather is blamed, but, while it has been cold and cloudy and may have affected the color somewhat, there is a salty look that is undeniable. Prices are still mounting. Teas range from \$6 to \$15 per hundred. Liberties sell as high as \$20. Beauties sell for from \$1.50 to \$6 per dozen. The quality is all that can be desired. Carnations are in good demand at prices ranging from \$2 to \$3, with \$4 to \$8 asked for the fancies. Mignonette sells for \$3 to \$4, bonvardia \$2.50 to \$3. Violets are so scarce that it is scarcely worth quoting them; \$1.50 is the price for good doubles, but many now coming in should have been picked two weeks ago and urgent appeals for more fail to move them. It is to be the same old story, none now to supply the demand but quantities of salted stock that will not be sold for Christmas.

The weather has moderated considerably and cleared off and the outlook for the next week promises well. A week of good sunshine would work wonders and put life and color into the flowers, a quality much to be desired. There promises to be a great business done on the street by the countrymen, who are to be found in every corner in the shopping district. Good holly wreaths are scarce; as much as \$25 per hundred is asked for good medium-sized stock.

The Philadelphia Carnation Company is to be the name of a new concern which will soon erect houses for carnations at Secane, Delaware county. The extent of the initial plant will be 20,000 feet. Horace Dumont, the well-known commission merchant, and Harry R. Crawford, son of Robt. Crawford, Jr., are principal owners of stock.

The stores are being decorated attractively with quantities of red immortelle work, wreaths and bells galore, with their wealth of scarlet bows, giving the interiors a very brilliant appearance. Holly, so far, is pretty good, notwithstanding the predictions that prime stock would be scarce; \$3 to \$5 per case is the price.

Albert Kelsey delivered an illustrated lecture before the Fairmount Park Art Association last Thursday evening, his subject being "Parkways and Monumental Thoroughfares." It was listened to by a large and thoroughly appreciative audience.

President Burton, of the S. A. F., has reached home again after an extended trip through Canada and the west with John N. May and expresses himself as greatly pleased with what he saw of the trade in his travels. K.

Toronto.

CLUB ELECTS OFFICERS.—LIST OF THE NEW BOARD.—CONVENTION PREPARATIONS.—A CARNATION SHOW.—GOOD STOCK AND HEAVY CROP AT DUNLOP PLACE.—COLD WEATHER RETARDS BUYING.—A VARIETY OF LOCAL NOTES.

Election night did not bring out the number expected at the regular meeting of the Florists' Club, December 16. The following officers were elected: President, Wallace W. Wood; vice-president, D. Robertson; second vice-president, William Ford; secretary, E. Collins; assistant secretary, Arthur Twiner; treasurer, George Mills; executive committee, J. H. Dunlop, Thomas Manton, William Jay, A. Watkins, George Douglas, D. J. Sinclair and H. G. Dillemath. Mr. Dunlop and Mr. Manton both spoke of the C. H. A. convention to be held in Toronto, in 1903, and all members were urged to attend regularly, so as to keep in touch with what was going on. The usual annual carnation show will be held in March and from the attendance and exhibits already assured from outside points, this meeting will prove valuable to any interested in carnation growing.

At John H. Dunlop's establishment the stock is in better shape this Christmas than it has been for some seasons past, and this is saying a good deal. Roses are clean and vigorous and in Brides and Bridesmaids there is an excellent crop showing, on some benches plants averaging five and six buds, which will all be ready in good time. Beauties are very well colored, though a little shy of bloom. Morgan, Perle and Sunrise all look well. The carnation houses have the same appearance of health and vigor. Many of the newer varieties look exceedingly well and have no doubt come to stay. His violets are also good. On the Princess of Wales the flowers are almost as large as pansies, with stems fourteen inches long. He will also have a few longiflorums, azaleas and Gloire de Lorraine which will be just right.

The past week has been rather erratic as far as business is concerned. Severe weather did not improve business for the retailers. Stock of all kinds is good and a few days of sunshine would make the color all that is desired. Carnations are fairly plentiful and of a very good quality. There are a few freesias and jonquils already on the market. Violets are the scarce article and are likely to be until after the holidays.

At Grobba & Wandrey's, in Mimico, they have thousands of cyclamens in excellent shape. This city is usually dependent on this firm for this plant. They also have a nice lot of azaleas in full bloom, a nice bench of violets, a fine lot of jonquils and other bulbous stock.

A freeze-out in the store of J. Simmons did considerable damage to his palms and ferns. Many of the boilers had to be remodeled for burning soft coal slack. The old style usually choke up very easily, and with the thermometer at 12° below zero this is not very desirable.

Several of our wholesalers report being sold out of red immortelles. An unusual demand has been experienced this season.

W. J. Gammage, of London, is sending in some very nice plants of Lorraine begonia, besides some nice assorted ferns.

James Goodier, formerly orchid grower at Exhibition Park, has accepted a position in the vicinity of New York.

Mrs. Harriet Townsend, relict of the late E. J. Townsend, of Hamilton, passed away on December 16.

H. G. D.

St. Louis.

CLUB MEETS AND ACCEPTS AN INVITATION TO BELLEVILLE.—GROWER NOW MAYOR OF ILLINOIS CITY.—TRADE AND OTHER NOTES OF LOCAL DOINGS.

The December meeting of the St. Louis Florists' Club was held with only fourteen members present. A committee of three, consisting of J. J. Beneke, F. M. Ellis and F. J. Fillmore was appointed to get up an entertainment some time in February. H. G. Berning brought up the matter of the raise of fifty per cent in express charges and after some discussion it was decided to appoint a committee of three wholesalers to co-operate with Mr. Smith or any of the other workers in this affair. J. W. Dunford, Jr., read a very interesting paper on greenhouse construction. Dr. A. S. Halstead, mayor of Belleville, was to have read an essay on chrysanthemums, but has been very busy and was excused until next meeting. He acquired this new title at a very recent date. The regularly elected mayor was elected county judge and the Doctor was elected by the council to fill the vacancy. He has asked the club to hold its January meeting in Belleville, where he will make it pleasant for all who can attend. The meeting will be held in the Commercial Club rooms and will be called at 2 p. m.; it will be necessary to leave East St. Louis at 1 o'clock to get there on time. The best way is to take the car at the Missouri side of the bridge and ask for a transfer at Collinsville avenue to the Belleville car. At the recent session Mayor Halstead had a vase of his seedling carnations, a cross between McGowan and Alaska, a cross between Alaska and Flora Hill, and a cross between McGowan and Daybreak. All are good.

A few clear days will bring stock in nicely for Christmas and New Years. Violets continue to be scarce in this section, due to their blooming so heavily in October and November. The prices are not expected to run above those of last year.

F. J. Foster has again removed his store to 507 Olive street from 1000 Olive street. He should do a good business here, as it is in the busiest section of the city.

Theodore Miller has his windows fixed up in grand style for the holidays, principally with a red effect, although some very fine Lorraine begonias are used.

Mrs. Ellison, of Ellison & Tesson, has a very beautiful window, made up principally with plants set in Indian baskets. This firm is setting up a series of table decorations at the Simmons Hardware Company store. Mr. Ellison is down from Chicago for the holiday season.

Julius Schray has been laid up for some time with a lame foot, upon which he dropped an iron bar.

Charles Cannon has sold his fixtures and trade to L. R. Townsend. R. J. M.

ATLANTIC CITY, N. J.—D. B. Edwards has sold his business to the Edwards Floral Hall Company, incorporated, of which he will be manager.

BENTON HARBOR, MICH.—Samuel Gentle has sold his interest in the Colby-Hinkley Company to give his entire attention to the Twin City Floral Company.

CHATTANOOGA, TENN.—Wm. Karsten, brother of John Karsten, the well-known florist, was stricken with apoplexy while on the street, December 10. He is recovering.

Syracuse, N. Y.

GROWER DECIDES TO WITHHOLD LONG-CHERISHED SEEDLING.—MUCH MONEY SACRIFICED.—GOOD STOCK SHOWN.—TRADE BRISK AND ALL WELL PLEASED.

L. E. Marquisee has decided that his Empire State carnation is unworthy and not a cutting will be sent out, nor will it be grown in his own place. It is remarkable that a carnation which looked so vigorous and promising, one which attracted such favorable attention at the Indianapolis carnation meeting, merits such a fate. The ordeal through which it passed during the summer in the field evidently impaired its vitality. Its behavior since being housed proved anything but encouraging. The decision not to send it out cost Mr. Marquisee nearly \$3,000, for he had booked orders amounting to upward of 25,000 cuttings. His three new seedlings, a white, a red and a variegated, which will be shown in Brooklyn in February and which will likely be put on the market in the spring of 1904, all look well. The white is free, of good form and size, with a stem and calyx that are all right. The scarlet is a free producer and a fancy. The variegated seems certainly ahead of Bradt in every way. Barring the Empire State, Mr. Marquisee's carnations are in splendid condition, his own Marquis sustaining all the claims he ever made for it. Nelson and Cressbrook vie with each other for supremacy. The former, considering its sickly condition at the time it was disseminated, has certainly made remarkable progress and is doing splendidly.

P. R. Quinlan & Company are cutting some fine Brides, Bridesmaids, Golden Gates and Ivories. The latter, in the opinion of Mr. Bard, is a most valuable acquisition, one that has come to stay. Their American Beauties are fully up to their standard and will yield a fine crop for Christmas. Perles do exceptionally well here and Meteors are coming along, of good quality and in paying quantity. Their carnations are strong, a heavy crop in sight.

L. A. Guillaume is well pleased with his new location on the outskirts of the city. With a well equipped range of houses, plenty of ground and no factories or dwelling houses to obstruct the light, his Lawsons average three and one-quarter inches in diameter. Marquis is decidedly fine in every way; Crane and Estelle behave splendidly and Queen Louise "blooms all the time." NOMIS.

Detroit.

CLUB HOLDS WELL ATTENDED AND INTERESTING MEETING.—SHOW MATTER POSTPONED.—CARNATION SOCIETY TO BE INVITED.—GOOD BUSINESS IN SIGHT.—VARIOUS NOTES.

The club meeting Wednesday evening was one of great interest to the large number of members present. It had been previously announced that the matter of a fall flower show would be considered, but after much animated discussion of the subject, showing a wide diversity of opinion bearing on the proposition, it was finally laid on the table until the next meeting. But on another matter of importance there was a complete unanimity of favorable opinion, that of inviting the American Carnation Society to hold its meeting of 1904 in our city. A vote taken showed everyone in favor of extending the invitation and in the event of its acceptance preparations will commence immediately after the Brooklyn

meeting in February, where a big delegation will be present from this city. A vase of Lillian Pond carnation was on exhibition, sent by S. J. Reuter, Westerly, R. I. The variety elicited much favorable comment, the stiffness of stems being particularly noticeable.

Active preparations for the holiday trade are being made in all directions and everyone is looking forward to an immense business. Already many flowering plants, palms and Boston ferns are being sold for Christmas delivery. At present, indications point to a decided scarcity of carnations and violets for the holidays, while the supply of roses will be much short of the demand. Christmas greens are on the market in great quantities, but each recurring season sees a decrease in the amount of this class of stock handled by retail florists and the greens business is now chiefly in the hands of the grocers and street vendors.

Frank Holzagle is the proud possessor of a house of 1,200 poinsettias in prime condition for Christmas. Two of his rose houses will be in with a heavy crop at the right time.

Louis Rush is suffering with a severe attack of rheumatism.

Visitors: John Burton, Philadelphia; John X. May, Summit, N. J.; Thos. J. Wade, New York; A. L. Vaughan, Chicago; E. J. Fancourt, Philadelphia.

J. F. S.

Boston.

GREENHOUSEMEN OF NEW ENGLAND SUFFER FROM COLD.—SEVERAL FREEZE-UPS REPORTED.—CONDITIONS FAVORABLE FOR OUTDOOR MATERIAL.

Greenhouses in this section have been subjected to an unprecedented test for the past two weeks. The wintry weather, which started in with a furious snow storm on December 5, has continued with little abatement ever since, breaking all December records in many respects. Through all this the coal famine has grown more and more desperate, soft coal even being unobtainable in some localities. Wood, much of it freshly cut and green, or sometimes a combination of soft coal and wood, is the only fuel available for many growers and all have had their hands full, day and night, struggling against the fierce elements and adverse conditions. Many places have suffered more or less damage from freezing. Among the establishments thus reported is that of C. J. Dane, at Winchester, which was frozen up on Sunday night, December 7, because of a bursted boiler. Quite a number of the smaller florists in rural communities throughout New England, despairing of securing fuel at living prices, have shut down and abandoned their houses for the balance of the season and some of them will probably not resume.

Conditions so far seem to have been favorable to outdoor plants and shrubs of doubtful hardiness. There was nothing more than a mere skim of frost in the ground when the snow came and buried everything deep and if this blanket should only lie through the winter at its present depth it would be an inestimable benefit, but this is almost too much to expect in this section.

ST. PAUL, MINN.—Mrs. H. H. Bunde's daughter Clara, aged 18 years, died very suddenly December 17.

LOOMIS, CAL.—The California Carnation Company, A. Mitting, manager, has bought out the Western Carnation Company, E. N. Faucher, manager.

Meetings of Florists' Clubs.

The accompanying list gives the cities in which there are active florists' clubs.

BALTIMORE, MD.—Gardeners' Club of Baltimore Royal Arcanum building, 18 W. Saratoga street. Second and fourth Monday of each month, at 8 p. m. John J. Perry, Sec'y, Gay and Eager streets.

BOSTON, MASS.—Gardeners' and Florists' Club of Boston, Horticultural Hall. Meets second Tuesday of each month. W. E. Fischer, Sec'y, 18 Union Terrace, Jamaica Plain, Mass.

BROCKTON, MASS.—Brockton Gardeners' and Florists' Club, store of W. W. Hathaway, Times Building. First and third Tuesday of each month, at 8 p. m. W. W. Hathaway, Sec'y, Brockton, Mass.

BUFFALO, N. Y.—Buffalo Florists' Club, 481 Washington street. Second Wednesday of each month, at 8 p. m. Wm. Legg, Sec'y, 1440 Delaware avenue, Buffalo.

CHICAGO, ILL.—Chicago Florists' Club, Handel Hall, 40 Randolph street. Second and fourth Wednesday of each month, at 8 p. m. George Wienhoeber, Sec'y, 413 Elm street, Chicago.

CINCINNATI, O.—Cincinnati Florists' Society, Jabez Elliott Flower Market. Second Saturday of each month, at 8 p. m. George Murphy, Sec'y, West Price Hill.

CLEVELAND, O.—Cleveland Florists' Club, Progress Hall, 241 Detroit street. Second and fourth Monday of each month, at 8 p. m. Isaac Kennedy, Sec'y, Woodcliffe, Lake avenue, Cleveland.

DENVER, COLO.—Denver Floral Club, 323 Charles Block. Second and fourth Friday of each month at 8 p. m. Adam Halmer, Sec'y.

DETROIT, MICH.—Detroit Florists' Club, Cowie Building, Farran and Gratiot avenue. First and third Wednesday of each month at 8 p. m. J. F. Sullivan, Sec'y, 214 Woodward avenue.

HAMILTON, ONT.—Hamilton Gardeners' and Florists' Club, 126½ James street, North. First and third Tuesday of each month at 8 p. m. Chas. M. Webster, Sec'y.

HARTFORD, CONN.—Hartford Florists' Club. Second and fourth Tuesday of each month at 8 p. m. J. F. Coombs, Sec'y, 688 Main street.

INDIANAPOLIS, IND.—State Florists' Association of Indiana, Commercial Club rooms, Indianapolis. First Tuesday of each month, at 8 p. m. H. Junge, Sec'y, 456 E. Washington street, Indianapolis.

MONTREAL, QUE.—Montreal Gardeners' and Florists' Club, Alexandria rooms, 2204 St. Catherine street. First and third Monday of each month W. H. Horobin, Sec'y, 23 Closse street.

NEW YORK, N. Y.—New York Florists' Club Civic Hall, 128 East Twenty-eighth street. Second Monday of each month, at 7:30 p. m. John Young, Sec'y, 51 West Twenty-eighth street, New York.

OMAHA, NEB.—Nebraska Florists' Society, City Hall. Second Thursday in each month at 8 p. m. Louis Henderson, Sec'y, 1519 Farnam street, Omaha.

PHILADELPHIA, PA.—Florists' Club of Philadelphia, Horticultural Hall, Broad street above Sorce. First Tuesday of each month, at 8 p. m. Edwin Lonsdale, Sec'y, Wyndmoor, Philadelphia Pa.

PITTSBURG, PA.—Pittsburg and Allegheny Florists' and Gardeners' Club, at rooms of Pittsburg Cut Flower Co., 504 Liberty street. Second Thursday of each month, at 8 p. m. T. P. Langhans, Sec'y, 504 Liberty street, Pittsburg.

PROVIDENCE, R. I.—Florists' and Gardeners' Club of Rhode Island, 95 Westminster street, Providence. Second Thursday of each month, at 8 p. m. Alexander Rennie, Sec'y, 41 Washington street, Providence.

RICHMOND, IND.—Richmond Florists' Club, Commercial Club rooms. First and third Friday of each month. H. C. Chessman, Sec'y.

SALT LAKE CITY, UTAH.—Salt Lake Florists Society, office of Huddart Floral Company, 214 E. Second South street. Second and fourth Friday of each month. P. T. Huddart, Sec'y.

SAN FRANCISCO, CAL.—Pacific Coast Horticultural Society. First Saturday and third Monday of each month. Thos. H. Munroe, Sec'y.

SEATTLE, WASH.—Seattle Commercial Horticultural Club, First and Cherry streets. First Wednesday of each month. Wm. Hopkins, Sec'y, 622 First avenue.

ST. LOUIS, MO.—St. Louis Florists' Club, Odd Fellows Hall No. 2, Ninth and Olive streets. Second Thursday of each month, at 3 p. m. Emil Schray, Sec'y, 4101 Pennsylvania avenue, St. Louis.

TORONTO, ONT.—Toronto Gardeners' and Florists' Association, St. George's Hall, Elm street. Third Tuesday of each month, at 8 p. m. W. C. Jay, Sec'y, 438 Spadina avenue.

UTICA, N. Y.—Utica Florists' Club, 183 Genesee street. First Thursday of each month at 8 p. m. J. C. Spencer, Sec'y.

WEST HOBOKEN, N. J.—North Hudson Florists' Club, store of H. C. Steinhoff, Hudson boulevard, West Hoboken. First Tuesday of each month, at 8 p. m. Geo. F. Kogge, Sec'y, 616 Washington street, Hoboken.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year, To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, **only on consecutive insertions**, as follows—6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

Cover space sold only on yearly contract at \$1.00 per inch, net, in the case of the two front pages, regular discounts applying only to the back pages.

The Advertising Department of the AMERICAN FLORIST is for florists, seedsmen and nurserymen and dealers in wares pertaining to those lines *only*.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday. Address

AMERICAN FLORIST CO., Chicago.

Now is the time to take extra precautions against fire.

WHOLESALE hands are again well cleaned up on Begonia Gloire de Lorraine.

THE blizzard in the east caught many growers napping or with insufficient supplies of fuel.

GROWERS will do well to remember that next Easter will be two weeks later than last, the date being April 12.

THE next annual meeting and exhibition of the American Carnation Society will be held at Brooklyn, N. Y., February 19-20.

THERE is a profusely illustrated account of the Detroit parks, by Alfred Rehder, in *Mollers' Deutsche Gartner-Zeitung* of December 6.

EARLY "copy" will be in order the next two weeks. Because of Christmas and New Year holidays, contributions and changes of advertising "copy," usually in season on Thursday, should be mailed to reach us Wednesday.

JAPANESE fern balls do vastly better the second year than during the first after importation, according to the Garfield Park Floral Company, Chicago, and the truth of this statement is shown in the condition of this firm's specimens at the present time.

It is announced that L. E. Marquisee, of Syracuse, has decided not to send out his white seedling carnation, Empire State, after booking orders for 25,000 cuttings of it. Dailedouze Bros., of Flatbush, will not disseminate the scarlet seedling exhibited at Philadelphia in November, 1901, labeled G. D. I. and winner of the Craig cup. And Isaac Passmore, of West Chester, Pa., has withdrawn his seedling Dora for lack of keeping qualities. Surely the millennium is close at hand.

The S. A. F. Proceedings.

We are in receipt of a copy of the report of the proceedings of the eighteenth annual convention of the Society of American Florists, held at Asheville, N. C., August 18-22, 1902. The pamphlet of some 212 pages contains a full account of the meeting, with papers, etc., read thereat, and much miscellaneous information of value to the members, including lists of new plants introduced and registered during the previous year. We note that in compliance with the suggestion of President Burton and motion of ex-President O'Mara a paeonia committee has been appointed, with Edwin

Lonsdale, of Chestnut Hill, Pa., as president, and Geo. C. Watson, of Juniper and Walnut streets, Philadelphia, Pa., as secretary. Among the corresponding members of this committee we note the following illustrious names: Kelway & Sons, Langport, Somerset; Thos. S. Ware, Feltham, Surrey; J. Backhouse & Son, York; Alfred Dimmock (Sander & Co.), St. Albans; R. H. Vertigans & Co., Chad Valley, Birmingham; Barr & Sons, Covent Garden, London; A. & C. Pearson, Lowdham, Notts; J. Veitch & Son, Chelsea, London, England; C. Paillet, Orleans, France; Louis Van Houtte, Ghent, Belgium; E. Krelage & Son, Haarlem, Holland; Jno. Forbes, Hawick, Scotland. All communications with reference to this committee and its work should be addressed to Mr. Watson.

Forcing Etherized Plants.

In our issue of December 13 Frederic Harris, of Hanburg, Germany, was given credit for some good work under the above head, when the name should have been Frederic Harms, the well-known grower of lilacs, lily of the valley, etc.

Greenhouse Building.

Seattle, Wash.—Woodland Park Floral and Seed Co., range of 35,000 feet.

Secane, Pa.—Philadelphia Carnation Co., range of 20,000 feet.

Oakland, Cal.—Domoto Bros., range of ten rose houses.

Shelburne Falls, Mass.—L. R. Fuller, one house.

St. Louis World's Fair.

F. W. Taylor, acting chief of the department, states that four acres is the amount of space in the Horticulture building to be devoted to the fruit exhibit. The building will contain altogether eight acres of space, four of which are in one large room to be devoted entirely to the fruit exhibit. The conservatory for the flowers contains two acres and there are available about fifty acres of outside space upon which to plant exhibits of flowers and nurserymen's stock.

The Price of Glass.

As to French glass for import in car-load lots, f. o. b. Atlantic seaboard port of entry, Semon Bache & Company supply the following as the current discounts, figured on the American list:

Second quality, 50-foot boxes, on sizes up to thirty-four united inches, discounts of 9-20 2½ per cent; on sizes up to forty united inches, discounts of 9-20-10 2½ per cent.

Third quality, single, 50-foot boxes, on sizes up to thirty-four united inches, discounts of 9-10 7½ per cent; 100-foot boxes, 9-10-10 10 per cent. On sizes up to forty united inches, 50-foot boxes, discounts of 9-10 10-10 per cent; 100-foot boxes, 9-10-10 2½ per cent.

Third quality, double, 57-foot boxes, on sizes up to thirty-four united inches, discounts of 9-10 7½ per cent; on sizes up to forty united inches discounts of 9-10 10-10 2½ per cent.

Fourth quality, single, 50-foot boxes, on sizes up to thirty-four united inches, discounts of 9-10 5 per cent; 100-foot boxes, discounts of 9-10 7½ per cent. On sizes up to forty united inches, 50-foot boxes, discounts of 9-10 7½ per cent; 100-foot boxes, discounts of 9-10 10 per cent.

The second quality French is figured from the AA column of the American list, the third quality from the A column and the fourth quality from the B column. On thirty-four united inches the American list is: Single, AA, \$33.50; A, \$28; B, \$26.75. Double, AA, \$46.75; A, \$41.50; B, \$38.75. On forty united inches (this includes 16x24) the American list is:

Single, AA, \$36; A, \$30; B, \$28. Double, AA, \$52; A, \$45.50; B, \$41.50.

As to American window glass, Sprague Smith Company report the prices somewhat unsettled at present, but, in their opinion, the price of greenhouse glass will not be advanced.

To Attract Purchasers.

A florist who has a shop at Cologne has had the happy idea of attracting the attention of the passers-by to his show of flowers and plants by the aid of a proceeding as ingenious in itself as it is good for the plants and flowers. This idea, says the *Garden*, he has realized by making a thin stream of water flow from the top and down the inside of his shop window. The water spreads and descends over the whole surface of the glass like an extremely fine sheet. The undulations, ceaselessly changing and constantly renewed, which the sheet of water produces, considerably dim the clearness of the view of the flowers on show inside, but do not prevent one from recognizing them and admiring their freshness. These undulations produce a new and charming effect, which attracts and fixes the attention of flower-lovers, whilst the evaporation, which naturally is considerable on account of the large surface of the glass, keeps the air moist, to the very great benefit of the plants and cut flowers. The installation of this curious process is very simple. A perfectly horizontal gutter placed at the top of the glass receives a stream of water, which it pours out along its whole length upon the face of the glass. A similar gutter placed at the bottom receives the water, and in its turn empties it into a waste-pipe. The fixing of the apparatus costs but little, and the loss of water is very small. There may perhaps be an idea in this which may be useful to some florist—at any rate we have thought it interesting to point out its ingenuity.

OBITUARY.

WM. HOFFMEISTER.

Venerable Wm. Hoffmeister, of Cincinnati, died Tuesday, December 16. He was one of the pioneers of the craft, having resided in Cincinnati for over fifty years, and was actively engaged in business up to the time of his demise. His sons and daughters, who conduct the business of the Hoffmeister Floral Company, have the sympathy of hosts of friends in their bereavement.

ALLAN BARR.

Allan Barr, for the past eighteen years head gardener for Wistar Brown, Villa Nova, Pa., died on Monday, December 15, after a short illness, aged 67 years. He leaves a widow and their three sons are all engaged in gardening. Born at Beith, Ayrshire, Scotland, he came to America when a young man, spending a number of years as gardener and for some time in the florist business. The many fine specimen trees on Mr. Brown's property are mute evidence of Mr. Barr's skill and judicious planting. The evergreens, especially, show the result of careful management and are well known locally. A thorough gardener, of cheerful disposition, his absence from the ranks of the old-time gardeners will be greatly felt. All who knew him extend sympathy to the bereaved family. F. C.

The Traveling Man.

CONSIDER now the Traveling Man.

That gay and festive blade
Who goeth up and down the land.
In sporty garb arrayed
Who playeth harrow with the hearts
Of many country belles
And stoppeth like the prince he is
At all the best hotels

Now mark him as he sits him down
Outside the tavern door.
And lighteth up his good cigar
Which cost ten cents or more.
And with his comrades gathered round
He swappeth sundry lies,
Or at the village maidens fair
Doth make the goo-zoo eyes.

And presently he to the bar
With others doth repair,
And many highballs will he take
To drive away dull care.
Now would not such a life of ease
Appeal to any one?
And would we all were traveling men
Nay, wait a bit, my son.

For in the morn ere dawn hath come
From bed ariseth he,
And drosseth in a chilly room
To catch the five-ought-three.
As breakfast is not ready yet
He getteth on the train
And rideth down to Green's Cross Roads,
Perhaps an hour or twain.

And there before the tavern stove
He warmeth up his legs.
And presently he sits him down
To hash or ham and eggs,
And when to work he goeth forth
He finds to his amazement
His customer hath gone to town.
To be there several days.

He rusheth back unto the inn
To make his get-away.
And there with sinking heart he hears
The landlord calmly say:
"Was you a-going east, my friend?
Well, you are left all right.
There ain't no other train that way
Till 9:18 to-night."

So when at last the weary day
Hath dragged its leaden round,
Again the happy traveling man
Is at the station found.
And to him comes the ticket man
And cheerfully doth state:
"Jest make yourself to home, old man
Your train's three hours late."

When on the morrow he awakes
Again at work to start,
He gets a letter from his house
Which cheereth up his heart:
"We note that your expense account
Is running far too high.
We must have this curtailed at once
Or know the reason why."

Now if his overcoats at home
The mercury doth drop,
But if he's clad in winter clothes
It hovers near the top.
And all the nicest days come when
He's traveling on trains,
But it he has ten miles to drive
It either snows or rains.

At length the weary trip is done
And he is home once more.
He sees his wife an hour or so
Then drops down to "the store."
And pleasant words like these he hears:
"What, Jimmie, home so soon?
Well, get your samples up in shape
To start to-morrow noon."

Ah, envy not the Traveling Man,
For though his job seems gay,
Despite his efforts, now and then
Some work will come his way.
And when to you it seems his lot
Is one of joy alone,
Remember that the Drummer has
Some troubles of his own.

—R. L. S. in the New York Sun.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED. By experienced seedsmen—any department, stockkeeper or mail order preferred. SEEDSMAN, care Am. Florist.

SITUATION WANTED. By a good all-around grower of plants and cut flowers, single, 21 yrs. experience. Address C. F., care Am. Florist.

SITUATION WANTED. As a traveling salesman for a reliable house in the florist line, the east preferred. Address SALESMAN, care American Florist.

SITUATION WANTED. By experienced salesman, to represent a grower in the Philadelphia cut flower market. Address PHILA. SALESMAN, care American Florist.

SITUATION WANTED. By young man, good grower of general stock, as helper in first-class establishment or could take charge of small retail place. Good wages expected. Address BOB, care American Florist.

SITUATION WANTED. By all-around florist and gardener, good on landscape and design work; private or commercial place. Good references. Address A. C. LUDWIG, 221 Second St., Marietta, O.

SITUATION WANTED. As head gardener or foreman, German, 30 years of age, unmarried, A No. 1 references. Neighborhood of New York preferred. Address J. KRAMER, care J. Blair, Ogden Mills, Staatsburg, N. Y.

SITUATION WANTED. As rose grower and propagator of A1 stock; 22 years' American experience. At liberty February 1st. Only first-class place wanted; English, married. State wages. Address DAISY, care American Florist.

SITUATION WANTED. As working foreman, who can manage help and is a good grower of all kinds of flowers; also a good designer; would like to take my head man with me. Good pay required and also a permanent place. Address MASS, care American Florist.

SITUATION WANTED. To take charge of a retail place. Good grower of roses and general cut flowers. 12 years' experience; single; age 33. A thoroughly reliable man. Ind., Ill. or Kentucky preferred. Address FOREMAN, care American Florist.

SITUATION WANTED. In retail store, after January 1, 1903. First-class designer, decorator and retail salesman; with present firm nine years. First-class references; 33 years old, and married. If you have an opening for A1 man, write or wire. A. B. WILLIAMS, care The Dahl Co., 83 and 85 Peachtree St., Atlanta, Ga.

SITUATION WANTED. By a first-class florist and gardener, all-around man in cut flowers, decorative plants and bedding stock. Carnations a specialty. Age 29, single, German; 15 years' experience. First-class references as a sober, honest and hard working man. Private or commercial place. Eastern or middle states preferred. State wages. EAST, care American Florist.

WANTED. Competent florist assistant. State wages with board. Address U. L. BRUNSON & Co., Paducah, Ky.

WANTED TO RENT. 8,000 to 15,000 square feet of glass, near Philadelphia, suitable for rose growing; partly stocked preferred. Address ROSE GROWER, care American Florist.

WANTED AT ONCE. Good steady man, experienced in growing cut flowers and bedding plants, as helper in M. C. R. R. greenhouses at Niles, Mich. Wages \$1.25 per day. Steady work. JOHN GIBNER, Chief Gardener, Niles, Mich.

WANTED. A good experienced man to work in retail department of a Western Seed House. Must be intelligent and have a thorough knowledge of garden and flower seeds, bulbs, etc. State salary expected. Address SEEDS, care American Florist.

WANTED. A married man without children, German-American preferred, to take charge of nursery where the growing of small stock for transplanting is made a specialty. Must understand the propagation of hardy shrubs and evergreens from cuttings, be sober, industrious and well recommended; \$50 per month and a house. A permanent position to the right party. Address JOS. W. VENTURA SON, Little Rock, Ark.

WANTED. Good all-around cut flower grower, single, for a place near Kansas City. Good pay to the right party. Address GROWER, care American Florist.

WANTED. A married man of small family, of general experience, capable of taking charge of 12,000 feet of glass, general line grower. House furnished. State wages wanted and give references. None who get drunk wanted. Address JAMES FROST, Greenville, Darke Co., Ohio.

FOR SALE. Greenhouses, 6,500 feet of glass, stocked with carnations, peas, palms, etc., town of 6,000. I want to go south. Address J. FRANKLIN HUNTER, Mount Holly, N. J.

WALTER P. STOKES, PRÉS.; C. N. PAGE, First Vice-Prés.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

IMPORTED cucumber seed is being offered in a small way.

CHARLES P. BRASLAN, of San Jose, Cal., has regained his health and is now in Chicago.

VISITED CHICAGO: Marshall H. Duryea, representing Henry Nungesser & Company, New York.

THERE was a carload of Japanese fern balls received at Vaughan's Seed Store, Chicago, December 15.

ALFRED EMMERICH, of Vilmorin-Andrieux & Company, Paris, sailed from New York on La Lorraine, December 11.

MRS. E. V. HALLOCK and daughters, and Miss Smith, of Queens, N. Y., passed through Chicago, December 19, enroute to California.

MEYER & SCHWAKE will open up at 19 Barclay street, New York, January 1; Wm. Hagemann & Company remain at 55 Dey street.

HARTFORD, CONN.—Hart, Wells & Co. have begun their winter's work of packing and unpacking seeds. The full force will be working in a few weeks.

EVERETT B. Clark and Mrs. Clark, of Milford, Conn., passed through Chicago December 18, on their way to Omaha, where they will spend two months with their daughter.

W. B. CLEVES, for the past three years with the Whitney-Eckstein Company, of Buffalo, will open a general seed business on his own account at Binghamton, N. Y., about January 1.

CONTINUED rains and warm weather are preventing the curing of the tuberose bulbs in the growing district, and both home and export deliveries will be considerably later than usual this season.

W. J. STEWART writes from New York, December 15: "Japan shipments of auratum lilies, fern balls, etc., are all late this season. High grade lily of the valley is in exceptionally short supply this year."

CHICAGO.—The holly market is not as brisk at this writing, December 19, as expected, prices for fancy stock just about holding their own with the early rates, while off quality is being cut 50 cents to \$1 per case.

ACCORDING to the *Gardeners' Chronicle* (English) there is an opening for trade in seeds, bulbs and tubers at Coruna, provided lists in Spanish are distributed. Senor Ingeniero, Director de la Granja Experimental, de la Coruna, is mentioned as one of the interested parties.

WM. HAGEMANN, who has purchased the interest of Mr. Meyer in the firm of Hagemann & Meyer, New York, has taken Ralph M. Ward into partnership under the firm name of Wm. Hagemann & Company. Mr. Ward has been in the employ of the old firm since it began business.

To say that this is the most extraordinary year the seed trade has experienced in a long time is putting it very mildly. There is not a mail that does not bring surprises as to crop shortages which developed at a time when the seeds should be in the hands of the dealers, as

they are in ordinary years. Beans, peas, sweet corn and vine seeds continue to lead the list in shrinkages from former estimates; tomatoes are equally as bad.

BOUQUET green prices have declined steadily since our last note in these columns and in line as there predicted. Ruling rates the past week have been for small lots \$3 to \$4 per crate, according to quality, and ton lots at 75 cents per 100 pounds less. The apparent surplus has been worked off pretty well at these low prices.

GERMAN growers will deliver perhaps one-half the ordered quantities of nasturtiums. The plants did not come into full bloom until the middle of September and frosts from the 18th to 20th of that month destroyed nearly the entire crop.

The invoices which are now being received contain in most cases the first intimation of these shortages.

ANDERSON, IND.—The Wilke Mfg. Company, of this city, is placing on the market attractive refrigerators for florists.

PLEASANT, ILL., MO.—Geo. M. Kellogg reports that Christmas prospects are excellent, but that for ten days prior to that time there had been no sunshine.

AURORA, ILL.—J. M. Smely is building two show houses and in the spring will put up five more structures, also an office and shipping room. Iron posts and gutters will be used. A new heating apparatus will also be installed. Shipping trade is very good and a nursery department is to be added.

OVER 2,000 ACRES IN CULTIVATION.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRIEZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

M. J. WRAGG, of Waukegan, has been re-elected president of the Iowa State Horticultural Society.

FRED. S. PHOENIX, of Bloomington, has been elected secretary of the Central Illinois Horticultural Society.

NIC OHMER was re-elected president of the Montgomery County Horticultural Society, in session at Dayton, O. N. H. Albaugh was elected vice-president.

THE apple crop of the United States for 1902 is estimated 43,020,000 barrels. In 1899, according to the federal census, it was 50,466,000 barrels.

JOHN PRUYN, who met reverses in the nursery business through the failure of a bank at Niles, Ind., died recently of paresis in the Kalamazoo Insane Hospital. He was 51 years of age.

FRED. N. PREVOST, for some years foreman for the Chase Nursery Company, at Highgrove, Riverside county, California, has resigned. He will devote his time to the care of orange groves in that section.

JOHN S. KERR, secretary of the Texas State Nurserymen's Association is quoted as saying: "At first blush it may seem an exaggeration, but I candidly believe that the increase in Texas orchards this season will be at least 200 per cent greater than a year ago; in other words, that there will be at least three trees planted this season to one last."

THE Rochester, N. Y., *Herald* prints the following under date of Danville, December 11: "The Stark Brothers Nursery Company, of Louisiana, Mo., has purchased the Orville T. Hartman nursery farm of 130 acres, located just outside this village. The F. E. Williams Nursery Company and the Kelley Bros. Nursery Company of this village will be associated with the Stark Bros. firm, which will make a strong combination."

Trees of Boston Common.

When in Boston Mr. Nicholson admired the methods adopted, and the results obtained, in the parks and public gardens of that beautiful city, but the trees on the Boston Common he described as in a state of semi-starvation. "If," said Mr. Nicholson, "a family of six grown persons was compelled to live upon a food supply only sufficient to maintain two persons in a healthy condition, the effect of this forced abstinence would before long show itself in the weakened physical condition of those who had been put through this ordeal."—*Gardeners' Magazine*.

[George Nicholson, formerly curator of the Royal Botanic Garden, Kew, Eng., is well known as an authority on trees and shrubs.—ED.]

San Francisco.

A TOUR AMONG NEAR-BY GROWERS.—GOOD STOCK BUT CROPS LATE FOR CHRISTMAS TRADE.—GOTTINGS OF THE JOURNEY.—BUSINESS DECLINES AFTER THANKSGIVING.—NOTES HERE AND THERE.

Messrs. Clack and Mitchell, of Menlo Park; Goertzshain, of Redwood City, and Fick, of San Mateo, visited the growers

across the bay the other day. The first place seen was John Carbone's at West Berkeley, where nothing but the best fancy carnations are grown in six or seven 100-foot houses. The stock looks good, but many splits were noticed among the Bradts, 2,000 of which are grown. Mr. Raddish, of E. Berkeley, has one large house of carnations in full bloom, Lawson being the best. J. Young, of Dwightway, has twenty-four houses of Beauties, Bridesmaids and Brides, and two houses of maidenhair ferns. The Beauties were mostly off crop but Bridesmaids and Brides were well covered with good strong buds. Mr. Young relies mostly on the spring and summer months for a good crop of Beauties, as all are planted in solid beds and more than two years old. Mrs. Young set a splendid dinner before the visitors. Fred. Abe's was the next place visited. The best Beauties to be found in the state can be seen here, a picture of health with from four to six shoots six feet long to each plant, just right for the holidays. A. Galloway's place in Fruitvale was reached after a long ride in rambling cars. He is an expert carnation grower and has invested heavily in up-to-date eastern carnation houses with iron posts and iron gutters. Two benches of Estelle, one of Lawson and one of Lorna were a fine sight.

Business since Thanksgiving has become somewhat slow, which is no surprise to any of us here, as it is a yearly occurrence. This year will find the holidays very short on roses and first grade carnations, as with very few exceptions the larger growers are behind with their crops. Prices have jumped considerably of late, the best Beauties bringing \$5 per

dozen and Bridesmaids, Kaiserins and Brides \$1 per dozen. Hobart carnations also fetch \$1 per dozen, Estelle and Lawson 50 cents and other grades 35 cents, with another twenty-five per cent increase in sight for the holidays.

Domoto Brothers' carnations are badly infested with stem rot. Two houses were not replanted at all owing to a shortage of young stock. Their plant houses look very fine, especially the kentias. Lilies have taken the place of chrysanthemums and can be seen by the thousands, with no sick ones among them. The firm has formed a stock company with \$50,000 capital, has bought thirty acres of land at Elmhurst and will shortly put up ten large rose houses.

E. W. McLellan, of Burlingame, is considerably behind with roses as well as carnations; very few flowers to the size of place will be cut for the holidays, but there is no limit to lily of the valley. Here the Easter lilies are considerably affected with disease but not half as bad as last year.

Arthur C. Cann, of San Jose, has been visiting here. He grows six houses of carnations and the whole cut goes to C. Navlet, of the same place. He says prices will not be so high as in San Francisco but quantity will make up.

A San Francisco firm whose name is held back has bought eight acres of land in Burlingame. A range of twenty modern rose houses will be put up the coming spring and others added as the season advances.

Gallert & Company have a house of smilax, one of *Asparagus Sprengeri* and another of *A. plumosus* which are fine.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

THE bowlers are enjoying a three weeks' holiday vacation.

At Chicago.

The Chicago bowlers, in company with most of their brother craftsmen, are taking a lay-off over the holidays; most of them are too busy to be able to spare the time and too wearied with the day's activities to care for further exercise. After the first of the year they will make a fresh start and will begin determined practice preparatory to the selection of a strong team for the convention contest. It is likely that the Florists will pull out of Anson's league if it can be arranged satisfactorily. The boys are out of their class there, although not the tailenders, but that is not the reason for their contemplated retirement. Most of those who bowl at Anson's also roll in the Florists' league, and two nights a week is rather too much for a steady thing.

Joseph Foerster, of George Reinberg's city store, is the leader of the florist bowlers, from all accounts. He is a member of the Illinois team, which holds the high game record for this city. He has rolled twenty-four games, with a total of 4,783 pins, an average a fraction above 199. His best game was 234, made in the record game.

Providence, R. I.

COLD WAVE PUTS ONE GROWER OUT OF BUSINESS.—MANY SUFFER TO LESS EXTENT.—STOCK ABUNDANT FOR THE DEMANDS.—VARIOUS NOTES.

The cold snap played havoc with the growers the past week. Almost everyone reports damage of some kind. Alvertus Martin, of Warren, was completely ruined on stock, his boilers giving out through lack of water. Afterwards came a decided thaw, making the business streets impassable to shoppers and putting a damper on trade generally.

Flowers are not plentiful but are abundantly meeting all demands. Prices on carnations have advanced and the result has been to stop the demand. The limit of active business is 50 cents a dozen retail. All the down town stores, as well as the suburban florists, have felt a noticeable depression in business the past week. The scare on coal has produced a swift economy among the people and the florists suffer thereby.

The policemen's and firemen's balls were of small account from a flower standpoint. They used some palms, but nothing compared to former days.

T. J. Johnston has removed the staging from his building and is now ready for daylight inspection.

Wm. Hazard mourns the loss of his aged father.

M. M.

Buffalo.

BUSINESS IN KEEPING WITH THE SEASON.—PLENTY OF PLANTS FOR CHRISTMAS.—A FIRE AND OTHER NEWS NOTES.

Trade has been all that could be expected before the Christmas rush of

orders, which are coming in to all in a satisfactory manner. The supply of potted stock will be equal to the demand. C. F. Christensen and D. Newlands have good stocks of poinsettias. J. H. Rebstock's Gloire de Lorraine are the finest in Buffalo and Jos. Neubeck will have a good lot.

On December 11 fire destroyed a small shed at the Fred. Katoll greenhouses, which are rented by S. A. Anderson. The shed was a small loss but the heat destroyed about 800 poinsettias and 400 lilies that were in good condition for Christmas.

Jacob Wiese of the Chippewa Market, and John Pickleman opposite are getting in a good stock and making active preparations for a big holiday trade.

Violets are scarce, but everything points to a good supply next week. All we want is a few bright days and all will be well.

It is almost impossible to get an audience with W. F. Kasting now, as he is buried in holly, pine and mistletoe.

Thomas Coleman is satisfied with the success he has had so far in his new departure. He did two good decorations last week.

The department stores have decorated their windows very tastefully, using considerable florists' stock. BISON.

“THE BEST WHITE CARNATION.”

Two years ago when we introduced the “HOOSIER MAID,” we claimed it would produce more good flowers from November to May, than any other white. We have not changed our opinion since. Orders booked now for February delivery at \$2.00 per 100; \$15.00 per 1000. 500 at 1000 rates. Cash or satisfactory reference.

Springfield, Mass.

SEVERE COLD MAKES TROUBLE ALL AROUND.—GROWERS PUT TO IT TO KEEP FROM FREEZING.—VARIOUS NOTES.

It is years since this city has seen so much snow with the thermometer down to 14° below zero so early in the season. All greenhouse men have had a hard time in keeping from freezing. Hard coal is \$12 per ton and only to be had in 1-ton lots. Soft coal is scarce and fetches \$10 per ton. Cut flowers are plentiful and fair in quality but business is anything but satisfactory. Retailers are busy decorating their stores in the usual order for Christmas. The present outlook is for a very good holiday trade.

A. Buckleton has about 10,000 feet of glass, all in carnations, which are showing up well for the holidays. Queen Louise is his white. Harry Fenn is grown for crimson and Joost for pink. Morning Glory does not do very well; too many single flowers. J. H. Manley is a great bloomer but does not make growth, so the plants seem to get smaller. Crane and Prosperity are fine but Mr. Buckleton says the latter should fetch more than this city cares to pay.

H. Grout, who had something more than 5,000 feet of glass, was frozen up December 8, owing to lack of coal, and others had close calls. Mr. Grout has not decided on his plans for the future.

A. B.

Columbus, O.

CRAFTSMEN ALL MAKING PREPARATIONS FOR BIG HOLIDAY TRADE.—NOTES OF THE SPECIALTIES.

The Livingston Seed Company has its store window decorated elaborately with Christmas bells and green. In anticipation of a brisk demand this firm will have a larger stock of holly and bouquet green on hand than ever before.

J. R. Hellenenthal has a fine lot of stevia ready to cut. Unlike many growers he believes in giving stevia a good place under glass and it is plain to be seen that where handled thus stevia is a good holiday crop.

The Franklin Park Floral Company has a fine lot of well-grown Gloire de Lorraine begonias, a great many of which have been used during the season for table decoration.

Sherman Stephens has bright prospects for a large cut of fine roses for Christmas but the dark weather makes him feel rather uneasy.

C. A. Roth will handle but a small quantity of decorative greens this season owing to the increase in his cut flower trade.

CARL.

SAN JOSE, CAL.—G. A. Lehman says that the season brought an unusually large sale for chrysanthemum stock plants.

ENCHANTRESS THE GOLD MEDAL WINNER, having defeated all comers at Madison Square Garden and at Kansas City, now reigns supreme.

Having ordered a large quantity, I am still in a position to book orders for February delivery. Don't delay if you want any.

MRS. E. A. NELSON Has proved all we claimed for it—being free and continuous and ahead of its rivals in pink.

Cuttings guaranteed to be absolutely strong and healthy. January and February delivery.

PRICE, \$6 PER 100; \$50 PER 1000.

S. S. SKIDELSKY, 708 N. 16th St., Philadelphia, Pa.

Carnation Gov. Lowndes.

Color, pure white. Size, 3 to 3½ inches in diameter. Calyx, spreading at the top, making it practically non-bursting. Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated, and beautifully arranged, forming a full, rounded center. Odor, is very sweet and particularly pleasing. Stem, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect. Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties. Productiveness, extremely free flowering. More productive than any other large white. A profitable and high grade commercial variety. Price, \$2.50 per doz.; \$12 per 100; \$100 per 1000. 50 at 100 rate; 500 at 1000 rate.

CUT FLOWER RECEIPTS LIGHT AND SHORT OF THE DEMAND.—PLENTY OF PLANTS FOR CHRISTMAS.—CLUB OFFICERS.

Unless cut stock comes on much faster the next two weeks than in the past two, supply is going to fall short for the holiday trade. While the past two or three years have been decidedly "plant years," it is to be hoped that this year it will be the same, for on plants the market is well supplied. Poinsettias are very good and the big firms have made them a specialty. Azaleas also will be plentiful and quality very good. Some very fine cyclamens and Gloire de Lorraine begonias are to be seen, which are going well now. Holly and greens have not turned up in any great quantity as yet but we expect the usual amount will be handled before the rush is over.

At the meeting of the Denver Floral Club, held last Friday evening, the following officers were elected for the coming year: President, E. W. Davies; vice-president, John Roland; second vice-president, John Massie; secretary, Adam Balmer; treasurer, A. M. Lewis.

On cut flowers high prices will no doubt prevail, owing to the shortage. Carnations will be the scarcest item and probably most in demand. Violets, valley, Romans and Paper Whites are about the only flowers that will run even with the demand.

Trade has been lively the past week, dinners and receptions being quite numerous and a few good sized decorations have been called for. B

MINONK, ILL.—J. Knapp, formerly in the greenhouse business, is now running a grocery.

SAN FRANCISCO, CAL.—Gustave Gagne is now nicely located in his new quarters at 2337-2347 Lombard street, where business is opening well for him.

NEW FANCY CARNATION "TIGER."

Color, orange, striped pink, effect of Sunrise rose. Size, 2½-3½-inch, stem 2-3 feet, straight as a wire. Habit, every shoot going to flower at once, dark green foliage; no supports necessary. Calyx, extra strong, seldom splits. Flower, type of Mayor Pingree.

Notes, it is an early, continuous and free bloomer. Shown and won prizes at Kansas City, New York and Baltimore this fall.

Be your own judge. Sample ½ doz. for 50c prepaid. The 50c you can deduct from your first order. 12 for \$1.50; \$10.00 per 100; \$75.00 per 1000. 25 at 100 rate, 250 at 1000 rate. 10,000 ready Jan. 1st.

Cincinnati.

WEATHER UNFAVORABLE TO CUT FLOWER PRODUCTION.—STOCK LIKELY TO BE SHORT FOR HOLIDAYS.—GOOD WINDOWS.—CLUB MEETS.—VARIOUS LOCAL NOTES.

The meeting of the Florists' Society was well attended Saturday night and a good deal of routine business attended to. Frank Ball resigned as secretary and was succeeded by George Murphy. Mr. Ball's business takes up his time and he could not attend to the duties. The committee was instructed to proceed with the schedule of premiums for the February and March exhibitions. A committee was appointed to draft resolutions of sympathy for John Lodder and family. Albert Sunderbruch and E. G. Gillett were appointed by the chair to meet with the Fall Festival Association and act in accordance with their plans for next year.

With the dark weather of the past two weeks and the growers holding back for Christmas, good stock has been scarce. Carnations, violets and calla lilies are very scarce and from present indications this market will be very short on good flowers for the holidays. Harrisii lilies are selling well at \$2 per dozen. There is not much demand for poinsettias, on which this market is well supplied. We have a fine lot of lily of the valley, Romans and Paper Whites, also good smilax.

Some very fine window decorations are to be seen around town. Julius Baer has his window trimmed all in yellow, surrounding orange plants well fruited. A great many Begonia Gloire de Lorraine are to be seen in the windows and they are fine. Fred. Gear has one window in red and the other in white.

There is an unusually good demand for holly, the call for Delaware exceeding the supply, and southern holly is substituted. The southern holly is used in conjunction with ilex berries for making wreaths, and fine wreaths they are, too. D.

Seattle, Wash.

PROSPEROUS CONCERN REORGANIZES AND BUILDS NEW PLANT.—NOTES.

The Woodland Park Floral Company has been incorporated and is now building a large greenhouse plant, comprising about 35,000 feet of glass and to be increased to 100,000 feet this coming spring. The houses will be modern in every respect and when completed this establishment will be one of the finest in the west. The chief product will be roses and carnations and also lettuce, tomatoes and cucumbers under glass. The officers and stockholders are: President, Alfred Peterson; vice-president, Gus. Bjorgman; treasurer, Ed. Marriatt; secretary, Carl Anderson. Mr. Peterson and Mr. Marriatt are the owners of the old Woodland Park Floral Company, so favorably known on the Pacific coast, where they have been engaged in the florist business for a number of years. The new firm, when ready to do business, will be known under the name of the Woodland Park Floral and Seed Company. C. A.

BEARD BROS., 1248 W. Fort St., Detroit, Mich.

Minneapolis.

BUSINESS SHOWS LITTLE CHANGE.—STOCK FOR ALL DEMANDS.—SOCIETY WEDDING MAKES MUCH WORK.

Trade conditions underwent no decided change last week. There seems to be stock enough to meet demands, although the call for tea roses, Beauties and violets has exceeded the supply somewhat. Carnations are not in oversupply but the buyers find sufficient in the city so that heavy shipments have not been received. The price is from \$2.50 to \$3.50 per 100 for choice stock.

The Hefelfinger-Bell wedding, which has been in progress for the last week or two, causing many social events, called for one of the most lavish decorations of the season and the florists would all like to see many more such affairs.

The Minneapolis Floral Company is preparing to enlarge its plant at Thirty-sixth street and Calhoun boulevard.

Oscar Swanson, manager of A. S. Swanson's Minneapolis store, reports last week full of decorations.

Holly will be short here this Christmas. Visitor: John Nordine, of Lake City.

C. F. R.

Sandusky, O.

WEATHER COLD BUT TRADE IS ACTIVE.—NOTES OF HOLIDAY PREPARATIONS.

The weather has been very cold, but trade is good. At the Central Greenhouses everyone is busy getting ready for Christmas. The stock is in fine shape. The roses and carnations are giving good cuts. Cyclamens and Boston ferns are specialties here. Mr. Thomasson, formerly of Storrs & Harrison, has charge of the plant. At the store everything is ready for the rush, which, in fact, began some days ago, many orders being booked. The retail end is in charge of John H. Meyer, formerly of the Meyer greenhouses, of New Brighton, Pa.

White's greenhouses are looking fine, and Matern's also.

**The Model Extension
Carnation Support.**

Flushing, Long Island, Dec. 11th, 1901.
MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir— I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.
Dear Sir:— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support.

Yours truly
F. DORNER & SONS Co.

BLIZZARD CATCHES GROWERS UNAWARES.—SEVERAL LOSSES FROM FREEZING.—COAL SUPPLY FAR SHORT OF REQUIREMENTS.—CUT FLOWER PRICES STIFFEN.

The weather the past ten days has been something fierce. On the night of December 8 we had one of the worst storms in many years; it was simply a blizzard, the wind blowing a hurricane and the mercury down to 22° below zero. This was the night of all others when coal was badly needed, especially down in Tewksbury, where there is practically no coal supply to speak of. Some of the growers froze up solid. Lem. Smith, who raises violets for the Boston market, will not be seen down in the Hub for many a day, for when he awoke his place was as solid as a cake of ice. At Lewis Small's the cold wind could not be kept out and the end of one house froze. At A. C. Tingley's repairs were not quite finished and the blizzard did considerable damage. There is practically no supply of coal, what little there is being dealt out in very small quantities. Gus. Foster, a grower of violets and carnations, decided to let his violets freeze up, because he could not get the necessary coal to keep them warm, and the probabilities are that he will have to let his carnations freeze, too.

With the coming of this weather it has shortened the supply of stock, while at the same time the prices have jumped up considerably. Carnations are just right to fill the demand, but roses and violets are away off in supply, especially violets, these being hard to get at any price.

The store men are anticipating a merry Christmas, with lots of trade if one can judge from the stock that is labeled "sold" at some of the local greenhouses.

The indications are that there will be more than enough holly to go the rounds. It is very good. A. M.

Washington.

COLD WEATHER INTERFERES WITH BUSINESS.—GOOD DECORATIONS A SAVING CLAUSE.—VARIOUS NOTES.

The weather having been cold and rainy, trade has not been very brisk the last week. A few had good decorations to occupy their attention. Most of the stores and windows are now wearing their Christmas apparel.

The dinner given December 10 by the bar of the Supreme Court at the new Willard Hotel, to Justice John M. Harlan was a most brilliant function. The decoration was by J. H. Small & Sons.

Benj. Duffee is confined to his bed. The doctor has not stated the nature of his case as yet. P. G.

FOSTORIA, O.—Raymond Cole has removed here from Manchester, Va.

GROWERS PUT THEIR PLACES IN FINE SHAPE LAST SUMMER.—GOOD CROPS NOW THEIR REWARD.—VARIOUS NOTES.

Improvements of one sort or another seem to have been the order of the day, despite the adverse circumstances occasioned by the memorable coal strike. Geo. W. Carr has rebuilt his entire range with modern and well equipped houses. The six houses comprising the place are practically under one roof. A large shed, an up-to-date office, boiler room, cold storage rooms and so forth, are additional features worthy of note. Mr. Carr, while growing a general stock for his retail trade, will devote the most space to carnations. Like everywhere else, it is the flower mostly in demand.

Geo. E. Fancourt happened to be in New York when I called. A stroll through the rose houses showed the place to be in finer condition than ever before, which is saying a good deal. Liberty and Meteor, as grown here, would puzzle anyone but an expert as to "which is which." Brides and Bridesmaids are decidedly fine and Golden Gates and Ivories could not be improved upon. Mr. Fancourt grows a bench of Sunrise and from all appearances it is well worthy of the space it occupies. Beauties do well and promise a fine crop for Christmas. Poinsettias, both in pots and in the bench, are just right. And this will apply with equal force to the carnations.

Benj. Dorrance's place has never looked better, and there will be a heavy Christmas crop. Mr. Dorrance is the largest rose grower in the Keystone state and his plant is the best that money could build and ingenuity devise. NOMIS.

FLORAL PARK, N. Y.—The numerous members of the craft in this vicinity will be supplied with popular recreation next summer in the shape of a race track said to be the finest ever laid out in this country.

COUNCIL BLUFFS, IA.—Emma, wife of Paul Uhlman, died at St. Bernard's Hospital, December 4, after a brief illness. Both Mr. and Mrs. Uhlman had been in the employ of J. F. Wilcox for the past four years, she doing the "making-up" in the retail department. The remains were taken to St. Joseph, Mo., for interment.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in.
75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

CROP INSURANCE.
 Life insurance is valuable because it guarantees the outcome.
"Gurney" Heaters
 "BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

Sprigs from the Spice Bush.

The Christmas trade in Philadelphia this year was fully abreast of the high standard of the past few years. Plants, flowers, greens, were as usual consumed in enormous quantities while the supply in most instances was about equal to demand. The weather was cold and clear but, up to Christmas morning, when a fleecy mantle fell, minus the usual snow which we have been led to expect from a long course of stereotyped Christmas cards.

If one wanted to see what was going on in the Christmas tree and green goods line a saunter down Market street or a ride out Ridge avenue was the proper caper. For miles and miles one would see scarcely anything but spruce forest mixed with flaring red and green wreaths and such a bustle and cheerful confusion among buyers and sellers as to make the scene quite inspiring.

In the fashionable quarter such stores as Pennock Brothers' might be called oases in the desert, so brilliant were their windows and interiors with flowers, flowering plants and gaily bedecked baskets of foliage and flowering plants. One might wish to pass the time of day with the proprietors of these enchanting palaces during the rush, but it was out of the question. Waiting on two or three customers at once seemed to be quite enough for them. So all that could be accomplished by the casual visitor was to stop, look and listen.

The Parisian basket filled with flowering and foliage plants was a strong feature among them all, but in none more so than with Kift & Sons, who were among the first to make a specialty of this line, some years ago.

Eleventh and Locust is sometimes considered to be rather out of the fashionable quarter, but if one might judge by the handsome equipages in front of George Craig's and Robert Crawford's establishments that notion would be quickly knocked on the head. Nowhere was the rush more pronounced than here.

On Twelfth street, from Chestnut to Sansom, it was apparently nothing but Battles. There are supposed to be some tailors' and jewellers' stores on that block but it would have been a hard job to find them the past week in the profusion of sylvan and floral display which Battles and his little army of forty men and boys were delving among like sappers and miners for many days and nights.

A block further west revealed a scene almost similar, where Graham and his minions were doing their prettiest to keep their ends up. Through rear passages and side alleys on to Drury and Sansom streets the Graham battle was waged with grim determination to do or die, and from authentic sources it can be stated that very little escaped them.

The up-town stores were equally busy. Habermehls' did probably the largest business in their history, while Fox and Wolff and most of the others wore that satisfied smile so eloquent of a rich harvest.

Even in the "hoopskirts" there was something of a rush. Such places as Westcott's, away out among the dead men in the Manayunk district, had all they could attend to. The commodore has a fine local trade besides growing special crops for the wholesale market. Red and white camellias are in evidence here besides the old *Daphne odorata*, sweetest of the sweet. Why do not Pennock or Battles or some of the rest of the fashionable florists take up the daphne for boutonnières and make it a go? It's a lovely thing for that. *Solanum* and poinsettias are specialties at Westcott's and very well done, too. The *solanum* went rather slow this year for some reason. Perhaps their cheeks were not painted quite enough. A fine batch of *stevia* here, called to mind the *Gypsophila paniculata*, another fine thing for mixing. Why don't the greenhouse men grow it? Far more graceful than *stevia*. There is said to be a double form of this *gypsophila* coming from Europe this season; but what use it could be is not easily imagined. For mixing the single form is away ahead of it and that's all *gypsophila* is any good for.

Speaking of *stevia* reminds me that I met Burton's "Steve" on the street the other morning.

"Hilloa Steve! What are you doing on the street? Thought your place was around at the market?"

Steve promptly dropped his eight four-foot boxes on the pavement.

"What's that? Round at the market? Y' bet y'r life if I can't mix things up round there I'm coming outside to hunt trouble. And don't you forget it."

So you see there's more than one *Stevia* good for "mixing."

That episode made me think of interviewing Superintendent Meehan of the market. Things looked a bit dull to me around that center of the flower trade, but perhaps it was a little late in the

morning to catch the right impression. Mr. Meehan was invincibly cheerful and assured me that everything was lovely. Even some of the commission men go there in the morning to buy stock.

In the other wholesale center, around Fifteenth and Ludlow, a very bustling air prevailed. S. S. Pennoek's men were slashing things right and left, 'phone bells ringing, expressmen bawling, buyers vociferating, hammers a-hammering and everything in a concatenation accordingly. Edward Reid and W. J. Baker and Geo. M. Moss were all working like Trojans on country orders—anything outside of Philadelphia is country—and were thankful that they had stuff enough to go around.

I don't know much about prices, of course—that's out of my line—and besides, they are either too high or too low, according to whether you are a grower, a commissionman, or a retailer, that they cause nothing but trouble all around, so what's the use of making things worse?

Michell, Landreth and Johnson & Stokes were the three principal seed houses which made a specialty of plants and greens during the holiday. They all did an excellent business and during this dull time in the seed trade the revenue comes in very handy. Speaking of the seed trade reminds me that "E. L." is still stubborn and unrepentant on the subject of nature study for children. He commends Secretary Wilson's plan of furnishing flower seeds to the schools. The farmers are already getting their seeds for nothing, so of course it's only but a step further to give the balance of the population theirs for nothing too! The next step will be spades and forks and hoes and rakes for cultivating the aforesaid seeds, and then as a supplementary measure food and clothing for the workers.

By and by the government will give us everything we require and nobody need worry about earning a living but just sit around and "nature-study" all day long.

There used to be an old-fashioned Jeffersonian kind of doctrine that the only legitimate function of a government was to see to it that the strong did not oppress the weak and keep a fair field and no favor for all. Governments now-a-days seem to be doing pretty much everything except that one thing. And a

tolerably fine, fancy, ghastly mess they are making of it, to be sure. How's your coal boys? Hadn't you better lock what's left up in the safe?

Next Thursday will be New Year's day! Open house at the club room on that day! So says the commodore, and he's the president this year, remember. He wants you all to be there, every one, and have a good, old-fashioned "Auld lang syne" reception. There will be some bowling, of course, sweepstakes, etc., with some creature comforts on the side, and all will join in wishing each other health, wealth and prosperity for 1903. And he who will that toast deny—down among the dead men let him lie. Down, down, down, down among the dead men let him lie. GEORGE C. WATSON.

Florists' Plant Notes.

POINSETTIAS.

Place the leftover poinsettias under a rose bench, where no water will be required until it is time to start them up again for cuttings in April. This is certainly an ideal plant to handle from the growers' point of view, for Christmas sees the end of the poinsettia for the season, and the space they occupied can be cleared and used for another crop.

CANDYTUFT.

If you can spare a bench for the purpose, candytuft sown at the first of the year in a temperature of 50° will come into bloom nicely for Memorial day. It may be a question with some as to whether this is a paying crop, but if cheap bunches of flowers are much in demand in your locality on that occasion, it is more cheaply grown than the old pyrethrum, or common feverfew.

GERANIUMS.

Geraniums in 2½-inch pots struck in September will need a shift to 3-inch now. If you are short of stock, a cutting may be taken from the stronger ones without doing any harm to the plants. Pot firmly in rather heavy soil, with one quarter well rotted cow manure and a good sprinkling of bone meal added. Give the fullest light, plenty of room and air on every possible occasion.

AZALEAS.

Any azaleas that failed to come into bloom for Christmas may have the temperature gradually reduced to bring them along more slowly. Do not take them

at once from a temperature of 70° into one of 40°, for it checks them too much. Those intended for Easter should have a night temperature of 40° until within about four weeks of the time wanted, when they may be sorted out, the later ones being given more heat. During this time the lateral growths beside the buds must be removed, or all the strength will be taken from them and the buds blasted.

PANSIES.

Many growers, notably in the west, sow their pansies at the first of the year. In the east the preference is to sow about August 20, transplanting into cold frames about four inches apart, covering with sash, and aside from an occasional watering and airing, practically no further attention is needed during the winter months. In the west, however, owing to the abundance of sunshine, this method results in too rapid growth during the winter months. For this reason, sowing in the greenhouse at the first of the year, while necessarily a more expensive way, produces more stocky plants.

Sow in drills, in a temperature of 50°, and when the seedlings have made two or three character leaves, transplant into cold frames, three or four inches apart, and cover with sash. To keep them growing, which is most essential, bank the sides of the frames and cover the sash with stable manure to keep them warm, uncovering on bright days to induce a strong and healthy growth. As the sun gets stronger and the growth firmer, they will stand plenty of feeding in the shape of liquid manure. While this method may be considered by eastern growers to be too expensive, a knowledge of conditions prevailing in many sections has proven to the satisfaction of the writer that the best results with pansies are obtained in this way.

DUTCH BULBS.

It is safe now to commence forcing Dutch bulbs. Early varieties of tulips, La Reine, Keizerskroon, Proserpine and others, may be brought in at any time now. If they are frozen, thaw them out slowly before you place them in heat. A temperature of 75° in a dark place for the first two weeks to give length to the stems is what they want; under a bench having bottom heat, with a canvas curtain to shade them, will grow them all right. After the first two weeks more light should be gradually given until by the time the flowers are open they can stand the fullest light.

Dutch hyacinths and Von Sions may be similarly treated, except that they must not be subjected to so strong a heat. Plenty of warm water, heated to the same as the forcing temperature, will bring them among all the later. In order to have a succession of bloom always on hand it is necessary to have a set day in each week to bring in the required quantity of bulbs. Paper White narcissus cannot stand the least frost, and as for the other narcissi, Dutch and Roman hyacinths and tulips, while they can stand a good freeze, it is better in addition to the four inches of soil, to cover them with stable manure of about the same thickness to prevent them from freezing too hard. Nothing is more disagreeable than when a pick has to be used to get the boxes or pans or pots of bulbs out of the frozen ground. Besides, too hard freezing may crack the pots or pans. G.

SAN ANTONIO, TEX.—G. Percy Mahood is now in charge of the estate of O. Koehler and had splendid roses in bloom outdoors for Christmas.

INTERIOR OF NEW PIERSON-SEFTON HOUSE, AT BRIARCLIFF.

THE NEW-STYLE GREENHOUSE BUILT BY THE PIERSON-SEFTON COMPANY.

An Advanced Type of Greenhouse.

The new greenhouse, views of which appear in this number, embodies the most advanced ideas in greenhouse construction as exemplified by the builders, the Pierson-Sefton Company, of Jersey City, N. J. A somewhat technical description is necessary in order to fully set forth the special features of the construction, but this we believe will be perused with much interest by our readers.

The house runs east and west and its area is 55x300 feet. The ridge is twenty-two feet six inches above grade and the height of the sides is six feet. The grade is level lengthwise but slopes to south two feet in the width of the house. There are eight beds, of concrete, four feet seven inches wide and two feet four inches high, and eight walks, also of concrete, one foot eleven inches wide and one two feet two inches wide. The roof is supported by four lines of columns, one under the ridge, two under the front slope and one under the rear slope. Lateral braces are carried from the ridge and rear rows of columns to the purlins and the columns are connected across the house with a tie-rod. There are three lines of angle-iron purlins on the north slope and four on the south. There are two lines of ventilators at the ridge, each three feet wide, and one of panel ventilators at the south side, twenty inches wide.

The foundation consists of iron posts, four feet apart, set in concrete. To these is bolted a heavy angle-iron base plate and to the angle plate are bolted steel "U" bars which extend from plate to plate, the eave line being bent to a sixteen-inch radius and the ridge connection made by a cast-iron bracket, the "U" bars being also bolted to the angle-iron roof-purlins. The sides and ends of the house are concrete blocks fastened to the iron frame and capped with iron sills. A cypress core-bar, chemically treated, is secured to the "U" bar with screws, and

the glass, 16x24, laid the 24-inch way between the bars, is bedded in putty and secured to the cypress with zinc shoe nails, being bent at the eaves to fit the curve of the bars. Thus no wood is exposed on the inside of the house, except at the ridge and ventilators, and no iron is exposed on the outside of the house, except the sills. All the iron, including bolts and screws, is galvanized, this obviating the necessity of any painting on the inside.

The advantages claimed for this house are the highest degree of light, strength and durability; the absence of drip, owing to the discarding of the customary eave plate; freedom from breakage of glass, because icicles cannot collect at the eave-line, and snow clears off the roof as rapidly as it falls. As shown in the illustration, the outlines of the structure are exceedingly graceful.

The house is one of a range of twelve known as the Briarcliff Greenhouses, on the estate of W. W. Law, situated on the heights back of Scarborough, N. Y., overlooking the Hudson river. The original house of the construction above described, size 30x100 feet, was erected in the spring of 1901 and Paul M. Pierson, the manager, states that it has fully demonstrated the correctness of the special claims advanced by the builders. American Beauty roses constitute practically the entire crop of the establishment.

Rose Cure for Nervousness.

All who have had much to do with roses, either in the nursery, the garden, or the florists' shop, know quite well that a deep inhalation of the fragrance of a deep red rose seems to do one a deal of good, more especially so if one is tired, or a little out of sorts. Our contemporary, the *Daily Express*, recently dealt at some length with "The Rose as a Cure for Nervousness," remarking that "it has been discovered that the rose will

cure a headache. Its perfume acts as a medicine upon the nerves. Its color—particularly if deep red—soothes the senses through the eyes, and its cleanliness and medicinal properties generally act upon the system, not only as a curative but as a tonic. The sweeter the rose is the better, for the sweetness of this flower is of such peculiar delicacy that it neither cloy upon the nostrils nor palls upon the senses. Other flowers with heavy scent make one languid, but the rose is invigorating. When undergoing a severe nervous strain it is a good plan to take a rose and hold it to the nostrils; breathe deeply of the scent."—*Gardeners' Magazine*.

CARNATIONS.

AVERAGE CUT FROM CARNATIONS.

ED. AM. FLORIST:—Having never grown carnations until this year and having good luck with the few I am growing, I have built three more houses for next year, which will take about 4,700 plants, such varieties as Lawson, Marquis, Crane, White Cloud, Peru, Roosevelt and Bradt. I would like to know what the average cut per day for the whole season ought to be when grown well.

G. W. D.

There is no uniform average cut of carnations; one grower may run as high as thirty flowers to a plant, and I know that there are some who if they kept a record would not average six flowers to a plant. The grower who can reach twenty flowers to a plant with an assortment of varieties is doing very well and it is better to do your calculating for an average of fifteen. ALBERT M. HERR.

MRS. T. W. LAWSON IN ENGLAND.

When this carnation first came over from America there were some who said it had been boomed too much, and others who, on seeing the first flowers open, felt

more than disappointed, as they were small and insignificant, and of a washy color, says a correspondent of the *Journal of Horticulture*. This was not to be wondered at, considering the tremendous amount of orders sent to America when it was announced for distribution, consequently the rapid rate of propagation had a more serious effect on the constitution of the plants. Now that we have mastered its requirements, we can value it in its true light. Quite by itself in its lovely shade of color, it has also splendid long stems, and lasts long when cut. The Liverpool florists' windows have certainly contained nothing more beautiful. It is a good grower, and if one only takes the precaution to shade from strong sunshine the color is intense and attractive.

TROUBLE WITH RUST AND SPOT.

ED. AM. FLORIST:—I am sending leaves and buds of some of my carnations which seem to be affected by disease. The Gov. Roosevelt show some kind of spot, but the trouble has not seemed to spread, as I cut off and burn all diseased leaves and spray the plants with a solution of copper sulphate. But there is another trouble that has developed and seems to be spreading, and I send you a bud from one of the plants affected, which seems also to be affected with the same trouble as the leaves. I fumigate once a week with tobacco stems. In watering have been careful not to wet the foliage. Should I spray the leaves occasionally on bright mornings? The compost in which the plants are growing was prepared according to the directions sent me by the Pennsylvania Agricultural College, four bushels of soil to one of well rotted manure. I had sent them a sample of the soil. Should I begin to use bone meal as a top dressing, and if so, in what quantities? NOVICE.

The sample leaves were hardly in condition to tell what the trouble is, but there was some rust in evidence. The treatment described will check that all right, namely, picking off and burning the affected leaves and spraying with copper solution. The spraying, together with the abundance of wet and dark weather we had this fall, no doubt developed some spot on the variety, and while

the copper solution will help rid the plants of this, the most important thing is to have plenty of ventilation, some heat when the warmth of the sun is not sufficient, and care that no moisture is on the plants over night or on cloudy days. It may be possible that the tobacco used for fumigating contained some foreign element that scalded the leaves and buds, but the sample was too far gone to tell whether this was the trouble, or if it were purely spot, of which there seemed an unusual amount this fall. It is hardly wise to feed plants that are not in good health unless the soil is so poor that they are starving for food, and this is not the case here. As soon as the plants get back to their normal health, then an application of good bone meal or any other fertilizer will be a benefit, being careful not to use too much at a time. ALBERT M. HERR.

FORCING AND FEEDING.

ED. AM. FLORIST:—W. N. Rudd's recent criticism of my article on Christmas forcing does not prove anything but a difference of opinion in the matter. The question is one upon which good growers differ. While some recommend that no forcing whatever be done before Christmas, on the other hand there are those who advocate and practice it, and are sure that it pays them when done with judgment and with plants that are in the best of health, with enough buds to justify it.

While 60° at night would seem high, still practical experience has demonstrated, to the writer at least, that the plants will come through a week of this temperature with no harm that cannot be remedied by careful treatment afterwards; nor does it seem to detract from the quality of the flowers beyond slightly decreasing the size of the bloom while the forcing process is on.

Now in regard to extra feeding, here again opinions differ. Some growers practice feeding at least two months before January 1, and the writer has yet to make the personal acquaintance of one who does not feed to some extent before the holidays. While the plants themselves may not require much or any extra feeding at this season, so long as it is not strong enough to injure the roots

we find that it heightens the color of the flowers and materially increases their size.

The writer wishes to admit that he does not "consult only the health of the plants, first last and always," neither does Mr. Rudd, nor any other prosperous grower, for that matter. The ruthless competition that exists in this country, in almost every line of business, has made it impossible for us to do that. If we consulted only the health of the plants we would be growing carnations during the winter months in a temperature no higher than 45° at night. Is there a grower anywhere who will dispute that we would build up a stronger stock by following such a policy? And where is there one who does it and makes carnations pay? To bring out anything like a paying quality and quantity of flowers it is necessary to carry the night temperature at 50° to 52°, and in some cases even higher. What is it that makes varieties prone to "run out" under our present methods of culture? It is because we are forced to grow them in a higher temperature than is good for the vitality of the plant, and one or two other things, such as continually propagating them from cuttings instead of from seed.

Mr. Rudd appears to place great stress upon his maxim in carnation culture, "when in doubt, don't do it," which is very proper; but on this point many eminent growers appear to have no doubts at all. The writer does not advise indiscriminate forcing and feeding; on the contrary, he advises the utmost caution, as must be apparent to anyone who does not greatly misconstrue his words. J.

PROPAGATING: THEORY AND PRACTICE.

To the careful grower the health of next year's stock is always a problem of greater importance than almost any other with which he is forced to deal in his yearly routine of work. So much depends upon the careful selection and proper handling of the cuttings that are the foundation of future success that no one can afford to intrust this important work to the careless and inexperienced.

The most practiced eye and a thorough knowledge of all the conditions that tend to bring out the best that is in this flower are none too good or expensive to be devoted to this branch of our work, for every unhealthy cutting that is taken will surely produce a diseased plant and is more than labor lost. Even with the best of selection and cultivation, varieties are prone to lose vigor and "run out." The carnation is not a plant that lends itself readily to perpetuation by cuttings, at least not under the present methods of culture, under which they are grown every day in the year, and year after year without a suspicion of rest.

Those who know the origin of our race of monthly carnations and are familiar with its habits will admit that this type still holds many things in common with its ancestors. Perhaps after many years of cultivation under glass, the race will become so accustomed to the conditions to which it is subjected that it will be as easy to perpetuate it by means of cuttings without injuring its vitality, as it is easy to perpetuate a tea rose.

We owe the vigor of the race solely to the fact that new varieties are grown from seed and introduced into commerce in such numbers that it takes but three or four years to supersede most varieties. We no more than think that at last we have attained perfection in some color or type than there comes another variety

OFFICE BUILDING AT BRIARCLIFF GREENHOUSES, SCARBOROUGH, N. Y.

VISITORS AT THE BRIARCLIFF GREENHOUSES, SCARBOROUGH, N. Y., NOVEMBER 20, 1902.

just a little better and we are forced to discard our pet and plant a new one in its place. Who can tell how long this course of improvement will continue and what gems we may yet attain?

When we have attained that type of perfection the race will probably be so thoroughly accustomed to its environment that few of the characteristics of its ancestors will be noticeable. Until that happy day comes, however, we must make the best of conditions as they are and spare no pains to keep up the vigor of our stock.

The very best time of the year to propagate is during the two darkest months, January and February. In those months we not only have the elements surrounding the cuttings in the sand under perfect control, but the stock plants from which they are taken are in a condition such that we can readily detect any plant that does not possess the most perfect health and vigor. All such plants should be avoided when cuttings are selected.

However those who have been long familiar with the habits of carnations, and studied them closely, can pick out a diseased plant at almost any time of the year, and as we think it of the utmost importance to get an early start in every stage of our work, we do a great deal of our propagating before the first of the year and would do it all before then if we could get enough cuttings without robbing the plants.

Except in very few cases we take all our cuttings from the flowering stems. Not only do these cuttings make the best shaped and largest plants in the shortest time but this course, if long pursued, will give a stock that is more free-blooming than will result from the practice of taking cuttings from the base of the plants. We have no scruples about occasionally taking a variety that is scarce and stripping it of all the good cuttings we can find. One or two generations will not make a perceptible change in the type.

Some growers make a practice of allowing the flowers to mature, and, after picking them, taking the cuttings from the stems. This system has only one thing to recommend it and that is, if the flower happens to come of an undesirable form or color, marred with undesirable markings, for instance, the cuttings on that stem can be discarded, while if they were taken before the flower was sufficiently developed to show the defect, the cuttings would be apt to perpetuate the defect and detract from the value of the stock. But the little depreciating effect that the ignoring of this point may have had upon our stock has been so inappreciable that we have become quite settled in our policy of taking the cuttings directly from the plants.

Especially have we become convinced that this is the only proper course since dry-rot has shown us what a dreadful pest it is when once it makes its appearance on a place. We have learned by repeated experiments that once any part of a plant is attacked by this disease there is absolutely no hope of saving it by cutting away the affected branch. Like leprosy in the human body, when once its presence is seen the whole plant is filled with the germs of the disease. What, then, must become of the cuttings that are taken from plants so affected? We often see plants where one branch begins to decay while the rest of the plant seems perfectly healthy and produces perfect flowers. Now, when such flowers are picked with the cuttings on them, it is utterly impossible to tell that they are from diseased plants and the cuttings will get into the stock from which we expect so much the following year.

The treatment of cuttings, after taken from the plants, is quite simple. If you have a north side lean-to propagating house, free from drip, in which the temperature is under perfect control, that is

the place for them. In the absence of a regular propagating house a good cutting bench may be provided by closing in the heating pipes with heavy paper or boards under a north bench in a carnation house, and preparing it just as you would in a regular propagating house.

To shade the cuttings from the sun and protect them from draughts a sheet of muslin should be hung vertically from the roof, flush with the front edge of the bench. A sand that is neither very fine nor very coarse and is perfectly clean is just right. Two and one-half inches deep after firming will be plenty. The coarser the sand the more water it will require. Whitewash thoroughly, with hot, newly-slaked lime, all the woodwork that comes in contact with the sand. Pound the sand as firm as you can, then water thoroughly. The bench should be sufficiently drained to allow all surplus water to escape, for the sand should never contain more water than it will naturally retain.

You are now ready to insert the cuttings. With an ordinary table knife make a deep, smooth cut and insert the cuttings three-quarters of an inch apart, just deeply enough to prevent them from falling over when thoroughly watered. When the row is full press the sand firmly against each cutting and proceed with the next row in the same way. For cuttings of ordinary size the rows should be about two inches apart.

A bottom heat of 60° to 65° and a top heat of 50° will suit them to a dot. All sun should be kept from them until they show signs of rooting. Give sufficient ventilation to keep the atmosphere pure and sweet, but never allow strong draughts to blow over the cuttings. Sprinkle every day for the first two weeks and after that water more sparingly until they are rooted. It is difficult to tell just how much water should be given. So much depends on the coarseness of the sand and how hard you may be firming.

If the sand is rather coarse and the bench well drained there will be little danger of over-watering if firing steadily. Fine sand will, of course, require more skillful handling in respect to watering.

The only trimming that our cuttings receive is to shorten back the tops about one-third if they are very long, and, with a sharp knife removing the "tail" that sometimes hangs to the base of the cutting. This tail will seldom be found, however, if the cutting is firmly grasped and taken from the plant with an upward and sideways pull. We never cut the base off the cutting to insure a perfectly smooth surface. We have learned that the cuttings will root just as well whether they are cut or not, so long as they are not bruised at the base. If there are any straggly leaves around the base of the cutting they are, of course, removed. J.

A New Minneapolis Store.

Northrup, King & Company's new uptown retail store is located in the best part of the retail section of Minneapolis, in a new building, 20x100 feet, with a fine basement salesroom of the same dimensions. Fixtures and decorations were designed and furnished by John S. Bradstreet, of Minneapolis, who has a national reputation in this line. The fixtures, tables, as well as refrigerator, were made of oak and with a dull oak finish, which, with the decorations in green and gold, makes a handsome effect. The seed case contains 1,044 drawers and packet pigeon holes with brass knobs and label holders. The store proper is separated in the rear by a partition which contains in the upper part two large plate windows, hand painted in oil and representing Shirley poppies and Japanese morning glories in the one and tulips Keizerskroon and Proserpine in the other. A number of small electric lights behind these windows bring out the colors and shading and produce a fine effect, particularly at night, when the store is darkened. These windows have caused a great deal of comment throughout the city and are a standing

advertisement, and they have produced such a grand decorative effect that it was decided to duplicate them in the refrigerator, which was built to order and is one of the largest and finest boxes in the country. There are eight of these painted windows in the upper part of the box and these are made up from the following flowers: Poinsettias, chrysanthemums, American Beauty roses, carnations, lily of the valley and Adiantum cuneatum, orchids, violets and holly and mosses flower, the last named representing the Minnesota state flower. These windows are also lit up from the inside with a row of small electric lights and they add largely to the appearance of the box.

In connection with the uptown retail store Northrup, King & Company have established a nursery and landscape gardening department and will make a specialty of supplying all lines of nursery stock for the decoration of home grounds. The main business of this firm is, of course, the growing and jobbing of seeds, but in connection with their business, which has been established for eighteen years in Minneapolis, they have always maintained a retail store. The establishment of this new retail store in the uptown district is in line with the belief of the firm that home trade is well worth attention. John Degan, formerly of Chicago, is in charge of the store.

A Brief History of the C. S. A.

BY EDWIN LONSDALE, PHILADELPHIA, PA.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

It must have been horticulture's great champion, John Thorpe, whose bright mind first conceived the idea of organizing an American national chrysanthemum society. The idea first took shape in the year 1889, in the columns of the AMERICAN FLORIST. The promoters were fondly hopeful that a grand exhibition would be held under its auspices in one of the larger cities each year; and alternating, one year toward the eastern end of the country, and the other nearer the west. But the revenue received from

membership fees was entirely inadequate for so laudable an undertaking, and did not warrant any attempts in that direction; nor were there any cash donations or endowments forthcoming to aid in such commendable missionary work.

It was, however, confidently expected that a very much larger list of members would be enrolled than has so far been the case. As to the roll of membership, I hesitate to tell the truth, the whole truth, and nothing but the truth, because the list is so small. However, in the hope that no harm will come from a plain statement of the fact, there never has been in any one year more than fifty on the roll in good standing, nor have there been 100 names on the roll all told since its organization.

It was organized in Buffalo in 1890, during the convention of the Society of American Florists, and, strange as it may appear, there is only one member who resides in that city. The officers as at first elected were as follows: President, John Thorpe; vice-president, William K. Harris; treasurer, John Lane; secretary, Edwin Lonsdale.

The reason that more members have not been secured is, I believe, because the society has nothing exclusively its own to offer for the membership fee. When first organized the membership fee was \$2 annually. A few years later the fee was reduced to \$1, with the expectation and the hope that more members would contribute at the lower price, but so far the results have not warranted the change.

The results of the deliberations of the committees, stationed at various points in the country, working under the society's auspices to examine novelties, are given broadcast through the horticultural press for the benefit of the public at large, so that those who do contribute to the fund do so in a public-spirited sense, receiving no more benefit than does the general public, which is truly altruistic. If an appeal should ever be made, and surely it might be, to increase the membership, it will have to be made on the grounds of philanthropy until a fund sufficient is secured to warrant the society in publishing an annual report, which certainly ought to be done, so that members would have same on hand in compact form for future reference.

The registering of names of varieties was first put into practice, I believe, by this organization. This innovation in plant nomenclature was forced upon the society on account of the ease with which seed ripened in this climate and seedlings could be so readily raised therefrom. Just as soon as a personal name became popular, there appeared frequently several distinct chrysanthemums under the same name. The registration idea worked well and was a step in the right direction. Soon after it was put into operation one impulsive and enterprising disseminator of novelties wired the secretary the name "Ruth Cleveland," on the very day the announcement appeared in the daily press that the then president of the United States and Mrs. Cleveland had decided to name their first-born Ruth!

A committee on classification did a good work in 1893, which was duly printed at a cost of \$86; and it was well worth the price. Not half that amount, however, was in the treasury at the time the bill became due and payable. This classification now needs revision and should be done.

The next good work undertaken by the national organization was to super-

VIEW IN NEW STORE OF NORTHRUP, KING & CO., MINNEAPOLIS.

wise the introduction to commerce of the numerous novelties appearing annually and eliminate, as far as possible, those not up to a given standard. Many anxious hours of cogitation were spent before the plan now in successful operation was formulated. It took definite shape at the meeting held at Atlantic City, during the convention of the Society of American Florists in August, 1894, and was put into operation the following fall.

The fact of committees being in session during the chrysanthemum season ready to examine novelties kept untold numbers of varieties out of catalogues, and consequently off the market, especially when an entrance fee of \$2 had to be paid or guaranteed before committees would examine a new variety according to the scale of points agreed upon. The entrance fee of \$2 has undoubtedly kept some fairly good varieties out of the race, consequently has aided wonderfully in simplifying the work of the committees. This work alone is worth the membership fee and abundantly warrants the existence of the society.

The number of first-class certificates awarded since the issuing of certificates was first inaugurated until the end of last year, 1901, is 231, a record of which the members of this organization may well be proud, because encouraging raisers of seedlings in their efforts to improve our patron flower.

Any city or town may have its exhibition, but it is only through an organization of national character, which this possesses, with its recognized authority, that carries the necessary weight to be effective with the public when certificates are granted to worthy novelties.

A committee was appointed at the meeting held in New York in 1900 to have the by-laws and other data printed, but from lack of funds, it is supposed, this has not yet been accomplished.

A few years ago it was decided to offer valuable pieces of silver as prizes for early new varieties, to be competed for in conjunction with other chrysanthemum shows in the larger cities. Exhibits of this character were made at Chicago, New York and Philadelphia, but from lack of proper support, I presume, have now been abandoned.

In 1900 a piece of silver valued at \$25 was offered by this society to be competed for in Paris under the auspices of the national organization of France, varieties not yet in commerce only being eligible. Mlle. Marie Liger was the successful candidate, the same which has been exhibited before all the committees of the C. S. A. during the present year, securing more than the coveted number of points in every instance, as follows: 87 in Chicago, 90 in Philadelphia, 93 both in New York and Cincinnati, and 98 in Boston, out of a possible 100, losing one point on form and one point on stem and foliage, and securing the full number of points in color, fullness, substance and size.

Some sports have received the necessary number of points entitling same to certificates, which is easy enough when it is a sport from a popular standard variety. It has, however, so happened that the same variety has sported the same year, in localities quite remote from each other, and have proven later, when grown side by side, to be so nearly alike as to be practically identical. Committees will have to exercise great care when examining sports.

Among the vicissitudes the society has experienced is, all the data up to and

THE EXPOSITION BUILDING AT MILWAUKEE, WIS.
(Where it is proposed to hold the S. A. F. convention of 1903.)

including its first year were said to have been given to someone in authority in connection with an amateur horticultural publication, but which has not since been heard of.

Until the present year here in Chicago, no effort has been made to hold general exhibitions to give same a national significance. It is to be hoped, however, that the promoters thereof will be so well pleased with the results attained in the first attempt that the idea will be taken up by other cities and carried out so successfully that they will become annual fixtures.

Hot Water Boilers.

(From the English paper, "The Garden.")

We notice in one of our contemporaries an account of Louis Pearson's paper on "Hot Water Boilers," recently read before the Institute of Heating Engineers. Many of the technical details would probably not interest our readers, but there are several hints useful to those interested in horticultural work. In his paper, Mr. Pearson speaks first of the similarity between the modern sectional cast-iron boilers and those in use twenty years ago, and gives illustrations of "Wright's Flame Impact," "Weather- spoon's Red Rose" and "Foster's Terminal End Saddle," all made twenty-five years ago. He then goes on to show that these old boilers were both economical and efficient, but they were discarded on account of their faulty jointing and unequal thickness of metal, both of which defects have now been overcome in the modern boilers. He makes a strong case out for cast-iron boilers in preference to wrought-iron and steel, as the following will show: "Cast-iron boilers can be made in sections, which enable them to be fixed in positions where wrought boilers could not be. It also enables the fire-box to be made in deeply corrugated or tubular forms, which not only present a much larger surface to the direct action of the fire but also tend to check the flow of gases and mix them thoroughly with the oxygen, thereby causing better combustion and economizing fuel.

"Cast-iron is also much less affected by oxidization, which is a great considera-

tion in our climate, and where many boilers are not at work for more than seven months of the year, for boilers, like men, rust out more quickly when idle than when at work. Experiments made by the Philadelphia Scientific Institute show that as a transmitter of heat cast-iron is more efficacious than wrought-iron by over ten per cent, principally on account of its being more porous, but I think the chief reason for the greater economy of cast boilers is due to the corrugations and the tubes that can be readily and cheaply placed in the fire-box, which not only add very largely to the direct heating surface but break up and thoroughly mix the gases as they leave the fire-box, causing better combustion. Heat is transmitted by radiation, convection and conduction; it is, therefore, quite plain that while direct heating surface in the fire-box is subject to all three influences, the surface in the flues of boilers can only be subject to one, viz., convection, and when the flue is covered with soot, which is very often the case in brick-set boilers, the efficiency of the surface is very low." We also quote his paragraph on combustion. "I think this subject should be fully considered before designing a boiler of any description or criticising those already made. Heat is, you are probably all aware, caused by the chemical union of various elements, which in the case of burning coal and coke consists principally of the oxygen of the atmosphere being mixed with the carbon and hydrogen (especially the latter, the heating power of hydrogen being three times greater than that of carbon) this affinity is greatly increased at a high temperature. As there is only one part of oxygen to four parts of nitrogen in the atmosphere, we see the necessity of introducing a large amount of air to ensure perfect combustion, in fact, providing that the air is sufficiently heated, I think it is almost impossible to introduce too much in a low pressure hot water boiler. H. J. Mills, in his treatise on boilers, puts the amount of air required to consume one ton of coal perfectly at 120,000 cubic feet. It will be seen from the foregoing remarks the reason for a thin fire giving a much better result than a thick one. As a rule, it is safe to say that the smaller

the fuel the thinner the fire should be, and the larger the fuel the thicker on account of the larger interstices in the use of the latter. It is a common practice to leave the fire-door open for a short time after firing to consume the smoke. This, of course, is wrong, for though you get a large supply of oxygen, yet as it is at a low temperature and does not, therefore, combine properly with the gases, the boiler is being cooled instead of heated, and in the case of wrought-iron or steel it also proves injurious to the plates."

The details of a test made by Mr. Pearson will perhaps interest our readers. The boiler was a cast-iron horizontal sectional boiler 54 inches long by 22 inches by 18 inches (inside measurement); fire grate, 8 square feet; direct heating surface, 50 feet. Flues taken at half value estimated power (allowing 41 feet of 4-inch pipe per foot of direct surface), 2,050 feet of 4-inch pipe; actual, 1,950. The boiler was worked to its full capacity during thirteen hours per day and was banked up to burn slowly for the remaining eleven hours; fuel consisted of half slack and half gas coke. Fuel consumed equalled thirty hundredweight per week of six days (as the fire was banked up during Sundays). This is a very favorable result, and could probably be considerably improved by substituting coal for slack.

Most of us have been troubled at some time with damp stoke holes, so we make no apology for giving this paragraph *in extenso*.

"Damp Boiler Holes.—These are often a source of considerable trouble to both heating engineers and their clients, and I think most of the trouble is caused by engineers trying to keep water out of the stoke holes built with flat sides and bottom by merely laying the bricks in cement or lining with Val de Travers, without considering the pressure. This is very considerable, for the total amount on a boiler house floor 15 feet by 10 feet by 5 feet deep, supposing the sub-soil water to be level with the top of the brickwork, is 54,000 pounds, or about twenty-five tons. It is, therefore, quite apparent that this must be provided for. With small, medium-sized boilers the simplest and best way is to place the boiler in a wrought-iron tank, which should be well tarred inside and out and paved with blue bricks. Where the boiler is very large there should be an inverted arch built under the floor of the stoke hole and tied to the side walls, which should be at least 14 inches, and have an inch space left between the 4½-inch and 9-inch work, to be afterwards filled with Val de Travers. Even with this plan the workmanship and material must be of the best to ensure success."

It Is To Laugh.

According to a correspondent in the *Washington Star*, bearing the simple name of Guy T. Viskniski, a "little daredevil French orchid hunter" has been doing stunts down in Columbia for the past four years, which dwarf into insignificance all efforts of the most vivid imaginations in the field of melodrama:

In his eager quest for a wonderful snow-white orchid described to him by a Columbian Indian guide, he has fallen over the edge of a precipice 2,000 feet in depth. He has been attacked, tormented and all but eaten up by hundreds of big black ants. He has been near death's door with the fevers of the tropics and tropical swamps. He has been robbed and deserted by his guides and left alone to starve in well nigh impenetrable Andean mountain forests. He has had to fight murderous guides for his very life. He has led Columbian troops in victorious battle. He has

been a prisoner of war of the rebels. And when last heard from—

The wildly exciting details of the four years' hunt fill nearly three columns but that which will fill the whole horticultural world with sadness, no doubt, is the sad outcome of the expedition, for after nearly the entire party had been wiped out with fever,

Just as the Frenchman once again was looking forward to a successful hunt, the guides—every mother's son of them—robbed him while he slept of all his possessions, including the precious orchids, and made off through the forest in the night.

Among Pacific Coast Growers.

At Ferrari Brothers, San Francisco, now the largest place on the coast, one can see all the leading varieties of carnations in good form. Estelle, Lawson and Prosperity are looking especially good. Lilies are grown here to the extent of 10,000, with hardly a sick one among them. Of asparagus, smilax and adiantum there is a notable houseful, and roses are largely grown. Worthy of special mention is the Liberty. This rose is doing very well here and they are the only growers of it in this vicinity.

At Chiappari & Son's roses are a specialty, and palms. Eight new houses have been built here lately and two or three others are still in course of construction. These are all filled with Bridesmaids and Brides, looking very good. Their palms, almost all kentias, are exceptionally healthy looking. Lily of the valley is grown in pans of different sizes. Some 10,000 pips were forced for Christmas and New Years. One house with ferns has suffered somewhat from dampness, but they are making good growth. For January and February three very large houses of Beauties, planted in open beds, are looking well. Here one can see lilies in bud, some being as tall as five feet.

L. Bonneau has about 50,000 feet of glass devoted to roses. Violets are all right.

A. Jacquemet suffered too much from last spring's storm to be at his best on carnations this winter.

Schwerins' place is always a delight to visit. Six or seven large houses with maidenhair ferns are in good shape, in 7-inch to 12-inch pans, and from 150 to 200 bunches of fronds are picked each day. Carnations, excepting one house of Lawson which is in full bloom, are well set with buds, but seem to me a little late, but January and February are as good as Christmas. Their Beauties are off crop, but Bridesmaids coming in nicely. Here, as in other places, lilies are healthy and promise well. Bulbs are forced by the thousands. This year they will have to divide the market a little, as a couple of other large growers have invested heavily in bulbs. I should like to mention a fine lot of azaleas, some already coming into bloom, but mostly for Easter; 1,000 are stored outside in lath sheds.

Sievers & Boland, the wizards of California carnation culture, have their stock in grand shape and it would well repay any eastern grower of this flower to come and see how things are managed here. The great novelty on the place at present is a very fine scarlet, Mrs. Spreckels, that surpasses anything in the market to-day. Hobart is their money maker and will be put on the market a year from next spring. A house of eastern varieties, among which are Nelson, Higginbotham, Palmer, Manley and others, could not be compared to the native seedlings. A house of poinsettias

was a sight to behold just before Christmas. Their other stock is all in good shape with the exception of a lot of cold storage lilies, which did not seem to enjoy the treatment given them. Orchids are grown largely. This firm is heating with hot water and burning oil instead of coal, doing away with all dirt and reducing their heating bill to almost one-half.

Cauhae Brothers are large growers of asparagus in the different varieties, smilax, ferns and other greens, six houses being stocked to overflowing and in the pink of condition.

At H. Plath's, in Ocean View, adiantums are the main crop. Some 15,000 are grown here for cutting and any amount of small stock for fern dishes and baskets. Smilax, palms, freesias and lilies all look well.

At A. Froumuller's, across the bay, one could see the best crop anywhere near Frisco for the holidays, but size was lacking, showing that considerable heat had been employed to bring the crop on. Since roses were a scarce article for the holidays it does not matter much.

G. Karmann, in the same neighborhood, had a good crop of Kaiserin and Testout roses, but just a little too soon for Christmas. Oil is also used for heating here, to the satisfaction of the owner.

J. Gilmore has five large houses, 15x400 feet, all but one in roses, the other in carnations, but they are short of help and playing in hard luck.

GOLDEN GATE.

New York.

STORY OF THE HOLIDAY BUSINESS IN THE METROPOLIS.—PLANTS CUT GREATER FIGURE THAN EVER.—CUT FLOWERS WANTED ONLY OF BEST GRADE.—MUCH SALTED STOCK.—RETAIL STORES IN BEAUTIFUL GARB.—PROPRIETORS TAXED TO THE LIMIT OF CAPACITY.—VARIOUS NOTES.

While, at time of present writing, it is not possible to present a full report of the Christmas trade for 1902, we can give, at least, a pen picture of the situation as it appears on the eve of the great holiday, with possibly some careful comments on certain phases of the business as indicating, in a measure, what is likely to be the complexion of the completed story when it is available, as we expect, next week. It is well to bear in mind the facts regarding the holiday sales generally, which, if the unvarying story as given in the daily papers is to be relied upon, are phenomenally large and admittedly greater in volume than in any past year. The florist should participate in this prosperity, and no doubt he will, in one department or another of his business, as flowers and plants have lost none of their claims on the affections of the people.

An inspection of the various retail stores throughout the city shows an unprecedented display of bright plants, regardless of locality or social standing of the establishments. Indeed, the occasion is very suggestive of Easter, for the windows are filled with plant displays, often to the exclusion of flowers, and the great sloping stagings that have heretofore done duty only at Easter have, in many instances, been resurrected and placed in position for a similar service in the display of Christmas plants and Christmas baskets. Red predominates. Poinsettias in billowy masses set the windows fairly aflame. Ardisias, solanums and red-berried branches crowd

upon the view and overhead hang dazzling ranks of scarlet bells and globes, the whole lavishly festooned and bedecked with ribbon of corresponding color. In fact, it is a veritable riot of red and green everywhere that a florist hangs out his sign and these stores stand out, wherever located, as the most brilliant and pre-eminent feature of the thoroughfare.

There are azaleas in abundance, *Veraneana*, *Mardner* and *Deutsche Perle*; *cyclamens*, *astilbes*, etc., and *Lorraine begonias* in great profusion. Frequently is seen a little forest of orange trees covered with fruit, the golden effect heightened by yellow satin and netting trimmings. Flower pots are concealed always in harmoniously-colored baskets and covers of braid or other material and there are many large "combination" baskets in the various forms already familiar to the Easter plant buyer, none being more popular than those built in the form of miniature automobiles. All available space outside the stores is utilized for Christmas trees of all descriptions, the most beautiful being the profusely-berried imported English hollies which are seen only in the most pretentious establishments, for "they cost money."

The advance sale of all the above-mentioned material was prodigious, and besides these there are araucarias and other things, unpretentious as to color, naturally, which with the assistance of a knot of brilliant ribbon and a showy pot-cover find not a few appreciative admirers. Last, but not least, are the ericas which are better than ever before, many of them from three to four feet and upwards in height, without which no store would be complete, and which also take kindly to the inevitable dash of scarlet satin. Among the unusual things to be seen are some pretty examples of our valued friend of the olden time, *Euphorbia jacinthiflora*, which well deserves the honor, and it looks very much at home in company with its companions of the same period, the camellias in red and white-flowered specimens.

So far, the plant is the all-engrossing subject. Perhaps this diversion of the popular fancy from the exclusive cut flower idea would have come about anyway and maybe no human ingenuity or foresight could have averted it. But yet one cannot resist the conviction forced upon him, after a tour through the great cut flower distributing centers, that a more general willingness on the part of the cut flower growers to heed the annual warnings of the past fifteen years, would have assisted in retaining for the cut flower industry a portion of its great pre-eminence of recent years. The writer has had exceptional opportunities for observing the quality of the cut flower material sent to this and other markets for many years and is sorry to be compelled to say that this year he has seen some of the worst stuff on the counters of the wholesalers that his eyes ever rested upon, kept so long after cutting that it was actually rotten. Not all are guilty, for there are many growers whose stock is a credit to them and a pleasure to its recipients, but there are enough of the other kind to bring reproach and loss to the cut flower industry far beyond any possible injury from the much-condemned doubling-up of prices at the holidays. It would seem that the reputable growers ought to find a way to interfere with this menace to their general welfare. The wholesaler seems either powerless or afraid to face the problem as it should

be met. Evidence in abundance can be found by any individual or committee making a tour of the wholesale markets on two or three mornings preceding a holiday.

Among the flowers most in demand are American Beauty roses of the best grades and carnations in the fancy sorts. Top quality in every desirable flower has taken a big spurt upwards in value for delivery on Christmas eve or Christmas morning. On the lower grades the proportionate advance is not nearly so great and for the refuse material there is no sale at any price. It might be said, in justice, that the weather is in some degree responsible for a portion of the poor material offered. It has been warm, with sunlight lacking, and firing properly has been almost out of the question. So there is an unavoidable softness that makes against the good-keeping qualities of stock generally. *Poinsettias* are in very heavy supply this year, with indications that it may be difficult to clean up the cut of this appropriate Christmas subject. On some other things, notably *Paper White narcissi*, there are similar indications, whereas on the other hand it would appear that the orders for first-grade roses are far in excess of the ability of the market to supply them. This we must leave, however, until next week, when fall returns will be available, hoping that we may be able to say that every bud and bloom commanded its full value and will have found its way to some appreciative buyer before the Christmas dinner got on the table.

A man representing himself as H. Smith, property-man at the New York Theatre, has been ordering big floral pieces sent to the theatre, e. o. d. during a few days past and causing lots of trouble and disappointment. Several of the retailers have had this unwelcome experience. As the only advantage the party appeared to get out of the transactions was an occasional boutonniere his methods are difficult to account for.

Mrs. Warendorf and Herman Warendorf have just opened a new store in the palatial up-town hotel, the Ansonia, which is now nearing completion. In its appointments the establishment is the peer of anything in this city in the way of flower stores, and at the grand opening, which took place on last Saturday evening, Mrs. Warendorf was the recipient of numerous sincere congratulations for her enterprise and good wishes for success in her venture.

George Tragidis has filed a petition in bankruptcy. Liabilities are given as \$6,647 and assets are represented by an oval shaped figure not unlike a goose-egg. Some of our good friends in the wholesale section are hit hard.

The holly situation underwent an unexpected change, with unexpected heavy arrivals of good material from southern points and purchases were made at the docks as low as \$1 per case, in quantity.

A greenhouse belonging to Charles Shucfer, at Maspeth, was destroyed by fire on the night of December 18. Loss given as over \$2,000; insurance, none.

W. H. Traendly will open a branch store at the Lafayette Brevoort, corner Eighth street and Fifth avenue, about January 1.

L. B. Craw, secretary of the Lord & Burnham Company, is ill with typhoid fever at his home in Irvington.

Visitors: R. E. Berry, Torresdale, Pa.; Chas. Ingram, Reading, Mass.; Sam. Goldring, Albany, N. Y.; R. E. Loeben, Gloversville, N. Y.; L. Menand, Troy.

Meetings of Florists' Clubs.

The accompanying list gives the cities in which there are active florists' clubs.

BALTIMORE, MD.—Gardeners' Club of Baltimore-Royal Arcanum building, 18 W. Saratoga street. Second and fourth Monday of each month, at 8 p. m. John J. Perry, Sec'y, Gay and Eager streets.

BOSTON, MASS.—Gardeners' and Florists' Club of Boston, Horticultural Hall. Meets second Tuesday of each month. W. E. Fischer, Sec'y, 18 Union Terrace, Jamaica Plain, Mass.

BROCKTON, MASS.—Brockton Gardeners' and Florists' Club, store of W. W. Hathaway, Times Building. First and third Tuesday of each month, at 8 p. m. W. W. Hathaway, Sec'y, Brockton, Mass.

BUFFALO, N. Y.—Buffalo Florists' Club, 491 Washington street. Second Wednesday of each month, at 8 p. m. Wm. Legg, Sec'y, 140 Delaware avenue, Buffalo.

CHICAGO, ILL.—Chicago Florists' Club, Handel Hall, 40 Randolph street. Second and fourth Wednesday of each month, at 8 p. m. George Wienhoeber, Sec'y, 413 Elm street, Chicago.

CINCINNATI, O.—Cincinnati Florists' Society, Jabez Elliott Flower Market. Second Saturday of each month, at 8 p. m. George Murphy, Sec'y, West Price Hill.

CLEVELAND, O.—Cleveland Florists' Club, Progress Hall, 244 Detroit street. Second and fourth Monday of each month, at 8 p. m. Isaac Kennedy, Sec'y, Woodchiff, Lake avenue, Cleveland.

DENVER, COLO.—Denver Floral Club, 323 Charles Block. Second and fourth Friday of each month at 8 p. m. Adam Balmer, Sec'y.

DETROIT, MICH.—Detroit Florists' Club, Cowie Building, Farran and Gratiot avenue. First and third Wednesday of each month at 8 p. m. J. F. Sullivan, Sec'y, 214 Woodward avenue.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

Now let us all pull together for a pros-
perous and happy New Year.

We are in receipt of handsome calen-
dars from P. L. Larson, Fort Dodge, Ia.;
Nebraska Seed Company, Omaha, Neb.;
Lord & Burnham Company, New York.

THERE is an item going the rounds of
the daily press to the effect that the
Society of American Florists is to meet
at St. Louis in 1904, with an attendance
of more than 1,000 persons.

THE mailing label on your paper shows
when your subscription expires; when
you send your renewal note that the
date changes within two weeks; it will
serve as your receipt.

LEWIS G. REYNOLDS, of Dayton, O., is
moving to organize the Carnation League
of America, to perpetuate the memory of
President McKinley, whose favorite
flower, the pink carnation, is to be the
badge of the order.

FREDERIC W. TAYLOR, acting superin-
tendent of horticulture at the St. Louis
World's Fair, has during the year trav-
eled 28,000 miles and spent fifty-eight
nights in sleeping cars in the interest of
his department.

E. T. GRAVE, of Richmond, Ind., has
sent us some blooms of the new carn-
ation, President McKinley. It is a strik-
ingly handsome dark pink flower. The
strong, stiff stems are eighteen inches
long; calyx and form of flower good; size
three and one-quarter inches.

It is rumored that the J. D. Thompson
Carnation Company has bought the
stock of a new pink seedling carn-
ation, a shade lighter than Marquis,
which is said to average four and one-
half inches in diameter. With good
habit, this should duplicate their success
with Enchantress.

The National Society of Equity of
North America has been incorporated at
Indianapolis. Its chief object is declared
to be "to promote and encourage orga-
nization and co-operation among farmers,
stockmen, horticulturists, gardeners, and
men of kindred vocations, by the estab-
lishment of a national society, with such
branch and local societies as may be
necessary to carry out such objects."

Greenhouse Building.

Grand Rapids, Mich.—Eli Cross, two
houses.

Lafayette, Ind.—Frank Schilling, four
houses.

North Yakima, Wash.—F. A. Huntley,
range of houses.

Valuable.

ED. AM. FLORIST:—I enclose \$1 for
another year's subscription to your val-
uable paper and wish it success and a
Happy New Year. G. P. MAHOON.
San Antonio, Tex.

The Fragrant Meteor.

ED. AM. FLORIST:—If one secures a
Meteor sport, with fragrance added, he
should keep it, grow it, watch it and, by
all means, make the most of it. Your
correspondent got that far with one
once, as reported in your issue of last
week. But though the blooms really did
afford the fragrance in full measure, the
characteristic depth of Meteor's color
had correspondingly vanished. And as
other good qualities were wanting, the
plants were in due time discarded.

FRANK L. MOORE.

New Trade Directory.

Final changes and corrections are
being made for the 1903 edition of the
American Florist Company's Trade
Directory. Where there have been any
changes in business during the past year
—new firms, change of firm name or
address, addition or reduction of glass
area in greenhouses, addition or reduc-
tion of acreage in nurseries, etc.—full par-
ticulars should be promptly forwarded
to insure insertion in the new edition.
Address, American Florist Company,
324 Dearborn street, Chicago.

American Carnation Society.

Davis Bros., Bloomsburg, Pa., register
Crisis, color bright scarlet; it holds its
color until the last and is a very good
keeper, flowers are from three to three
and three-quarters inches, stems from
eighteen to thirty inches. It is an early
and continuous bloomer.

Wm. G. Saltford, Poughkeepsie, N. Y.,
registers Fair Harvard, color Harvard
crimson, strong grower and a free and
continuous bloomer, fine calyx, seldom
bursting, stems strong and stiff, about
two feet long; plants three feet high
December 12. A decided novelty in color.

ALBERT M. HERR, Sec'y.

The Market for Christmas Greens.

The holly market at the close was
glutted, mainly with poor stock. The
whole country must have been well sup-
plied with holly. Dealers who formerly
bought twenty-five and fifty cases of
holly bought in carloads. The larger
part of the holly came from distant
points, at pretty heavy freight rates.
One shipper from North Carolina points
reports sending out 4,171 cases, about
forty carloads. These shipments paid
an average freight rate of nearly \$1
per case. There was an absence of gloss
on the leaves of most of the North Car-
olina stock that would indicate that the
lack of frosty weather before shipping
time was responsible for this handsome
finish to the foliage which is so much
desired.

There was practically no small leaf,
glossy, dark green, well-berried Delaware
stock to be had. The nearest to this
article was shipped from Maryland. The
Virginia and North Carolina stock, while
resembling the Delaware in some respects,
was generally of larger leaf, but not as
large as that from farther south. The
brightest, best selling stock was from
south of the Ohio river, but the percent-
age of prickly-leaved trees in that section

is so limited that the cutters cannot
afford to get it out, excluding the other
kinds, at the present competition prices.
North Carolina holly was objectionable
because of irregular, dwarfed growth of
branches, with absence of foliage except
at the tops of the shoots, which hurt the
sale of it. Common second and third
grade holly sold in Chicago in five and
ten case lots at the close as low as \$1 to
\$2 per case, according to quality.

Bouquet green, or lycopodium, in bulk
was pretty well cleaned out at the low
prices prevailing the last ten days, \$2 or
\$3 per hundred being accepted according
to quality.

Mistletoe was, as usual, very irregular
in grading and few very choice lots, well
berried and with good foliage, were
found. This article is often damaged,
either from the heat in the very warm
express cars or from freezing outside the
cars when the weather is severe.

Christmas trees were scarce in the
Chicago market, while last year they
could hardly be given away. The ten-
dency on these, as well as on green and
holly, seems to be toward a glut one
season and famine the next.

Carnation Night at Philadelphia.

As a change from the strenuous life led
during the holiday season by retailers,
commissionmen, growers and the numer-
ous assistants connected with the busi-
ness, the Florists' Club of Philadelphia
will hold a "Relaxation Night" at the
regular meeting to be held the first Tues-
day in January, 1903.

The essay usually read at these meet-
ings will be dispensed with on this occa-
sion. Instead, some of the Junos among
the newer carnations will be present.
Enchantress, Lillian Pond, Murphy's
Lady in White, Mrs. E. A. Nelson and
others have promised to grace the event
with their spicy presence. Adonis will be
there to extend the glad hand to his
compers. All who can qualify as to
possessing merit will be welcomed regard-
less of pedigree. It is general good
character that the craft in Philadelphia
are looking for and desire to encourage
and maintain. The standard is away up
but it is worthy the highest endeavor to
reach it. EDWIN LONSDALE, Sec'y.

The Prices of Plants.

ED. AM. FLORIST:—The season for
advertising and getting out price lists for
next year's business is at hand. Before
advertisements are started, or lists issued,
I am wondering if anything can be done
to help the poor plant grower realize
living prices for his stock. I started in
business in 1875, was one of the charter
members of the Society of American Flo-
rists and the same in the American Asso-
ciation of Nurserymen. In both of these
societies I tried to do a little something
towards holding a fair price on the stock
we had to offer. I at one time circulated
a "round robin" among leading concern
in which we should agree not to offer
standard goods like roses below a cer-
tain price. This was signed by some and
rejected by others. During all the inter-
vening time prices on plants have steadily
declined. I have compared copies of my
old lists with those of the present and
find great difference in prices then and
now. The prices on roses, carnations,
geraniums, verbenas, coleus—in fact all
leaders—have declined all the way from
fifty to seventy-five per cent, and even
more. The cost of production has
increased, inasmuch as labor and fuel

have advanced in price and almost everything used in connection with the business, whether in the construction of the houses or working them. Cost of living has increased. Cost of advertising has increased, from the fact that outside of our price lists in former times we had to do very little advertising. Is it right that the plant grower shall continue to pay more for what he uses and get less for what he produces? Can anything be done to change this? I thought when I started to get up the florists' exchange some years ago in Chicago that I was on the right road to help in this matter of prices. I worked this up for the growers only, but others turned it into a "free for all," and of course it was doomed before fairly formed. The continual lowering of prices on the goods we produce, while everything we use is constantly increasing, will surely prove disastrous, as the fate of many good men has already proved. I have talked with leading shippers both east and west, and all agree that the shipping plant business is in a deplorable condition. What can we do?

W. L. SMITH.

Boston.

HEAVIEST CHRISTMAS BUSINESS ON RECORD.—BOTH PLANTS AND CUT FLOWERS WANTED.—GROWERS HOLD STOCK TOO LATE FOR SHIPPING.

Boston's Christmas trade was far in excess of anything ever before experienced here. The weather was continuously favorable and buyers were unprecedentedly generous. Plant trade was enormous but did not seem to affect the flower trade injuriously, which was also unprecedentedly heavy. All retail stores at noon Christmas were practically empty. Considerable loss was experienced by the inability of wholesalers to supply the demand from New England points for flowers by express, owing to the policy of the growers of hoarding up their cut till Wednesday. Much of Wednesday's receipts failed of satisfactory market because they showed evidences of age and the usual loss from this cause occurred. Prices generally were high. Not as high as in New York for fancy grades, but average for medium stock fully as high as any market in the country. Fuller details of the Christmas trade and its lessons will be given next week.

Houghton & Clark met with a serious mishap Christmas morning, when the automobile, with which they were delivering, took fire. The ruined stock was of small consequence as compared with the embarrassment caused by the loss of the address cards, which were consumed. There was an overstock of holly in this market, the qualities being variable, and considerable was left unsold.

OBITUARY.

BENJAMIN A. ELLIOTT.

Benjamin A. Elliott, one of the best known veteran florists of western Pennsylvania, died at his home in Allegheny, on December 19 from heart failure. He had been a florist all his life, his father having been in the same business nearly a century ago, in old Birmingham, England. In 1854 the deceased opened a store on Market street, Allegheny, which he conducted for many years. Later he moved to Sixth street, where he kept up the business until about five years ago. He was 63 years of age and is survived by his wife and ten children. One son is

J. Wilkinson Elliott, the landscape architect, and another, B. L. Elliott, operates the greenhouses at Cheswick. The deceased was a member of the Knights of Pythias, Royal Arcanum and Ancient Order United Workmen.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1902 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

SITUATION WANTED—By experienced seedsmen—any department—stockkeeper or mail order preferred. SEEDSMAN, care Am. Florist.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

SUNFLOWER seed is selling at the lowest price for many years.

WHITE clover is very scarce—choice worth \$22 per 100 pounds.

A. A. BERRY, of Clarinda, Ia., is in the hospital under surgical treatment. He is doing well.

THE sweet corn question is now the most uncertain one on the list; however, back counties are often heard from with unexpected lots of this article.

VISITED CHICAGO: James B. Kidd, representing the Cox Seed Company, San Francisco; Harry N. Hammond, Bay City, Mich.; Fred. M. Clark, of the Everett B. Clark Co., Milford, Conn., on his way to the Wisconsin pea district.

PAPE & BERGMANN are offering a new giant pansy, *Dirra*, with cream colored flowers; *Waldersee*, a new type of dwarf aster, and blue *gladiolus* hybrids which bloom the second year from seed and produce a very large percentage true to type.

THE Leonard Seed Company, Chicago, has leased the Newberry warehouse, northeast corner Kinzie and Franklin streets and will remove their office and store to that place May 1. This is one block west of the Goodwin, Harries Company, on the north side.

The Follow-Up Method.

The manager of the mail order department in one of the largest stores in this country says, in a communication to the *Mail Order Journal*, that after sending out a general catalogue it will not pay to mail a series of "follow-up" letters to the same addresses. He reasons that if the catalogue does not interest people to the extent of bringing an order for any one of the thousand articles described therein, it will be useless to waste further effort on them.

English Seed Trade Notes.

London notes in the *Horticultural Trade Journal* of December 3, run as follows regarding seed crops: "The outlook is about as bad as it can be, small crops, poor samples, indifferent vitality, and high prices. Peas are extremely short, especially early wrinkled sorts. American Wonder and its types are nearly a total failure. Samples will, it is feared, prove badly stained from effects of the weather and the buyers will hardly take such consideration into account when examining them. The increasing trade in seed peas has rendered necessary that English houses procure their seeds from outside sources but this year foreign producers are in the same plight as English growers and are in the markets in the capacity of buyers instead of sellers. Dwarf beans are scarce, Canadian Wonder especially so because of unusual demand in South Africa, where it does well. There is a growing taste for green-podded varieties from America. Beets are one of the most satisfactory crops this season. The cabbage crop in some instances is only ten per cent of an average one. The short carrots show a better crop than last year and prices are likely to be twenty-five per cent cheaper, except on the long

kinds. The onion seed crop is a fairly good one but samples are neither plump nor heavy. A large percentage of light seed is blown out in cleaning. Radish and spinach are good and the same is true of rutabaga."

Some Legal Decisions.

The value of wheat stored in a public warehouse at the owner's risk of fire is held, in *Moses vs. Tectors* (Kan.), 57 L. R. A. 267, not to be recoverable by the owner from the warehouseman in case of a subsequent fire, where the identical wheat stored was sold according to the custom of the warehouseman, known to the owner, to commingle grain so deposited for storage with like quality belonging to him, and from such mass to sell from time to time and replenish with such other grains as should be brought to him for storage or he should buy, and when the warehouse burned it contained enough wheat of the quality stored to replace the same, and the warehouseman had at all times kept on hand sufficient in quantity and quality to replace all wheat stored with him.

For the deterioration of goods while in cold storage the warehouseman is held, in *Marks vs. New Orleans Cold Storage Company*, (La.) 57 L. R. A. 271, to be responsible notwithstanding a stipulation, in the receipt issued for the goods, to the effect that he will not be responsible for "damage" to the goods.—*Chicago Daily News*.

Indianapolis.

E. A. Nelson reported his retail trade as excellent this season. Blooming

plants for the holidays, of which he had a very fine supply, moved especially well. He has booked many orders for cuttings of Mrs. E. A. Nelson carnation, which shows up fine this winter.

Bertermann Brothers have added an automatic steam trap to return the condensation in their heating pipes. John Bertermann is confident that the outfit will save its value on coal the first winter. The cost was \$110.

It is feared the city will lose St. Clair Park, one of its finest down-town parks. The ground belongs to the state and there is danger that the legislature will dispose of it.

Bert Stanley, the city gardener, is hard at it making cuttings. He has already 35,000 alternantheras and 20,000 geraniums in 2-inch pots.

August Riemann's mule "Kate" is dead. It was thirty-five years old and a well known character in the lower Pleasant Run valley.

One of Smith & Young Company's boilers sprung a leak, which fortunately was repaired between cold waves.

On the lots formerly occupied by his greenhouses J. J. Vondersaar has erected a large business block.

H. Junge has been sick for a week with a very severe attack of neuralgia.

H. J.

GRAND RAPIDS, MICH.—Eli Cross shipped a big cut of violets to Chicago this week, and they were good, but the season has not been a favorable one for the violet growers here. Mr. Cross has eight houses in violets this season and one house of Easter lilies. In the spring he will put up two more houses and install a new boiler.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THERE were large shipments of Kieffer pears to Liverpool this season.

THERE is record of a pecan tree in Georgia which bore in one crop nuts to the value of \$164.

THE Crimson Rambler rose is gaining popularity every season. There is likely to be a shortage in the spring.

A GREAT deal of peach seed is going into the ground in southern orchards but the plantings would have been much heavier had the seed been obtainable.

THE Nova Scotia Fruit Growers' Association meets at Middleton, January 20, 1903, when there will be a large exhibition, a lengthy prize list having been issued. A feature will be barrels and boxes of apples packed for export.

THE Illinois State Horticultural Society, in session at Champaign December 19, elected the following officers, Henry M. Dunlop declining a re-election: President, H. A. Aldrich, Neoga; secretary, L. R. Bryant, Princeton; treasurer, J. W. Stanton, Kichview.

THE Western Association of Wholesale Nurserymen was in session at Kansas City December 16. The following officers were elected: President, A. L. Brooke, Topeka; vice-president, R. N. Blair, Ottawa, Kas.; secretary and treasurer, E. T. Holman, Leavenworth, Kan.

Tree Business in California.

Nursery interests in Southern California are flourishing and, with good winter rains, the season will be the largest on record. There is a heavier demand for prune and apricot, which range from \$12 to \$15 per hundred, and even in peach there is considerable activity in spite of low prices realized for the fruit the past season. Stock of some varieties, as Muir and Phillip's Cling, is short and prices range from \$12 to \$20 per hundred according to supply and demand. The canneries pay best for good yellow elings and these are now the bulk of the plantings. There is good call for French prunes, but prices are lower than on Sugar and Imperial, which run \$15 to \$18. Apple and pear are called for locally but cherry is the scarcest item. As high as \$2.50 per thousand is bid for Napoleon Bigarreau, locally known as Royal Ann, which constitutes the bulk of the plantings but is obtainable only in limited quantity. Wholesale prices for fruit of this variety usually run from \$80 upward per ton, as high as \$160 having been paid by canners in the short crop year of 1899. The requirement is for a fruit from 3 1/4-inch upward in diameter. There is also good call at present for ornamentals, especially roses.

The Modern Paeonia.

Having recently received an invoice of choice paeonias from James Kelway & Son, of England, some of them costing \$5 a root wholesale over there, my friends address me with opprobrious epithets and say the fad will soon pass away and the bottom will fall out of the boom and let me down.

But let us look at the matter. First, the modern paeonia is a new discovery and the newer sorts are as beautiful as any flower that blooms.

Second, as never before, both in Europe and America, there is an awakened interest in flowers. In England there is a greater demand by far than ever before. The love of the beautiful grows with the nation's growth. Growers find that notwithstanding the immense amount raised in New England there are hardly enough to supply the demand and western growers are drawn on heavily. Millions will be needed in New York alone, when all the dealers of the state have not 200,000.

Third, with anything like decent care there are no failures with these flowers, no losses as with roses and other choice things. They stand more neglect than anything else.

Fourth, there is the immense empire of the west and northwest yet to be supplied, and these are about the only flowers that will succeed in that vast region. I have calls from Manitoba and northwest Canada, where they succeed admirably.

Taking all these things together, the paeonia is the surest, most profitable and most satisfactory flower we can raise.

C. S. HARRISON.

Albany, N. Y.

QUIET PERIOD ENDS WITH APPROACH OF CHRISTMAS.—GOOD HOLIDAY TRADE.—NEW YEAR PROMISES WELL.—PLENTEY OF DECORATIONS.—VARIOUS NOTES.

After a couple of weeks of very quiet trade, business took a decided change for the better. The approach of the holiday

season stimulated the demand for decorative material and accessories. The local craft is much encouraged over the number of orders that have been booked for the first week in the New Year. Eyres has secured orders for the decoration of the assembly chamber in the capitol, also for the charity ball to be given for the benefit of the Homeopathic Hospital building fund on January 1, and for the alumni meeting of the Albany Medical College. W. C. King & Company will decorate the new Aurania Club house in the Pine Hills district, the I. O. O. F. hall for the Adelphi Club ball on January 1 and will also do a number of private decorations.

A very neat decoration was executed by Eyres on Monday of this week for Mrs. Franklin Townsend's reception. The parlor, with its fireplace and three large mantels, was decorated with poinsettias, southern smilax and palms banked in the corners. A large bunch of mistletoe and bells of red immortelles were suspended from the central chandelier. The mantel in the dining-room was buried in poinsettias and holly.

Miss Elsie Hansen, daughter of Henry Hansen, of Catskill, assisted Eyres during the holiday rush. R. D.

HELENA, MONT.—The State Nursery Company has one house devoted to cyclamens which are in bloom now and look first-class. Carnations are in good demand and stocks are in fine condition. Mr. Mills is nursing a white sport of Lawson which he claims, in addition to having inherited all the qualities of its parent, excels it in size.

Almost half a century of fair dealing has given our products that prominence which merit deserves. We still offer everything of the best for

ORCHARD, VINEYARD, LAWN, PARK, STREET, GARDEN & GREENHOUSE.

Very BEST for FORCING

LIVINGSTON'S BEAUTY TOMATO.

Prof. W. J. Green, of the Ohio Experiment Station says:

"I am fully satisfied that Livingston's Beauty Tomato is the most profitable variety of all for growing under glass."

Prof. W. B. Alwood, of the Virginia Experiment Station says:

"Your Beauty Tomato was superb, and unusual, gave us magnificent fruit. We are using it now exclusively for winter forcing."

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

Prepare for Milwaukee.

Now is the time for action on the part of those interested in the success of the national bowling tournament at Milwaukee next August. Bowling enthusiasm is at full tide all over the country and it should be easily possible to make the contest at Milwaukee much the largest and most closely fought in the history of the S. A. F. conventions. The accessibility of Milwaukee and the assurance, which it gives, of a large attendance at the convention should cause the officers of the National Florists' Bowling League to seize the opportunity to stimulate the interest in the sport throughout the trade. The boys should get to practicing in every town from Boston to Denver and from Minneapolis to St. Louis. Milwaukee has some of the finest bowling alleys in the country and the local committee will see that every arrangement accords with the wide interest and keen competition which should mark the contest.

Chicago.

CHRISTMAS BUSINESS NOT UP TO RECENT YEARS.—MONEY VALUE NOT IN THE ROSE CROP.—POOR QUALITIES CUT RETURNS.—WHITE CARNATIONS HURT THE AVERAGES.—ORDERS MORE NEARLY FILLED THAN USUAL.—REINBERG WILL INCREASE ROSE PLANTINGS.—FLORIST AS A THIEF CATCHER.—LITTLE MONEY IN CARNATION CUTTINGS.

The Christmas business began with long-distance shipments on Sunday, but Monday found the market rather weak. Tuesday was the big shipping day and practically everyone in the wholesale district had all he could jump to, but the aggregate of sales was not up to recent years. There was an adequate supply of material but there would have been a decrease in total sales if only on the score of the diminished value of the rose crop as compared to last year. Brides and Bridesmaids have seldom been so poor for the holidays. The stock was all soft and the very best of it lacked that crispness which is a large part of the value. Bridesmaids were of very poor color. There is likely to be much complaint on the score of poor quality at high prices, but the buyers should pause to consider that no one got first-class stock; what little good material there was had to be divided up among the orders to leaven the mass of soft flowers, and many an order was cut, not because there were no roses to fill it but because it was impossible to get stock which would stand shipment. Of course red roses were far under the demand and there was more of a stringency in the Beauty market than had been anticipated. There had been more pickling on this item than almost any other, but the salted stock got only its deserts, in most cases less than it would have brought if shipped in when it was right. The same applies also to white carnations. Last week white was wanted and hard to get; this week it was half the stock and was only moved by making customers who

wanted red take a fair proportion of white. Clean-up sales on white were made at \$1 per hundred. Red brought big values if the stock was fresh, but there was a sufficient supply in other colors, unless it might have been some of the fancy varieties. The supply of violets was just about equal to the demand. Bulbous stock moved slowly because there were low grade roses and a surplus of white carnations. There were larger supplies of poinsettias than usual and they sold only fairly well. Wednesday brought the local buying and also the stiffest prices of the week on good stock, with little call for the low grade. Beauties were held at \$15 for long, but did not all move at that. The trade did not have the life it sometimes does, for there were callas, valley and other things which did not sell.

Peter Reinberg came down town Tuesday to see the boys at the store do their holiday stunt. He said that he has never before had so good a holiday crop, although the dark weather had taken a little quality out of Brides and Bridesmaids and reduced the cut somewhat throughout the place. Liberty was rather between crops but everything else was on. Mr. Reinberg says Chatenay is his best money getter this year, fully as good as Liberty so far as profit goes. He is figuring on rebuilding mine houses this spring. They are only six years old, now largely occupied by Liberty, but he wants them higher, to make room for Beauty next year. He plans to add about three more houses of Chatenay and would like about three houses of La France also for next year. If he follows out his present idea it will reduce his planting of carnations nearly one-half.

John Schoepfle is getting a reputation as a thief catcher, although credit for the latest exploit is also due to his 15-year-old daughter, Anna, who discovered a sneak thief and locked him into the basement of the store, 1431 Belmont avenue, last Saturday night. Three weeks ago Mr. Schoepfle captured a man who was seeking to enter a neighbor's flat and in 1899 he caught, after a struggle, one Henry Romain, a former employe whom he suspected of robbing the place and who was sent to the penitentiary.

George Reinberg says that the prices of carnation cuttings of the standard varieties are so low that there is nothing in the business any more and he does not propose to this season propagate anything like the quantities of the last two or three years. He will, however, provide a large stock of field grown plants.

Wholesale business on holly fell off at the first of the week and was dull, while the retail trade was being pushed. Considerable quantities are still on South Water street. Some South Water street dealers have laid in stocks of lycopodium at about \$1.50 per hundredweight to carry over to next year.

Henry Rowe reports a very good Christmas business and has some good orders on for New Years, among them the decoration of the dining rooms at the Wellington Hotel and at Rector's. The latter job includes the decoration of eighty-seven tables.

The numerous friends in this trade of L. F. Vosburgh, former city ticket agent of the Lake Shore & Michigan Southern R. R., will be pleased to learn that he has been promoted to the position of general agent of the passenger department of that road.

Albert F. Amling is on with a very good cut of Brides and Bridesmaids. Mr. Amling has been very busy for a long time and is treating himself to a vacation, spent in visiting nearby places of interest.

The Flower Growers' Company, of Chicago, capital \$2,500, was licensed to incorporate on December 19. The incorporators named are Fred. P. Hills, J. Willard Newman and Charles L. Spencer.

M. Winandy had expected to have an additional house ready for use by the holidays, but was delayed. He is busy propagating.

A. L. Randall had a nice crop of roses from the Swanson place this week.

Visitor: Frederic Cranfield, Madison, Wis.

JOLIET, ILL.—Chas. Siegl has gone into business for himself. At the J. F. Wilcox Spot Cash store Julius A. Schnapp has succeeded Mr. Siegl in charge of the floral department. He was formerly with Wienhoeber and Samuelson, Chicago.

Cincinnati.

CHRISTMAS BUSINESS ALL THAT ANYONE COULD EXPECT.—CARNATIONS THE ONE SHORTAGE.—PRICES GOOD.—RETAILERS SATISFIED.—NOTES.

Christmas trade was all that could be expected. A big lot of stock was disposed of at fair prices. Beauties were enough for all orders and good ones, too. Carnations were very short in this market, not half enough for orders. Plants were in good demand. Bulbous stock, such as Romans and Paper White narcissi, was in over-supply. Lily of the valley sold well. Harrisii lilies were in good demand at \$2.50 per dozen. This market will be well supplied with them from now on. Poinsettias did not sell as well as last year and there are some left over. If the present weather continues good flowers will be very scarce.

A. Sunderbruch's Sons did a tremendous business. They had a force of sixteen working to get out their orders. One of their wagons left the store on Christmas morning with over 100 different boxes to be delivered. Hardesty & Company also did a good business.

The Cincinnati Cut Flower Company had a vase of the new white seedling carnation, Innocence, and a vase of Franz Deegen rose on exhibition this week, from the E. G. Hill Company, which showed exceptionally fine keeping qualities.

John G. Graull celebrated the one hundredth anniversary of his birthday on Christmas day, at the German Old Men's Home. Mr. Graull was gardener to the Longworth family for years.

D.

Washington.

RETAILERS HAD GOOD STOCK.—PLANTS SOLD WELL.—NOTES OF THE SPECIALTIES.

J. H. Small & Sons had a fine assortment of plants, such as azaleas, poinsettias, ericas, oranges, dracanas and a fine lot of imported evergreens for Christmas, most of which were sold some days in advance. They complain of the English holly dropping its leaves in transit. Boxwood wreaths were again in great demand.

A. Gude & Brother had a nice lot of azaleas, poinsettias, cyclamens and a good stock of roses and carnations. J. R., Freeman and J. Louis Loose had their stores well stocked with flowering plants and cut flowers.

Z. D. Blackstone and Otto Bauer had their stores looking very attractive and well stocked for the holiday trade. George C. Shaffer had a good stock, including a fine lot of wreaths.

J. D. Thompson Carnation Co.

JOLIET, ILLINOIS.

Carnation Gov. Lowndes.

Color, pure white. Size, 3 to 3½ inches in diameter. Calyx, spreading at the top, making it practically non-bursting. Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated, and beautifully arranged, forming a full, rounded center. Odor, is very sweet and particularly pleasing. Stem, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect. Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties. Productiveness, extremely free flowering. More productive than any other large white. A profitable and high grade commercial variety. Price, \$2.50 per doz.; \$12 per 100; \$100 per 1000. 50 at 100 rate; 500 at 1000 rate.

SUPPLY AND DEMAND A GOOD FIT IN CHRISTMAS WEEK.—RED THE COLOR SOUGHT.—CLOUDY WEATHER INJURES QUALITIES.—NOTES OF THE DECORATIONS AND TRADE DOINGS.

The weather has been warm, considerable rain has fallen and the absence of sunshine was conspicuous prior to Christmas. Beauties, Brides and Liberty are the best in quality at present, Cousins and Bridesmaids being soft and of poor color. In carnations Mrs. Lawson, Goethe and Genevieve Lord are the best. The various red shades are good but very scarce and much in demand. Violets have reached the perfection mark and sold at a double quick pace. Orelids and gardenias have been meeting with good sale. Harrisii lilies seem to be at a premium. Poinsettias were good.

The sale of plants for holiday presents has developed remarkably within the past few years. The stores were well stocked with palms, cibtiums, dracaenas, azaleas and Gloire de Lorraine begonias and a large number of these were arranged in fancy baskets and decorated with red ribbons. Red was the popular color everywhere.

Breitenstein & Flemm have had a very attractively decorated store. The walls and ceiling are painted red and the decorations were all red, baskets, ribbons, flowers, fruit and all accessories and at night red candles were used. The effect was one of remarkable beauty.

Charles T. Siebert has a carnation house 48x165. He is making arrangements to construct another house for the growing of asparagus.

John Bader had a decoration every night last week, for the various chapters in the Masonic Temple.

James H. Scaman, Washington, Pa., had a temporary store on Main street for the holidays.

Mrs. E. A. Williams decorated the Pittsburg Club for three occasions this week.

J. B. Murdoch & Company had a big cut of roses and carnations for Christmas.

The Pittsburg Cut Flower Company will handle a line of florists' ribbons.

E. L. M.

DENVER, COL.—Davis Brothers, who recently started in business at Forty-fifth street and Homer boulevard, report things moving prosperously for them.

WYNCOTE, PA.

GROWER OF...
ARECA LUTESCENS,
KENTIA BELMOREANA,
COCOS WEDDELIANA.

Syracuse, N. Y.

GROWER HAS THREE UNDISSEMINATED CHRYSANTHEMUMS.—STEM ROT IN CARNATIONS.

Walter Meneilly's house of chrysanthemums attracted much attention this fall. Three of the best in his collection are named for Syracuse society women, Mrs. Adelaide White, Mrs. Robert Dey and Miss Charlotte Land. The flower named for Mrs. White is of the Japanese incurved section with a white center, the four outside rows of petals of a shell pink color. Mr. Meneilly has taken several prizes with this variety. The Mrs. Robert Dey chrysanthemum is Daybreak pink of large size. This variety has not yet been publicly exhibited. The Charlotte Land differs from the others, its color being a soft golden yellow. It rivals both the others in size.

Peter Kay is an extensive carnation grower. He has had to fight a great deal this year against stem rot, as has everyone else. The new Governor Wolcott is a favorite with him. The Lawson, he says, has a tendency to burst at this time of the year. Mr. Kay grows two houses of asparagus and has a splendid reputation in that line. A. J. B.

San Francisco.

TRADE ACTIVE JUST BEFORE THE HOLIDAYS.—CROPS GOOD EXCEPT ROSES.—ACCESSORIES LARGELY USED.

Business for the holidays is in full swing at this writing and it promises well, as far as can be seen, a peep at all the nurseries showing that roses will be the scarcest article, and consequently will bring fancy prices. Carnations will be about equal to the demand. Prices will also be good and may be a little higher than last year. Lily of the valley and hyacinths are equal to demand. Daffodils can be seen, a few, and narcissi are plentiful. Violets are somewhat scarce, owing to cold and cloudy weather.

Ribbons will be used in all colors, to suit the flowers, in colored paper boxes, with colored raffia. All colors can be seen of these articles piled up in the stores. Birch bark will be used largely for pot covering, also redwood bark baskets, for plants or flowers.

GOLDEN GATE.

RICHMOND, IND.—H. C. Chessman calls attention to the fact that the next meeting of the Richmond Florists' Club will be at the greenhouses of the G. R. Gause Company, January 19.

NORTH YAKIMA, WASH.—F. A. Huntley, for a number of years professor of horticulture at the Idaho State University, at Moscow, is building greenhouses here to go into business.

NOTICE.

THE MODEL PLANT STAKE COMPANY, formerly of Brooklyn, N. Y., has removed to 208 Jersey St., Harrison, New Jersey, and is now The Parker-Bruen Mfg. Co.

**The Model Extension
Carnation Support.**

Flushing, Long Island,
Dec. 11th, 1901.
MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir— I have used your Wire Carnation Support the last two years. In all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time.

Very truly,
A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir:—After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season.

We were much pleased with the simplicity, strength and neat appearance of the support

Yours truly
F. DORNER & SONS Co.

Tarrytown Horticultural Society.

The annual meeting of the Tarrytown Horticultural Society was held December 18. David McFarlane, chairman of the executive committee, reported that the fourth annual dinner will be held at the Florence Hotel, January 14, at 8 p. m. Arthur Herrington, of Madison, N. J., president of the Chrysanthemum Society of America, was present, and made an address in reference to having the local society co-operate with the sister societies around New York and holding a national flower show next fall in connection with the American Institute of New York city. F. R. Pierson, vice-president of the Chrysanthemum Society of America, being present, made some very encouraging remarks in reference to the future of this society.

The regular business of the society was transacted, after which followed the election of officers for the ensuing year, which are as follows: President, David McFarlane; vice-president, Francis Gibson; secretary, Edw. W. Neubrand; treasurer, Jas. T. Laurie; corresponding secretary, H. J. Rayner; executive committee, Wm. Scott, Thos. Lee, Joseph Bradley, James Ballantyne, Wm. P. McCord, Jas. W. Smith, John E. Whyte, John Elliott; board of directors, Wm. Scott, Jas. W. Smith, Jas. Ballantyne, Wm. F. McCord, F. R. Pierson, Fred. E. Weeks, Isaac Requa, Dr. R. B. Contant. E. W. N.

Minneapolis.

ROSE CROPS COME ON TOO SLOWLY.—A VARIETY OF LOCAL AND SEASONABLE NOTES.

Few Beauties have appeared in market the past week and they were like precious stones in value. Carnations have been in ample supply. Holly and Christmas trees have been in great demand at good prices. Good choice holly always finds a ready market at the seller's price.

R. Will is preparing for a large addition to his greenhouse plant, which will be of most modern construction.

The raise in express rates between the Twin Cities and Chicago is causing many kicks.

R. Wessling's rose cut this season has been remarkable.

G. M. Lynes is on the sick list.

C. F. R.

[In our issue of December 13, it was stated that H. Dunn, of Chicago, would take charge of the new cut flower store of Northrup, King & Company. We are now advised that Mr. Dunn will not do so.—Ed.]

CLAY CENTER, KAN.—C. Humfeld says that as yet the call for rooted cuttings has been light, but that he is so confident of a big season that he is preparing much more stock than usual.

C. C. POLLWORTH CO., MILWAUKEE, WIS.

Pennsylvania Horticultural Society.

The December meeting of the Pennsylvania Horticultural Society was held at Horticultural Hall, Philadelphia, December 16, Vice-President Dr. Geo. Goebel presiding. The election of officers for the ensuing year resulted, as the executive council recommended, in the re-election of the old board. The past year has been an active and successful one. The officers have been earnest workers, and the florists and gardeners have done much to make the exhibitions and monthly meetings the success they were.

The exhibits of the evening were for the Bodine prize for the best plant of *Cypripedium insigne*. John Thatcher was first and F. Canning second. For the Michell prizes for mushrooms John McCleary was first and John Gaynor second. For lily of the valley Albert Fenton was first and Wm. Robertson second. For the Dreer prize for best specimen flowering begonia, F. Canning was first with *Begonia incarnata grandiflora*.

W. P. Peacock, the dahlia specialist, recommended that an extensive dahlia exhibition be made in conjunction with the September, 1903, meeting of the society, several Massachusetts growers having signified their intention of making exhibits, providing suitable arrangements were forthcoming. The motion was adopted and the committee of arrangements requested to prepare a schedule for a two days' show.

The ornamental foliage plants exhibited by John Thatcher at the recent show having brought forth so many encomiums, he was requested to prepare a paper, to be read at the January meeting, giving his methods and a selection of varieties.
F. C.

Troy, N. Y.

The city of Troy has now secured possession of the Warren estate for use as a public park. The city paid to George B. Wellington, as attorney for the Warren heirs, the sum of \$110,000. The property comprises about seventy-five acres and is on a commanding site, giving a wide view up and down the Hudson and across the adjacent territory north to the foothills of the Adirondacks and southwest as far as the Catskills. The work of improvement will be begun in the spring.
R. D.

SANDUSKY, O.—John H. Meyer, of the Central Greenhouses, is spending a few days at his old home at New Brighton, Pa.

LAFAYETTE, IND.—Frank Schilling is remodeling his heating apparatus and in the spring will add four houses for forcing vegetables.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.

50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-inch.

75,000 FEET of cotton rubber-lined fire hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

CROP INSURANCE.
Life insurance is valuable because it guarantees the outcome.
"Gurney" Heaters
"BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

THE CHRISTMAS TRADE.

THE CONSENSUS of opinion classes the Christmas season as the best yet experienced by the flower trade. General satisfaction is apparent in the numerous reports of prosperous business. Supplies were larger than ever before, but prices were higher in many localities. There is now and then a complaint at this, but usually from those who produce little of the stock they handle, for the primary advance was in wholesale hands and on select material, low grades being caused by continued dark, cold weather over a large part of the United States.

Red is the Christmas color. It is apparent that the rose still holds a long lead, but each recurring holidays sees increased call for carnations and this year the prices obtained for fancy colored stock were the best on record. Violets were scarce everywhere. In general bulbous stock sold only when other items were exhausted.

Plant sales generally increased but from here and there comes word of a falling off. Flowering stock was wanted, but the Boston fern was a good seller.

The trade on holly was unprecedented and all decorative greens sold well. Many of the trade reports will be found in this issue.

ATLANTIC, IA.—Chas. Olsan says the cloudy weather and scarcity of coal hurt Christmas sales, but trade was good and prospects fine.

FORT DODGE, IA.—P. L. Larson says sales fell off because of bad weather, 20° below zero Christmas day. Stock scarce because of little sun; bulbous stock and white slow sale.

MONTGOMERY, ALA.—W. B. Paterson says Christmas business was ten per cent ahead of a year ago, stock scarce and prices higher. There was increased call for flowering plants.

BRATTLEBORO, VT.—Business was good, prices reasonable, qualities fair, all orders filled but stock well cleaned up. C. E. Allen notes that bulbous stock is always slow sale at Christmas.

LANCASTER, PA.—G. W. Schroyer reports the holiday results about as last year, prices being a little higher because of the shortage of good stock. There was wider sale for flowering plants.

AKRON, O.—E. J. Bolanz says Christmas business was about as last year; no unusual features. Carnations had most calls. Boston ferns were a great seller. Plenty of bulbous stock but demand only fair.

KOKOMO, IND.—There were enough Christmas roses and a plenty of bulbous stock. Carnations were in increased demand and ran short. W. W. Coles says there was an increased sale for wreathing and holly and that the total of sales was fifteen per cent ahead of last year.

NEW LONDON, CONN.—H. H. Appledorn says holiday plant trade is on the decline; cut blooms had preference but were enough, except violets, for the demand.

HAMILTON, ONT.—E. G. Brown says the holiday business was about the same as last year, stock scarce and prices higher. Bulbous stock was plentiful and sold well. Big sale for Boston ferns and table ferneries.

LINCOLN, NEB.—C. H. Frey says that with sun and favorable weather Christmas would have broken all records. As it was sales were fairly satisfactory. Stock was not up to the demands and qualities were off.

MUNCIE, IND.—The Muncie Floral Company reports Christmas about as last year. Violets were short and the high price of Beauties shut off business on this item. Carnations were wanted. Holly never sold so well.

CLINTON, IA.—With only twenty-five hours of sunshine in December, stock was scarce for Christmas and prices up. Pot plants sold well. The azaleas and Lorraine begonias would be hard to beat. Holly sold better than ever.

PEORIA, ILL.—Except on bulbous stock, for which there was little call, there was not enough Christmas stock, even with prices ten to fifteen per cent higher than usual. Qualities were not up to standard. J. C. Murray says everyone wanted strictly fancy stock and was willing to pay the price. Scarlet carnations were favorites. Plant trade was about as usual.

MOBILE, ALA.—Miss Marie Minge says that Christmas demands are never met in full, except on bulbous flowers. Violets, roses and carnations are most called for. Plants moved slowly, ferns selling best.

GRAND RAPIDS, MICH.—The holiday sales were ten or fifteen per cent ahead of 1901, with enough stock and little sale for bulbous material; qualities averaged well. Henry Smith says plant sales increased all along the line.

DUBUQUE, IA.—Zero and a blizzard made delivery difficult and Christmas sales were only a slight increase over 1901. More colored flowers could have been sold. W. A. Harkett lays deterioration in qualities to the dark weather.

HARRISBURG, PA.—C. L. Schmidt says his Christmas sales doubled and he had stock enough for every one, unless they wanted Liberty or Beauty or red carnations; qualities were fine. Holly never sold so well. Numerous calls for plants.

FREMONT, NEB.—C. H. Green says it was the most satisfactory business on record, but not larger than last year. Stock was good and supplies close up to the demand. Everyone wanted violets and carnations. Boston ferns sold well.

YORK, PA.—Sales were twenty per cent above last year and prices a little better than usual at Christmas, but there was enough stock. Chas. E. Smith found Romans a good seller. All qualities were good. Azaleas and araucarias led in plant sales.

WATERVILLE, ME.—H. R. Mitchell & Son report a satisfactory increase in holiday business, with the largest demand for holly ever known. Prices were reasonable, with enough of everything except violets. There was a decrease in plant sales.

JACKSON, MICH.—Lee & Company say sales increased one-third, largely because prices were twenty-five per cent higher than usual. Violets were short; slack sale on bulbous stock; qualities as good as last year if not better. No increase in sale of plants.

DES MOINES, IA.—The blizzard of the day before Christmas, with 10° below zero, cut into the retail trade but there was a slight increase as compared with last year. Stock was equal to all demands. There was good sale for azaleas, cyclamens and all greens. W. L. Morris says that last year's call for strictly fancy cut flowers did not materialize.

SHARON, PA.—Prices and sales increased at Christmas; carnations had the call but roses and violets were the scarcities. John Murchie says he could have sold more bulbous stock except Paper Whites. There was a big increase in the sale of holly and green.

JACKSON, MISS.—W. J. Brown, Jr., says there was an increase in the sale of plants but cut flower trade was almost a failure, owing to the open winter. On Christmas day roses, Romans and Paper Whites could be gathered in the garden. Such a season was never known before.

ROCKFORD, ILL.—It was extremely cold the day before Christmas but trade increased ten per cent; everyone wanted carnations, but there were plenty, also violets; bulbous stock was abundant and sold well. There was more sale for plants than ever before.

LITTLE ROCK, ARK.—J. W. Vestal & Son report Christmas prices as better than a year ago and sales a very handsome increase, possibly one-third. They filled only about one-half the orders on roses, carnations and violets. There was increased sale for palms.

BLOOMINGTON, ILL.—Conditions were about as last Christmas, except that cloudy weather cut down supplies of the staple cut flowers. Bulbous stock cleaned out. Plant trade was about as usual. J. D. Robinson says that the principal increase in call was for red carnations.

SCRANTON, PA.—G. R. Clark says Christmas business increased ten per cent; prices and qualities as last year; supply equal to demand on cut flowers. Increased call for flowering plants. Poinsettias grown in fern pans were fine and sold out fast at good prices.

JACKSONVILLE, ILL.—Joseph Heil reports Christmas sales about twenty-five per cent ahead of last year; roses and violets short, carnations plentiful, prices about as a year ago, qualities better. Red carnations the item most in demand. No increase in the sale of plants.

LACROSSE, WIS.—Christmas trade was about as last year, with not enough cut flowers. Qualities were good, except roses, but everyone wanted carnations, especially red; no call for bulbous stock. Plant sales showed no increase, some establishments reporting a decrease.

LEXINGTON, KY.—There was a twenty-five per cent increase in holiday sales, carnations and Beauties extra fine, prices reasonable, sufficient stock and an over-supply of bulbous material. Honaker reports good increase in plant sales and that Lorraine begonias made a big hit.

ADRIAN, MICH.—Christmas trade opened late, but prices were a little ahead of last year and the total of sales were practically the same. There was enough stock and qualities were good. Nathan Smith & Son say there was increased call for carnations and azaleas.

DAYTON, O.—There was a shortage of all cut flowers, except bulbous stock, for trade increased twenty per cent. Conditions were about as usual at Christmas. Carnations, especially scarlet, were called for. J. B. Heiss noted a brisk business on cheap flowering plants, with few in market.

MITCHELL, S. D.—S. D. Newbury reports on Christmas trade as follows; Sales increased forty per cent, prices from ten to twenty-five per cent; plenty of stock and little sale for bulbous material;

CARNATION HARLOWARDEN.

A BENCH OF CARNATION HARLOWARDEN AT THE ESTABLISHMENT OF THE CHICAGO CARNATION CO., JOLIET, ILL.

(The girl whose head is seen among the flowers is standing erect, walking on the bench.)

roses soft; a decided falling off in the sale of bouquet green and increased call for holly.

DULUTH, MINN.—John K. Richter says stock was good and in quantity to double last year's sales at the same prices. Big supply of bulbous material and little call. Less sale for Beauties. Violets in big demand. Decrease in all plant sales. A blizzard interfered with business December 24.

BAY CITY, MICH.—Christmas trade was fully up to last year. Boehringer Brothers say that at prevailing prices they had enough stock for everybody; little call for bulbous stock. Their own seedling carnations led their sales. Good demand for Gloire de Lorraine begonias and holly.

ELIZABETH, N. J.—Prices were slightly higher and sales a little greater than at Christmas in 1901. Stock was short, but there is little sale for bulbous material. John White says that it seems impossible to get enough carnations, larger supplies but a shortage every Christmas.

ATCHISON, KAN.—Prices were ten per cent higher than a year ago and sales increased rather more than that. Except on bulbous stock, supplies were far short of the demand. There was big call for red carnations. Mangelsdorf Brothers

report increased sale for decorative plants and say solamums were in great demand.

ST. JOSEPH, MO.—There was a slight increase in Christmas business, prices being a little stiffer. Roses were in adequate supply but carnations and violets short. L. J. Stuppy notes a steadily increasing holiday call for carnations and Boston ferns. Bulbous stock was all used up.

DAVENPORT, IA.—J. T. Temple reports a slight increase in prices and in the total of Christmas sales; roses short, carnations equal to demand, no violets; no call for bulbous stock; marked popularity of poinsettias. Cyclamens and Lorraine begonias were wanted. Severe cold made delivery difficult.

POUGHKEEPSIE, N. Y.—Lynch's report marked increase in Christmas call for Beauties, violets and Lawson carnations. Tea roses were equal to demands. Sales increased ten per cent and prices were better than last year. Plant sales decreased. Holly and Christmas bells were wanted.

FORT WORTH, TEX.—Baker Brothers found Christmas business half again as heavy as last year. Some roses left but not enough carnations or violets; slow sale for bulbous stock. The noticeable increase was in the call for carnations

and blooming plants; decreased sale for decorative plants.

MADISON, WIS.—Christmas sales totaled ten per cent above last year, with retail prices about as then. Roses were scarce and soft, carnations good and equal to an increased demand. Victor Wayman says the holiday call for palms is decreasing very much. His best seller was cyclamens in 4-inch pots.

PORTLAND, ORE.—Prices were ten per cent above last year and total sales increased thirty per cent. Roses were plentiful but carnations and violets were scarce, bulbous stock equal to demand. Martin & Forbes note that the trade was easily handled, more good buyers and not so many "pricing."

HOLYOKE, MASS.—Prices were better than in 1901; enough roses and carnations; violets scarce; plenty of bulbous stock and demand good. Qualities better than last year. E. H. Howland says the call was for Lawson and fancy carnations. Plant trade about as last year, call wholly for blooming stock.

BUTTE, MONT.—The Christmas sales increased thirty per cent, Law Brothers accounting for it by the higher prices, supply being very short except on bulbous stock, for which sales were slow. Qualities were much better than a year ago. There was good call for flowering

plants and few available. The demand for holly and greens exceeded all previous records.

FALL RIVER, MASS.—Stock was scarce but prices were higher and sales went ahead of Christmas 1901. Qualities not up to the mark. Plenty of bulbous stock and slow sale. Every one wanted red. Azaleas sold well. C. Warburton says Lorraine begonias moved slowly. Increased call for green and holly.

RICHMOND, IND.—The E. G. Hill Company notes increased call for high grade stock, particularly Beauties. Sales were twenty per cent ahead of a year ago; prices about as usual; cut flowers short of demand except bulbous stock; qualities poor. Usual sale for plants, principally fern pans and Lorraine begonias.

WATERBURY, CONN.—Christmas buying began early and the total sales increased twenty-five per cent. Carnations sold higher than ever before, other flowers about as a year ago. Everything except bulbous stock was under the demand. Alex. Dallas says violets were the best sellers. All plant sales increased.

KALAMAZOO, MICH.—The Dunkley Floral Company reports Christmas sales as fully seventy-five per cent ahead of 1901. Stock was under the demand, notably in Beauties and Meteors; everyone wanted high colors. Plant business was good, flowering stock being most popular. Good qualities were constantly demanded.

FARGO, N. D.—Cut stock was good and Shotwell & Grayer report an increase of twenty per cent in sales with no increase in plant trade. Supply was about equal to demand but there was little call for bulbous material. Holly and green were wanted everywhere. Delivery was difficult for the temperature was 25° to 30° below zero.

ASHEVILLE, N. C.—Trade, if different from last year, was very little less. Roses were plentiful but poor, carnations short but good and violets fine but not half enough for the very noticeably increased demand; few calls for bulbous stock. The Idlewild Floral Company noted an increased call for plants, berried subjects leading, and say more ribbon and crape paper was used than ever before.

KNOXVILLE, TENN.—There was a twenty-five per cent increase in the volume of Christmas sales, with prices about as last year. Qualities were about as usual, enough cut flowers and all good stock cleaned up. The principal increase in sales was on plants. C. W. Crouch says there was less complaint at prices than usual.

PITTSFIELD, MASS.—Sales, prices and qualities were about as last year. Carnations most in demand and scarce, also violets, other stock abundant, slow sale for bulbous flowers. Plant sales decreased. John White says customers would not purchase Begonia Gloire de Lorraine on account of "its being a poor house plant."

PAWTUCKET, R. I.—Sales were a little ahead of last year, caused by higher wholesale prices, which made retailers ask more. Jas. Nisbet says there was complaint at the charges, 8 cents wholesale being asked for first-class carnations, which is more than the trade will stand. Roses sold best but qualities were not up to standard.

BIRMINGHAM, ALA.—Wm. M. Lindsay says sales were fifty per cent ahead of 1901, with Beauties lower but other stock higher in price. Roses a little short, violets enough but too high, carnations most in demand and far short of requirements, bulbous stock also short. Increased sale on plants in bloom, azaleas leading.

NASHUA, N. H.—Christmas trade was very satisfactory, prices and sales twenty-five per cent higher than last year; plenty of fine carnations, roses, violets and Harrisii lilies. In pot plants poinsettias and Begonia Gloire de Lorraine easily in lead. Holly sold well. A. Gaedeke & Company say the cold weather made plant delivery expensive.

BINGHAMTON, N. Y.—Jos. D. Tully says the report of scarcity put prices up thirty per cent above a year ago, and the total of sales increased nearly as much, but there was enough stock of all kinds except red. Carnations were favorites, with moderate sale on azaleas and Harrisii. There was a big increase in the sale of holly and green.

KANSAS CITY, MO.—Samuel Murray noted the increased call for something fine in made up Christmas baskets of

plants, for large bunches of violets and for fancy carnations. He sold twice as many plants as a year ago. The total of sales showed an increase and stock was a little under the demand. Harlowarden carnation was a good seller.

COLORADO SPRINGS, COL.—Wm. Clark says that owing to fine weather the stock with most growers was in good shape for Christmas, the cut larger than last year, with demand less. Beauties went well but did not bring the prices of the last few years. Tea roses, carnations, violets, narcissi and hyacinths were in fair demand and brought good prices.

SPRINGFIELD, MO.—The demand was greater than a year ago but the shortage of stock kept sales down. Roses retailed at \$2.50 and carnations 50 cents to \$1 a dozen. W. A. Chalfant finds that two-thirds the customers want roses; carnations are selling more and more but the rose still leads. Bulbous flowers only sell after other stock is gone. Romans in pans sold best.

VINCENNES, IND.—Sales increased in proportion to the rise in prices as compared with last Christmas. Stock was short, except Romans and Paper Whites, for which there was little demand. Roses were sold and carnations had the call. There was decreased sale on plants. W. A. Reiman says the high prices deterred some would-be purchasers but all good stock sold.

WINONA, MINN.—Christmas prices were rather better than ever before and there was a nice increase in business. More stock could have been sold than was available. Ed. Kirchner had about 500 late chrysanthemums that sold well at \$2 and \$3 a dozen. He opened a downtown store September 1 and good advertising in the local papers brought him a big increase in trade.

CANTON, O.—There was a big increase in the sale of Christmas cut flowers, with a little shortage on roses and carnations. Qualities were good; not much sale for bulbous stock. Plant sales were about as a year ago. Charles Lindacher says that with good weather there would have been a still larger increase, as little stock was sold for cemetery use as compared with former years.

CAMDEN, N. J.—Christmas prices were about as usual but sales increased ten per cent. Carnations were plentiful but roses scarce. Violets and red roses were wanted; small supply of bulbous stock and demand fair, qualities good. There was larger sale on rubbers, Lorraine begonias and araucarias. C. W. Turnley says there was a big call for holly and metal wreaths sold well.

LAFAYETTE, IND.—Everyone wanted carnations for Christmas, especially red or odd shades, and there was a big sale on plants showing bright colors; 8-inch Boston ferns were a good seller at Dorners'. Total sales were fifteen per cent ahead of last year. Roses short and poor, carnations and violets good and about equal to demand. Bulbous stock only salable in mixed boxes.

AURORA, ILL.—Every one agrees to some increase, about ten per cent. Cut flowers not so good as usual; good prices for good stock. Plenty of roses except red; colored carnations short, white in slight surplus; practically no violets; plenty bulbous stock but no demand. Increased sale for flowering plants, because of good quality. J. M. Smely

HOUSE OF LAWSON GROWN BY R. WILL, MINNEAPOLIS, MINN.

CARNATION SUNBEAM AT WM. CLARK'S COLORADO SPRINGS, COL.

says he never could sell Romans in pots but this year fixed some up with winter berries and covered the pots and they went well, the \$1 size most salable.

MANSFIELD, O.—The Berno Floral Company says prices were twenty-five per cent higher than a year ago and sales increased in the same ratio. There was a marked decrease in the call for plants but all cut flowers were under the demand. Bulbous stock sold well, but marked increase was in call for carnations. Green wreaths, of whatever material, sold double last year's record.

SYRACUSE, N. Y.—L. E. Marquisee says Christmas demand was at least twenty-five per cent greater this year than last, notwithstanding the higher prices which prevailed. There were practically no flowering plants in the market save primulas and cinerarias. Palms and Bostons sold well, the latter in the lead. In cut flowers carnations sold at an average of \$1.50, with \$2 and \$2.50 for selected stock. Brides and Bridesmaids sold at \$3, with \$6 for specials.

UTICA, N. Y.—Wm. Mathews estimates the Christmas business here as twenty-five per cent above 1901, prices also being higher. Stock was scarce, violets especially, with qualities about as last year. There was increased call for orchids, violets and roses. Nice rubbers and Boston ferns sold well, also fern dishes well filled. Azaleas, poinsettias and Romans in pans were popular and many holly wreaths were wanted.

SAVANNAH, GA.—Christmas sales are growing every year, twenty per cent advance this time. Cut flowers were good, plenty carnations, and not so big a call as last year; roses in demand and short; Beauties sold up to \$8 a dozen and \$1.50 per dozen for 8-inch stems. Paper Whites sold well but other bulbous stock hung fire. Large palms sold well, also azaleas, Bostons and cyclamens. Unusual demand for holly. John Wolf says every call was for the best.

LONDON, ONT.—This is the way Wm. Gammage & Sons size up the Christmas trade: Sales increased twenty-five per cent; prices from ten to thirty per cent higher than last year; all stock short of the demands, roses some short, carnations very short and violets out of the question; qualities all very fine; carnations called for by everyone. Year by year increased sale for flowering plants, Lorraine begonia a good seller at fine

prices; cyclamens in 7-inch and 8-inch pots brought \$1 to \$1.50 each; increased sale for azaleas and Boston ferns; some stock frozen in delivery.

LOS ANGELES, CAL.—There was a fine advance, forty-five per cent in some stores, in Christmas sales. Prices were better than ever before. Outdoor-grown carnations which last year sold at 35 cents a dozen brought 75 cents this year. All stock was short. There was noticeable call for violets, flowering and decorative plants, holly and wreaths. A. F. Borden, manager of the Redondo Floral Company, says the necessity is for greater care in the production of a higher grade of stock.

CARNATIONS.

TEMPERATURE FOR WHITE CLOUD.

ED. AM. FLORIST:—What is the proper temperature for a house of White Cloud carnations? In a tight house in the southwest would a night temperature of 48° be about right? O. & S.

Better go 2° higher for White Cloud, as it has some inclination to split its calyx in many soils and 48° might help this trouble along. To go over 50° will weaken the grand stem of this variety and while the flowers might be pushed

along faster with a higher temperature, one will lose in the value of the flower and stem. ALBERT M. HERR.

CARNATIONS IN COLORADO.

The accompanying illustrations show two carnation houses at the establishment of William Clark, of Colorado Springs, Colo. The photographs were taken on December 21 and show a fine crop for the Christmas trade. One house is planted almost entirely with Sunbeam and the other with Norway and Bon Homme Richard.

AVERAGE CUT FROM CARNATIONS.

ED. AM. FLORIST:—Having never grown carnations until this year and having good luck with the few I am growing, I have built three more houses for next year, which will take about 4,700 plants, such varieties as Lawson, Marquis, Crane, White Cloud, Peru, Roosevelt and Bradt. I would like to know what the average cut per day for the whole season ought to be when grown well?

G. W. D.

I believe it to be impossible to make a certain estimate of the daily average cut. The main thing is to make the plants produce blooms of a quality good enough to command a ready sale during the season, from November 1 to May 1. The varieties mentioned should produce during that time sixteen to twenty first-class blooms per plant.

C. W. JOHNSON.

NOTES ON SEASONABLE TREATMENT.

After January 1 we always look for settled cold weather and an increasing amount of sunshine. A steady, hard fire at night and plenty of sunshine during the day are the ideal conditions in which to grow carnations and we never fail to see the plants respond to them. The real springtime of the year in the greenhouse dates from January 1, and while outdoor life enjoys the balmy air of May, greenhouse plants are well on in their summer.

While the plants send up new shoots and mature their flowers more quickly the roots will be searching the soil for more plant food and feeding may be started in earnest. Where a good system of manure watering has been installed, in the shape of a tank and a separate set of pipes, this is the ideal way to keep the

NORWAY AND BON HOMME RICHARD AT WM. CLARK'S. COLORADO SPRINGS, COL.

plants supplied with the extra fertilizers they need. A good watering of liquid manure may be given once a week from now on. A half bushel of fresh cow manure to a barrel of water, if allowed to soak for two days, will be found strong enough. To this may also, with safety, be added two quarts of bone and blood to a barrel of water. We do not use chemical fertilizers and therefore do not recommend them. However, where animal manure is scarce and difficult to obtain and chemicals have been successfully used it would be folly to discontinue. Soot and wood ashes we always add to the soil by top-dressing, at the rate of a bushel to 1,000 square feet of bench surface. Soot heightens the color of the flower and wood ashes strengthen the stems. Besides the manure water above recommended, these two materials may be used alternately, every two weeks; that is, use each once a month.

When the slow process of applying manure water with cans is the only way, it would be best to discontinue its use and feed by top-dressing. We find that carnations can be grown just as well by the latter method of feeding. We find sheep manure to be the best to use for this purpose. It contains about the same fertilizing elements as cow manure, only in a more concentrated form. It must be old and well rotted before use. It pays to run it through a half-inch sieve. This puts it into a shape in which it is easily handled and washed into the soil. Applied at the rate of a half cubic yard to a house 20x150 feet will be just right. We refer to that brand of sheep manure that is taken from the cars and sheep pens and goes through no process but rotting, the same as cow manure. Those brands that are advertised in the trade papers are much stronger and must be more moderately used. Using this once in six weeks from now on will be just right, and in addition we use bone and blood, wood ashes and soot alternately as above recommended. Use these three materials at the rate recommended before, a bushel to 1,000 square feet of bench surface. By using these four fertilizers in rotation, and in addition about May 1 a good mulching of rotten horse manure, to hold the moisture in the soil, you will keep up as good a quality of cut flowers as with the manure water.

With the hard firing that you will be doing from now on the soil must be carefully watched for dry spots. There will be scarcely a day when it will not be necessary to touch up the dry places with the hose. We aim to get all parts of the house in about the same condition of dryness, and then give a good soaking. Syringing should also be attended to once a week.

While the plants are growing fast they will need an abundance of fresh air, so this important item must not be neglected. Air is not admitted simply to cool off the temperature. Every particle of air in the house should be completely changed every twenty-four hours. This does not imply that the ventilators should be open every day for just so long. Conditions differ. On a cold day, with a strong wind blowing, and if the house is not very tight, little or no air need be admitted at the ventilators, while on a calm day the ventilators may often be wide open with no steam on. Avoid opening the ventilators wide suddenly. They should be raised gradually as the house warms up, and lowered the same way as it cools down in the afternoon.

Fumigate regularly once a week with

tobacco smoke. If the plants have been kept free from aphids from the beginning of the season, a light smoke at each fumigating will be sufficient. Very heavy smoke will fade the blooms of the colored varieties. Cut the flowers quite closely before smoking and leave them without cutting the next day. The flowers take up some of the odor of tobacco, but if left on for thirty-six hours afterwards they will have passed it off into the atmosphere again.

Cuttings in the sand should be carefully watched. If in the same house with blooming carnations the draught resulting from free ventilation must be offset by the judicious use of water. In the earlier stage of their career in the sand they may be kept quite wet, but from the beginning of the third week on until they are thoroughly rooted water at the sand should be gradually diminished. Sprinkling with a fine rose that delivers the water in very small drops that dry up quickly is much better than to use a coarse spray and be caught with the cuttings wet at night. J.

Notes and Comments.

"Now let us all pull together for a prosperous and happy New Year." Yes, let's, and so say we all of us!

Carnations for the Philadelphia Florists' Club should reach Horticultural Hall not later than Tuesday afternoon, January 6. David Rust has agreed to take care of them upon arrival. They may be forwarded addressed to Mr. Rust, Florists' Club Rooms, Horticultural Hall, Broad street, Philadelphia. Quite an interesting collection is expected and there will be room for all.

Respecting sports of chrysanthemums again, Elmer D. Smith's very interesting article on the subject in a recent number of this journal is instructive, and according to that account chrysanthemums under certain conditions are quite liable to vary in form, which is believed, but so far as his experience and observation have gone no fixed sport in form has been secured. When Mr. Smith speaks or writes he always says something worth listening to, for there is no other person who is in closer touch with the queen of autumn than he; but I yet believe that the time will come when a fixed sport in form among chrysanthemums will be a reality in America as well as it is in Great Britain, as it will be remembered in quoting from Prof. Hanslow's paper a true anemone sport occurred from the reflexed variety King of Crimson and called Mrs. R. A. Mudie.

The double form of *Gypsophila paniculata* ought to be a good thing as a hardy herbaceous plant for cutting in summer for mixing among other flowers, but hardly in the winter season. The *gypsophila* may force readily. I have not tried it, nor would I make the attempt. It would not be so easily managed as is *stevia*, and the difference in its favor as to grace, which it does possess, would hardly compensate for the difference in cost of production. Here is where a little "nature study" would be a help to our friend of the "Sprigs From the Spice Bush." As to the government, it should be "of the people, for the people and by the people," and if it is not, it is the people's own fault. As a general rule, those people who have the most to say against a government are those who will not take the time or the trouble to make an effort to effect corrections.

In looking over the several committees' reports of the Chrysanthemum Society of

America which are on file I find that Mrs. Perrin was not the only variety which was honored by a full score of 100, for Western King was so honored. It was exhibited before all five committees, and the results are as follows: New York, 85; Cincinnati, 87; Chicago, 94; Philadelphia, 95, and Boston 100. If I remember aright this variety, away from home, proved hard to grow. Its possessors must have had it in good quantity and had confidence in its quality to have sent it to all the committees, and it also proved to be a good shipper, which is one of the very essential points in a commercial variety. *Violescent* was also exhibited before the five committees and scored high enough before all, excepting Chicago, where 83 was the number of points awarded; New York, 85; Cincinnati, 90; Boston, 91, and Philadelphia, 96.

Col. D. Appleton, which is still up front as a commercial and an exhibition variety, has the distinguished honor of having been exhibited three years in succession before plants of it were offered for sale. In the year 1897 at New York it scored only 66. Think of it in the light of later developments! In the following year 92 points were awarded by the New York committee, and in 1899 the Philadelphia and Boston committees each awarded 91, and Chicago 95. It does not appear to have been exhibited before the New York committee in the latter year, presumably because it had been before that committee the two years before. Appleton was exhibited by J. R. McDonald in 1897-8 and by John Marshall in 1899 and disseminated later by F. R. Pierson Company.

The *peonia* association appears to be meeting with much encouragement, as it deserves to be. There will be little or no necessity of preparing long essays on its cultivation, as this plant is very well able to take care of itself if it has half a chance. The tree *peonia*, however, may require some special treatment. What magnificent blooms these newer imported Japanese varieties produce, but great care has to be exercised for some years after they are planted in America to watch the suckers which spring from the base of the stock upon which the "Japs" graft the better varieties. If great care is not taken and vigilant watchfulness is not pursued the stock will run away with the more choice varieties. There ought to be some better way of increasing the stock of a given variety than to use the one in general use by the Japanese, else the people in America who have selected something extra fine when in bloom, in a few years will find only a purple variety with single flowers where a gorgeous flower of eight to ten inches across had been before. The herbaceous varieties are much the best for cut flowers. The tree varieties, grand though they are, are hardly suitable for commercial cut flowers. E. L.

WHITE MARSH, MD.—Richard Vincent, Jr., read a paper on "Trucking in the Past and Prospects for the Future" before the Maryland Horticultural Society December 16.

GIBBSBORO, N. J.—One of the features of the John Lucas & Company business is the annual convention of its salesmen and officials from all over the United States, held December 15-20, in 1902. The sellers all reported a prosperous year, with a larger demand than ever before, and bright prospects for 1903. They do a large trade with greenhouse owners.

Boston.

REVIEW OF THE CHRISTMAS MARKET.—ALL RECORDS BROKEN.—TREMENDOUS PLANT TRADE BUT ALL CUT FLOWERS SOLD.—SELLERS MAKE THE PRICES.—MUCH SALTED STOCK GIVES RISE TO REPROACH.—BIG HOLLY TRADE BUT THE DEALERS LOSE.—A VARIETY OF LOCAL AND TRADE DOINGS OF VARYING INTEREST.

As briefly stated in our notes of last week, Christmas trade in Boston surpassed all previous records. The plant trade, especially, took a mighty spurt and gave the cut flower specialty a close run for precedence, although the cut flower trade held its own well and did not seem to suffer in the least. The younger element in the retail trade has broken loose from the peculiar conservatism as to plant adornment which has prevailed here hitherto and a reasonable use of bright-colored receptacles and ribbon gave to the florists' windows more of the gaiety and warmth appropriate to the great festival than Boston has ever seen before. A great many azaleas were sold at good prices, this being perhaps the leading plant in popularity. There was an unusual proportion, however, of very sparsely-flowered specimens, and these were left unsold. Ardisias also enjoyed a big demand and solanums sold well. For small gifts Chinese primroses were a favorite.

The cut flower trade was eminently satisfactory to the retail people. It is not their custom now to assume any great risk by carrying a large supply of flowers, but simply to call upon the wholesalers from hour to hour as occasion requires. They held the wholesalers close to the chalk-line as to quality and freshness of stock and had things generally their own way excepting in the matter of price, over which they were powerless, for once, to exercise any control, there being no surplus of acceptable material. The effect of the prevailing conditions was the sale at good prices of practically all first-class stock that came to the market or the wholesale dealers. It also effected the sale of considerable stock that appeared all right at time of purchase, but disclosed its antediluvian complexion soon thereafter and was responsible for much unquotable language over the telephone and elsewhere, but the major portion of the inferior material that came in—and there was a big lot of it—went just for what it was worth and that isn't much.

How best to prepare for and handle the special demand that is sure to materialize at Christmas is a difficult problem. The wholesaler is overwhelmed with calls for extraordinary quantities of material from parties who are never heard from except at such times. They all want about the same things and they insist that all shall be fresh, the aggregate demand being many times the actual daily product of the growers. In the effort to satisfy this requisition two courses are open. One is to induce an abnormal crop by extra forcing directly before Christmas; the other is to hoard up the cut bloom for several days. The first, frequently indulged in by carnation growers, injures the plants to an extent far beyond the advantage gained and discredits the stock and those who handle it by making it soft and quickly perishable; the latter, while permissible to a reasonable extent, is usually so indiscreetly overdone that many out-of-town buyers refuse to take orders in preference to sending to the city markets for the goods and taking the risk of stale stock. The

quantities of offensive, discolored roses and collapsing carnations that were in evidence around the wholesale marts for a day or two preceding Christmas was an object lesson for observant students of the holiday problem.

The sale of violets was heavy, the supply being inadequate, and prices were paid for violets this time that amazed conservative Bostonians. It is evident that the day of small "mixed boxes" is past. A buyer is no longer satisfied to invest in a gift comprising a few choice buds and carnations bolstered up on a filling of stevia, bits of hyacinth, greens and other odd rubbish, but is willing to pay the price for a bunch of fresh violets or a dozen choice carnations neatly encased in a pretty box, and this kind of a gift is much more appreciated.

The holly question, which gave so much solicitude to dealers beforehand, solved itself in a manner that left some very sore spots. One wholesaler who

Joseph Mahan.

handles many hundred cases of holly and who had made extraordinary efforts to secure a full supply of good material, on being asked as to the outcome, replied with warmth, "I've been buncoed, slugged, sand-bagged—everything has been done to me—and it's a wonder I'm alive." There was no scarcity of holly, there was much more sent to this market than it could reasonably consume. There was plenty of good holly, but it was so mixed up with waste stuff as to lose much of its value and it was impossible to know the character of any single case without opening and inspecting it. The holly shippers must do the business of selecting, packing, caring for and shipping holly if they expect to find a reliable or responsive market here in future. The cases in which the holly is packed are also so carelessly made that few of them arrive intact.

Joseph Mahan, one of Thos. F. Galvin's most capable employes, died of pneumonia on Thursday, December 25. He was an all-round good fellow and exceedingly popular with everyone who came in contact with him during the twenty years he was connected with the flower business. He served some years ago with W. J. Stewart, Welch Brothers and G. A. Sutherland, but most of the

time he has been in the employ of Mr. Galvin. The funeral on Saturday was attended by many of his former associates, including five of the Galvin clerks. His age was 33. Tom. Welch, another of the Galvin clerks, is dangerously ill. Mr. Addison, also, who is employed at Mrs. Rogers' store on Summer street, has been on the sick list for two weeks. Fred. S. Davis, president of the G. and F. Club, has been laid up for several days and Mrs. Lawrence Cotter and Mrs. Wm. Martin are both reported as seriously ill.

The feeling here against the high-handed action of the express companies in almost doubling their freight charges on cut flowers is very bitter. If insisted upon this must work great injury to the shipping trade, which is so essential a factor in the distribution of the immense product seeking a market in this city. The claim of the companies that the risks assumed in carrying perishable goods make an extra tariff necessary is not borne out by the facts, as of all the frozen, belated or otherwise badly handled lots of flowers ever carried to or from this market there is, so far, no case on record where the express companies have made good for the loss.

On Tuesday, December 30, Fred. L. Harris passed his eightieth birthday. That the state of his health would not permit him to observe it in the society of his friends will be universally deplored and thousands of those who love this grand old man of American horticulture will unite in a sincere wish that his health may be restored and his life spared to be enjoyed for years to come.

The greenhouses of F. W. Fletcher, at Auburndale, were frozen solid last Saturday night, no fuel being available except green wood. Successive disasters have caused Mr. Fletcher to determine to settle up and discontinue for the present.

Macklin Brothers, of Cambridge, are to open a branch in a new store which is being erected at the corner of Massachusetts avenue and Upland road.

Detroit.

HOLIDAYS BRING BIG BUSINESS.—PLANT SALES RELIEVE THE PRESSURE ON CUT STOCK.—GOOD TRADE ON EVERY ITEM.

Christmas will long be remembered as an event attended with most satisfactory trade results, for such is the report of most local dealers. Anticipating abnormally high prices on cut flowers, most retailers provided a nice stock of flowering plants, ferns and palms, and prepared many baskets of assorted plants, further ornamented with appropriate ribbons, all of which met with ready sale, demonstrating more forcibly than ever the increasing popularity of these gifts of the more permanent character. As a consequence the supply of carnations, violets and roses was about equal to the demand, although the cut of most local growers was diminished by the almost constant cloudy days preceding Christmas. Prices prevailing were about the same as a year ago and very few complaints in that respect were heard.

Contrary to the general expectations, good holly wreaths and ground pine sold well; even Christmas trees were sought for at the floral stores. The weather on Christmas day was severely cold, causing much difficulty in the delivery of goods.

Trade for New Year's day was stimulated by an extraordinary demand for violets and with that exception no special features were noted. J. F. S.

A SCREEN OF HYBRID SWEETBRIER ROSES AND A GLIMPSE OF LAWN.

A Rose Screen.

The hybrid sweetbrier roses, used in this manner, are highly satisfactory. When the canes, twelve feet in length, bend over with the weight of the many pink blooms, the effect, as you come upon it unexpectedly, is very pleasing. After the flowers have passed the seeds give some color and the foliage is quite durable. For this reason it is the most satisfactory rose where such a width of permanent screen is desired. There is a Colorado blue spruce in front of it and the pyramid at left of the center in the illustration is a red cedar. C. B. W.

New York.

REVIEW OF THE CHRISTMAS TRADE.—PLANT SALES UNPRECEDENTED.—GOOD BUSINESS ON EXTRA QUALITY CUT FLOWERS.—RETAILERS' REPORTS VARY AS TO ITEMS IN DEMAND.—NEWSPAPER DOES A SERVICE.—VARIOUS NOTES.

The results of the Christmas wholesale cut flower trade, as tabulated from available reports, indicates that the supply of roses was not proportionately as heavy as that of last year, except in the case of American Beauty, to which a large amount of new glass has been devoted. Quite a few of the latter were left over and some of the retailers overbought. On medium grades of teas there was a shortage and the need of a \$6 or \$8 grade was keenly felt. In carnations, as in roses, the preponderance of call was for reds. Next in order came pink, followed by crimson, white and variegated. There was a large supply of Prosperity and a wide range of prices, the color not being particularly in demand. Violets varied greatly as to values, there being a heavy stock of medium grade

flowers. In consequence of the stormy weather on Christmas morning violet sales suffered; with bright weather all might have been sold. The supply of bulbous flowers was, as usual, cumbrous, with light sales. Poinsettias showed a bad surplus and green material such as asparagus and smilax suffered similarly, mignonette also going slowly. The out-of-town demand was comparatively small, and this fact coupled with the left-over stock of special Beauties, fancy carnations and violets worried the wholesalers not a little.

The leading retailers report variously on detailed results, some recording good demand for items reported by others as unsalable. All agree that outside of the automobile baskets mentioned in our last, nothing of a novel character was in evidence and flowers were sold almost exclusively loose in boxes. They all emphasize the indispensability of high grade material and they protest against stock held in reserve until jaded and assert that there is no difficulty in getting a high price if the goods are only first-class. Beauty, Liberty, Meteor and Bridesmaid roses, carnations in bright colors, violets, poinsettias, lilies and orchids are all credited with a good sale. Holly made an excellent run, as did also red immortelle goods, but wreaths fell off from the record.

The story of the plant trade as given by the retailers is very encouraging. Poinsettias low-grown in pans, Lorraine begonias in hanging baskets, ardisias and red-berried aucubas are universally approved. On oranges, heathers, cyclamens and azaleas reports conflict, azaleas and orange trees having been manifestly overdone. Holly trees, bougainvilleas and daisies were generally unsatisfactory. A better appreciation of red-foliaged dra-

cernas, araucarias and small bright-leaved plants for basket combinations was generally noted and those who had cattleyas to sell made the price as they pleased. Cypripediums and camellias also caught on. Ribbons were used to the entire exclusion of the erape paper and there was a marked call for better qualities in ribbon as well as for a finer grade of bright colored baskets for pot covers, etc.

Since Christmas there has come with the soft weather a sudden and unusually severe drop in prices of cut flowers. Beauties took a precipitate fall from \$12 to \$6 a dozen for the best, and other flowers have suffered in a like degree as to value. At present the market is in a state of demoralization, which the limited New Year's demand can do but little to regulate. Present prospects do not indicate a proper relation between the price of coal and the price of flowers for the balance of the season.

Although the picture was excessively overdrawn, yet it was a valuable service that the New York Herald, on Sunday, December 14, rendered to the flower trade in devoting an entire page, illustrated in two colors, in which it was represented that roses and other flowers are now superseding the common Christmas "greens" for swell holiday decorations. Curtains of evergreen and wild smilax, once considered a pleasing feature of holiday trimming, it said, have been supplanted by deep fringes of purple orchids, roses or violets. Seeing that the Herald's informant omitted the usual scare-head about the extravagant prices people would have to pay for flowers at Christmas and had the good sense to refrain from the ostentatious brag that sometimes finds its way into the floral news columns of the New York dailies

we can conscientiously commend the *Herald's* enterprise, more especially as there is considerable truth in the suggestion that the aristocratic element in a city like New York will not long be content to limit their Christmas decorations to any material that is easily within the reach of the general public. It is, however, too much to expect that these people will forsake entirely the time-honored holly and mistletoe with all the legendary romance associated therewith.

The English holly, which is and always must be expensive as compared with the native brand, fills the bill nicely for those willing and able to pay for something superior. Every year sees heavier importations and larger sales of this elegant material. Sales of it in tree form have been disappointingly slow this year. The cut sprays have, however, been largely used. Beautiful banks for mantel and other decorations are made of it by covering a board with moss, into which the holly branches are thrust, projecting high enough to hide a row of fiber vases which are also fastened to the board and are filled at the proper time with poinsettias, lilies or other showy cut bloom.

This inclination to introduce cut flowers in one manner or another into every form of decorative work is one of the most auspicious signs, from the standpoint of the cut flower grower. The aggressive prominence of late of the plant industry at Christmas, Easter and other floral holidays, is qualified by the the penchant for marked color effects which prompts the artist to combine masses of cut flowers with fancy plant arrangements in baskets and jardinières, a practice which is very general where high-class customers are served in New York.

The action of the express companies in increasing their charges for transporting flowers is looked upon here as a gross injustice. It is confined as yet to the three big trunk companies, Adams, American and National, which practically constitute a trust controlling the greater part of the country. A petition has been presented asking for a restoration of ordinary merchandise rates, and if it is not acceded to the matter will be brought to the attention of the interstate commerce commission. The legislative committee of the S. A. F., of which John N. May is chairman, is acting in concert with the representative New York and New Jersey growers.

Otto Nasher, bookkeeper for August Rolker & Sons, died on December 29, at the Presbyterian hospital, where he had been operated upon for appendicitis. He was an affable, courteous gentleman, always at his post. His age was 42 years and he has been in the employ of Messrs. Rolker for twenty-five years.

The next meeting of the Brooklyn Horticultural Society will be held at the Germania Club, Monday, January 5. Carnation convention preparations will be forwarded.

Hitchings & Company have the contract for a large range of greenhouses at South Elizabeth, N. J., for the Pennsylvania R. R.

The New York Florists' Club's dinner will take place at the St. Denis Hotel on January 31.

BUTTE, MONT.—The *Miner* of December 21 contained an illustrated page write-up of the history of floriculture in this city, with accounts of leading decorations, a large part of which was a very good advertisement of the work of O. A. C. Oehmler

Chicago.

HOLIDAY BUSINESS IS SATISFACTORY TO EVERYONE.—CHRISTMAS GOOD AND THE WEEK FOLLOWING BRINGS FINE SHIPPING DEMAND.—NEW YEAR'S CALLS ARE HEAVY.—BEAUTIES WEAKEN MORE THAN OTHER ITEMS.—QUALITIES AVERAGE LOW.—DOINGS OF THE GROWERS.—JOTTINGS HERE AND THERE.

A summing up of the holiday business finds everyone satisfied with the results achieved, although the cold wave shut off some of the late buying in down-town retail stores and left some stock unsold. Outside retailers suffered less from unfavorable weather and in general report sales up to or a little ahead of last year. The plant trade was up to expectations, good material selling out clean, but there was little seen in the way of novelties, the innovations being in the line of dainty pot covers, ribbons and other handsome accessories. Among the wholesalers the week figured up to a handsome total, particularly pleasing in view of the poor quality of the rose crop and the distressing way in which white stock hung fire. One item on which the market was overstocked was poinsettias. Never before were so many offered, and as a result a great many were left unsold after there had been a very big business in them. The scramble for Christmas roses left the market bare, but it was not long before an unsettled condition began to make itself felt. There is a period just after Christmas when local buyers do not want Beauties and they quickly began to accumulate in the hands of those who do not cater to the shipping trade. The result was that prices eased off to \$8 per dozen for long. Red roses continued far under the demand and good Brides and Bridesmaids have been scarce, for out of town demands have continued heavy all the week and for New Year's there was a call considerably in excess of what it has been in recent years, also for far more good stock than the market could supply. The result was that prices have held right along within fifteen or twenty per cent of the Christmas list. Carnations are more plentiful than roses, but there is not much good stock, a large part of the receipts, particularly Lawsons, being split, undoubtedly as the result of too heavy firing just before the holidays. Violets have come along slowly and have sold out at good prices. There is an accumulation of bulbous stock, including practically everything from callas and Harrisii to valley, Romans and Paper Whites. White stock has hung back all the past ten days, there being little funeral work and this is the season of bright colors.

J. B. Deamud is handling Harlowarden, the new bright crimson carnation of the Chicago Carnation Company which scored 94 points when exhibited in New York recently. It was a popular color for Christmas and he sold the cut for from 12 cents to 15 cents a bloom. It is a large flower and a vigorous grower. A vase of the variety is illustrated on page 830 of this issue and a bench of it is shown in the halftone on page 831.

The trade was inexpressibly shocked to hear of the tragic death, on New Year's day, of Oscar Kreitling, the West Twelfth street retailer, and brother of Walter Kreitling. Mr. Kreitling was attacked in his store by the husband of Mrs. Kreitling's sister, who was arrested and is said to have confessed the shooting. The injured man was taken to the County Hospital, where he died about eight o'clock New Year's night.

Kennicott Brothers Company is receiving from George Hopp, of Grand Rapids, some very fine blooms of his new rose, claimed to be a seedling of Bridesmaid and Mme. Caroline Testout. The color is a beautiful pink, the growth vigorous and the form and substance excellent.

Henry Pfister, head gardener at the White House, Washington, D. C., has been in the city for a few days. With the changes made at the White House the past season, the conservatories are no longer need and Mr. Pfister's term of service will expire next month.

Bentley & Company have a sport of Bride which they propose to nurse with utmost care. It is a pure pink and the flower is larger than the parent. They propose to discard Golden Gate after this season and give its place to Sunrise.

E. H. Hunt has marketed nearly 25,000 poinsettias during the holiday season. Most of them, of course, went out at Christmas, but many were sold this week, Hauswirth using nearly 1,000 in decorations the early part of the week.

With his plants in their present superb condition J. A. Budlong thinks it profitable to cut them up for young stock and he is answering inquiries to the effect that he shall have few rose cuttings this year, but quite a stock of carnations.

Wietor Brothers are still cutting very fair chrysanthemums. They are planning another big addition to their glass area this spring.

W. N. Rudd, who has been confined to his home with bronchitis the past week, is able to be out again.

The Flower Growers' Company is getting in shape to open for business Monday morning.

O. P. Bassett and Mrs. Bassett will leave early next week for a sojourn in California.

At its meeting December 27 the Gardeners' and Florists' Union gained fifty-four members.

Visitors: Chas. Knopf, representing E. T. Grave, Richmond, Ind.; L. J. Stuppy, St. Joseph, Mo.

Kansas City.

HOLIDAY BUSINESS TOTALLY ECLIPSES ALL PREVIOUS RECORDS.—STORE PEOPLE WORK FORTY-EIGHT HOURS AT A STRETCH.—PLANT SALES LARGE BUT CUT FLOWERS NOT BEHIND.

Christmas trade, in all its features, far exceeded that of last year by an average increase of probably thirty-five per cent. Greens of all sorts sold out clean. On Christmas day there was no good holly to be had. Some very fine azaleas, pans of poinsettias, Lorraine begonias, cyclamens and heathers sold quickly and commanded fancy prices. There was an unusual demand for large red immortelle wreaths in crescent form, also for purple wreaths, for cemetery purposes. The demand for cut flowers kept pace with plant sales, even though the weather was unfavorable on Wednesday and Thursday. The quality of cut roses was hardly up to the usual standard, as a result of the dark weather which prevailed for six weeks, also causing stock to come in soft and hard to hold. Carnations were somewhat better, at least the fancy varieties. Select stock of either tea roses, Beauties or carnations brought fancy prices, better than last year. That we are in the midst of an era of prosperity was shown by the manner in which the public purchased, in that there was less haggling over prices. Selections were made more quickly and customers were easily satisfied if the goods were right.

Rock's window contained a well-grown lot of Begonia Gloire de Lorraine, several white swans and some handsome red wreaths. Overhead were hung white bells trimmed in holly. He had a large stock of azaleas, poinsettias and other Christmas plants and his force of twenty people worked all night December 23 and 24 to get out orders.

Newell's two stores were well filled with a choice assortment of all kinds of blooming and foliage plants, which were well cleaned out.

Murray showed a beautiful window of fancy poinsettias surrounded by trimmed pans and boxes of Romans.

J. H. Vesey brought in a fine lot of Lorraine begonias.

Kellogg had nothing to offer on Christmas morning. W.

Philadelphia.

HOLIDAY BUSINESS ALL THAT COULD BE HANDLED.—EVERYONE HAD HIS HANDS FULL.—PLANTS AND CUT FLOWERS BOTH SOLD.—VARIOUS NOTES.

Christmas trade was quite up to the volume of previous years, there being a good sale for all kinds of stock, with possibly a little overstock of carnations as prices softened considerably on Christmas eve; \$25 per thousand would have purchased some very good stock that had previously been held for \$40 to \$50. The early shipments of the holiday stock presented a very drowsy appearance and thousands never got farther than the commission houses. It will always be this way, I suppose. The flowers would probably keep a week in the grower's cool sheds, but when a number come to be packed together in a tight box for from six to twenty-four hours, or possibly more, they will not stand it and the loss falls on the grower. Violets also had been left on the plants until all the fragrance had gone and in some instances from ten to twenty flowers in a bunch of fifty had softened and started to decay. There had been a fine demand for these flowers all through December but the growers would try for a large quantity at Christmas and lost accordingly. Prices of all stock were about the same as last season; \$2 for best double violets, \$12 to \$15 per dozen for special Beauties, \$15 to \$25 for special Brides and Bridesmaids; \$6 to \$8 for carnations.

There is heard considerable talk of plants crowding out cut flowers on account of the high prices of the latter, but I can see no difference, there being about the usual demand for both. Azaleas, cyclamens, begonias, poinsettias, oranges, ardisias and baskets of growing plants all sold as well as their quality deserved, there being very little really good stock left. Harris' red-berried aucubas sold well, as did some of the holly, but some varieties of the latter have a tendency to drop their leaves, which makes them a risky thing to handle.

The commissionmen say they cannot see that plants are crowding cut flowers at Christmas, as the demand was excellent for almost all their stock. Even the high price for top Beauties did not scare the buyers and the market was entirely bare on the morning of Christmas day. Bridesmaids were also very scarce and there were not enough to go around. Taken altogether the trade may be said to have been very satisfactory.

H. Bayersdorfer & Company say their holiday business broke the record and it was all they could do to get their orders out on time. Bells and red wreaths sold

particularly well and the demand was far from satisfied. M. Rice & Company were also much pleased with their Christmas business; in fact they have been under pressure since the season opened in the fall. Their ribbon business has been a great success.

Coal has become very scarce. Any kind is hard to get and the growers are spending many anxious moments these days. I hear of one large firm that was on its last day's supply when a fresh lot arrived.

Wm. Crawford became a partner in the business of Robert Crawford, Jr., on January 1, having withdrawn from the ribbon business of Turnbull & Crawford.

Don't forget the smoker at the club the first Tuesday in January. K.

Denver.

STORY OF THE CHRISTMAS BUSINESS.—PLANT TRADE VERY BRISK.—ALL GOOD STOCK SOLD.—WEATHER FAVORABLE.

This year's Christmas trade was fully up to previous years if not a little better. We were favored with mild, pleasant weather throughout the week, consequently deliveries were gotten off in good shape. As expected, plants took the lead and the market was well stocked. Plants ranging in price from \$3 to \$5 were mostly in favor, although a few good azaleas brought \$8, also made up baskets selling from \$5 to \$15, but we cannot say that the latter met with as much favor as in previous years. Poinsettias were plentiful and sold at \$1 and \$1.50 for single-stemmed plants, while the pans went at from \$3 to \$5. Some very fine cyclamens were offered. Boston ferns, as usual, sold well.

The supply of cut flowers was better than expected, with quality excellent and very little pickled stock. Beauties were much in demand and ran short, particularly in the longer grades. The best brought \$20 per dozen at retail. Tea roses were very fine and the supply of best grades fell short. Carnations turned up in good quantities but were about cleaned out, the best fetching \$2 a dozen. Violets were in ample supply. Valley, Romans and Paper Whites were little called for outside of mixed boxes of flowers.

Holly and greens were handled in about the same quantities as other years, with a better demand and slightly increased prices. Mistletoe was poor and not as much sold as last year. B.

Minneapolis.

CHRISTMAS BUSINESS VERY GOOD.—ADEQUATE SUPPLIES IN MOST LINES OF STOCK.—REPORTS OF RETAILERS.

There did not seem to be such a shortage as was looked for at Christmas, although the demand was great. Carnations were sufficient to meet all calls. Tea roses were not in any scarcity, but cleaned up at good prices. Liberty and Meteor were far short and sold as high as \$18 per hundred. American Beauties were much called for here, the few on hand selling for from \$2 to \$10 per dozen wholesale and as high as \$18 per dozen retail. Violets were scarce and brought \$2 per hundred. Bulbous stock was plentiful.

E. Nagel & Company report a good trade in cut flowers, better in plants, and what holly they had cleaned up at an exceedingly good price.

A few late shipments, caused by carelessness of the express companies, came in Friday and, of course, were refused.

Carl Johnson, of the Powers Mercan-

tile Company, reports that he had no idle moments and no stock to spare.

Ralph Lathom, of Donaldson & Company, said it was the same old story, sold out everything at good value.

Northrup, King & Company had a good call for greens, flowers and Christmas decorations.

R. G. Mendenhall says they cleaned out 200 azaleas, together with good trade on cut stock.

R. Wessling had a good cut of roses, which were a gold mine for him.

A. S. Swanson had good trade and plenty of decorations to see to.

C. F. R.

Worcester, Mass.

Christmas trade was fully up to our expectations but the scarcity of flowers interfered very much with the amount of business done. Flowers were short in all lines except Romans, Paper Whites and lilies, which sold well after the other stock was exhausted. Good prices were realized, Brides and Bridesmaids making from \$2 to \$6, Liberty \$4 to \$8, Beauty \$6 to \$15 retail. Carnations sold at from 75 cents to \$1.50 a dozen. Violets at \$4 a hundred and other stock at slightly increased prices. Nice azaleas, oranges, cyclamens, solanums, English holly trees, primulas and hyacinths in pans were in good supply and sold well at top-notch prices. Fancy baskets of foliage and flowering plants were also popular. Greens sold well and were practically cleaned up by Wednesday noon. The weather was cold and made delivery rather difficult.

Since Christmas business has continued to our satisfaction and many decorations are booked for the immediate future. The stock of flowers has recovered from the furious onslaughts necessary to fill Christmas orders and the supply is now equal to the demand. A. H. L.

Orange, N. J., and Vicinity.

Kershaw Clegg is once more among his friends in West Orange, having returned to his old stand lately leased by Henry Good and, in addition, rented a store at 587 Main street. Bradbury has also opened a new store, on South Orange avenue.

W. A. Manda has filled his five new houses. He has a stock of *Kuelleria macrantha* which he will offer next season as a winter bloomer as a rival to the azalea, it being hardier, more floriferous and of easier cultivation. Another effective plant shown is *Costus igneus*, a free bloomer, and a very pretty *cyripedium*, *C. media superba*, a cross between *Spiraeum* and *hirsutissimum*.

Among the commercial men reporting a satisfactory general and holiday business are George Atkinson, at Llewellyn; John McGowan, Popkin & Collins, Massman, of East Orange; Bernard Kuhn, of Lyons, and Thos. Horlicek. At Mountain Station Perry S. Watrous is making a fine cut of roses for the New York market.

Among the private gardeners all is prosperous. Malcolm MacRorie is showing some very fine Lorraine begonias. Peter Duff is strong on roses and John Hayes is demonstrating the virtues of the new house on the mountain-side with some superb Lawson and other carnations.

The indispensable J. B. Davis is always at hand when any disinterested service is required by the boys or the society and Orange is ever proud of him. S.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with Order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

An English firm now offers *Hydrangea*
Hortensia nivalis, a variegated form.

In England a variegated violet, after
the style of *Mme. Salleron* geranium,
was exhibited recently.

We are in receipt of some blooms of
very good seedling carnations, white,
light pink and dark pink varieties, from
the Swan Peterson Floral Company,
Gibson City, Ill.

ACTING on the rule adopted at the Chi-
cago meeting of the Chrysanthemum
Society of America, the officers deemed it
advisable to withhold, in the report of
the year's work, the scores of sports
exhibited, with the exception of *Yellow*
Eaton, which has been shown to three
committees, which conforms to the new
rule.

We learn from a newspaper report
from London that the supply of flowers
there for Christmas was unusually poor.
Violets, lily of the valley, "arum lilies,"
gardenias, camellias, carnations and
"eucharis lilies" are said to be the flowers
in greatest demand, and for these high
prices were demanded. Holly, however,
is said to be in superb condition. It is
interesting to learn from the same
authority that mistletoe for the London
market is supplied chiefly from the north
of France and from Hereford and other
English apple producing counties, mis-
tletoe from the oak being now very rare.

Collector Doesn't Return.

ED. AM. FLORIST:—A young man giving
his name as Charles Deuvall, claiming to
have worked for the Gasser Company, of
Cleveland, and Mr. Miller, of Toronto,
the raiser of *Timothy Eaton* chrysanthemum,
made a few small collections for me and left
without turning in any money. He was caught
ransacking his boarding house, but was not
detained. He is about 21 years of age, sandy
complexion, blue eyes, about five feet eight
inches tall, weight 145 to 150 pounds,
speaks with a Canadian accent and is a
heavy cigarette smoker.

E. Toledo, O. E. A. KUHNKE.

The Price of Glass.

On December 22, 1902, a new scale of
window glass prices went into effect. On
16x24 A double thick the list is now
\$49.50. On less than car lots, f. o. b.
Chicago, H. M. Hooker Co., are quoting
discounts of 90 and 10 per cent. On car
lots, f. o. b. factory, Sprague Smith Co.
quote discounts of 90, 20 and 21½ per
cent and John Lucas & Co. quote the

same discounts f. o. b. Philadelphia,
Pittsburg or Muncie, Ind., and Casper
Limbach quotes \$4.50 per box f. o. b.
Pittsburg in 100 box lots and \$4.58 per
box in car lots f. o. b. Chicago. Freight
from factory to Chicago averages 11
cents to 12 cents. Some jobbers say
greenhouse sizes are being delivered
slowly, few small sizes being cut. Sharp,
Partridge & Company report a stock of
two or three cars of 16x24 on hand in
Chicago, carried over from last fire.

The Paeonia Idea.

ED. AM. FLORIST:—It looks to an humble
on-looker as though it was a wise move
on the part of the national institution,
the S. A. F., to espouse the cause of the
paeonia and President Burton did well
and is to be commended for drawing
attention to this valuable plant in his
address at the convention at Asheville.
There is no flowering plant in existence
more worthy than the *paeonia* of the
fostering care of that society, not that
the plant itself needs any fostering care
other than to be planted in an open situ-
ation in any ordinary good soil, where
it may get lots of light and air. When
located in that sort of a position it will
go on developing and blooming, whether
an organization for its benefit is in exist-
ence or not, for it will stand more neglect,
yet give a more creditable account of
itself, than any other hardy flowering
plant ever grown. It is very grateful for
any little intelligent attention as to
manure that may be given it, and will
respond nobly for such attention. It will
do well in almost any position except it
dislikes to be buried under shrubbery or
planted too close to big trees.

Its nomenclature, however, needs well
directed, intelligent effort to straighten
out. There is hardly any class of plants
become so hopelessly mixed as to its cor-
rect naming, and that, I take it, is the
main object of the association and it is
due to us all to aid all in our power to
help the good work along. E. H.

Exorbitant Express Rates.

ED. AM. FLORIST:—The action of the
express companies in increasing the rate
on cut flowers fifty per cent calls for a
vigorous protest. A meeting of a num-
ber of New York and New Jersey growers
was held recently in New York to confer
as to the best method of protesting
against this arbitrary and unjust
advance. Cut flowers have always been
classed as first-class and have paid the
highest rates. This makes the action of
the companies especially outrageous and
imposes altogether too much of a burden
upon the shippers. It would seem that
the managers of the express companies
have acted without due consideration of
the case, and it is thought that if the
florists of the country will wake up and
vigorously and unitedly protest against
this action the old rates will be restored.

It is believed that the best way to
accomplish results will be for every inter-
ested party, grower, retailer and com-
missionman to write at once to the
superintendent of his express company,
protesting against the advanced rate.
Every florists' club in the country should,
at its next meeting, pass strong resolu-
tions condemning the advance and
requesting that the old rate be restored.
Copies of these resolutions should at once
be sent to the superintendents of the
various express companies and to John
N. May, 55 and 57 West Twenty-sixth
street, New York city.

Individuals should also send protests
to Mr. May, as well as to the companies.
In this way a mass of protests can be
gathered that will be used where they
will have the most force. This is a mat-
ter of great importance to the shippers of
flowers. The increase in rates will cost
the florists of this country thousands of
dollars annually. Don't delay. Write
your protests at once and mail as
requested.

It should be remembered that almost
all growers deliver their goods at the
railroad stations, and in many cases
load them on the cars, saving the com-
pany the cost of collecting and handling
them at the point of shipment. This
business is regular, everyday in the year,
and it would seem should have an espe-
cially low rate instead of the outrage-
ously high rate which rules at present.
It rests with you, florists. Protest!
Protest! GEO. W. HILLMAN.

St. Louis World's Fair.

Under the classification of trees, shrubs,
ornamental plants, flowers, etc., there
will be installed in the Horticulture pal-
ace and on the grounds of the Universal
Exposition of St. Louis in 1904, displays
as follows:

TREES, SHRUBS PLANTS AND FLOWERS.

Ornamental standard trees, seedlings or grafted.
Ornamental shrubs, deciduous or evergreen.
Plants for the park or for the garden.
Herbaceous plants grown in open ground;
dahlia, chrysanthemums, etc.
Masses and baskets of flowers. Bouquets of
natural flowers.

PLANTS OF THE CONSERVATORY.

Specimens of culture used in different countries
for a color for ornament.
Forced culture of vegetables and fruits: Specimens
of products.

Specimens and varieties cultivated for orna-
ment: Plants from houses of moderate tempera-
ture. Plants from hot houses.

SEEDS AND PLANTS FOR GARDEN AND NURSERIES.
Collection of seeds of vegetables, plants and
trees.

Young trees, seedlings or grafted. Plants and
flowers grown for perfumes or extracts.

GARDEN APPLIANCES AND METHODS.

Tools for gardeners and nurserymen: Spades,
picks, hoes, lawn mowers, garden rollers. Tools
for pruning, grafting, gathering, packing and
transporting produce; pruning and grafting
knives, ladders. Watering apparatus.

Apparatus and objects for ornamenting gar-
dens: Vases, pots, chairs, seats, fountains, labels,
etc.

Glass houses and their accessories: Heating
apparatus, matings, etc.

Aquariums, ferneries, etc., for use in dwellings.
Landscape architecture: Plans, drawings, mod-
els, books, pictures, etc.

SPACE AND POWER FREE.

There will be no charge for space occupied by
exhibits, and a limited amount of power for the
operation of mechanical devices to illustrate pro-
cesses of special interest will be furnished to
exhibitors without charge.

The Prices of Plants.

ED. AM. FLORIST:—Commenting upon
W. L. Smith's letter with regard to the
price of plants, would say in my opinion
the only solution of the difficulty is for
the party complaining to cut off the
unprofitable ends of his business and
substitute, if he can, more profitable
lines. PATRICK O'MARA.

ED. AM. FLORIST:—With reference to
the prices on plants, as set forth by W.
L. Smith, will say that the only remedy
I can see is to follow the tendency of the
times and consolidate. Do away with
competition and it will be an easy
matter to set a price on our commodity
that will be fit to meet the requirements
of the producer and, furthermore, a
better profit can be made, even if prices
were not raised, as a great deal of

expense could be eliminated if the florists' business was properly systematized and organized.

Organization and system are the keys to profit. Knowingly no man sells his goods at a loss, but I believe that a large proportion of the pot plants grown are sold without a fair profit, or at a loss to the producer, especially by the small grower, through the ignorance of cost of production and his prices being forced down by ignorant competition.

It is not the competition of the man whose business is conducted under business principles, and who knows at all times what each department of his business costs and pays him, that need be feared, but the fellow who is plodding along in the dark and who, after he has reached the end of his rope, takes advantage of the bankruptcy laws and then starts anew in his tour of destruction, doing all that he can to pull down with him men who deserve a better fate.

The remedy prescribed may seem rather strong but a serious malady needs drastic measures and I can assure you that if properly applied the cure will be quick and simple. LOUIS WITTBOLD.

ED. AM. FLORIST:—This sentiment of Mr. Smith's ought to awaken a hearty and unanimous response throughout the whole trade. The writer recalls that in 1887 W. F. Gullett, of our firm, but then temporarily in the employ of J. C. Vaughan, went to the establishment of The Garfield Park Rose Company, on West Madison street, Chicago, (John E. Bohan, superintendent) and bought for us about 800 rose plants of such sorts as were then the standard kinds for forcing. The price paid was \$6 per hundred for 2-inch pot stock. Nice, clean plants they were, too, and well worth the money. We believe this establishment was then the leading plant for exclusive rose growing in this part of the country, but we may be in error. This was our first venture into growing roses for cut flowers, and for this reason we have mentioned particulars. For some years following we bought rose plants, always paying \$5 to \$6 for 2½-inch and \$7 to \$8 for 3-inch. Compare these prices with the advertisements we shall presently see, unless there is a reform, offering roses at \$20 per 1,000 for 2-inch and \$35 for 3-inch.

The florists down here in the country think they could point out the ranges of glass responsible for this state of affairs. Are these gentlemen satisfied with that kind of prices for their plants? If so, we fear that no number of columns in your esteemed journal will avail anything. But from long observation we are convinced that the fault is chiefly in the west. We notice that the leading eastern growers hold their rose plants at approximately \$4 to \$5 per hundred for 2½-inch and \$6 to \$7 for 3-inch. No fair buyer need complain of such a rate, if the stock is from selected wood and is well grown. No honest grower but would use extraordinary care to have his stock so if he could realize such compensation for his investment of labor and money.

We hope to see a full discussion of all sides of this matter, but what is more to the purpose, an organized effort to apply the remedy at the point which we consider to be the chief seat of the disease, and this, in our humble opinion, could be located by swinging the segment of a circle some ten or fifteen miles north, west and south from a point in the neighborhood of Lincoln Park, Chicago, Illinois. W. H. GULLETT & SONS.

SITUATIONS, WANTS. FOR SALE.

Situation Wanted—By experienced rose grower and general greenhouse man about 30 years. N. WILSON, Ohio, Ill.

Situation Wanted—As carnation and 'mum grower; 5 years at present position. Address: A R B, care American Florist.

Situation Wanted—As all-around florist and gardener. Best of references; married, no children. State wages. GARDENER, Anna House, 102 North Clark street, Chicago.

Situation Wanted—By first-class grower of roses, carnations, etc., on modern place in Colorado or any far western state. State wages, etc. Address: AUTO, care American Florist.

Situation Wanted—By single German, 31; 20 years' experience; 8 years in this country, cut flowers and pot plants. Want first-class position on good place. State wages. Address: C B, care American Florist.

Situation Wanted—As working foreman, by a reliable and up-to-date grower of roses, carnations, 'mums and general line of pot and bedding stuff. State wages. Address: RELIABLE, care American Florist.

Situation Wanted—To take charge of a retail place. Good grower of roses and general cut flowers; 12 years' experience; single; age 33. A thoroughly reliable man; Ind., Ill. or Kentucky preferred. Address: FOREMAN, care American Florist.

Situation Wanted—As working foreman as grower of roses, carnations, violets, 'mums, bulbs, and miscellaneous plants, 36 years' practical experience in England and United States; single, age 50; English. Address: GEO. H. MOARIS, Westfield, N. J.

Help Wanted—General all-around seedsman. German with family preferred. Address: U S, care American Florist.

Help Wanted—Carnation grower; must be competent and reliable. Address, with full particulars: CARNATION GROWER, care American Florist.

Help Wanted—A first-class man for grafting roses. Must understand the work thoroughly. Apply to: BASSETT & WASHBURN, Hinsdale, Ill.

Help Wanted—Young man who has chance to assist an expert rose grower. Some experience necessary. ASSISTANT, care American Florist.

Help Wanted—A man to look after about 8,000 feet of glass. Must know how to grow carnations, violets, roses and general stock. Send reference. W W, care American Florist.

Help Wanted—Good all-around cut flower grower, single, for a place near Kansas City. Good pay to the right party. Address: GROWER, care American Florist.

Help Wanted—Young man, assistant rose grower, must be willing to work. State references and wages expected. ASSISTANT GROWER, care American Florist.

Help Wanted—Good all-around grower of cut flowers and plants, capable of taking charge of 40,000 square feet of glass near Chicago. Good wages to right man. Address: J. B. DEAMUD, 51 Wabash Av., Chicago.

Help Wanted—Manager or foreman for 50,000 feet of glass; must understand management in general and growing of roses, carnations and general stock. Wages \$100 per month to right party. MANAGEMENT, American Florist.

Help Wanted—Single man to take charge of greenhouse work on extensive private place. Must have good experience in growing roses, carnations, 'mums, and general stock. State wages wanted. Address: JOHN CULLEN, Narberth, near Philadelphia, Pa.

Help Wanted—A good all-around man who can propagate and care for general stock. A young man of reasonable experience, good worker and pleasant manner. Can have a permanent place in a live establishment. Address: LE R, care American Florist.

Wanted—Catalogues. J. H. JACOBSON, 3341 Girard Av., So., Minneapolis, Minn.

Wanted to Rent—8,000 to 15,000 square feet of glass, near Philadelphia, suitable for rose growing; partly stocked preferred. Address: ROSE GROWER, care American Florist.

Wanted—The address of James Kallieck, who worked for H. M. Sanders, Spokane, Wash., about four years ago; will hear of something to his advantage by addressing the American Florist Co., Chicago.

For Sale—In gas belt, modern greenhouses, about 7,000 square feet with stock, in prime condition. Write for particulars. M. E., care American Florist.

For Sale—Greenhouses, 5,000 feet stocked with carnations, roses and bedding plants, and 5 acre garden. Good retail trade in garden and greenhouses. Have southern fever, good opportunity. JOHN KLINK, Chicago, Ohio.

For Sale—Glass, sash bars and ventilating apparatus from two 10x60 greenhouses. Glass 10x24 double strength. Hotbeds boiler No. 16 and 730 1½" 4-inch pipe. Address: H. H. CADWELL, Decorah, Iowa.

For Sale or Rent—About 26,000 square feet of glass without stock. City of 80,000 population. Will sell greenhouses and business, or will sell business and rent greenhouses, or will rent greenhouses without business. Rare opportunity for a first-class grower. BROOKSIDE GREENHOUSES, Reading, Pa.

FOR SALE SMALL FLORIST PLACE, 75 feet or more, new greenhouse 12x10, fully stocked for spring planting: Pansies, violets, shrubs, roses. A bargain. M. BALLING, Wellston Ste., St. Louis, Mo.

For Sale or Exchange.

Fully stocked greenhouses, 20 miles from Chicago, 25,000 feet of glass; steam heat; paying well; part cash, balance good real estate or time to right party. Address: V J 95, care American Florist.

WANTED.

We have an opening in our Flower Seed, Bulb and Plant Department, for a young, experienced man, possessed of ability and push. Apply, with references and salary expected, to

A. SMITH,
care Joseph Breck & Sons, Boston, Mass.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

This is the time of the year when the crop of dummy inquiries ripens.

D. V. BURRELL will grow about 1,000 acres of vine seeds the coming season.

The Wholesale Seedsmen's League has left the question of carrot prices open.

Good judges of the market think wax beans and sweet corn can hardly be quoted too high.

JOHN LEWIS CHILDS, Floral Park, N. Y., had a serious fire at the Mayflower building within the past week.

The next annual meeting of the American Seed Trade Association will open at Philadelphia, June 23, 1903.

STURGEON BAY, WIS.—The Everett B. Clark Company is placing contracts for 5,000 bushels of peas in this vicinity.

SAMUEL COLE has moved four miles east of Ventura, Cal., and has forty acres devoted to callas, freesias, gladioli and seed beans.

The canners' annual convention, in which many seed houses are interested, will be held at Washington, D. C., February 9-14, 1903.

RETAIL catalogue prices on beans will be high, wax varieties from \$8 to \$9 per bushel; best green podded sorts from \$6 to \$7 per bushel; and linas from \$6.50 to \$8 per bushel.

The catalogue of D. M. Ferry & Company, of Detroit, seems to be the early bird this week. It is, like all the catalogues of that firm, a beautiful affair with colored cover and no less than seven colored plates.

W. W. BARNARD & Co., Chicago, had their catalogue all ready for the press in the hands of the Adventist Publishing Company, Battle Creek, Mich., when that plant was destroyed by fire December 30, and lost everything, plates, cuts and "copy."

JOHN BODGER & SONS, who have a seed farm at Santa Paula, Ventura county, Cal., making a specialty of tomato seeds, have bought forty acres at Oceana, San Luis, Obispo county, but will not move there for some time.

TERRE HAUTE, IND.—On and after January 1, 1903, the business of Hoermann & Cleary will be continued in the name of Frank Hoermann, the former firm having been dissolved by the purchase of Mr. Cleary's interest by Mr. Hoermann.

VISITED CHICAGO: Alexander Rodgers, representing J. Charles McCullough, Cincinnati, Ohio; John W. Kiley, representing the Braslan Seed Growers Company, of San Jose, Cal.; W. H. Small, Evansville, Ind.; George Hayward, representing Tomlinson & Hayward, Lincoln, England.

WEST NEWBURY, MASS.—T. C. Thurlow, the peonia specialist, who has been in poor health for a year, will spend the winter in the south.

HINGHAM, MASS.—Heavy loss was caused by the burning of a large conservatory on the premises of Miss A. S. Bradley on Christmas morning. The fire is supposed to have originated in an explosion caused by gas from soft coal in the heater.

VAN WERT, O.—Charles Wesley McConahy died suddenly of heart disease November 21. He had been in the florist business a little more than two years and was very successful. He was 35 years of age and left a wife, parents, brother and sisters and a host of friends to mourn their loss. He was a member of the M. E. Church, of the Knights of Pythias and of the Royal Arcanum.

OVER 2,000 ACRES IN CULTIVATION.

Braslan Seed Growers Co.

Growers for the Wholesale Trade Only.
Correspondence solicited. SAN JOSE, CAL.

Placing Onion Machine in position to clean a crop 1902, Large Red Wethersfield Onion. Part of a crop of Southport Yellow Globe can be seen at a distance on sheets.

HERE IS ANOTHER BARGAIN IN BULBS FOR EASTER FORGING.

All the Paper White Grandiflora, Horsfieldi, Emperor, Empress, and double-nosed Von Sion Narcissus offered in last week's issue **Are All Sold**. We could have sold them two or three times over. People know a good thing when they see it. We offer below some other good stock at equally low prices. If you can use any of the **Bulbs** offered, let us have order without delay, before we're sold out.

Now that the holidays are past florists are looking forward to Easter, which comes late this spring—April 12—so that there is plenty of time to get any of the stock here offered in bloom by that time. Bulbous stock is selling for good prices on account of the scarcity of other flowers—due to the high price of coal—and as bulbs can be grown in a low temperature, they will make money for you.

Everything offered is in first class shape, and are **Great Bargains at these Reduced Prices**. Send for complete list of surplus bulbs, which we are closing out at equally low prices. When ordering please refer to this special offer.

SMALL SIZED NAMED HYACINTHS. This is wonderfully fine stock for the price. The bulbs are of large size—12-15 cm. in circumference—and are splendid for Easter forcing, either for cutting or growing in pans. Nothing is more readily salable. Although the price is low, the bulbs are first-class. They will throw almost as good flowers as the larger and higher-priced bulbs. If you have never flowered them, try a thousand or two. You will be pleased with the results. They cannot fail to make money for you.

The following pink varieties at **only \$1.50 per 100; \$12.00 per 1000** viz: (Worth \$16.00 per 1000), Baron van Thyll, Gen. Pelissier, Gertrude, Gigantea, Robt. Steeger, Solfataro.

The following blue varieties at **only \$1.50 per 100; \$12.00 per 1000**, viz: (Worth \$16.00 per 1000) Grand Maître, King of the Buns, La Peyrouse, Chas. Dickens, Blondin, Czar Peter, also Tamerlan (yellow).

The following white varieties at **only \$2.00 per 100; \$16.00 per 1000**, viz: (Worth \$24.00) Baroness van Thyll, Grandeur a Merveille, Blanchard, L'Innocence, Mme. Van der Hoop, Paris de l'Europe.

FINE NAMED HYACINTHS, SINGLE AND DOUBLE. We offer also a limited stock of the following varieties in first sized bulbs: **\$3.00 per 100; \$25.00 per 1000**, (Worth \$35.00 per 1000), La Peyrouse, Regulus, Tamerlan

Grand Lilas, La Phœnix, Gen. Pelissier, Grandeur a Merveille, Bloksberg, Bourquet Tendre, Czar Nicholas, Crown Prince of Sweden, Flevo, Garriek, Grootvorst, Gen. Antimek, King of Wurtemberg, La Tour d'Auvergne, La Virginie, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar, Princess Royal.

HYACINTHS IN SEPARATE COLORS, SINGLE AND DOUBLE. We still have a few of these left, which we offer as long as unsold at **\$2.50 per 100; \$20.00 per 1000**. (Worth \$26.00).

WHITE ROMAN HYACINTHS. We still have a few cases of fine 12-15 cm. bulbs, which we offer as long as unsold at **\$15.00 per 1000**. (Worth \$25.00 per 1000).

NARCISSUS. These prices will speak for themselves. Per 1000
Von Sion double, extra sized bulbs \$ 7.50
Trumpet Major, single Von Sion 6.00
Princes, Poeticus Ornatus, Barni Consplendus 5.00
The incomparable Stella, incomparable fl. pl., Alba Plena Olorata 4.00
Poeticus, Single Sweet-scented Jonquil 2.0
Golden Spur, Silver Phoenix, Grandis Maximus 15.00

TULIPS, SINGLE AND DOUBLE. Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing: La Reine, Rachel Ransch, Rosamundi Huykman, Bizard Verhelst, Conkeur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche, Count Leicester, 5.00
Cottage Maid, Joost van Vondel, Brutus, Peony Red 6.00
Tournesol Red and Yellow, Gloria Solis, Le Blason, Rosine 7.00
Potrebakzer White, Duc van Tholl Scarlet, Standard Royal Silver, 7.50
Rose Griselin, Belle Alliance, Marring de ma Fille 10.00
Proserpine, Mon Tresor, Conkeur Cardinal 12.00
Joost van Vondel White, Rose Lisante, 20.00

CALLAS. We have a few hundred of these, which can be gotten in fine shape for Easter.
Extra sized bulbs, 1 1/4 to 1 1/2 inch. in diam., \$3.00 per 100. (Worth \$5 per 100).
Selected bulbs 1 1/2 to 1 3/4 inch. in diam., \$4.00 per 100. (Worth \$6.00 per 100).

F. R. PIERSON CO.,

Tarrytown-on-Hudson, N. Y.

A NEW ★ IN THE FIRMAMENT.
Chas. F. Meyer,

(FORMERLY OF HAGEMANN & MEYER.)
Wholesale Importer of Bulbs, Plants and Nursery Stock,
19 Barclay Street, NEW YORK.

SPECIALTIES: Lilies of the Valley, Bermuda and Japan Lilies, Chinese Lilies, Roman Hyacinths, Narcissus and Dutch Bulbs, Azaleas, Palms and Nursery stock.

All imported **direct** from the best growers of their native countries.

MOTTO: "High-Grade Quality First, last, and all the time." My patrons will find me true to my motto.

I recommend my new firm to the kind consideration and patronage of the trade and any orders entrusted to me will be filled with the utmost care and fidelity. In case my representative misses you during the traveling season, write for catalogue with special quotations. Buy the Best at Honest Market Prices.

Yours Respectfully,

CHAS. F. MEYER.

Buyers of AZALEAS AND PALMS, Attention!

Please note that the celebrated Commercial Nurseries

AD. D'HAENE CO., Ltd., Ghent, Belgium,

Have appointed me their sole representative in the United States and Canada for the sale of their products in

AZALEAS, ARAUCARIAS, PALMS AND MISCELLANEOUS PLANTS.

Extensive plantations and new houses have lately been added to the Nurseries and a large stock, unsurpassed in perfection of growth is offered to the trade this season at reasonable prices.

The greatest care is devoted to the cultivation of **AZALEAS** and **PALMS**, and buyers can rely upon receiving well-grown and shapely plants. **FOR SPRING DELIVERY.** Growers having room in their greenhouses during the idle summer months, when no artificial heat is required, will find it to their advantage to import young plants of Palms, Araucarias, Citrus, Ficus, etc., in the spring, as such young plants can be had at a low figure and will grow rapidly into money making, fine salable plants for fall.

My representative will call upon you during the selling season. If you should unfortunately be missed, write for catalogue. I shall be delighted to receive your order. Your turn to be delighted will come when you receive the goods.

CHAS. F. MEYER, 19 Barclay St., NEW YORK.

THE SURREY SEED CO., Ltd., REDHILL, ENGLAND.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. LIGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

VISITED CHICAGO:—C. H. Perkins, of Jackson & Perkins, Newark, N. Y., enroute to California.

THE end of the year saw extreme cold, as low as 22° above zero, in the Florida orange groves, but good protective work is thought to have averted serious loss.

The Federal Inspection Law.

The legislative committee of the American Association of Nurserymen has resumed the campaign in favor of the national inspection law. The following circular letter has been sent to all nurserymen by C. L. Watrous, Des Moines, Ia., chairman of the committee:

In obedience to the unanimous vote of the association at Milwaukee last June, the committee on legislation is doing its utmost to secure the success of our inspection bill (H. R. 10,999). The committee will go to Washington next week to urge action, and needs your aid. Nothing will help so much as a good, strong personal letter to your congressman and one to your senator. Will you attend to this, writing at once and make your appeal as earnest as you can? We ask uniform rules to govern interstate shipments. At present most states have laws, but there is no uniformity. Some are very drastic and difficult to comply with; others are imperfect; and some states have no laws at all. The administration of these laws lacks uniformity as much as the laws themselves do, causing complaint and friction. The great fruit growing interests of the country suffer less and business is hampered by uncertainty. We need uniform rules of law and uniform rules of administration. These will be secured by the passage of our bill. Please do not fail to mention the number (10,999) and that we hope to have it without amendments.

San Francisco.

CHRISTMAS TRADE BREAKS ALL RECORDS.—RETAILERS OBLIGED TO LOCK THEIR DOORS TO FILL ORDERS.—NOTES OF DOINGS OF GROWERS AND OTHERS.

Another Christmas has been put behind us and a very good one at that. Orders came in so fast the day before the holiday that several of the retailers were obliged to close their doors in the afternoon to give them a chance to fill their orders. Some had signs up, "no more orders taken," others, "will not open until to-morrow morning." All agree that more business was done than the year previous and especially in greens and pot plants. Of the latter ferns in dishes and baskets easily lead. The growers who were lucky enough to have their crops in time are smiling. Of course, under existing conditions the very best of prices were realized.

T. Thompson, of Santa Cruz, has been visiting this city and says that the prospects down that way are very good. He is making a specialty of carnations and has five houses devoted to that flower, besides a miscellaneous stock. A good deal of his cut goes to Mr. Navlet, of San Jose, who was also here recently.

The Pacific Coast Horticultural Society is to give an entertainment, with dancing and refreshments, the first Saturday in January. Christmas and New Year's yards will be in order and everybody is expected to be on hand.

Sidney Clack is all smiles now, for not only have his gold mines in British Columbia turned out a success, but he had the biggest holiday cut of any grower in San Francisco and vicinity.

Charles Mitten, at present foreman for McLellan, in Burlingame, has invested in

land across the bay, where he will embark in business with his brother. They will tackle first-class roses.

Frank Mills, at present in Menlo Park, is to start in business at Palo Alto. He intends to put up two houses for carnations for the San Francisco market.

Among the latest arrivals was a fourteen-pound baby boy at Mr. Domato's at Fruitvale.

GOLDEN GATE.

St. Paul.

EVENTFUL YEAR CLOSING WITH BIG HOLIDAY BUSINESS.—CARNATIONS HELD THE LEAD IN EVERY PARTICULAR.—GOOD PRICES.—GREENS TRADE HEAVY.—LOSSES FROM FREEZING.

The year just closed was an eventful one to florists. Notwithstanding the end of the coal strike was announced several weeks since, coal becomes scarcer as the weather becomes colder, and prices are correspondingly higher. Christmas trade was very good, several reporting it much better than last season. The weather was the only drawback. Stock was fairly abundant and sold at good prices. The most noticeable shortage was in roses. The cold, dark weather kept the cut down to the minimum, while the quality was not first-class. The few that were cut retailed readily at \$3 to \$5 per dozen, Liberty and Meteor bringing the latter price. Beauties were quite scarce but sold well. This was a carnation Christmas, the divine flower being most abundant, most eagerly sought after and gave the best satisfaction to dealers and customers alike. The best fancy blooms retailed at \$2.50 per dozen, Enchantress at \$3 and good common stock at \$1.50 to \$2. Violets were of good quality and sold well, the demand

far exceeding the supply. Lily of the valley, Paper Whites and Romans sold well in assorted boxes.

There was nothing new or striking in the plant line. Azaleas, cinerarias, cyclamens and primroses constituted the main stock, with some Lorraine begonias, poinsettias, peppers and oranges thrown in to make up the full complement. There was a good trade in holly and greens of all kinds.

Losses from freezing were in some instances very heavy. Nearly all trains were behind time and many flowers shipped in were badly frozen on arrival. The express companies will have to face several damage claims which might never have been presented had they not raised rates.

Dr. Schifmann and family will leave shortly for the Philippines, to obtain another importation of orchids.

FELIX.

New London, Conn.

December 29 the gardeners and florists of this city and vicinity formed a club to be known as the Gardeners' and Florists' Club of New London County. Next week we will have a meeting for the purpose of electing officers and drafting by-laws.

Coal is a scarce article, with prices for hard coal near \$10 per ton and the soft variety not much behind. We have to take about what we can get, sometimes hard, then soft and occasionally both mixed together.

H. H.

ADRIAN, MICH.—The Detroit News, of December 25, contained an account of Elmer D. Smith's work with the chrysanthemum, illustrated with Mr. Smith's portrait and by halftones of his seedlings F. J. Taggart and Convention Hall.

VAUGHAN'S INTERNATIONAL PANSIES.

THE WORLD'S BEST. This is a combination of as many separate colors, types, blendings and unique kinds as can be found in the world. It has been made up and sold by us for twelve years; it is the best general mixture in existence and is most widely known and popular. It is used by most florists. It contains eight different strains, the crack selections of noted Pansy specialists which we purchase every year especially for this mixture and which cannot be had in any other way. We beat the world on Pansies. Price per oz., \$1.00; 1/2 oz., \$1.50; trade pkt., 50c.

VAUGHAN'S "GIANT PANSY MIXTURE." Embraces, besides all the best shades and colors, five special strains not listed elsewhere in this adv. and our International Pansy. This mixture includes the richest reds, coppers and bronzes, together with the most delicate rose and pink shadings, all the distinct colors of Trimarlean, the splendid Cassier strain with its delicate veinings. Price, 1/4 lb., \$14.00; oz., \$1.00, 1/2 oz., 60c; trade pkt., 25c.

VAUGHAN'S PREMIUM PANSIES MIXED. Embraces all the varieties of the Fancy German Sorts. Per pkt., 25c; 1/8 oz., 80c; 1/4 oz., \$3.00; oz., \$5.50.

COMPLAINT AT CONDITIONS PREVAILING AROUND THE HOLIDAYS.—HIGH PRICES A BAR TO BRISK BUSINESS.—VARIOUS NOTES.

It would appear as though we are ever to be hampered by dull holiday weather. For the past two years the special flower seasons have been marred by inclement weather, and this Christmas was in line, with a continuous run of overcast skies. From the very first of the month things had shaped themselves for a shortage and prices advanced sharply. By December 20 it had become impossible to quote carnations for Christmas in any certain quantity, although the price asked was from \$2 to \$5 for good flowers, which was sometimes in excess of even their retail value. Roses were in regular supply at \$6 to \$12, some fancy stock bringing \$1 per dozen, wholesale. Violets were the scarcest flower of all. At retail the trade was forced to demand \$1 per dozen for good carnations, \$2 to \$3 for roses and \$2.50 to \$3 per hundred for violets. Sword ferns and flowering plants met with a fine call until the temperature dropped and put an end to the plant line. Greens were scarce and in good demand, especially ground pine wreaths, which were a decided shortage. Holly was used more than ever but the florists were not the gainers, most of it being sold by markets.

The shipments of the J. A. Budlong Company to Boston were the largest ever leaving the local market. On December 23 they taxed the capacity of a large double-teamed produce wagon. They do not cater to this city, sending direct to Boston, where the stock is again handled by their own employes and sold to the trade.

One or two florists report better business than last season, but the rank and file are not slow in expressing dissatisfaction with the volume of business. Prices were too high to encourage the sale of holiday flowers and public distrust seems stronger each year as the time of high prices approaches.

Alexander Miller suffered the loss of his wife and little boy by sudden illness. We sincerely sympathize with him at this time. M. M.

Springfield, Mass.

HOLIDAY BUSINESS A SURPRISE.—SALES EXCEEDED ALL EXPECTATIONS.

Christmas trade went beyond our expectations. Owing to the high price of coal and so forth, flowers being a luxury, we thought the florists would be left out somewhat this Christmas, but from reports sales were good and prices in most cases ruled about the same as last year. Cut flowers were sold out early, storemen not buying too heavily, fearing the demand would be light. In pot plants azaleas took the lead, there being some very fine specimens, ranging in price from \$1.50 to \$5. The varieties were Deutsche Perle, Mardner, Vervaneana and Apollo, the latter being a fine dark red. Cyclamens, ericas, poinsettias, primroses and Lorraines found ready sale. Boston ferns and rubbers were in good demand but palms moved slowly. A. B.

GLOVERSVILLE, N. Y.—R. E. Loeben has a seedling carnation named Kingsbury, which he believes will have a brilliant future. In color, vigor and size it rivals Lawson but in number of flowers he says it far outblooms that famous variety.

Toronto.

HOLIDAY TRADE MAKES AN ADMIRABLE RECORD.—BEST PERIOD EVER EXPERIENCED BY LOCAL DEALERS.—GOOD STOCK AND MUCH BUSINESS.

Christmas in this city will long be remembered. There was only a few degrees of frost, which greatly facilitated the handling of stock, and business on the aggregate was about twenty per cent in advance of last year. As was expected, Beauties held the first call in cut flowers, prices were well advanced, and only about halfenough to fill orders. Meteors were next sought after. Stems and color were good, but the buds were small. The large quantity of Brides and Bridesmaids relieved the market in roses. Carnations were also very good and plentiful. Lawson, Prosperity and the fancies found ready sale at \$2 and \$3 per dozen retail, other varieties at \$1.50 per dozen and second grade at \$1. A few Harrisii brought \$5 per dozen. Violets were not as plentiful as a year ago and cleared at \$5 and \$6 per hundred at retail.

In plants azaleas of the larger sizes met with ready sale, and the market was cleared of these. Well grown cyclamens, ericas, fern pans, mixed baskets and medium-sized palms all found ready sale, but Begonia Gloire de Lorraine was not wanted, as the price seems too high for the Canadian buyers.

At Tidy's there was a very pretty window of immortelle bells. His large conservatory in the back of the store was very tastily arranged. This proves quite an advantage to him in the busy season, as it gives him plenty of space in which to handle his orders.

The Steele Briggs Company had some very well grown lilacs which met with ready sale. Orchids and violets were the principal part of Manton Brothers' cut.

At Grainger's new store he was more than satisfied with business. On Christmas morning not a rose nor a flowering plant was left in the place.

Having doubled his space W. Hill did a very large business in both plants and flowers. Violets were the scarce article with him.

Simmons had a mixed window of plants and holly wreaths tied with streamers of ribbon, lettered with Christmas greetings.

Jay & Son, with their new refrigerator and improved greenhouses in the back of the store, did a rushing business.

Thomas Plumb and W. J. Lawrence both report a decided increase.

Dunlop and the Dale Estate each sent in large cuts of good stock. H. G. D.

Washington.

CHRISTMAS BUSINESS FAIRLY SATISFACTORY —A PLANTSMAN WEDS.

Christmas trade was fairly good. The market was well stocked with green and in good demand. Plants sold very well. On cut flowers in general the demand was as good as the supply. Late Christmas eve it started to snow and in the morning we had about an inch of snow, which made an ideal Christmas. A number of the retail florists were much inconvenienced by their violets coming in about twelve hours late.

Edward Frye, one of A. Gude & Brother's plantsmen, was married December 29 to Miss E. Winona Milstead.

Willie Clark is about again after a relapse with typhoid fever.

P. G.

Lowell, Mass.

VOLUME OF CHRISTMAS TRADE ESTABLISHES A NEW HIGH WATER MARK.—BIG BUSINESS IN GREENS.—ROSES THE ONLY SHORTAGE.

Without a doubt the business done at Christmas was the heaviest ever known for a holiday. The trade was phenomenal when one considers the high prices that now prevail for the necessities of life. The fun started the week before Christmas, with anything but suitable weather, it being very cold, which necessitated extra help to wrap up plants, and then a good many were frozen. There was a tremendous supply of greens of all kinds offered this year, and most of it was not up to the mark, but nevertheless it all sold and more could have been disposed of.

The supply of cut flowers, except roses, was enough to meet the demands, and the prices that were asked were given without any kicking on the part of customers. Carnations were as popular as ever, especially the red varieties, which were quickly sold at prices that far exceeded those of last year. Fairmaid sold for \$15 per hundred. Violets were scarce and the prices realized were good. Some very fine valley was offered, but the demand was very poor.

One thing that was very noticeable was the way the storemen fixed up their establishments. Never did the stores present a prettier appearance. The stores were all well filled with both foliage and flowering plants.

We are all very sorry to hear that our friend, Clarence Additon, formerly of Lowell, but now with Mrs. Rogers, in Boston, is very ill.

E. N. Pierce, of Waverley, sent in some white chrysanthemums, but they looked out of place among so many bright flowers.

In summing up the old year, which had its ups and downs, we find it was not so bad after all.

There was good plant trade all along the line, Lorraine begonias being most popular. A. M.

TROY, N. Y.—Fire caused a damage of about \$700 in the greenhouse of J. V. Robbins on the evening of December 18.

LENOX, MASS.—The Lenox Horticultural Society has elected A. H. Wingett as its president for the coming year. Arrangements are being made to hold the annual ball on January 27.

DUBUQUE, IA.—On the morning of December 26 fire in one of W. A. Harkett's boiler rooms did some damage to the building and to the stock in two adjoining greenhouses, but the boilers were kept running as usual.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

Carnation Gov. Lowndes.

Color, pure white. Size, 3 to 3½ inches in diameter. Calyx, spreading at the top, making it practically non-bursting. Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated, and beautifully arranged, forming a full, rounded center. Odor, is very sweet and particularly pleasing. Stem, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect. Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties. Productiveness, extremely free flowering. More productive than any other large white. A profitable and high grade commercial variety. Price, \$2.50 per doz.; \$12 per 100; \$100 per 1000. 50 at 100 rate; 500 at 1000 rate.

TRADE GOOD.—PRICES SATISFACTORY.—
LARGE PLANT SALES.—COLD WAVE
MAKES DELIVERY DIFFICULT.—NEW
SEED STORE.—NOTES.

Christmas trade has been good, fifteen per cent better than last year. Tea roses were not up in quality and Beauties and violets were very scarce. Carnations were good and plentiful. Bulbous flowers, such as Romans, went slow at 60 cents per dozen. Prices were good. Potted plants sold better than ever, especially azaleas, of which there was a good supply. Cinerarias and cyclamens brought good prices. Holly and wreaths sold well, but the market was badly overstocked and holly could be bought at any price from the commission houses. We had splendid weather until the day before Christmas, when the temperature fell from 17° above zero to 10° below, which made it very hard to deliver plants and hurt the plant trade to some extent.

We have a new seed store located at Sixteenth and Howard streets, by the name of Hulry & Company. Mr. Hulry has been with the Nebraska Seed Company for the last four years.

Mr. Norlander, late with L. Henderson, has opened a flower store on South Sixteenth street and reports good business. He will erect three greenhouses as soon as he can get the material.

Steam coal is very hard to get and consequently the price went up.

GRIPPE.

Buffalo.

CHRISTMAS BUSINESS VERY SATISFACTORY.—
ALL STOCK WELL CLEANED UP.—NEW
STORE.

With cool, fair weather the three days preceding Christmas, trade was at least twenty-five per cent better than last year. The sale of holly, pine, laurel and other greens seemed equal to other years although opposition is greater. Roses and carnations found ready sale at fine prices. Violets were held at \$4 and \$5 per hundred, and not as good quality as in other years, but sold well. Bulbous stock sold at \$1.50 per bunch of twenty-five and was in great demand. The sale of poinsettias was also good. Window decorations of poinsettias and red bells of immortelles helped the sales wonderfully. Poinsettias in pans, primroses, azaleas and baskets trimmed with ribbons and bells, with an assortment of ferns, sold well at \$5. Palmer, Rebstock, Anderson, Zimmerman and Keitsch all say trade was good. Neubeck, Newlands, Christensen and Scott, who sell at their greenhouses, were about sold out.

There is to be a new flower store uptown, so they say, opened by New Yorkers.

BISON.

Barrie, Ont.

PLANT TRADE PROSPERS BECAUSE OF SCARCITY OF CUT STOCK.—FUNERAL WORK.—VARIOUS LOCAL NOTES.

The weather has been decidedly cold, 15° to 20° below zero, but it moderated slightly a few days before Christmas, which enabled the florists here to ship plants with less difficulty. These have had ready sale this season on account of a scarcity of cut flowers. Some very nice Begonia incarnata and cyclamens were to be had, but were soon disposed of. Some orders for cut flowers could not be filled and others were cut. A few late chrysanthemums helped to fill up a gap. Carnations and violets were more in demand than ever and good stock brought top prices.

Orders for funeral work have kept the stock of white flowers down. There always seems to be a scarcity of white flowers, as nearly every customer asks for all white.

A deer passed through the fields close to the Vairville conservatories one day last week, but it is the close season.

E. Wheatley, of Collingwood, reports trade good, the only trouble not half enough stock.

Geo. Street, of Orillia, paid us a flying visit in search of Christmas flowers.

L.

New Castle, Ind.

ROSE GROWERS HAD A MERRY CHRISTMAS.—ADDITIONS PLANNED FOR THE SPRING.—NOTES AND VISITORS.

Nearly all the rose-growing establishments here had a good Christmas business. The South Park Floral Company was in full crop and their stock was never better. The latter firm's new rose, Franz Deegen, was in good demand and brought \$6 per dozen. Reinberg & Weiland had a big cut of Beauty. Bentley & Company were in with their teas. It is rumored here that the latter firm intend increasing their glass the coming season; they already have a model plant. The South Park Floral Company also contemplates a range of house, each 60x265, for growing Beauty. They placed their hot water system on a pressure basis the past season with very good results.

Ivar Magnuson, John Pagle and Leonard Lundin spent several days in Chicago this week.

Recent visitors: E. G. Gillett, Cincinnati; John Evans, E. G. Hill, Jacob DeWeiss and Charlie Knopf, Richmond, Ind.

GRAND RAPIDS, MICH.—J. A. Creelman says this has been the best season on record.

RICHMOND, IND.—Robert Craig, of Philadelphia, and James S. Wilson, of Western Springs, Ill., have been recent visitors.

NOTICE.

THE MODEL PLANT STAKE COMPANY,
formerly of Brooklyn, N. Y., has removed
to 208 Jersey St., Harrison, New Jersey,
and is now The Parker-Bruen Mfg. Co.

**The Model Extension
Carnation Support.**

Flushing, Long Island,
Dec. 11th, 1901.

MR. THERON N. PARKER,
Brooklyn, N. Y.

Dear Sir— I have used
your Wire Carnation Sup-
port the last two years, in
all about 12,000. They fill
the bill to every particular.
Nothing could be more
satisfactory and would
give me a great deal of
pleasure if I can bespeak a
good word for you to the
trade and you are at liberty
to refer to me at any
time. Very truly,
A. L. TORNE.

La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison, N. J.

Dear Sir:— After using
your Model Carnation Sup-
port in two of our houses
the past winter, we have
come to the conclusion that
it is perfectly adapted to
supporting carnations, and
shall use them on all our
plots the coming season.

We were much pleased
with the simplicity,
strength and neat appear-
ance of the support.
Yours truly
F. DORNER & SONS CO.

RETAIL TRADE EXCELLENT AT CHRISTMAS.
—LOCAL GROWERS SUFFER FROM THE SEVERE COLD.—A NEW SOCIETY.

All the up-to-date flower dealers are feeling good with a pocketful of money. The Christmas demand for flowers and plants was very much better than ever before. The crowd was so great in the stores on Wednesday that many could not be waited on. The stores stocked up heavily, principally from out of town, but very little was left. There was also a great trade in Christmas wreaths and greens of all kinds. Prices were high but the public did not seem to mind it.

Local growers did not all have a merry Christmas. The recent blizzard was too much for some of them. One man found the thermometer at 27° in his greenhouse and had almost everything spoiled. Several others lost more or less. In addition to many frozen plants the crop of flowers was very much shortened by the extreme cold and cloudy weather.

There is a movement on foot to start a horticultural society here. For a number of years we had a Gardeners' and Florists' Society, which was very successful for a while, but finally dwindled. A committee is now canvassing to get names for the new organization. A. B. H

Cincinnati.

STOCK FAR SHORT OF THE DEMAND.—TULIPS IN THE MARKET.—BOWLING.

Such a scarcity of good stock as we have experienced in the past two weeks has not been known in recent years. Business is very good and the demand exceeds the supply threefold. Carnations are very scarce, colored ones especially, and were it not for Murphy's White it is pretty hard to tell what we would have done to fill orders. William Murphy tells me he cut and sold 15,000 flowers for the holidays.

There is some talk of forming a florists' bowling club in this city and if the boys will only respond there is no doubt they could make some of the top-notchers from other cities hustle to hold their honors at Milwaukee next summer.

George & Allan are again first in the market with tulips. Proserpine is the variety and \$4 per hundred the price. This firm has done well on lily of the valley and Harrisii for the past two weeks.

The charity ball Monday night did not use many flowers, for wild smilax and paper poinsettias were the decorations. However, the florists made quite a few bouquets. D.

CAMDEN, N. J.—C. W. Turnley has had serious illness in his family, which has interfered with business and improvements in progress at the Haddonfield Nurseries.

Columbus, O.

CHRISTMAS BUSINESS BEST ON RECORD.—
STOCK WELL CLEANED UP AT FAIR
PRICES.—GREENS ACTIVE.

Christmas week was one of the busiest
ever known to the trade. There seemed
to be a big demand for everything in our
line, including immortelle bells and red
wreaths. Plants of all kinds sold well at
very satisfactory prices. Roses brought
\$2.50 on an average, and carnations
\$1.25 to \$1.50. Beauties and violets
were in great demand, with the supply
of good stock cut short, especially vio-
lets. The weather was quite favorable,
with the exception of a little cold. Every-
body was selling holly on the street, yet
we all had a satisfactory holly trade.
Christmas green in festooning sold well
but was very low in price. Mr. Metz-
meier had one contract for 1,500 holly
wreaths which he filled, besides making
that many more, which he disposed of.

The rose crop about Columbus is rather
short just now but prospects for the very
near future are good. CARL.

Alexandria, Va.

STATE OF TRADE WITH THE GROWERS.—
LOCAL BUSINESS ON THE INCREASE.—
WEATHER BAD AND COAL SCARCE.

In this historic city of the Old Dominion
large quantities of flowers are grown to
supply the Washington trade. J. Louis
Loose, whose Washington store is at
Thirteenth and F streets, N. W., has an
extensive and well equipped range of
houses at this place. A considerable
feature is the rose section, and Will
Arnold, the foreman, is now cutting some
excellent Beauties. There are also sev-
eral growers located here who cater to a
no inconsiderable home trade. Alexan-
dria has passed the "river town" era
and, like many of its sister cities, is put-
ting on metropolitan airs.

While there has been much dark and
rainy weather, stock has stood it well.
We all sympathize with the poor fellows
up in Massachusetts, and elsewhere, who
have had such hard knocks from Old
Boreas. Coal is scarce and high, but all
the growers seem to have enough to last
a while. A. F. F.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

- 20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.
- 50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you:

- 100,000 FEET of 2 to 4-inch wrought iron, lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.
- 1,000 000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.
- 1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.
- 50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.
- 100,000 FEET of garden hose, 3/4 and 1-in.
- 75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.
- VALVES and fittings of every kind.
- BOX COILS for heating purposes.
- RADIATORS, new and second-hand.

We also offer the following bargains in
Heating Boilers.

- 50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.
- 1 NO. 2 Standard Kroeschell hot water heating boiler.
- FOUR 36x10 Horizontal Tubular.
- FOUR 36x12 Horizontal Tubular.
- FIVE 42x10 Horizontal Tubular.
- FIVE 42x12 Horizontal Tubular.
- SIX 48x14 Horizontal Tubular.
- TWO 54x16 Horizontal Tubular.
- FOUR 60x16 Horizontal Tubular complete with all fittings.

PUMPS of all Descriptions.

A carload of shovels and spades that we are selling at \$5.00 per dozen.

We carry a complete stock of hardware and farm implements, besides plumbing material of every kind.

CROP INSURANCE.
 Life insurance is valuable because it guarantees the outcome.
"Gurney" Heaters
 "BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

Florists' Plant Notes.

PETUNIAS.

For bedding purposes and spring sales petunias may be sown now. If small plants in 2½-inch pots are wanted to plant out, the first of March is early enough to sow them. Sow only double varieties, for over half will come single anyway. As the seed is very small, no covering with soil is needed. Do not let the sun parch the soil in the seed pans, but keep them well sprinkled and in a slightly shaded place. When sufficiently large to handle, transplant into boxes, about one inch apart; later, pot off into 2¼-inch pots and shift into 4-inch when ready. Any good soil with some leaf mould added will do.

ASTILBE JAPONICA.

Astilbe Japonica for Easter should be brought in twelve weeks before they are wanted in bloom. Give them a 6-inch or 7-inch pot, and for the first three or four weeks until they get started they may be placed under a bench at a temperature of 55°. Later increase the heat to 60°, at which temperature they will make Easter nicely. Give them plenty of room and the fullest light and, as the pots by this time will be filled with a mass of hungry roots, they will require plenty of water and feeding in the shape of liquid manure. A saucer placed under each pot kept filled with water will save much time. They must never be subjected to tobacco smoke, for it burns the young growth, and even after the foliage is matured it is easily affected. If the plants are being grown in a house where fumigation is necessary, either carry them out for the time being or syringe them thoroughly and cover with paper to keep off the smoke.

FUCHSIAS.

Fuchsias for spring sales should be shifted along as needed. Cuttings may be struck until the first of March, but after this the plants will be too small to be of any use. Add plenty of leaf mould or old hotbed manure to the soil; one-third or even one-half is not too much. Give them a temperature of 55° and sprinkle the foliage several times a day. To grow bushy, compact plants with three or four strong shoots, they may be topped once or twice. Later, as the sun gets stronger, a light shading may be applied to the glass, to give a dark, glossy color to the foliage. We have found the following to be the best standard varieties to grow for the spring trade: Phenomenal, Avalanche and Mme.

van der Strasse, for double; Speciosa, Black Prince and Earl of Beaconsfield, for single. The Little Beauty, a later introduction, we have found to be a little wonder. It has no rival for compactness and profusion of bloom.

BOUGAINVILLEAS.

Bougainvillea Sanderiana may be given more heat now if wanted for Easter. A temperature of 60° at night is warm enough, for if they are forced too hard they frequently grow blind. Keep them well syringed and give plenty of water at the root. Although this plant soon sheds its leaves in a dwelling house the long, handsome bracts hang on for several months in the greenhouse. Its chief value is for decorating purposes, for which it is extensively used. For next year's stock the cuttings may be taken at any time during January. The young growths strike readily in sand, with a mild bottom heat, but do not attempt to propagate from the hard growth made the previous fall, for it will take them all eternity to root, if they ever do. When rooted pot off into 2¼-inch pots, shifting along as needed, and when the weather permits plunge out of doors and keep them growing all summer. Many growers prefer to plant them out in the spring, but we find they do not lift well in our soil. They require a good, turfy soil with about one-third leaf mould added.

LILY OF THE VALLEY.

Lily of the valley may be forced from New Year's on. Plant them in sand five or six inches deep and place in a strong bottom heat of 75° to 80°, and keep them heavily shaded for the first twelve days, after which gradually remove the shading until, by the time the flowers are developed, they are fully inured to the light. To have a supply always on hand a certain quantity should be brought into heat every week, or twice a week. For the average retail place, where about 400 pips are forced weekly, we have found the following plan to be productive of good results:

Select the end of a side bench in the warmest house you have, where the proper bottom heat can be maintained, and nail a foot board on top of the sides of the bench, both front and back, about the length of three hotbed sash. Partition this frame into three equal parts and place a sash on each part. Plant under one sash every week, which will hold, at a distance apart of two by three inches, about 400 pips and cover with

boards or heavy burlap for the first twelve days, after which time the shading should be gradually removed and more air given. Handle each batch in the same manner and, as it takes just three weeks in a temperature of 80° to force the pips, you will have your frame full all the time with valley in different stages of growth. Be careful in watering not to wet the bells after the flowers are developed, but they should have plenty of water at the root, for water is all they have to live on.

ASTERS.

The first batch of aster seed may be sown now. Queen of the Market is the best strain to sow for early flowers. We usually make a sowing at this time of the year, and twice a month afterwards until the first of March, when the main batch is sown. For later flowers we prefer to sow different strains, Vick's Branching, Victoria and Semple's Branching. In this way we manage to have a succession of crops from early summer until nearly chrysanthemum time. For extra early flowers the small seedlings should be given 2½-inch pots and later planted out on a bench in a temperature of 50°. If you have a carnation bench that is not paying for itself, take them out and plant the bench to asters without changing the soil, but give them plenty of headroom for they will grow quite tall. Plant about 10x12 inches apart and give plenty of water and syringing. Later sowings may be transplanted into flats and then into cold frames and covered with sash, or out in the open ground as soon as the weather permits.

HYBRID ROSES.

Hybrid roses intended for Easter, which are now resting in a cool house in pots or boxes, may have the temperature gradually raised to 56° or 58° at night.

would a tea rose, excepting that no feeding is required until the buds are set, that is, if the soil, which should be of a heavy texture, has had about one-fifth well decayed cow manure and a good sprinkling of bone added in the first place. Gen. Jacqueminot, Magna Charta and Ulrich Brunner are the best varieties to force.

Crimson Rambler for Easter should be given at least twelve weeks in which to come into flower. Extremely long canes may be shortened back to three or four feet and wound around stakes to induce even breaks, but in every other particular handle this rose as you would any of the other hybrids. We have never forced the Yellow Rambler, but understand that it requires two or three weeks less time to force than the crimson variety. B.

CARNATIONS.

A REMARKABLE MONSTROSITY.

The accompanying illustration shows two views of a malformed stem from Flora Hill carnation, found by W. C. Cook, of the Central Michigan Nursery, Kalamazoo, Mich. Submitted to an eminent botanical authority, Prof. Goodale, of Harvard University, he says: "This case of twisting is the most remarkable I have ever noted and I thank you for it. So far as I am aware, the cause of this particular monstrosity is unknown."

TWO NOVELTIES.

In this issue we show vases of two of the Chicago Carnation Company's novelties, Her Majesty, white, and Marshall Field, variegated, also views in houses where these varieties are blooming during the present season. The white has large size and fine form, but it is its freedom of bloom, coupled with these attri-

"It is a bright crimson seedling, obtained from a large scarlet seedling, No. 50, crossed with Gen. Maceo. No. 50 is a short, stocky grower which we got by crossing Red Bradt with Jubilee. The foliage and stems of No. 50 are very thick and fleshy and contain so much sap that when breaking off a flower the sap will actually run out from the end of the stem. Maceo, of course, is just opposite in habit, being very wiry. We think it was this combination of growth that gave us such marvelous results in Harlowarden, and naturally the scarlet brightened up the crimson. Two years ago we had one plant of Harlowarden. Last year we had sixty; we cut enough blooms from those sixty plants to win two firsts, a certificate and a silver medal at the Chicago flower show, and a first and a silver medal at Kansas City. We were very careful not to over-propagate the variety. We allowed every flower to open on the plants and only took stem cuttings, otherwise our stock might have been double what it is to-day. Next year we shall grow 10,000 of it for cut flowers."

CARNATION PRESIDENT M'KINLEY.

The supplement with this issue of the AMERICAN FLORIST shows a vase of Carnation President McKinley, the latest novelty of the originator of Carnation Dorothy, of which it is a seedling. The name was bestowed at Kansas City in 1901, where the variety won the special premium offered for a vase of blooms of the color, pink, most favored by the then recently assassinated chief magistrate. The next year, at the same place, Carnation President McKinley took first as the best dark pink. The Grave place at Richmond, Ind., from which the variety comes, is well known for the quality of the cut flowers produced.

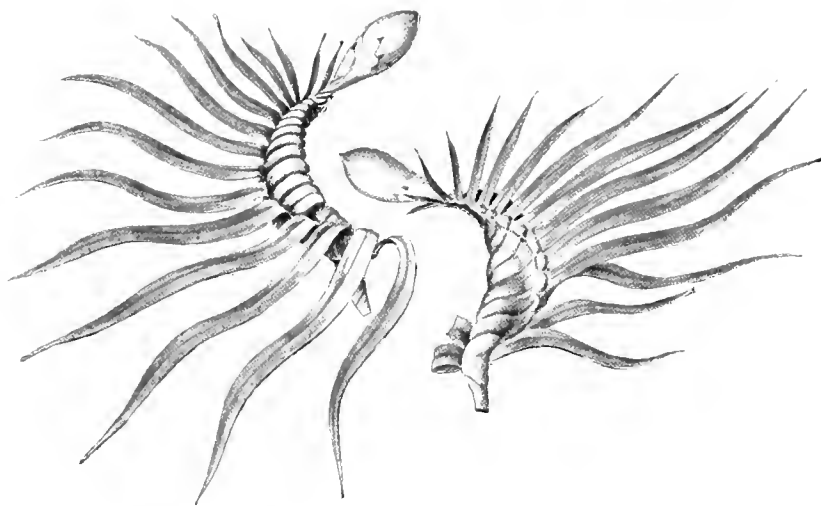

SYRINGING.

Were the carnation not subject to the attacks of red spider it would not be necessary to syringe them at all, except during hot weather, to keep down the temperature, and right after planting, to offset the check that they receive from lifting. The several fungous diseases that attack the plants and cause such widespread ruin in some sections have been the source of much discussion as to whether it would not be wise to discontinue syringing, at least during the darkest months of the year.

Some skillful growers fell in with the theory and succeeded in keeping their plants free from red spider, although not syringing at all between the last of October and the first of April. But I think it is safe to say that most of these have returned to the hard and beaten path, and again use a limited amount of water overhead.

Four or five years ago, when 48° to 50° was the standard night temperature for growing carnations, the practice of not syringing gave excellent results in some cases; but now, when 3° or 4° higher is considered right, such a policy is not to be thought of and a good syringing once a week is about the least they should receive.

In syringing carnations as a preventive of red spider it should always be the aim of the man handling the hose to do as much good as possible with the least amount of water. Indiscriminate throwing on of water will not do at all. It is not the amount of water used that does the work, but how and where it is applied. We not infrequently hear some

TWO VIEWS OF MALFORMED CARNATION STEM.

(Stem received from W. C. Cook, Kalamazoo, Mich.)

Raise the temperature 4° or 5° each week until the proper limit is reached. Cut out the small growths and prune back the stronger shoots to two or three good eyes and start them slowly into growth by frequent light syringings and gradually applying more water at the roots. Be careful, however, not to water much at this stage, for to do so will check root action. Give all the air you can without bringing on mildew, and treat them while they are growing just as you

butes, which promises to earn for it a permanent place. Carnation Marshall Field attracted much attention at the Chicago flower show as a variety which promises to displace Mrs. Bradt, if not all other variegated sorts. The flower is of the size of Bradt, with somewhat similar markings and a much better stem. Added to this it has a free-flowering habit.

Referring to Harlowarden, illustrated in our last issue, Mr. Hartshorne says:

old florist, who ought to know better, claiming that it is the dampness that kills red spiders. Nothing could be further from the truth. It is the force of the water that does the work, applied where the red spiders congregate.

Having in mind the above points, the question resolves itself simply into a mechanical operation. We know that we should not syringe except on a very bright day, use as little water as possible and apply with good force, where it is needed, and do it early in the day to give the plants a chance to dry off before night.

Thirty pounds pressure to the square inch is about right. When the pressure is very much below this it might pay to use a steam pump, for the lower the pressure the more water will be needed to do the work. Use no nozzle. The skilled waterer knows how to apply his index finger to the hose coupler to produce any kind of spray desired. What is wanted is a fan-shaped and fine cutting spray, directed straight across the bench and to those parts of the plant from within six inches of the soil up.

Never direct the spray lengthwise of the bench, for by directing it straight across all surplus water will fall into the walk beyond, while otherwise it will drench the plants and stay on them for hours. A sharp, cutting spray when properly applied, will leave the hearts of the plants comparatively dry, and whatever water does settle on the plants will be divided into very small drops that evaporate quickly. On the other hand, a sluggish spray will stop almost where it hits and follow the stem down to the base of the plant and hang there for hours in large drops that seldom dry up before night. Turn on just as much water as you can direct just where it is wanted.

We syringe the plants from one side of the bench one week and from the other side the next, so as to treat both sides alike. With the small amount of syringing that we dare to do during the dark weather, it is well to watch carefully that no out-of-the-way corners escape attention, for once red spiders get a foothold anywhere, they will spread very rapidly.

All matured flowers should be cut before syringing, as water lodged on them will destroy the brightness of their color. J.

CUTTINGS AND STEM ROT.

Now that the holidays are past, we need to turn our attention toward our stock for next season in earnest, and to give such careful attention to the health of our plants that they may produce the greatest amount of bloom possible without losing the vitality necessary to carry them in good health until June 1, at least.

If you have followed my advice regarding the late blooming sorts, they are now rooted and ready for potting or planting. I use pots exclusively and think it pays for the extra time and room. More important than pots or flats is the soil into which they are planted. This should be but moderately rich and no fresh manures added to it. Soil from a field that has been under a high state of cultivation for several years is the best, and if it needs additional fertilizer use some very old manure and no bone meal or other quick-acting fertilizer.

For potting young carnations avoid, above all other things, your rotted-sod compost pile; there is no other soil that makes the same happy home for stem rot. This has been demonstrated by our

CARNATION MARSHALL FIELD.

experiment stations and more practically in some good carnation growers' houses. There are two forms of stem rot, the one which rots the plant completely off at the top of the soil, and the one that kills the plant branch by branch. This last one is distinctly hereditary and can, to a great extent, be avoided by being very careful not to take a cutting from any plant that shows a sign of this trouble. The first one is the result of improper soil, improper watering and, principally, and above all other reasons, the use of cuttings that have a touch of cutting bench fungus on them.

I attribute my almost entire freedom from this trouble to the fact that cuttings that show any sign of fungus when taken from the cutting bench are thrown out as unfit for use and, next to this, to the fact that no sod soil of any kind is used for their growth, either as pot plants, field plants or in the houses for winter blooming. This is the fourth year for this sort of treatment and up to this winter it was more in the shape of an experiment than anything else, but I am writing now with the backing of three years' success and freedom from stem rot. Losses from this cause in my own stock run less than one plant to the

thousand, and even these few no doubt are some that slipped in from the cutting bench with fungus on them. Occasionally a novelty reaches here full of cutting bench fungus and I always figure on losing a good percentage of them from stem rot, with never a mistake in the figuring. There is one noticeable instance of this on the place this season. When the cuttings arrived last spring the remark was made, "Well, here is a case of stem rot for next winter," and fully thirty per cent of them are now gone with stem rot, while the two varieties on either side of it have not lost a single plant.

There is much said about the careful selection of cuttings from the stock plants (all of which is sound doctrine), but the selection should not stop there. When it comes to taking the cuttings from the sand a liberal throwing out of any fungus infested ones will more than repay the loss of these cuttings. If you do not handle this end of the business yourself you will need a man who has a good eye in his head and good judgment, as there is no use in throwing out cuttings that will make good plants. It is my experience that a good, healthy little cutting will make a mer plant than a great, big,

magnificent-looking one will. Careful observation on this point is well worth while for everyone, for in a few years you can be moderately sure of your success by using only such cuttings as will bring successful flowering plants, other conditions being normal. Here, again, I might add that it is not necessary to throw out rust affected cuttings unless they are very bad, for often they are the best plants by planting-in time.

It is hardly necessary to give advice as to potting or planting, as that is part of every florist's stock in trade and any careful man can do this work. The only point to particularly watch is that they do not get into the soil any deeper than they were in the sand and to have them well firmed.

There are certain varieties that should be propagated this month, those of medium growth and early blooming qualities, as it were, the middle class. The very early ones and very strong growers can better be left until February or even the first of March. All of these matters vary in different localities and growers will have to adapt them to their own particular needs.

ALBERT M. HERR.

FRUITVALE, CAL.—A. Galloway was seriously burned December 23 by an explosion of gas under one of his boilers, which are operated by petroleum. Noticing that the burner was not working properly, Mr. Galloway opened the furnace door, when the explosion enveloped him in a sheet of flame.

ROSES.

IVORY SOAP FOR RED SPIDER.

The red spider is a pernicious pest. But the skillful rose grower never worries over the pest because he knows that careful and efficient syringing will keep it in check. There are times and places, however, in most houses that the spider may be found to be more or less plentiful, especially after the holiday season, when the houses have been carried at a higher temperature than usual, producing a soft growth and also providing a congenial temperature for the spider. To keep the spider in check by syringing is one thing; to clean badly infested plants by this method is an entirely different proposition. In such cases a "dope" of some kind is useful.

Last spring I tried several remedies for red spider, including several tobacco preparations and ivory soap. All proved useless except the soap. For each experiment, several infested plants in pots, were placed in a close frame within the greenhouse and the different preparations evaporated over a spirit lamp, according to the directions given for each. Whenever greenfly were present, these dropped in showers within two minutes after the fumes began to rise, but none of the spiders was killed in any case.

After several discouraging trials with the patented preparations, a number of infested plants were thoroughly sprayed and washed with an ivory soap solution, consisting of two ounces of soap dissolved in a gallon of hot water. After five

minutes, a careful examination showed that every spider touched by the soap solution was killed. Many subsequent experiments gave similar results.

FREDERIC CRANFIELD.

CARRYING ROSES A SECOND YEAR.

ED. AM. FLORIST:—Can roses on their own roots be kept over for the second year successfully and if so what is the best method? How does the product of the first and second years compare?

L. P. L.

There is no reason why roses on their own roots, or any other roots, for that matter, cannot be carried over for the second year, and, if handled with reasonable care, the product of the second year will compare very favorably with that of the first. There are several methods of treating them. The one that seems to be most successful on the whole is to give the plants a slight rest in July by gradually withholding water from their roots for three or four weeks or until they cease to produce young, soft wood, but not enough to make them shrivel or drop their main crop of leaves. When they are sufficiently rested they are pruned back by cutting out most of the small wood and shortening the strong shoots to some extent, leaving good prominent eyes at the point to which they are cut back. Then lift them very carefully, so as to bruise or break no more of the root than necessary and replant in entirely new soil, spreading the roots out as straight as can be. Press the soil very firm after planting. Keep the tops well moistened with a syringe or by spraying two or three times daily until they have started to make new roots, which will be readily determined by the eyes commencing to push out new growth, but until this occurs be very careful not to get the body of the soil too wet, otherwise the plants instead of starting to break strong, clean, healthy shoots will be very apt to get a severe check and in some cases it will kill the plants outright. A material help to get the plants into strong, healthy growth, when treating them as above, is to keep a liberal amount of air on the house all night. This allows them to recuperate after the hot atmosphere of the house during the day. Those trying this method for the first time might well have a few extra plants potted up or heeled into the ground in the open air in case of any going back, which will as a rule show readily in about three weeks.

JOHN N. MAY.

POT GROWN ROSES FOR FORCING.

ED. AM. FLORIST:—Has any grower tried growing roses for forcing one year in pots before planting? If pruning back and transplanting is successful, why would not growing in pots prove more so?

INQUIRER.

When we first started planting roses in benches it was to avoid the great amount of labor of repotting and handling several times in the course of a season, which we found rather a heavy tax on the labor. That is when we were growing roses in pots, boxes, and so forth for blooming the season through, which method was altogether the one employed in this section thirty years ago. There is no reason why this subscriber should not grow and bloom roses successfully in pots for a year and then transfer the same plants to the beds or benches for the second season, but he will find, all items counted, that it will cost him consider-

CARNATION HER MAJESTY.

HOUSE OF CARNATION MARSHALL FIELD GROWN BY CHICAGO CARNATION CO.

ably more to grow them this way than by the ordinary bench system. The first item of pots alone will be rather a large one, as to grow and bloom them successfully they can hardly be taken from a 4-inch pot, which is about the average size for benching, and placed into an 8-inch or 9-inch pot at one shift, which is about as small a size as they can be grown on in and produce blooms of any quality for the winter. Therefore there is not only the expense of two sizes of pots, at least, but added to this must be the labor of potting them twice, which means also considerable time in handling. Then the labor of watering and so forth, will be much greater through the whole season, with, on the whole, a much shorter count of flowers produced. If these extra items of expense are of no consideration, then there is no reason why one should not grow his roses this way and, if the plants are reasonably treated while in pots, about June 10 to 20, after running them this way all through the winter and spring, water may be gradually withheld for two or three weeks, in the meantime placing them on a bed of ashes in the open ground. This will give them a slight rest. Then trim out the very weak wood and have their new quarters duly prepared for them. Then shake most of the old soil from the roots and plant them in the new soil. Attend carefully to watering, syringing and so forth, to get them to start into new growth, and for the second season the grower will have as fine a house of roses as could be desired.

JOHN N. MAY.

GRAFTING.

This method of propagating roses is rapidly gaining favor and, although it is a more expensive method than is that by cuttings, I feel confident that it pays well in the end. As a general thing grafted stock is more hardy and vigorous and better able to stand those sudden changes which are so often dangerous.

With many florists who have never undertaken this method the impression prevails that it is a difficult and costly operation. However, I do not consider it as such. With care in the process of grafting and after the plants are in the case the number of plants which fail to strike should be small.

The first thing necessary is a properly constructed case. Nail two boards to the sides of a bench and close in the ends in the same way, across these lay sash similar to hotbed sash; you then have the grafting case in its simplest form. Of course more elaborate contrivances can be made use of to greater or less advantage, but if one has the joints quite tight in the case described there is no reason at all why he should not succeed.

The temperature in the case necessary to the operation is 75° and in order to maintain this temperature close in underneath both the sides and ends of the bench, so that you will be able to hold the heat given off from the pipes. A strip of cotton cloth tacked to the bottom of the bench will answer the purpose very well.

On the bottom of the bench spread a layer of sifted ashes about one or one and one-half inches deep and wet them well. It is also a good plan to sprinkle them over lightly with air-slaked lime before each batch of plants is inserted. This will help to check fungus, which is liable to appear.

The operation of grafting is simple, yet it must be performed with care. When the Manetti stocks arrive they should be potted into as small pots as possible, usually 2½-inch or 2½-inch, and placed at once in a house where they will start slowly. By placing them underneath a bench in a carnation house I find we receive very good results. They should be kept watered, never allowing them to get dry, but neither should they be kept soggy. With this treatment they start in gradually to make roots and as soon as the eyes are seen to begin swelling they should be grafted. They will then start in with a sudden flow of sap as soon as they get the change of temperature in the case and should be able to continue in the rapid growth which is necessary to the scion already in a growing condition.

When selecting wood from your plants for grafting take only healthy and well ripened stock which shows an eye not yet started. A good plan to adopt, so that you may not be without a supply for grafting, is to leave two or three additional eyes on the plant when cutting the flowers; these can then be cut off and used when needed, and they are usually the best stock obtainable.

When grafting always use a very sharp knife, make a clean cut and do not allow the scion to become dry or shriveled. It is best to place them in a dish of water until they are used.

There are several ways of grafting, differing according to the size of the stock or scion. The following will describe the most common method: Cut the stock off about two inches above the pot, making an oblique cut about three-fourths of an inch long. Cut the scion in the same way, so that the two will match as nearly as possible. Of course it is not possible to have them always match, but all that is necessary is to have one side perfect. The sap from the Manetti flows from beneath the bark and it is this which causes it to adhere. The best article to use for binding the joint is raffia, as it does not rot easily nor is it so likely to cut into the bark when they start to grow.

Another way which works well when the stock is very large and the scion small, is the side graft. Make a cut on the side of the stock about the same

HOUSE OF CARNATION HER MAJESTY GROWN BY THE CHICAGO CARNATION CO.

length as in the former case and deep enough to go a trifle beneath the bark. You then can make a good joint with a small scion and will find they will strike as well as the former way but are more liable to break off when they are being shifted and handled.

After placing the plants in the case they should be watered thoroughly and be kept damp, holding the temperature as near to 75° as possible and avoiding all draughts. The scions should adhere in about two weeks. When you see that they are forming a callus you can begin to give a very little air each day, but be careful not to give too much; a quarter of an inch should be enough for the first few days, increasing gradually until the plants are hardened. Look the plants over carefully every morning and if any shoots from the Manetti appear they should be cut back close to the plant.

R. I.

The Prices of Plants.

ED. AM. FLORIST:—W. L. Smith states facts and only facts. "The shipping plant business is in a deplorable condition." What can we do? My answer is, grow something that pays better.

HENRY EICHHOLZ.

ED. AM. FLORIST:—I know of no remedy that has proved efficient in preventing a gradual reduction in price, which always ensues when competition in any line of business becomes keen. The proper method by which to arrive at prices at which goods should be sold is first to ascertain the exact cost of production, then to ascertain the cost of advertising and selling and collecting the money from sales; then ascertain what percentage of loss should be charged against the goods because of stock being left over unsold. To the sum made up of the above items a substantial profit should be added, not less than twenty to thirty per cent. This should form the net price below which the goods should not be sold under any circumstances, excepting at the end of the season, when they may be in danger of being left over unsold. They can then

be offered at a special reduction in order to clean out.

I have little faith in combinations composed of a large number of individuals for the purpose of advancing or maintaining prices. They are generally broken by some "smart aleck" and frequently result in much lower prices than would have ruled had no combination been formed. I believe that the only way in which an advance in price will come about is for each individual grower to cipher out how little he is getting out of his business at the present time and to make up his mind that he will get fair prices for his goods, regardless of what the other fellow does.

There are always some men in every trade who imagine that giving goods away is doing business. Such make a failure, beat their creditors and frequently move to another locality and try the same thing on again, and there are usually enough of these in existence in every trade to keep prices below the level at which they legitimately ought to stand.

C. W. WARD.

Forcing Campanula Medium Calycanthema.

This campanula is described as a valuable and beautiful pot plant suitable for forcing. A writer in *Moller's Deutsche Gartner-Zeitung* recommends that the seed be sown in April or May in order to produce strong plants susceptible of forcing. The seedlings are pricked once and then planted in a rich, mellow soil in the open. They are then potted about the middle of September and placed in a closed cold frame in order to induce a vigorous root growth. As soon as that is accomplished much air should be given, or perhaps the sash can be entirely removed until freezing weather comes. The forcing of these campanulas commences in January and the pots are for that purpose first placed in moderate heat, which should be increased from 65° to 70°. The flowers will then bloom in from ten to twelve weeks. *Campanula Medium calycanthema* grows to a height of about three feet and produces from five to eight shoots, or sometimes more, which are densely set with large double

flowers. This campanula is equally valuable for forcing and for out of doors. The most pleasing of its colors is the pink, but the white and light blue are very handsome. For indoor use they will keep six weeks if properly cared for.

The Future of the Chrysanthemum Society.

BY WILHELM MILLER, ITHACA, N. Y.

[Presented to the Chrysanthemum Society of America at the Chicago convention, November 12-13, 1902.]

It is one of the unrealized hopes of my life to attend the first annual meeting of the Chrysanthemum Society of America. I count it a great honor to have the privilege of addressing the first convention, if only by proxy. I take a very hopeful view of the future of the chrysanthemum in America, and of the society which is devoted to its interests. This exhibition and convention constitute a great step in advance. It is the fulfillment of a hope that has been in the hearts of chrysanthemum lovers for many years. The first steps in an enterprise of great magnitude are necessarily slow and painful ones. I trust that progress from this time forth will be sure and steady. The "fad" stage is past, but the chrysanthemum is sure of a permanent and important place in American life.

The biggest fact in American floriculture to-day, it seems to me, is that the love of flowers is not so generally diffused among our people as it is in the Old World, and especially in England. The chrysanthemum is essentially a people's flower, rather than a class flower, as orchids are. The hope of the future for this society lies in popularizing the chrysanthemum. In other words, the great object for the Chrysanthemum Society of America is to create and organize the amateur spirit. It is a numerous class of amateurs, skilled and unskilled, which American floriculture most needs to-day.

In order to popularize the chrysanthemum, there are two things to accomplish: First, to improve the flower itself; second, to perfect the organization of the society. As it is to-day, the chrysanthemum is too exclusively a florist's flower. By this I do not mean that the florist's interest in the chrysanthemum is a short-sighted and narrow-minded one. On the contrary, it is the florists who are the backbone of the society at present. They founded it, and have given practically all the money for its support. They have also done most of the work, and their influence has been steadily progressive. The interest of the liberal-minded florist is identical with that of the people. The greater the popular interest in flowers, the greater is the florist's return. It is possible that a day may come when certain florists will carry only one of two classes of chrysanthemums, but I venture to predict that at that day their work will be more profitable than it is now.

Let me define more clearly what I mean by adapting the flower to the people's needs. The six-inch flowers and the flowers of even greater size are only for the florists, the rich and the skilled amateurs who are willing to compete for prizes in the exhibition hall. In other words, these large flowers are for classes rather than for the masses. What we want is more of the four-inch flowers in millions of homes. The chrysanthemum greatly needs improvement along two distinct lines: First, as a hardy border plant; second, as a subject for the window-garden.

As an outdoor plant the chrysanthemum has, at present, certain limitations which are somewhat trying. The old-

HARRISH LILIES AT GEO. A. KUHL'S, PEKIN, ILL., DECEMBER 5, 1902.

Fancy Foliage and a Few Flowers.

Wreath of Gloxinias and Foliage.

FUNERAL WREATHS OF MISCELLANEOUS MATERIAL SUCH AS ANY GREENHOUSE ESTABLISHMENT AFFORDS.

fashioned Chinese pompons, which our grandmothers used to call artemisias, have little button-like flowers scarcely half an inch across. The strong point about them is their perfect hardiness, and the fact that they add color to the garden in October and November when the frost has killed every other bit of herbaceous growth. Everything ought to be done to increase the size of the flowers of hardy chrysanthemums, and to bring in as many distinct shapes as possible. There is little to hope for in the way of new colors. The ideal thing is a race of perfectly hardy chrysanthemums, having all the beautiful forms of the Japanese types, and capable of producing four-inch flowers with a minimum of cultivation, especially a minimum of disbudding.

Ever since the large-flowered Japanese varieties first came to America the effort has been made to grow them out-of-doors. The results are generally disappointing in the northern states. There is not one man in ten thousand who has such enthusiasm as Mr. J. N. Gerard, of Elizabeth, N. J., who produced magnificent six-inch flowers on bushy plants on a city lot 50x150. The fact is that most people cannot afford the expense and trouble of such a tent as Mr. Gerard used, to say nothing of greenhouse sash and temporary heating devices. So far as I know, California is the only place where the big Japanese flowers can be grown to perfection out-of-doors without any glass protection, and with a minimum of care. Perhaps this is done also in some of the southern states; but for the northern and middle states, a great problem is to increase the size and diversify the shape of the flowers while still retaining perfect hardiness. This is essentially an American problem and the plant breeder who successfully solves it should make a fortune.

In struggling after this great prize the closest attention should be paid to the problem of disbudding. So far as the general public is concerned, it is too much trouble to disbud chrysanthemums. The florist does it and, in a way, the people pay him for this work when they buy his cut flowers. Disbudding is now, and perhaps always will be, essential to the production of large flowers. But why should we not try to get varieties which require practically no disbudding? The carnation has been steadily selected with this end in view. I dare say that if any one will look closely among a hundred varieties of chrysanthemums as they are to-day, he will find a few that tend to make comparatively few buds.

The other great chance for the improvement of the chrysanthemum itself is along the line of adaptability as a subject for the home window-garden. The ideal window plant so far as ease of cultivation is concerned, is the geranium. Anybody can grow a geranium or a begonia. Few people have the patience to grow successful chrysanthemums for the home window. The ideal chrysanthemum for the home window, as it appeals to me, is a bushy plant in a six-inch pot, bearing ten flowers, most of which average four inches across. It would be better to say that two distinct ideals are desirable for the window garden. The one just defined is suitable when mass effects of color only are desired. However, there are certain varieties, such as lora, that have a very distinct form, which is best realized when the flower is five or six inches in diameter. It stands to reason that the average amateur must be content with only two or three such flowers on a single home-grown plant, unless it is grown in a larger sized pot than is commonly used. The expert amateur may do a little bet-

ter. In growing bushy plants for the home window, disbudding is again one of the most troublesome features, but perhaps the greatest limitation of the chrysanthemum to-day as a window-garden plant is that it requires a longer period of cultivation for a relatively short period of bloom than many other flowers. The important question then arises, "Shall we try to decrease the period of cultivation and lengthen the period of bloom?"

An ever-blooming race of chrysanthemums opens up boundless possibilities to the imagination. On the other hand, some florists say that the people would not care for such a class of chrysanthemums even if we could get them. They declare that the chrysanthemum is by nature a short-seasoned flower, and that its lack of fragrance is a serious handicap to it, if it is to compete with its only rivals among long season florists' flowers, namely, the rose, carnation and violet. They say, moreover, that the chrysanthemum is too firmly fixed in the minds of the people as a short-season flower, and that a fashionable demand for it out of season could never be created. Indeed, they assert that one of the very reasons that made the chrysanthemum craze possible, was the fact that the chrysanthemum came to fill a decided gap in the floral year.

In reply to these assertions of older and wiser men, I can only affirm my implicit faith in the wonderful plasticity of the chrysanthemum. Of all the species in the great family of composites, I think it has the greatest genius for variation in form and color, its only rivals in this respect being the dahlia and the China aster. So far as the nature side is concerned, I believe an ever-blooming and even a fragrant race of hardy, large-flowered chrysanthemums could be secured, offering

considerable variety of form and such variety in color as the chrysanthemum now has. Such a task, however, is perhaps the work of a century or more. On the human side of the question, there are serious doubts. It stands to reason that, even if we had the beginning of an ever-blooming race of chrysanthemums adaptable to the home window-garden, the education of the people would be a slow and expensive process.

The color range of the chrysanthemum is rather narrow compared with that of the dahlia. It is particularly lacking in bright shades of red and a true pink of a permanent nature. Blue is probably out of the question, at least such shades as the china aster and cineraria enjoy. In plant breeding in general it is usually easier to produce new colors than new forms that are desirable, but personally I am very skeptical about any great extension of the color range in the chrysanthemum. So far as I know, there is no other species to look to for purposes of hybridization with the idea of getting new colors, and I am inclined to think the color possibilities of the chrysanthemum have been developed nearly to the limit during nearly two thousand years of cultivation.

Let us now consider the future of the society which is devoted to the chrysanthemum in America. The history of special floral societies shows that there is a danger of becoming too narrow. The chrysanthemum lover may know perfectly well that the chrysanthemum is the finest flower in the world, but he ought to be careful how and where he says it is the only flower in the world. In other words, some of the special societies, both at home and abroad, which have outgrown their usefulness, have died because they were managed too exclusively by one class of persons, or else because the societies did not keep in touch with the greater forces that exist in the world. The work of the Chrysanthemum Society is not the most important work in the world. For instance, the work of civic and village improvement has a much greater scope. I do not believe that the Chrysanthemum Society of America can ever exercise any very great influence until it becomes allied with local societies all over the country. In England, the National Chrysanthemum Society is affiliated with several hundred local societies, which in this case are devoted exclusively to the chrysanthemum. In America we ought to look

at things in a large way, and the Chrysanthemum Society of America should seek alliance with civic and village improvement societies and all sorts of local clubs devoted to horticulture, floriculture and gardening in general. What we want is a practical scheme that will make it worth while for these various societies to affiliate with us so that their members will send plants to our national exhibitions and hold autumn flower shows in their own localities.

We ought to profit by the lessons of history. Have we made a sufficient study of the methods of the world's greatest society, the National Chrysanthemum Society of England? The methods by which this society has achieved world-wide success are well worthy of our careful consideration. Of course we should not copy these methods literally. The most important factor in the success of the English society, it seems to me, is that the element of continuous interest is supplied in the management of its affairs. In other words, they have a salaried official, a secretary, who doubtless performs most of the drudgery of the society, and is presumably on the lookout for enlarging the membership. Could we not in this country get a young man who is fond of floriculture and has the missionary spirit, who would be the permanent secretary of the society? I believe that the services of such a man would be essential to the success of the society, if it is to enlarge its province after the manner of the English society, namely, by holding national exhibitions in the twelve or twenty largest cities of the country.

Americans are surely not deficient in organizing ability. What we most need is the application of this organizing spirit to the peculiar problems of the Chrysanthemum Society of America. I firmly believe that a scheme could be worked out by which the society could be put on a permanent and almost self-supporting basis. By self-supporting I mean that the secretary would earn his own salary and more. Such a plan would probably include a list of patrons and fellows who should receive special privileges in return for larger contributions to the society. But the annual membership fee is one of the most important items. People do not like to give up a dollar year after year unless they have something to show for it. As it is now, some of the members of the Chrysanthemum Society are not able to attend the meetings or the exhibitions in the big cities, and they do not even have a report of the annual proceedings, nor is there any distribution of plants. The annual membership fee ought to be based upon an appeal to enlighten self-interest rather than charity. In other words, there should be something like a "value received." We ought to have a plan by which there is some substantial encouragement for local organizations to affiliate with the Chrysanthemum Society of America. We should by all means have annual reports embodying the scientific and practical papers and discussion, and the subject of free distribution of plants to members is well worthy of close study. The Ottawa Horticultural Society gives its members two dollars' value for one in the form of plants and bulbs, which it is able to do by buying plants at wholesale. This is the secret of the remarkable success of that local society. Is not something of the kind possible on a national scale?

So far the burden of the work and financial responsibility has rested upon the florists, many of whom have doubt-

THE PHILADELPHUS IS WORTHY OF MORE GENERAL USE.

less suffered great personal loss at times. The hope of the future is a great body of amateurs. Given the amateurs, the rest will take care of itself.

At the present day there is little inducement to preserve the minor types of the chrysanthemum, such as single forms, both large and small, the pompons, the three types of anemones, and certain curiosities, which we are wont to lump together in the Japanese section. We should not blame the florists for this state of affairs. It is unreasonable to ask them to preserve types for which there is at present very little demand. If we can secure a great body of amateurs, who will devote their time to the chrysanthemum, these rare and curious types will be preserved in the collections of those who can afford them.

On the whole, it seems to me that the future of the chrysanthemum and of the society devoted to it in America is full of hope. Let us rise above class distinctions and prejudices and endeavor to place both the flower and the society upon a permanent basis.

The Philadelphus.

One of the best-known shrubs, and always popular, is the philadelphus, yet there is much confusion as to the name and variety. It is commonly called syringa, which is the proper name for our lilac, but it is sometimes called mock orange and jasmine. While almost everyone is more or less familiar with the plant, I find comparatively few who are aware of there being some which grow like the one here illustrated, showing but a small section of a backyard screen eighteen feet high. If grown in more space they make a wonderful display. Of course they are too large for many places, where the varieties four to five or even six feet are better adapted, but where this large variety is adapted, nothing will answer for its substitute. This variety is either *P. Gordonianus* or *P. pubescens*, both of which grow very large. The branches are beautiful cut for decorations, but the odor, although sweet, is too strong for some people to endure indoors. C. B. W.

Carnation Society's Meeting Place.

The Germania Club house, 122 Schermerhorn street, Brooklyn, has been selected as the meeting place for the American Carnation Society, February 19-20. The club house is within five minutes walk of the exhibition hall and is well equipped as a meeting place. The customary bouquet will also be held at the club and it is possible to procure meals there at all hours, which will be a great convenience to the visitors. The arrangements are in the hands of the Brooklyn Horticultural Society, organized a year ago for this purpose. Much interest is already being manifested in the convention and exhibition and a large attendance seems assured.

WAUWATOSA, WIS.—Alex Klokner, of Milwaukee, is now making his headquarters at his new greenhouses here.

CATONSVILLE, MD.—A large greenhouse at the country place of Gen. John Gill was destroyed by fire December 31.

GALESBURG, ILL.—I. L. Pillsbury and wife left January 5 for a visit with a brother, A. N. Pillsbury, at Palma Sola, Fla. It is hoped the trip will benefit Mrs. Pillsbury's health.

(Where the American Carnation Society meets February 19-20, 1903.)

New York.

BROOKLYN SOCIETY COMPLETES PREPARATIONS FOR THE CARNATION MEETING. — PLANS WELL FORWARDED. — GOOD MEETING PLACE PROVIDED. — A LARGE ATTENDANCE ASSURED. — STATE OF THE MARKET. — STOCK MOVING WELL.

The Brooklyn Horticultural Society held a good meeting at the society's headquarters, 122 Schermerhorn street, on Monday evening, January 5. As the date for the approaching carnation meeting draws nigh the interest among the society's members increases and an enthusiastic reception is assured the visitors, as well as an exhibit of carnations of surpassing extent and interest. Thirty members were present at the meeting and preparation for the coming event was the principal business on hand although there is really little left undone now, so thoroughly has the preliminary work been done. The chairmen of the various sub-committees reported progress and letters from a number of prominent concerns gave evidence of a widespread interest in the trade exhibition, which has been put in charge of Wm. Plumb, who is a past-master in this specialty. It was announced that either Timothy Woodruff or St. Clair McKelvey would likely be secured for toast-master at

the great banquet. Several donations of cut glass, silver cups and other special premiums for the exhibition were recorded. It transpired that a goodly attendance of ladies is expected at the convention and plenty of entertainment is promised them. Secretary A. M. Herr, of the American Carnation Society, came over from Lancaster, Pa., to attend the meeting and was enthusiastically welcomed. He addressed the meeting, speaking in a hopeful strain and gave his estimate of the attendance at the convention as fully 400, the concession of one and one-third fare for the round trip having been secured from all the railroads. The next meeting will be held on January 19. The Germania Club rooms, on Schermerhorn street, where the meetings and banquet to the American Carnation Society will take place, are admirably adapted for the purpose and all the appointments are first-class. Arrangements have been perfected to comfortably seat 450 guests at the banquet. The Brooklyn Institute, on Montague street, where the exhibition will be placed, is but a short distance from the meeting hall and, being in a very swell neighborhood, it is expected that the aristocratic element in Brooklyn society will turn out strong.

Conditions in the cut flower traffic here are about normal for the season. The

usual quiet spell succeeding the holiday fever is on but the unfortunate surplus of flowers which has made so much trouble on some past occasions is not in evidence and the product received is handled with generally satisfactory results. Roses do not accumulate to an embarrassing degree and as the quality averages good no fault can reasonably be found. Carnations are, as expected, more abundant, with prices well down below the holiday figures. Violets hold their own as well as anticipated, the poorer grades being the principal stumbling block. Lily of the valley is plentiful. It is a persistent commodity just now in the hands of the curbstone dealers all along the busy section of Twenty-third street, an acknowledged had sign for the prosperity of any flower. Other bulbous material is also in excess of the demand therefor. Yellow narcissi of good quality are now being received in good supply and sell fairly well.

Chicago.

ROSE CROPS SHORTENED BY DARK WEATHER.—QUALITIES OFF AND SUPPLIES SHORT OF THE DEMAND.—A PLENTY OF CARNATIONS AND LOTS OF VIOLETS.—BIG GLASS AREA GOING UP IN THE SPRING.—ALL GROWERS PLANNING TO BUILD.—THE FERN BUSINESS.—MANY TULIPS.—NOTES.

Early in the week the dark weather made its long continuance apparent in the rose crop, for supplies shortened up decidedly and qualities, which had been vastly improved by a few days of sun, deteriorated again. The receipts of Beauty shrank to a mere fraction of the normal production and most of the buds were more or less blackened and distorted, the short and medium lengths being the worst. Bride and Bridesmaid show the effects of the weather less than Beauty, except that the cut is reduced in the same ratio. Bridesmaid continues of very fair color, considering the gloom of the past week, but the buds are rather soft. The supply of the better grade of roses is far below the requirements of the shipping trade, which has been fairly active this week. Every house in town has been unable to supply its orders for roses and prices have been pushed up very near to the Christmas list for selected stock. White carnations are wanted and have been stiff in price, but there are enough of everything else, pink rather hanging fire in many houses. E. E. Pieser says that the most plentiful item of the week's supply has been violets, but he lays this not so much to increased receipts as to an absence of demand, still the better grade of goods is well enough cleaned up so that \$2 is asked for the prime stock. The receipts of valley, Romans and Paper Whites are on the increase and Amling is getting good quantities of sweet peas. This material is selling for funeral flowers and stavia is a merchantable article because it fills in and saves stock.

It begins to look like another record-breaking year in the matter of putting up glass for cut flowers for this market. Probably the largest range will be built by Wietor Brothers, but George Reinberg will not be far behind and J. A. Budlong will add largely to his area. Benthley & Company are planning a big addition and so are Weiland & Risch, the South Park Floral Company, William Dittman, John Muno, Adam Zender, John Didier, the Beckers and a dozen others; in fact, it begins to look as though he will be a lonesome grower who is not this spring

engaged in the merry scramble to get another house ready for early planting.

The Flower Growers' Company opened its new wholesale market last Tuesday morning. They have a very large room, admirably adapted to their needs and the start was auspicious, although many of the growers who are said to be going in were not ready for the opening day and only a part of the space was occupied. Each day since the opening has seen some accession to the ranks and the general report is of satisfactory business. An entertainment is planned for Tuesday evening to familiarize the trade with the place.

As an indication of the extent of the business in ferns it is interesting to learn from C. S. Stewart, manager for Frank Garland, that they sold in the month of December ferns to the amount of \$1,127.45. This is only one house of eight or nine handling this item largely. Mr. Garland has 400,000 tulips on the way for the next few months, quite a few more than last year. He expects to begin shipping in about ten days. Last year he was in with tulips before Christmas, but says he found nothing in it.

Some of the growers are in hard lines for coal. The big growers, who made their contracts last spring, are being taken care of at reasonable prices, although few of them are getting the grade specified, but the grower who buys in small quantities is having to skirmish for his supplies. Some retail coal dealers are asking \$8 a ton for Pocahontas and \$6 for Illinois and Indiana block and say that the householders take all that can be supplied at that price.

Wietor Brothers have secured a ten-acre tract about a mile south of their greenhouses from which they will get their soil for this season; they have hauled it three times as far.

C. E. Methfessel, the Englewood retailer, is ill and in the hospital. The store is being run by his daughter.

C. M. Dickinson is about again after a ten days' stay in bed, but has not yet fully recovered.

Charles Siegk is back in town, his plans for opening a store in Joliet having miscarried.

"Mons." Olson, of J. A. Budlong's staff, has been ill this week and off duty.

J. D. Thompson is making an eastern trip.

Visitor: Thos. Roland, Nahant, Mass.

Philadelphia.

CARNATION NIGHT AT THE CLUB.—ALL THE NEW ONES ON VIEW.—NOVELTIES FROM A DISTANCE SHOW UP WELL.—MARKET A LITTLE DULL.—GOOD STOCK STILL BRINGS FAIR PRICES.—THE FIGURES.—COAL SCARCE.—VARIOUS NOTES.

The most interesting feature of the week was the carnation exhibition held in connection with the January meeting and smoker of the Florists' Club. There was a fine show of cut blooms, most of them coming quite a distance, and with few exceptions carrying very well. The collection, both in quality of flowers and as a whole, was the best the club has ever had. The J. D. Thompson Carnation Company, of Joliet, Ill., staged their light pink, Enchantress, which was easily the first and most noticeable variety in the display. Governor Wolcott was probably the best white, while M. A. Patten, a large striped variety, was fine and is said to have the good quality of being equal to Scott as a producer. Nelson Fisher was another of their exhibits and is said to be better than the Lawson. The Chicago Carnation Com-

pany, also of Joliet, Ill., sent vases of their new ones, Harlowarden, a fine scarlet, Marshall Field, a striped like Bradt, and a Daybreak pink, Mrs. Higinbotham, all of which were very fine. S. J. Rueter, Westerly, R. I., sent his white, Lillian Pond, which is a great flower. Isaac Passmore staged his large white seedling, No. 3, certainly a choice one. What a lucky man to get such a good one out of three. Dailedouze Brothers had White Bradt and their blush seedling, Fragrance. These two are great carnations, the blush seedling being an especially fine thing, a taking color, having a great fragrance, and this, with its good stem, make it a great "counter" carnation. Two mammoth seedling whites, four and four and one-half inches in diameter, attracted a deal of attention. The Little South Floral Company, of Natick, Mass., staged through Leo Niessen a commercial white called Queen. It has all the appearance of a winner in the race for favor with the public. Robt. Craig & Son's vase of Adonis attracted as much attention as ever. A vase of President McKinley, a very choice dark pink with a neat round flower full three inches in diameter, on a good stem, was striking. It is much better than America, which it somewhat resembles. This came from E. T. Grave, Richmond, Ind. Murphy's White, from Cincinnati, a medium-sized flower, had not been packed properly and did not carry well. It is said to be very prolific. W. G. Saltford sent a few of a large magenta-colored flower called Fair Harvard, a good thing in the color. Henry Eichholtz, of Waynesboro, staged a vase of his new striped variety called Tiger, a very showy sort having a large flower and good stem. There was a large attendance and all seemed much interested in the exhibits. J. D. Thompson, of Joliet, Ill., was present and spoke of carnation growing in the west. Eugene Bailedouze, of Brooklyn, also spoke, and in reply to a question said that they always pick their carnations in the morning and keep in water for twenty-four hours before shipping. The matter of the approaching exhibition of the American Rose Society was taken up and from the action of the club the members of the society should have a pleasant time while here.

There is a lull, a quiet spell has set in, and with the exception of a few large balls there is little doing. The dull and cloudy weather which has prevailed lately has kept the supply of flowers down so that there is no great surplus. Prices are receding a trifle. For special Beauties \$9 per dozen is still asked, but they move slowly and a lower figure is likely soon. Teas sell at \$15 for the specials. Liberty ranges from \$35 for the extra choice to \$15 per hundred for fifteen-inch stems. Carnations are now \$4 for the selected stock, with a few extras at \$5 to \$6; a very fair grade sells for \$3. Double violets range from \$1 to \$1.50 per hundred, singles 50 cents to \$1 and very scarce. Mignonette is \$3 to \$4, valley \$3 to \$4, calla lilies \$10 to \$12, longiflorums \$12 to \$15. No gardenias are to be had.

The coal situation is becoming alarming. Many of the growers have only one week's supply ahead, and some not even that much, and nearly all their time is taken up with hunting up a fresh supply at prices ranging anywhere from \$8 to \$10 per ton. Should severe weather interfere with the railroads' movement of cars the result will certainly prove disastrous.

I regret to announce the death of John J. Stoneham, an associate member of the Florists' Club. He was a very genial gentleman and will be much missed by the bowling contingent, of which he was an active member. His funeral took place Wednesday, January 7.

Benj. Dorrance, of Wilkesbarre, at the club meeting, said the rose society was never in a better position financially and predicted a great meeting and a fine show this spring. K.

Belated Christmas Trade Reports.

SPOKANE, WASH.—Miss Rose Wright reports that holiday trade has been good, with cut flowers in strongest demand.

BURLINGTON, VT.—C. E. Gove says there was enough Christmas stock and sales increased ten per cent. There was added call for primulas and cyclamens.

HAMILTON, O.—J. Lodder & Sons report a very poor sale on plants in bloom, with marked increase in the holiday call for carnations. Total sales were about as in 1901.

COUNCIL BLUFFS, IA.—J. F. Wilcox says he was short on all cut flowers for the holidays, because of dark weather, and, by the same token, qualities were poor. There was a good trade on Boston ferns.

HARRISBURG, PA.—G. Hanson says the holiday business was all done in two or three days but that the aggregate was about as last year, enough stock but prices were a little above those of 1901. Plant trade increased.

DOVER, N. H.—There was a decrease in all plant sales, but C. L. Howe says the total of Christmas business was twenty-five per cent greater than a year ago, due to a large increase in cut flower sales. Qualities were good, stock short and prices high.

VICTORIA, B. C.—J. T. Higgins says it rained great guns all day on December 24, but that the total of Christmas sales was about as last year. Prices were favorable, supply being much behind the demand, qualities fine, chrysanthemums being all the rage.

DANBURY, CONN.—Holiday sales were fifty per cent ahead of 1901, with better prices. Theo. H. Judd noted large demand for carnations but little call for violets. There was increased sale on potted hyacinths, azaleas and holly wreaths for cemetery use.

AUBURN, N. Y.—James Morgan says carnations are nearly a failure in the vicinity this year and stock was scarce at Christmas, but the total sales were about the same as last year, due to higher prices. There was a small increase in the sale of flowering plants.

OMAHA, NEB.—New Year's business was very heavy on all kinds of cut flowers. To give an idea, Hess & Swoboda sold 240 dozen carnations on that day at 75 cents and \$1 per dozen. January 2 there was a large funeral and one firm made \$450 worth of designs.

HARTFORD, CONN.—Holiday trade started in earlier than usual and kept up steadily to the end, which gave an opportunity for a twenty-five per cent increase in sales without higher prices on other items than carnations, cut flowers were short of the demand, except bulbous stock. John Coombs found an increase in the sale of both flowering and decorative plants.

VANCOUVER, B. C.—James Pont reports Christmas trade about as usual in its main features but sales increased twenty per cent. Chrysanthemums were in great favor and there was larger call than ever for flowering plants. Customers all chose *Asparagus plumosus* for green.

BURLINGTON, IA.—Joseph Bock says the retail prices were the best on record at Christmas and sales increased twenty-five per cent, with enough roses and carnations but few violets. The call was all for high grade, fresh flowers. There was an especially good sale for ferns.

WILMINGTON, DEL.—Christmas trade was fairly good here with the retailers and the wholesale carnation growers had plenty of bloom, but the prices in Philadelphia were all the way from good to bad, there being a great many salted flowers dumped on the market at the last minute.

TOLEDO, O.—Geo. A. Heil says that the holiday business was ten per cent ahead of last year, with plenty of everything except violets, which, with carnations, were most in demand. There was considerable increase in the sale of plants, poinsettias, azaleas and cyclamens being most called for.

ANDERSON, IND.—Stuart & Haugh say the holiday trade was about ten per cent ahead of last year, with a marked increase in the call for carnations and violets, the latter being the short item. There was a decrease in the sale for flowering plants but about the usual demand for palms and ferns.

ROCHESTER, N. Y.—There was a marked increase in the holiday sales on plants in flower but J. B. Keller Sons say the total business was about as usual. Enough roses and carnations, violets very much under the demand; no sale for bulbous stock except Romans in pans. Poinsettias in pans sold better than ever.

WICHITA, KAN.—Christmas business was from ten to twenty per cent ahead of last year, considerable stock being shipped in to meet demands. Carnations were most wanted and the sale of plants in flower showed an increase. W. H. Culp & Company say they sold holly by weight and found it a very satisfactory way to handle it.

NORWICH, CONN.—Christmas business was fifty per cent ahead of 1901, with supplies short except bulbous stock. Jos. F. Smith says that the trade would not stand the prices for good stock made necessary by wholesale prices in Boston and New York of 20 cents to 25 cents on roses. There was a big increase in the sale of plants in bloom.

TERRE HAUTE, IND.—The Christmas trade this year was a decided increase. Roses and carnations cleaned up well. Bulbous stock, azaleas and so forth sold well. Holly and green sold about the same as former years, with holly exceptionally good. All the florists report an exceptionally good year all through, according to the M. H. Hunt Floral Company.

NEWARK, N. J.—Kimmerle & Minder report a very satisfactory plant and cut flower trade for Christmas. Poinsettias in pans, cyclamens and Lorraine begonias in flowering plants, ardisias in berried plants and *Pandanus Veitchii* in ornamental foliage plants were the best sellers. Orange trees, azaleas and heaths showed a slight disposition to lag. Baskets filled with assorted foliage

plants of a hardy nature were in good demand. Roman hyacinths and Paper White narcissi were, as elsewhere, slow to move.

NEW ORLEANS, LA.—U. J. Virgin found the holiday business about as last year but retail prices on cut flowers were twenty-five per cent higher. Qualities were good and roses and carnations equal to the demand. Plant sales were ahead of the record of any year and the call for flowering subjects was above the supply. There was a big increase in the sale on holly and wreaths.

NEWS NOTES.

WEST HOBOKEN, N. J.—Ernst Asmus is making a western trip.

HARTFORD, CONN.—James Smith is recovering from a severe illness.

TACOMA, WASH.—A. A. Hinz had roses in bloom outdoors on New Year's day.

GRAND RAPIDS, MICH.—Eli Cross shipped 20,000 violets to Chicago for Christmas trade.

BEVERLY, MASS.—D. H. Guinevan has filed a bankruptcy petition, liabilities \$8,127.28; no assets.

CANON CITY, COLO.—Mrs. Thompson has bought the McKay interest in the firm of Thompson & McKay.

YORK, NEB.—C. S. Harrison says that the pæonia growers of Nebraska have stocks aggregating only 200,000.

LOUISVILLE, KY.—Mrs. Chas. Raynor has sold her store to Mrs. C. B. Thompson, who has placed her son in charge.

LAURELBRANCH, N. C.—Mrs. Alice Bryan has bought the stock and business of the C. W. Smith Florist Company.

WICKFORD, R. I.—The Homogansett Greenhouses have been sold out to a new company called the Homogansett Florist Company.

SOUTH ORANGE, N. J.—The business of W. A. Manda has been incorporated under New Jersey laws, with a capital stock of \$150,000.

BATAVIA, ILL.—Wm. Clark was visited by a fire on the night of December 28 which destroyed three greenhouses and the office, loss about \$1,500.

EVERETT, MASS.—James Burns has been compelled to shut up his place because of inability to get coal, and several others are in about the same boat.

WATERBURY, CONN.—The City Lumber and Coal Company has begun suit against R. S. Rasmussen for \$600 and Rasmussen has closed his flower counter in Dillon's art store.

BOULDER, COL.—Ed. Hubbard has sold the retail branch of his business to John M. Johnson. He will continue the producing end and will shortly erect a large range of glass for the wholesale trade.

SPRINGFIELD, MASS.—The Murphy Company are petitioners in bankruptcy. Liabilities given as \$2,785.33; assets \$1,000. A. N. Pierson is the heaviest creditor, \$685.59. The firm consisted of D. J. Murphy and J. I. Bolt.

DES MOINES, IA.—I. W. Lozier advertises that on funeral work he gives churches, lodges and other societies a discount of twenty per cent from regular prices. He says he has agents in nearly every community in Iowa and is doing a big business in shipping designs.

secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

FRED. MANSOFF, Brandon, Manitoba,
was delivering cut flowers on Christmas
day with the temperature 44° below
zero, but says he has no "kick coming."

THE rate of a fare and one-third for
the round trip has been authorized for
the convention of the American Carna-
tion Society at Brooklyn, N. Y., February
19-20.

THE whole country will heartily
co-operate in the action on express rates
to be determined upon at the Boston
meeting next Saturday under the auspices
of the S. A. F.

THE yellow address label on your paper
bears the date at which your subscrip-
tion expires. When we receive your
renewal the date on the yellow label will
change within three weeks.

Society of American Florists.

EXECUTIVE COMMITTEE APPOINTMENTS.

President Burton has appointed Messrs.
Geo. C. Watson, Philadelphia, and R. F.
Tesson, St. Louis, members of the execu-
tive board, to serve for a term of three
years, beginning January 1, 1903.

ACTION ON EXPRESS RATES.

In compliance with an appeal from
local members of the society and by and
with the advice and consent of President
Burton, a meeting of flower shippers and
others directly affected is called at 9
o'clock a. m., Saturday, January 17, at
the American House, Boston, to consider
the unwarranted and oppressive advance
in express charges upon cut flower ship-
ments and to take such action in the
premises, under the auspices of the
national society, as may be necessary for
the protection of the cut flower industry.
All flower growers and dealers are cordi-
ally invited whether or not members of
the S. A. F. Wm. J. STEWART, Sec'y.

Treatment for Violets.

ED. AM. FLORIST:—Do violets need a
top dressing during the season? If so
what is beneficial for them? When
should the dressing be applied? Would
you recommend watering them occasion-
ally with weak liquid manure? I rubbed
a little wood ashes on the top of the soil,
as it was getting a little green. Is the soot
from the boiler tubes of any value? I am
burning wood. F. B.

If the violets are in good growing con-
dition a top dressing may be applied
before the blooming season to good
advantage. It is rather difficult to put
on when the plants are in bud and bloom.
If put on late in September it will answer

two purposes, keep the flowers clean and
prevent the soil from getting green. A
mixture of barnyard manure, not too
rotten, makes a good dressing. Liquid
manure may be applied every third or
fourth watering during the flowering
season, but care must be exercised not to
water when there are many open flowers,
as violets are very sensitive as to odor.
Water with very little pressure so as not
to soil the flowers and foliage. If "F. B."
had rubbed a little air-slaked lime into
the soil instead of wood ashes, it would
have been more beneficial to both plants
and soil. Wood ashes are all right for
carnations but are of no use for violets.
I have no experience regarding soot from
boiler tubes but would not advise its use.
I know ashes are death to violets if used
frequently. ROBERT KLAGGE.

Greenhouse Building.

Chestnut Hill, Pa.—F. W. Taylor, con-
servatory.

Pittsburg, Pa.—D. A. Stewart, one
house.

Pittsfield, Mass.—Dr. F. A. C. Perrine,
conservatory.

New Haven, Conn.—Doughty & Co.,
one house.

Mansfield, O.—Berno Floral Company,
house 22x65.

So. Elizabeth, N. J.—Pennsylvania R.
R., range of houses.

The Giberings of Job.

Speaking of the coal situation, reminds
one that summer will come by and by;
and speaking of summer calls to mind
the host of flies, gnats and mosquitoes
which come with it. This naturally
leads us to think of Job, only we have
him with us all the time—worse luck. His
bite is non-poisonous—it isn't even pain-
ful—but how he does buzz, and buzz,
and buzz! What malicious pleasure he takes
in alighting on our friend Lonsdale's bald
spot just as that horticultural leviathan
has settled down in the calm conscious-
ness of duty well done, to the enjoyment
of his after dinner nap! What a terrific
snort there is when he blunders into the
ginger jar man's nostril!

Then at times, too, he reminds us of
other things. One of my neighbors has
recently purchased one of the long-eared,
patient little beasts whose name is not
to be mentioned to ears polite, and every
time the brute "hee haws" I can't for the
life of me help thinking of Job. It is such
a tremendous noise to come from such an
insignificant little animal, and so abso-
lutely futile, too.

As we have just said, these things
remind us of Job in his occasional moods,
but to describe him in proper form,
when he is most natural, most like him-
self, one must draw on Kipling. How
perfectly his characterization of the Ban-
dar-log (the monkey folk) fits Job:
"They have no law. They are outcasts.
They have no speech of their own, but
use stolen words which they overhear
when they listen and peep***. They
have no remembrance. They boast and
chatter and pretend they are great peo-
ple about to do great affairs***. But
whenever they found a sick wolf or a
wounded tiger or bear, the monkeys
would torment him, and would throw
sticks and nuts at any beast for fun
and in the hope of being noticed. Then
they would howl and shriek senseless
songs*** and so they settled things by
making up a saying 'What the Bandar-
log think now the Jungle will think

later;' and that comforted them a great
deal." Surely, Kipling must have known
him—intimately.

Lately he has given out the statement
that he does not write for pay—how does
he eat, then? Can he show any visible
means of support aside from the per-col-
umn returns for the "sticks and nuts" that
he throws at recognized and respected
members of the trade. Can he demon-
strate himself to be anything more than
a wart on the trunk or a boil on the neck
of the trade? LASTMAN.

Exorbitant.

ED. AM. FLORIST:—Cannot something
be done by united action in protest or
petition on the matter of these exorbi-
tant express charges? We do a compar-
atively small business up here but our
express bill was running \$2 a day and
now, since the rise in rates, it averages
\$3. We want to give our aid in any
movement looking to a return to the old
tariff. SHOTWELL & GRAVER.

Fargo, N. D.

Express Rates.

ED. AM. FLORIST:—Is there no remedy
for the florists against the recent change
in express rates? We had built up quite
a business in loose cut flowers, as well as
designs, with small neighboring towns.
We could send a small package, under
three pounds, for 15 cents, so we prepaid
the express. Now they charge us 40
cents for the same, which will completely
kill the business. I protested to the local
agent and he said the charge of 15 cents
was a special rate, the regular rate being
25 cents, and now he has instructions to
make it one and a half times the regular
rate, so he made it 40 cents for even
change. Rather steep for fifteen miles of
direct road. E. H. HOWLAND.

Holyoke, Mass.

OBITUARY.

JOHN S. MURRAY.

John S. Murray, the well known and
highly esteemed pioneer florist of Mon-
treal passed away December 31. Some
years ago he suffered a stroke of paraly-
sis, from which he never recovered, but
he was able to be up and around the
house in an invalid chair and to receive
friends. He appeared to be in his usual
health until the last day of his life, giving
no warrant that the end was near. Born
at Alyth, Forfarshire, Scotland, 69 years
ago, he came to Montreal in 1854, where
he worked as a private gardener for
about eight years. He then started, on
a very small scale, in the flower business
and soon built up one of the best in the
city, being thus the pioneer among the
florists there. He was a quiet, home-
loving gentleman, attentive to his busi-
ness and highly esteemed by the trade,
who sent floral tributes in abundance
and attended his funeral, with few absent.
G. V.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STORES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

VISITED BOSTON:—H.C. Agnew, Agnew, Cal.

VISITED ST. PAUL:—W. H. Small, Evansville, Ind.; W. H. Grenell, Saginaw, Mich.; A. T. Ferrell.

HIGHER contract prices for peas and beans for 1903 crop are being asked, especially for the former.

THIS year's issue of the catalogue of J. M. Thorburn & Company, New York, is the 102nd annual issue.

VAUGHAN'S SEED STORE, Chicago, has a department in which lessons are given in Indian basketry by a competent teacher.

FIRE at the plant of the Madson Seed Company, Manitowoc, Wis., January 2, caused panic among the girls employed, but did little damage.

THE executive committee of the American Seed Trade Association will meet at the Shoreham Hotel, Washington, D. C., January 13, at 3 p. m.

J. K. L. M. FAROUHAR, of Boston will give an illustrated lecture on seed growing before the horticultural society at Worcester, Mass., January 29.

THE H. N. Hammond Seed Company, Bay City, Mich., is delayed with its catalogue because of the destruction of the Adventist printing plant at Battle Creek.

J. H. McCOTTER, who has had charge of D. M. Ferry's seed farm at Pontiac, Michigan, now to be platted, will have the superintendence of the new farm at Rochester, Mich.

EARLY inquiries and orders for field seed corn indicate probable good demand for the season. There seems to be a growing appreciation among farmers of the importance of good seed corn and a willingness to pay better prices.

MANITOWOC, Wis.—The Manitowoc Seed Company has been incorporated here by G. L. Born, G. E. Alter and Albert Guttman. Mr. Born, the secre-

tary and treasurer, was formerly with the M. G. Madson Seed Company. The new firm will carry a general line of seeds and grow peas and other vegetables.

THE tomato crop has certainly been a short one. Catsup makers have been troubled to get pulp, which is their basis. Seedsmen have a very short supply of seed, but in face of this the canned product, says the *American Grocer*, is nine and one-quarter million cases against four and one-quarter million in 1901. The five states, Maryland, Indiana, Delaware, New Jersey and California, pack eighty per cent of the output, the first state named packing one-half.

Samples of Seeds.

The following circular letter (No. 142) of the Treasury Department, Washington, D. C., to collectors and other chief officers of customs, was issued under date of December 23, 1902:

At the instance of the Secretary of Agriculture,

it is hereby directed that, commencing January 1, 1903, and continuing for six months, 2-ounce samples of all importations of 100 pounds or more of grass, clover and forage-plant seeds be prepared at the earliest practicable date after entry, and forwarded to the seed laboratory, Department of Agriculture, Washington, D. C., labeled with names and addresses of consignors and consignees, name of seed as given in the invoice, and quantity of the consignment.

O. L. SPAULDING, Assistant Secretary.

FORT WAYNE, IND.—Geo. W. Doswell has taken his son into the firm and they have doubled their glass, having now 12,000 square feet, two-thirds of it in carnations and roses and doing a general wholesale and retail business.

SAN JOSE, CAL.

Cleaning a 1902 Crop of Southport White Globe Onion.

Wish you could visit our ranches during the interesting process of harvesting our various crops.

HERE IS ANOTHER BARGAIN IN BULBS FOR EASTER FORGING.

All the Paper White Grandiflora, Horsfieldi, Emperor, Empress, and double-nosed Von Sion Narcissus offered in last week's issue **Are All Sold.** We could have sold them two or three times over. People know a good thing when they see it. We offer below some other good stock at equally low prices. If you can use any of the **Bulbs** offered, let us have order without delay, before we are sold out.

Now that the holidays are past florists are looking forward to Easter, which comes late this spring—April 12—so that there is plenty of time to get any of the stock here offered in bloom by that time. Bulbous stock is selling for good prices on account of the scarcity of other flowers—due to the high price of coal—and as bulbs can be grown in a low temperature, they will make money for you.

Everything offered is in first-class shape, and are **Great Bargains at these Reduced Prices.** Send for complete list of surplus bulbs, which we are closing out at equally Low Prices. When ordering please refer to this special offer.

SMALL SIZED NAMED HYACINTHS. This is wonderfully fine stock for the price. The bulbs are of large size—12-15 cm. in circumference—and are splendid for Easter forcing, either for cutting or growing in pans. Nothing is more readily salable. Although the price is low, the bulbs are first-class. They will throw almost as good flowers as the larger and higher-priced bulbs. If you have never flowered them, try a thousand or two. You will be pleased with the results. They cannot fail to make money for you.

The following pink varieties at **only \$1.50 per 100; \$12.00 per 1000** viz:— (Worth \$16.00 per 1000), Baron van Thuyll, Gen. Pellissier, Gertrude, Gigantea, Robt. Steger, Solfatar.

The following blue varieties at **only \$1.50 per 100; \$12.00 per 1000**, viz:— (Worth \$16.00 per 1000) Grand Matite, King of the Blues, La Peyrouse, Chas. Dickens, Blondin, Czar Peter, also Tamerlan (yellow).

The following white varieties at **only \$2.00 per 100; \$16.00 per 1000**, viz:— (Worth \$22.00) Baroness van Thuyll, Grandeur a Merveille, Blanchard, L. Innocence, Minc, Van der Hoop, Paix de l'Europe.

F. R. PIERSON CO.,

FINE NAMED HYACINTHS, SINGLE AND DOUBLE. We offer also a limited stock of the following varieties in first sized bulbs: **\$3.00 per 100; \$25.00 per 1000.** (Worth \$35.00 per 1000), La Peyrouse, Regulus, Tamerlan, Grand Lilas, La Paine d'Or, Gen. Pellissier, Grandeur a Merveille, Bloksberg, Bonquet Tendre, Czar Nicholas, Crown Prince of Sweden, Flevo, Garriek, Grootvorst, Gen. Antinek, King of Wurtemberg, La Tour d'Auvergne, La Virginite, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar, Princess Royal.

HYACINTHS IN SEPARATE COLORS, SINGLE AND DOUBLE. We still have a few of these left, which we offer as long as unsold at **\$2.50 per 100; \$20.00 per 1000** (Worth \$26.00).

WHITE ROMAN HYACINTHS. We still have a few cases of fine 12-15 cm. bulbs, which we offer as long as unsold at **\$15 per 1000.** (Worth \$25).

NARCISSUS. These prices will speak for themselves. Per 1000
Trumpet Major, single Von Sion \$ 8.00
Prinsep, Poeticus Ornatus, Barri Conspicuous 5.00
Silver Phoenix, Grandis Maximus 15.00

TULIPS, SINGLE AND DOUBLE. Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing: Rachel Ruisch, Rosamund, Hnykuan, Bizard Verdier, Couleur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche, Count Leicester 5.00
Cottage Maid, Joost van Vondel, Brutus, Paony Red 6.00
Toumbesoll Red and Yellow, Gloria Solis, Le Blason, Rosine 7.00
Pontebakker White, Due van Tholl Scarlet, Standard Royal Silver, 7.50
Rose Grandison, Belle Alliance, Mariage de ma Fille 10.00
Proserpine, Mon Tresor, 12.00
Joost van Vondel White, Rose Luisante, 20.00

CALLAS. We have a few hundred of these, which can be gotten in fine shape for Easter.

Extra sized bulbs, 1 1/4 to 1 1/2 inch. in diam., \$3.00 per 100. (Worth \$5 per 100).

Selected bulbs, 1 1/4 to 1 1/2 inch. in diam., \$4.00 per 100. (Worth \$6.00 per 100).

To the American Wholesale Seed Trade

We shall have pleasure in quoting special low Contract prices for seed of the under-noted varieties, which we have grown very extensively in Surrey, Essex and Lincolnshire, our principal effort being to produce the very best strains and supply them direct to the Trade at the most moderate prices. Visitors to England are cordially invited to call and inspect our trial grounds and growing crops.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Pprs.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

THE Douglas nursery at Waukegan, Ill., has been growing evergreen seedlings since 1861.

THE present plans contemplate the early planting of about 85,000 street trees in Great Falls, Mont.

JUDGE FRED. WELLHOUSE, the "apple king," has been elected president of the Kansas State Horticultural Society.

SAMUEL C. MOON believes in planting for permanency. He says that the oak will overtake many a tree of faster growth.

THE Denver & Rio Grande R. R. will shortly plant its station grounds. J. P. Brown, of Connersville, Ind., is now at Provo, Utah, where the road has 65,000 catalpa trees ready for use in the spring.

THE American Nurserymen's Protective Association has increased its executive committee to seven by the appointment of D. S. Lake, Shenandoah, Ia.; A. L. Brooke, Topeka, Kan.; H. B. Chase, Huntsville, Ala., and John S. Kerr, Sherman, Texas.

CAMDEN, N. J.—During the coming spring the work of laying out the little park in front of the Pennsylvania R. R. terminal will be completed. The expense of beautifying this tract of ground will approximate \$10,000, divided between the different divisions of the P. R. R.

Utica, N. Y.

Utica is one of the few cities of any size in the eastern section of the country having no public park reservations. For several years the subject has been discussed very generally and public opinion has been gradually brought to a realization of the necessity of an appropriate system of public parks. It is likely that something practical will be done very soon, as the Chamber of Commerce and the Common Council have both taken up the subject this season with commendable energy and the people are manifestly favorable.

Tree Seeds.

Our new descriptive CATALOGUE OF SEEDS of American Conifers, Trees, Shrubs, Palms, Cacti, Herbaceous Plants, etc., has been mailed to the trade. A postal will bring it to you. PINEHURST NURSERIES, Pinehurst, N. C. Otto Katzenstein, Mgr.

ANDERSON & CHRISTENSEN, Short Hills, N. J.

CARNATION

President McKinley!

Winner of the \$100 prize at the Kansas City Flower Show in 1901.

First on Vase of 100 dark pink at same show in 1902.

THE flowers average 3 to 3½ inches; compared with the famous Lawson, it is fully as large and more symmetrically formed. The stem longer and fully as strong. It surpasses all varieties in healthfulness and vigor of growth. It is ideal in this respect. Like its parent, Dorothy, it is early and free, as we have been shipping from it continuously since September. It is a favorite with, and much sought after by our customers.

This is what Edwin A. Kanst, one of the awarding judges, said of it:

"President McKinley is a splendid flower, the petals are perfect and it is well built. The color is deeper and brighter than the Lawson and the coloring is more distinct. The peculiar purplish tinge in the Lawson is absent from the President McKinley. It will become a favorite carnation."

READ JOHN THORPE'S LETTER.

Kansas City, Mo., Nov. 26, 1901.
Mr. E. T. Grave, Richmond, Ind.,

Dear Sir:—I desire to inform you of the great keeping qualities of your President McKinley carnation. At the close of the exhibition on Sunday evening most of the flowers were even better than on the first day of exhibit, the color equally as bright and without a trace of purple. It is exceedingly brilliant in artificial light.

Respectfully yours, John Thorpe.

If you wish to keep in line better order some of this stock, and should you see it growing at our place you will want to double your order.

Rooted Cuttings, \$2 per doz.; \$12 per 100; \$100 per 1000.

E. T. GRAVE, Richmond, Ind.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At Chicago.

The bowlers are still going slow. In the Illinois League the Florist's team has won five games, lost thirty-seven, made a high score of 916 and an average of 514. Joe. Foerster keeps up his good work in the Chicago League, having an average of 199 in thirty games.

At Philadelphia.

Bowling averages for December were as follows:

Yates.....	174	Harris.....	153
Moss.....	165	Polites.....	151
Watson.....	161	Gibson.....	144
Westcott.....	159	Dunlap.....	137
Starkey.....	159	Anderson.....	137
Adelberger.....	153	Falek.....	132
Connor.....	153		

Among the associate members of the club the high man for the month was Dunham, with an average of 174. In the Philadelphia Bowling League championship contest the Florists are now in first place. Six clubs are in the contest this season.

Boston.

MASSACHUSETTS HORTICULTURAL SOCIETY HOLDS FIRST MEETING OF THE YEAR.—STATE OF THE MARKET AND VARIOUS NOTES.

The first meeting of the Massachusetts Horticultural Society for the year 1903 was held on Saturday, January 4. The notification that the committee appointed last summer would bring in a draft of a new constitution and by-laws for the society's consideration resulted in a fairly large attendance. This committee, known as the "compromise committee," had been made up from representatives of the various divisions which have flourished within the organization for some years and the gratifying announcement was made that the proposed new form of government which they presented had been unanimously agreed upon. An equally harmonious spirit pervaded the meeting and the new constitution was adopted, practically as presented, by a unanimous vote. It now lies over for final action at the quarterly meeting in April. The published schedule of prizes for the coming year was ready for distribution. It shows a considerable decrease in the amount appropriated as compared with recent years. The list of lectures, eight in number, for this winter is very disappointing. One subject is "Remunerative Out-door Occupations for Women," another "A Stereopticon Lecture on Southern Trees;" all the rest are purely agricultural; not a practical horticultural paper on the list. In the small exhibition hall was a pretty display of plants from Mrs. J. L. Gardner, comprising *Primula Sinensis*, *P. obconica* and *P. stellata* and *Euphorbia Jacquiniiflora*. George McWilliam showed a seedling, *Cypripedium Hildegardae* Lasell (*C. Schlusingerianum* var. *W. W. Lunt* × *C. Leeannum*). Paintings of two seedling orchids in competition for the special premiums offered therefor were presented by H. T. Clinkaberry and J. E. Rothwell. The former entered *Zygopetalum Roeblingi-*

anum and the latter *Cattleya* × *Rothwelliana* (*C. Bowringiana* × *C. Eldorado*).

Since the holidays the usual weakened demand for bright red carnations has been experienced, with the result that they are abundant in the wholesale establishments and obtainable at rates much lower than the white varieties realize. White is most in demand and when really fine blooms are offered they have no difficulty in finding willing buyers. Roses maintain their position very well since New Years, with the exception American Beauty, which is not only in full supply but averages rather below the standard in quality. Violets are suddenly over-plentiful and a weaker sale is the result. All bulbous material is plentiful.

The proposed meeting to protest against the extortions of the big express companies meets with general approval and a bold stand is advocated. The meeting will be held at the American House on Saturday, January 17, at 9 a.m.

Mrs. W. J. Martin died at her home in Milton on Saturday, January 3, after a long and painful illness.

Denver.

NEW YEAR STARTS OFF WELL.—STOCK NOW PLENTIFUL AND PRICES REASONABLE.—WITH THE BOWLERS.

The condition of the market did not vary much between Christmas and New Years. With good trade stock kept scarce, but, notwithstanding that fact, prices were lowered considerably just after Christmas, which held through New Year's. Trade at the latter day was very good and flowers of all sorts had a pretty good run, with the exception of bulbous stock. Beauties and violets, which were fine, were particularly favored, the best Beauties selling for \$12 per dozen at retail. Beauties were a little scarce, while violets were in good supply. Violet trade was nearly as good as at Christmas, but no doubt the liberal cut in price did that, as only \$2 a hundred was asked at retail. Bridesmaid and Bride, which were of good quality, sold well and were about all closed out. Liberty, as usual, was most in demand but the supply was very small. There has been a lull in trade since the holidays, although there is now and then a good decoration heard of. Consequently stock is loading up and no shortage is noted.

The Florists' Bowling Club journeyed to Boulder on December 29 to play the team of that town and was beaten three straight games, but lays defeat to poor alleys. The club is doing good work in the Commercial League and from a bad start is quickly working its way to the top.

FRANKLIN, PA.—Wm. T. Bell did the decoration for the twenty-fifth anniversary banquet of the Nursery Club at Oil City, December 23.

WEST HAVEN, CONN.—The shed and boiler room connected with the greenhouses of A. J. Thompson were destroyed by fire on the morning of December 29. The greenhouses were saved through energetic work on the part of the firemen.

KENOSHA, WIS.—H. D. Kamp has nearly completed his first year as proprietor of the Kenosha Greenhouses and reports business excellent. He has 20,000 feet of glass and makes a specialty of carnations, shipping a large part of his cut to the Chicago market.

Montreal.

SEASON ONE OF COMPLETE SATISFACTION.—FLOWERING PLANTS WELL SOLD OUT.—SEVERE WEATHER BRINGS DIFFICULTIES AND LOSS.—VARIOUS NOTES.

Trade is reported fully as good as last year, perhaps a little better. Gloire de Lorraine begonia was the leading holiday plant and brought from \$1.50 to \$5 each. Azaleas sold for from \$1.50 to \$12 each, poinsettias from \$1 up and cyclamens from \$1 to \$6. Solanums were over-abundant and sold for from 50 cents up. Palms, Boston ferns, rubbers and English holly were well cleaned out. The prices of cut flowers were higher than last year for roses were not abundant. Some chrysanthemums held back for Christmas were sold without trouble at \$2.50 a dozen. Violets were not plentiful.

Hall & Robinson sold out of Gloire de Lorraine, cyclamens, solanums, primulas and azaleas at the holidays and P. McKenna & Son also cleared their benches. S. S. Bain had the most elaborate Christmas window. His holly trees attracted great attention and he had also the finest cut of roses in this city.

Jos. Bennett was second to none for azaleas this year and on cut flowers he is credited with getting the highest prices obtained in this city.

C. Campbell is trying hard to have the best window in this city. He sustained a loss of stock in the severe weather we have had lately.

Louis Hertz lost a good deal of his stock of plants in a recent cold spell.

L. H. Gould has been doing an immense trade in cut flowers.

Wilshire Brothers report a satisfactory Christmas trade. G. V.

FALL RIVER, MASS.—Seth A. Borden has just completed two fine greenhouses and will soon be ready for business.

LAWRENCE, MASS.—Charles Thornton, of Thornton Bros., has been seriously ill for a number of weeks but is now improving in health rapidly.

The Best White Carnation to Date

The Queen

Reaches highest standard in size, form, calyx, stem, productiveness and keeping quality. A sure winner where ever shown. Price per 100, \$10.00; 250, \$22.50; 500, \$37.50; 1000, \$75.00.
Little South Floral Co., So. Natick, Mass. S. J. Goddard, Framingham, Mass.

Minneapolis.

BUSINESS CONTINUES BRISK AND ALL STOCK CLEANS UP WELL.—PRICES STILL HIGH.—LOCAL NOTES.

Trade has shown no increase since the holidays but still there is a scarcity of stock, especially roses. Funeral trade last week was very heavy and is one cause of there being no let-up in business. Carnations are bringing from \$4 to \$5, tea roses \$6 to \$10, Romans \$3 and violets \$2 per hundred. American Beauties are hardly to be had and prices range high. Stock in roses does not appear to be of an extra good quality, stems weak and color off, caused by the incessant dark weather.

A. S. Swanson has had a beautiful display of araucarias, palms and Boston ferns, together with large baskets of Roman hyacinths tastily arranged.

From the outlook in the coal question there will be good stiff prices on all kinds of flowers this year, as the cost of production is much higher.

The Tribune recently published a very entertaining story by R. J. Mendenhall, treating of the pioneer days of floriculture in Minneapolis.

E. Nagel & Company had a large and attractive lot of azaleas, which found ready sale for the holidays.

C. F. R.

Albany, N. Y.

HOLIDAY TRADE DOES NOT MAKE NEW MARK.—GROWER CUTTING FROM NEW RANGE.

Christmas and New Year's trade in this section, as reported by most of the dealers, was no better than last year and in some instances was a little less. The convening of the state legislature on Wednesday of this week distributed a goodly number of orders among the local florists.

Fred. A. Danker, of Maiden Lane, has begun to cut from four new houses erected in September by the Lord & Burnham Company. One house is 22x100 and three 18x100. Mr. Danker has filled them with a miscellaneous stock suitable for the needs of a retail trade.

Conchiflora, Grandiflora Alba, Pavonia Grandiflora, 30c per doz.; \$2 per 100; \$15 per 1000.

MONTBRETIAS.

Six choice varieties, 25c per doz.; \$1.75 per 100; \$12.50 per 1000.

HENRY A. DREER, 714 Chestnut St., Philadelphia, Pa.

Carnation Gov. Lowndes.

Color, pure white. Size, 3 to 3½ inches in diameter. Calyx, spreading at the top, making it practically non-bursting. Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated, and beautifully arranged, forming a full, rounded center. Odor, is very sweet and particularly pleasing. Stem, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect. Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties. Productiveness, extremely free flowering. More productive than any other large white. A profitable and high grade commercial variety. Price, \$2.50 per doz.; \$12 per 100; \$100 per 1000. 50 at 100 rate; 500 at 1000 rate.

NEW YEAR'S BUSINESS FULLY AS SATISFACTORY AS CHRISTMAS.—STOCK PLENTIFUL.—NOTES OF DOINGS OF THE GROWERS.

New Year's trade was very good. Stock was more plentiful than at Christmas and, while the volume of business was much smaller, it was also more satisfactory. Prices were slightly lower than the week before. Beauties, Meteors, Liberty, carnations and violets were in greatest demand, there being enough for all orders except violets. Trade since has been fairly good though of course there is always a week or two of dullness succeeding a holiday.

Holm & Olsen's new houses are well filled with a good assortment of palms, ferns, azaleas, lilies and other bulbous stock. Poinsettias and azaleas were very fine at Christmas and sold well. Young ferns from seed are in prime condition. Ludwig Anderson is in charge here. The houses, three in number, 20x100, are models of construction. A great deal of trouble is had with water flowing into the boiler pit, which was dug out of solid rock and is without sewer connections.

W. F. Lemke, who succeeded Ed. Behrens, reports New Year's trade ahead of Christmas. He has a good location, in the best residence district of the city and he has given an air of thrift to the establishment.

Christ. Bussjaeger, who lost two dozen palms in one of the churches at Christmas time, settled the case with the church people for \$60.

Gust. Calberg is on the sick list this week. FELIX.

PORTSMOUTH, N. H.—It is understood that the beautiful estate of the late Frank Jones is to be cut up into parcels and the conservatories, with their fine collection of plants, discontinued.

OCEAN PARK, CAL.—E. J. Vawter, whose business is incorporated as the Ocean Park Floral Company, paid up capital \$6,000, has 1,000 square feet of glass and ten acres of land on which he grows carnations for the wholesale market and for his store in Los Angeles. He reports a good season.

TRADE ACTIVE.—SOCIAL AFFAIRS NUMEROUS.—GOOD FORCED LILACS.—NOTES.

New Year's retail trade was good in cut flowers. Carnations, violets and roses were in demand. The White House reception has started the ball rolling and quite a number of small social affairs have taken place. Violets are somewhat scarce on account of the continued cloudy weather. Other stock is falling back a little also.

A. Gude & Brother have an extra fine lot of white lilacs, stocky plants covered with bloom and taking well. On December 31 Wm. F. Gude was elected illustrious potentate of Almas Temple of the Mystic Shrine.

Fred. Miller has left the hospital, where he has been for some time with typhoid fever, but is still confined to his room.

Visitors: Charles F. Meyer, New York; Wm. J. Boas, Philadelphia. P. G.

GIBSON CITY, ILL.—Swan Peterson is having a good season. His range now covers 100,000 square feet. Carnations are the specialty.

SENECA, KAN.—Henry R. Brown proposes to this spring remove his establishment to the main street, rebuild his houses and add about 1,000 feet more glass.

**The Model Extension
Carnation Support.**

Flushing, Long Island,
Dec. 14th, 1901.

MR. THERON N. PARKER,
Brooklyn N. Y.

Dear Sir— I have used
your Wire Carnation Sup-
port the last two years in
all about 12,000. They fill
the bill in every particular.
Nothing could be more
satisfactory and would
give me a great deal of
pleasure if I can bespeak a
good word for you to the
trade and you are at liberty
to refer to me at any
time. Very truly,

A. L. THORNE,
La Fayette, Ind.,
July 8th, 1902.

MR. THERON N. PARKER,
Harrison N. J.

Dear Sir:— After using
your Model Carnation Sup-
port in two of our houses
the past winter, we have
come to the conclusion that
it is perfectly adapted to
supporting carnations, and
shall use them on all our
plants the coming season.

We were much pleased
with the simplicity,
strength and neat appear-
ance of the support
Yours truly

Toronto.

OLD YEAR THE BEST YET.—NEW ONE STARTS BRISKLY.—DARK WEATHER KEEPS STOCK SCARCE.—VARIOUS LOCAL NOTES.

The old year was the best for the florists in the history of Toronto, and all were very well satisfied with the increase. The new year has started very briskly and the demand for stock is unprecedented for this season. Unfavorable weather keeps down the supply of roses and of those cut the first grade are in the minority. Beauties are still the scarce article, but the few coming in are nicely formed and very well colored, and a good crop is expected soon. Liberty is also picking up, but only a few stray blooms are to be had. Bridesmaids are furnishing the best blooms and are very well colored. Mrs. Morgan is also in pretty fair crop. Freesias and jonquils are becoming more plentiful and a few Harrisii are coming to the market. Carnations continue both plentiful and good. Many of the newer varieties are showing up well. Continued dark weather has not been favorable to violets and occasionally we are very short of these.

Frank Duffort has some very good freesias and Morning Glory carnations. This variety has done very well with him, having been heavily cut from all through the season. Next year he intends to increase his glass area and grow carnations more extensively.

Late varieties of chrysanthemums from George Hollis and R. Jennings, Brampton, are still used to advantage in design work.

Visitors: J. M. Gasser, Cleveland; Wm. Fendley, Brampton. H. G. D.

Worcester, Mass.

BUSINESS FOR THE YEAR MAKES A FINE START.—VARIOUS LOCAL NOTES.

New Year's day brought us considerable business and several good decorations for teas and receptions. Flowers were plentiful and prices a little lower than at Christmas. Regular trade remains steady, with plenty of good stock available. Funeral work has kept down the supply of lilies, Romans and Paper White narcissi.

Denholm & McKay's department store, which has maintained a conservatory for some years, has discontinued that department, but will continue to handle cut flowers.

The coal situation is still keeping the growers on the anxious seat, but the mild weather makes it a little easier for them. A. H. L.

NEW CASTLE, IND.—The weather has been very cloudy here lately and sun is needed badly.

American Florist Advertisements Work Every Day.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap and effective means of destroying insect pests and other vermin in various places. This work is the outcome of practical tests made by the author, together with the experiences of others, and is one of the most important books published this season and is much needed at this time. It will be of particular interest to

FRUIT GROWERS AND NURSERYMEN owing to the widespread prevalence of the notorious San Jose scale. Hydrocyanic acid gas is the only practical remedy for the destruction of this pest and is being used more extensively than ever before by nurserymen and fruit growers. The perfection of the apparatus for fumigating young orchard trees is outlined in this work. The methods can be easily applied in orchards and nurseries for many dangerous pests at very small cost. The writer is considered the best authority on this subject in this country and has left nothing undone to make this the most complete work of the kind ever published.

GARDENERS AND FLORISTS have found that vegetables and flowers cannot be grown under glass without frequent fumigation for the destruction of insect pests. Hydrocyanic acid gas has solved this problem. The methods of procedure are fully described and every detail is given for generating and applying the gas.

MILLS AND GRAIN DEALERS have been looking forward to the publication of this work, as hydrocyanic acid gas has been found one of the most important materials for clearing mills and warehouses of insects. The subject of carbon bisulphide for fumigating mills and elevators containing grain in storage is also thoroughly considered. To this trade the work is indispensable and transportation companies have found it of great value for the fumigation of cars, ships and other inclosures infested with vermin.

FARMERS OF THE COUNTRY have here fully described a simple, easy remedy for chiggers, prairie dogs, squirrels and other animals in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS will find it an up-to-date reference work on this subject. It is covered in every respect and is the only work of the kind ever published. It is written in a popular non-technical style, profusely illustrated, handsomely bound, covering 250 pages, price, post-paid, \$1.00.

TRADE BRISK EVER SINCE THE HOLIDAYS.—GOOD BUSINESS AND FAIR PRICES.—CARNATIONS TAKE A TUMBLE.—VARIOUS NOTES.

Business has been very brisk since Christmas, especially at New Year's, when there was a heavy demand for flowers in general. With this extra rush came plenty of funeral work, which keeps up remarkably. Taking everything into consideration the new year of 1903 has started in to "beat the band." There was no great display of plants and flowers for the installation of the new mayor, Chas. E. Howe, on inauguration day, as has been the custom for a good many years. Stock having recuperated from the severe cutting it was subjected to at Christmas, prices are again reasonable. Carnations are down to the ordinary price; from \$15 per hundred they have come down to \$2 to \$4 per hundred. Roses are steadily improving, especially Bridesmaids, which have been decidedly off color lately. The supply of violets is daily on the increase. Lucky is the violet grower who passed unscathed through the severe weather we have had. Daffodils are coming in limited quantity. With the lengthening days the stock in general is on the improve.

Previous to Christmas the retailers all got together and agreed on a schedule of prices for the rest of the winter, but it is reported that some are not adhering to the agreement.

W. A. Patten has gone to Plum Island to see how the life savers work, and get a much needed rest.

Harvey Green is slated for a place on the newly created park commission.

A. M.

MAQUOKETA, IA.—Mrs. John Odgers has remodeled one of her old greenhouses, erecting a modern one 16x50. She reports good business.

GALT, ONT.—Arthur J. Young reports business good. He last season added 10,000 feet of glass to his facilities and put in a new boiler. His stock is now in good shape.

AVOCA, N. Y.—E. A. Higgins is informed that W. Atlee Burpee & Company have adopted the name, The Dainty, suggested by Mr. Higgins for their new sweet pea, white with a pink edge.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.

50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you **100,000 FEET** of 2 to 4-inch wrought iron lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 gauge.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in.

75,000 FEET of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

1 NO. 2 Standard Kroeschell hot water heating boiler.

FOUR 36x10 Horizontal Tubular.

FOUR 36x12 Horizontal Tubular.

FIVE 42x10 Horizontal Tubular.

FIVE 42x12 Horizontal Tubular.

SIX 48x14 Horizontal Tubular.

CROP INSURANCE.
 Life insurance is valuable because it guarantees the outcome.
"Gurney" Heaters
 "BRIGHT IDEA," "DORIC" and "400 SERIES" do the same thing for your hothouse: **THEY GUARANTEE THE CROP.** First of all they save 20 per cent on the coal bill and so keep expense at a minimum. Next, they produce an even heat and so do not imperil the life of the plant. Next, they are simple to operate and so require least attention. Lastly, they wear longer than others and thus perceptibly reduce the capital invested. Don't buy or exchange until you've investigated them.

The Violet Industry.

There were recorded in the Florists' Directory for 1896, three violet growers doing business in Rhinebeck on the Hudson, this year's directory will list upwards of fifty and they tell us there are more a-coming.

While musing over the great changes which time has brought about in the violet industry my thoughts revert to some early spring days away back in the shadowy past, days when Marie Louise and her modern crystal palace were as yet unknown, when our first duty at dawn of morning was to pull away the protecting mats, raise the sashes and kneel down over the redolent frames while we made the daily picking of luscious "Neapolitans," which for size and perfume, at least, have never been excelled in these strenuous days. Surely Shakespeare's oft-quoted lines,

To throw a perfume on the violet,
Is wasteful and ridiculous excess

must have been written after a fragrant whiff from some such spot. Had his experience been limited to the brand of violet not infrequently encountered on the corner flower-stands of to-day, it is very doubtful if he ever would have penned those expressive lines.

The violet's popularity dates from the misty distance of antiquity. In ancient mythology it was dedicated to Venus and there is no better testimony that, even in the flower business, "there's nothing new under the sun" than the recorded fact that when Athens was at the height of her glory, bunches of violets were exposed for sale in the market-places at all seasons of the year. From the days of Homer the beauty and fragrance of the violet have furnished a favorite theme for the poets. By some it has been deemed emblematic of faithfulness. To Shakespeare it was a type of modesty and maidenhood, "Sweeter than the lids of Juno's eyes," and Scotland's poet evidently agreed with the Bard of Avon, for he also wrote, "The violet is for modesty." Another poet of the long ago had apparently learned something of the inconstancy of the violet's odor but nevertheless found a good reason for its universal popularity. He wrote:

For though the rose has more perfuming power,
The violet haply cause 'tis almost lost,
And takes us so much trouble to discover,
Stands first with most, but always with a lover

If there were no lovers it would indeed be a long "blue Monday" for the violet, yet we in these practical days, we who from long habit have come to look upon

the violet's money-circulating value as its chief attraction, bestow but little thought to its sentimental qualifications. The Rhinebeck grower sees in it a nice living, the requisite capital for a couple of new houses annually and, incidentally, a reasonable grounds for an occasional visit to that sprightly and exhilarating section of the metropolis bounded on the south by Madison Square and on the north by West Thirty-fourth street. To the Yale undergraduate, likewise to his feminine partisan, it furnishes a satisfactory medium for breeding commotion in the innermost soul of his Harvard rival. Appropriately adorned with purple cord and tassels it is good to gladden the heart of matron or maiden and nothing more felicitous in the way of a peace-offering has ever yet been discovered to plead the cause of the festive reveler who has "stayed out" overlate a merry-making.

There is no flower, the sweetness of which is so evanescent as the violet. A bunch of blooms twenty-four hours after marketing has already lost the best part of its perfume. Give it twenty-four hours more and it begins to get suspicious and a day later its stench becomes villainous and far reaching. Yet, if a box in which fresh violets have been packed be promptly closed up the delicate violet fragrance may be detected there in all its purity, many weeks thereafter. Herein lies the violet's weakest and also its strongest characteristic. To find a buyer it must be fresh. It cannot, like the carnation, be made to do duty on successive occasions, its age speaks for itself in the dark as well as in the light and hence "salting" and "pickling" are no part of the violet-growers' holiday programme.

Myriads of violets are consumed in a season in New York city and notwithstanding the greatly augmented production each successive year the capacity of the market increases at a like rate, the only serious interruptions to its prosperity being the occasional disposition to advance the price to an unbearable limit. In the magnificent floral establishments patronized by the most exclusive society and on the stand of the lowliest curbstone peddler the violet is at all times a welcome stock in trade, neglected by the latter class only when the market value becomes prohibitive to his customers' limited purse. The smart set may make a show of repudiating it at the horse show or other swell affairs but it lands on its feet every time, for all that. It has passed through all the caprices and fads of the "designers," has been hacked

up into the supposed semblance of doves, eagles, bibles, urns, hearts and many other contrivances, the like of which has never yet appeared in the heavens or upon the earth and still to-day its most acceptable arrangement is in the form where it started ages ago—a plain bunch surrounded by its natural foliage. The bunching of violets for the critical New York trade is in itself an accomplishment not readily acquired. So expert have many of the pickers become in this work that great care is exercised in handling the bunches after their receipt from the grower, the bunching being no insignificant factor in determining the market value of a shipment.

With this general introduction we close for the present and next week we shall have something to say about the famed "up-the-Hudson" violet growers.

Lonsdale on the Lorraine Begonia.

The regular monthly meeting of the Germantown Horticultural Society was held on Monday evening, January 12. The president, Edward Neville, was in the chair. The election of officers resulted as follows: President, Edward Neville; vice-presidents, Charles J. Wister, Edwin C. Jellett and Albert Woltemate; secretary and treasurer, George Redles.

Among the carnations on exhibition were the beautiful Enchantress from Peter Fisher, Ellis, Mass.; The Queen, the

most wonderful flowering plant ever introduced. It is as true a hybrid as there is to be found among the whole list of flowering plants. It does not produce pistillate or seed-bearing flowers until quite late in its flowering season and, so far as is known, no fertile seeds have been produced from it. Quite ninety-nine per cent of the flowers are of staminate kind.

"It is generally known, I presume, that all begonias have pistillate, or seed-bearing, and staminate, or pollen-bearing, flowers separate, in which respect they differ from many other flowering plants. Take all the semperflorens type, of which Vernon is perhaps the best known, and it will be noticed that pollen is produced so freely that on a bright, dry day if a plant in full bloom is shaken the dust-like pollen may be seen flying in miniature clouds, and this same type under consideration produces seed to its full capacity; every pistillate flower makes a seed pod and in due course will be found bulging with fertile seed."

After Mr. Lonsdale had finished his talk, he was plied with numerous questions as to the care of plants in the home. One lady asked how to kill the aphid or greenflies on her plants, to which the lecturer replied, to immerse the plants infested in hot water at a temperature not to exceed 127°. This was given as an emergency remedy when insecticides proper, which may be obtained at any well appointed seed store, are not on hand.

mented with the end in view as indicated in the question, his judgment would be that the sooner the pans were planted the better; the earlier they are planted the fewer plants would be required to fill a given size of pan.

The origin of the Lorraine was asked, and given as follows: "It is a seedling between B. Socotrana as the seed parent and B. Dregei as the pollen parent."

In reply to the question, how is it, seeing that rose growers do not always have their crops in at Christmas, that the Lorraine begonia is always in full bloom for that occasion, the speaker said: "There is no skill required at all to have said begonia in bloom at that season. It blooms naturally in the late fall and winter months. The skill required is in securing the necessary number of cuttings to meet the demand, and that depends upon the care of the stock plants between the flowering season and the time when young shoots spring from the base of the plants from which the cuttings are made. Plants are produced both from leaves and young growths. The young plants from cuttings are believed by many to be the better, but practically there is little or no difference."

It is frequently the case that some quite pertinent questions are fired at a lecturer, or a person who has made an address, after the meeting has adjourned, and it was so in this case. Here is one: "Is it true that the best Lorraine plants seen in Philadelphia last Christmas were received from Cincinnati?" This could not be answered by the speaker because, as he stated, he had not seen any of the Cincinnati plants, so was not a competent judge. He admitted, however, that it was possible because the demand for young plants in the summer was very heavy and in that way many of the best plants raised in Philadelphia were to be found in other cities.

Another point brought out after adjournment was, that there is great danger in over-potting this begonia. It will flourish more luxuriantly with less soil than most other plants, and that it is a great help to florists at Christmas when it is practically impossible to secure as many cut flowers as can be sold, and that for the amount expended for Lorraine more cash value is received by a customer because under the most adverse conditions it will last longer than cut flowers for the same amount spent. G.

The Prices of Plants.

ED. AM. FLORIST:—I fully agree with Mr. Smith in regard to the low prices of plants, particularly in the wholesale line; the retailers make a good profit on what they have to buy, 100, 200 and 300 per cent. Of course their trade is limited and they must make a big profit to live. But the wholesaler must sell low to get the trade and so far as I can see it is because every year new dealers come into the market and, to get trade, they put down the prices, which others must follow. Many of the new growers, after a few months drop out of sight, as it did not pay them, but the damage is done. It is very well to cut down prices when you are nearly sold out and want to close out quick, but even that is demoralizing to the trade.

Geo. J. Hughes.

ED. AM. FLORIST:—The article by W. L. Smith again draws the attention of florists in general and growers of plants in particular to the deplorable fact that the prices obtained, or obtainable, for

John Dick.

Fred. L. Harris.

FLORICULTURE HAS LOST TWO VENERABLE CRAFTSMEN THIS WEEK.

promising commercial white from the Little South Floral Company, South Natick, Mass.; the bright scarlet Adonis from Robert Craig & Son, Philadelphia; a vase of well-grown Scott and other pink varieties from James Barrows' Sons, Germantown, and a bunch of seedlings in nearly all the colors from Albert Woltemate, Germantown. The last named exhibitor also had well grown ferns and cyclamens, which added to the decorative features of the meeting.

Edwin Lonsdale, being present, was called upon to say something about one of his pet specialties, namely, Begonia Gloire de Lorraine, and said in part as follows: "I do not hesitate to say that the Begonia Gloire de Lorraine is the

To the question, which heat is the best for plants, steam, hot water or hot air, Mr. Lonsdale said that so far as he has been able to observe there is no difference between plants of the Lorraine grown in dwelling houses out in the country and those that were heated by steam, hot water or hot air, provided, of course, no deleterious gases escape through the registers or the unconsumed illuminating gas through the burners into the rooms where the plants were growing.

Another question asked was: "Is it better to make up pans of the desired sizes with small plants of Lorraine immediately before Christmas or some weeks or months before that time?" Mr. Lonsdale replied that without having experi-

plants are unreasonably low. This subject, although old, is so full of interest and real importance to us, and Mr. Smith's question is put in such a direct way to all in the trade, I feel that no excuse is needed if I venture a few remarks concerning this lamentable state of affairs.

While I admit that prices in some lines are low, lower than they were, at the same time I claim that well grown plants of nearly all kinds bring as good a price as ever, and fancy goods a better price than years ago. My observations in the last five or ten years have led me to the conviction that the point at issue is not so much a matter of increasing prices for things we have to buy, and decreasing prices for our products, as rather a case of increasing quantity and deteriorating quality. Neither do I believe that over-production is the main cause of this trouble. It is more likely that the cause is to be found in unscrupulous, unbusiness-like, destructive, yes, and killing competition, carried on by members of our trade, who, like other good shoemakers, ought to have stuck to their lasts, instead of embarking in a business of which they knew little or nothing. They enter our trade with the idea that it is the one which holds out the fairest chance for rapid money-making combined with an easy existence. The natural consequence is the production of immense quantities of worthless rubbish, which is offered to the unwary at prices temptingly low; and the further consequences are that seller and buyer alike get discouraged, discontented, tired and sick of the business.

Several times during the last few years, when buying stock, I sent to firms which offered their plants at a low price, and when they came I found that their low prices were very high for the goods received, and in one case I became the owner of stuff for which any price would have been too high even if I had got them for nothing with a chromo thrown in. Repeatedly I sent an order calling for 4-inch stock, paid the price, and when I got it, it was a "measly" lot of plants, coming out of 4-inch pots, but not good enough for 3-inch, unshapely, ill-grown stuff. On several other occasions I sent for rooted cuttings to firms in different parts of the country which had them for sale at astonishingly low prices. They arrived in due time and they were thin, spindling things, mere sticks, some of them not rooted at all, others, and this was the majority, with a few dried up threads hanging to them; they were diseased and irredeemably damaged by long and repeated handling and crowding.

At the same time, while these transactions were the cause of much chagrin, disappointment and aggravation, I also had dealings with other firms, which treated me fine, sent me splendid plants at a good, reasonable price, and even if they should deem it timely and necessary to raise the price I would remain their customer. Nearly all of us have had the same experience; I know many who have.

The grower of good stock has no reason to complain of low prices for plants; if he has, it is his own fault. There is an ever increasing demand for well-grown, fine plants of all kinds at prices profitable to the growers, which demand is not fully supplied; in fact, such plants are scarce all the year around and hard to find at any price. Extra fine, first-class pot plants, especially at the holidays, will bring almost any price you ask for them. At the close of every season the growers of good plants are completely sold out, hunting around for more of the

HOUSE OF AMERICAN BEAUTY ROSES PHOTOGRAPHED DECEMBER 12, 1902.

(Grown by the J. A. Budlong & Son Co., Providence, R. I.)

same grade, unable to find it. You never hear them complain of low prices.

In the face of these facts here stated it is not difficult to find the remedy for the aforesaid disease which periodically spreads disappointment, discouragement and discontent. Let everything we grow, at least every plant we sell, be the best that can be produced; let it be so good that we feel sorry to see it go and still delighted at being able to serve our patrons so well. Let them be such as were raised years ago by growers whose love for money went hand in hand with their love for fine plants, which love almost amounted to a passion. Do not patronize "cheap Johns," if you know them. Do not try to raise 2,000 geraniums on a bench which will hardly accommodate 1,000. Do not annually add glass to your place (and kick about the high price of material) unless you can personally direct and oversee every department of it, and, finally, ask a good living price for all you have to sell—you will get your price if the stock is worth it.

FRED. W. TIMME.

CARNATIONS.

THE SELECTION OF NOVELTIES.

The buying of novelties has become a part of the year's doings in carnation culture and must be taken into account, the same as thrip or red spider. It is something of a nuisance, often a loss, but an ever present necessity for the up-to-date carnation grower. One might as well attempt to grow carnations in cold frames for winter blooming as to try and get along year after year with the old varieties.

To be successful at this end of the business one must use the same care and good judgment that he does in his cultural methods. Wherever and whenever practicable it is, of course, best to see the variety growing, and if you use your eyes to good advantage you can nearly always tell if the variety is likely to be a success with you. This is not infallible, but the failures will be few and far between, and more so if the variety can

be seen growing at different periods of the season. There is a variety being introduced this season that in its two years of existence, where I could watch its growth, has been but a very meager success; in fact, it comes nearer being a failure than a success, yet I have conceited enough to want to plant a house of it if that many cuttings can be had in time and believe that it can be made a grand and paying variety. If I had not had the opportunity to watch this variety and learn its habits its present appearance would hardly warrant the placing of a large order, but this one seems to be the exception to the rule, for generally if a variety does not show up well with the introducer it had best be left alone, as he is a poor introducer who cannot bring out his variety's good points.

Next best to seeing the variety growing is to see the flowers on the exhibition table. Here greater judgment is required for a proper decision as to what to buy, but it is well to always keep in mind the fact that the flowers before you are the very best the plants will produce, judged from the point of size, color, form and stem. The introducer will always be glad to answer any questions you ask as to blooming qualities of the variety, its earliness and general health, and in ninety-nine cases out of every hundred these answers will be truthful ones.

After getting all these facts and deciding for yourself that the flower is one that is better than any of its own color you now have, you can deduct about ten per cent in values all around and then if it will pay you to grow it, go ahead and buy.

Where neither of these two methods can be followed you will have to read the glowing accounts in advertisements and catalogues and get what information you can by correspondence.

Next to deciding on varieties you must determine the number you will buy. This, of course, varies with the size of your place and your market. If you are after flowers less than 1,000 plants will not give enough to make them an item in your daily cut. If you simply want to

give the variety a fair trial 100 will be a fair supply, as these will demonstrate the value of the variety and, if you have the plants well grown, will give enough cuttings to plant it in quantity for the next season. If you simply want to know what the variety will do in your soil and to use it for deciding its merits as an investment the second season, twenty-five will answer the purpose, providing they are put in the best bed or bench in the house. For the grower with a medium-sized place the last named method will be the best, being the least expensive and enabling the grower to try a number of the novelties without either breaking him or using up too much of his space. The grower with a small place who consigns his cut should try as many as he can afford by the 100, so that he may be in the swim the second season with stock enough to make it an item of his cut. The grower with 5,000 feet of glass devoted to carnations should buy them by the 1,000, so as to catch the market the second season. Two or three carefully selected varieties will usually be a paying investment. Of course there will be an occasional failure. If there were not we would soon have the market overrun with carnations and you and I would not be growing them.

ALBERT M. HERR.

THE CARE OF YOUNG STOCK.

No cuttings should be taken from the sand before they are thoroughly rooted. This means that the roots should be about half an inch long. The temperature recommended by the writer in a previous article will root them in from

fresh air; often pot bound and starving, simmering in cold frames long before we have experienced the last of winter's icy blasts, is there any wonder that we often see those patches of feeble, wan looking plants in summer and fall? The fullest light, moisture overhead and in the soil under perfect control, a good soil, well drained and free from all danger of disease are the conditions that we must try to create, and these conditions are only found in the best of houses.

At this time of the year progressive florists always have benches so situated occupied by something, and nearly every year it becomes a problem to find enough room for our young stock. The blooming plants may be doing well and we hate to throw them out. But the dollar that will stay with us in the long run is the one we are after, and it is not well to follow a parsimonious policy here. Better sacrifice a few flowers now and lay the foundation for a golden harvest later on. There are always benches that are not so promising looking as others, and these, if no other room is to be had, should be thrown out, soil and all, the benches thoroughly whitewashed and refilled with fresh soil.

Except late in the season, we never plant rooted cuttings with the view of leaving them in the same position until planting-out time. Nursery stock that is transplanted every year makes stock that will bear transplanting better than stock that is left standing in the same position for several years. The root-pruning that they receive in transplanting keeps the feeding roots near the plant, and when lifted to set in their permanent quarters they have a good

to two months before planting in the field, we usually put them in pots or flats, for handled in this way they may be set out in cold frames sometimes for three weeks before planting in the field. Young plants thoroughly inured to the full sun and open air in this way will take hold quickly and have a considerable advantage over those taken directly from the houses. For the first planting we prefer to plant on benches in two inches of soil, as it saves room over pots or flats and it is much less trouble to keep the soil at a uniform moisture. The soil should be scratched every two weeks with a sharp stick, to keep the surface open. Smoke and syringe regularly to keep down greenfly and red spiders.

Every effort should be bent towards producing a low-branched, stocky plant. The full sun, an abundance of fresh air and plenty of room are essential to produce this result. When the young plants are surrounded by these conditions they will start to break long before the center runs up to a bud. They will start more eyes than will plants grown under unfavorable conditions, and consequently make plants quicker. In the former case topping consists simply in pulling out the leading shoot when it begins to elongate, preparatory to setting a bud, while in the latter case it becomes necessary to remove the center to induce breaking. Which of the two ways is the least detrimental to the plant is not hard to decide.

Sunshine is the most perfect germ killer in nature and, as the young plants will stand it all, they should have it. Especially is it foolish to shade just before planting in the field to save watering. A soft, flabby growth is an ideal breeding ground for diseases of all kinds. Even the shading that the cuttings receive when transferred from the sand is detrimental if they do not wilt without it. Right here is the weakest stage in the plant's whole career, and disease germs are ever on the alert for a chance to penetrate the weakened tissues. The shading that is used right after transplanting from the sand should not be on the cuttings a moment longer than is necessary. We find newspapers serve well for shading in this case. After the first good soaking use water at the roots sparingly until they show signs of growth, but sprinkle lightly overhead every morning until well established. Over-watering discourages root growth, and this is what you should avoid at all times.

Where it is possible to plant in a house by themselves a temperature of 45° at night will suit them better than a few degrees higher. If planted in houses that contain blooming plants the temperature should, of course, not be reduced.

Stock that is wanted for summer blooming should never suffer for want of room and sunlight. To get an early crop it is necessary to depend upon shoots that start under glass, and these will come weak and lopover if the plants are at all coddled. Following are a few varieties that will produce a fair quantity of good flowers on good stems during summer. For red, G. H. Crane; for pink, Ethel Crocker, Mrs. Frances Joost and Wm. Scott; for white, Flora Hill and Mary Wood. Of these Ethel Crocker easily takes the lead; it produces almost as good flowers in summer as in winter.

J.

CARNATION LOUISE NAUMANN.

The accompanying illustration shows a house of carnations at the establishment of G. M. Naumann, Cleveland, O.

HOUSE OF SEEDLING CARNATION LOUISE NAUMANN.

thirty to thirty-five days. The best place you have is none too good for them but some growers still follow the mistaken notion that any place is good enough. Because we do not realize immediate returns from these small plants is no reason why we should not give them the best possible treatment. Stuck in odd corners that are not fit to grow blooming plants; in damp, drippy houses, where, indeed, there may be no dearth of

foundation to support the top growth. The same principle applies to carnations; and besides this it does any plant good to get into fresh soil. Two months is long enough for them to stand in one position.

Cuttings of medium size we plant two inches apart at the first planting, and at the second planting they receive three inches each way. At the second planting, which is usually about six weeks

The variety is Mr. Naumann's seedling from Tidal Wave and Scott, dark pink in color. The name is Louise Naumann. The originator does not call it a fancy, but a good market sort. The house shown was planted September 15 and photographed December 1, 1902.

Greenhouse at Seabright, N. J.

The principal purpose in showing the accompanying illustration is to indicate how a pleasing architectural effect may be secured with the oftentimes essential economy in building. This straight roof construction gives a palm house of reasonable height, very practical growing-houses for cut flowers, etc., and at a very moderate cost. The pretty little vestibule adds materially to the general effect of the structure. This conservatory was built for Selmar Hess, at Seabright, N. J., by the Lord & Burnham Co.

Florists' Plant Notes.

RHODODENDRONS.

Rhododendrons kept in a cool house must now have more heat to bring them on time for Easter. A temperature of 55° at night in my judgment is about right. Keep them well syringed and give plenty of water at the roots. After the flowers are open, a light shading applied to the glass will prevent the bright sun from wilting the flowers.

GLADIOLI.

If an early crop of gladioli is wanted, plant your corns any time this month. We plant them among the carnations, just deep enough to cover the top of the corns. If they are not planted too thickly no harm will be done to the carnations, for the foliage is not heavy enough to do any shading. A row on the north edge of a bench the length of the house planted two feet apart is about the proper distance.

FERNS.

Now is the time to sow the spores of the different varieties of ferns we grow for ferneries. A temperature of 65° to 70° at night in a well-shaded part of the house will be all right. Keep the seed boxes covered with glass and give little air until the spores have germinated, but be careful to keep the moisture rubbed off that gathers on the under side of the glass. The best varieties to grow for ferneries we have found to be the following: *Pteris tremula*, *Pteris argyrea*, *Pteris cretica albo-lineata*, *Pteris serrulata cristata*, *Pteris adiantoides*, *Onychium japonicum*, *Cyrtomium falcatum*, *Adiantum pubescens*, *Aspidium angulare* and *Lastrea opaea*. *Selaginella Emmihana*, for edging, requires different treatment in propagating. We rob each plant of a few good leaves, cut up into pieces about three-fourths of an inch long, discarding the coarser part of the leaf in the middle, and scatter the pieces over the sand in a flat. Cover with glass and keep them well sprinkled and densely shaded until they commence to take root, after which, transplant them into flats in good fern soil and when of sufficient size pot off into small pots. They require at all times plenty of water and heavy shading. Unless you are growing ferns for this purpose in quantity, it is perhaps better and cheaper to leave this work for the specialists who grow them annually by the hundreds of thousands, and supply them to the trade in the fall at a cost less than you could grow them for yourself. G.

GREENHOUSE AT SELMAR HESS ESTATE, SEABRIGHT, N. J.

Protest at Express Rates.

ED. AM. FLORIST:—I enclose a protest which the florists of Wichita, Kan., have prepared to use in the campaign against the fifty per cent increase in express rates on cut flowers. We have filed one copy with each agent here, have sent one to each of the general managers' offices and also a copy to John N. May, of Summit, N. J. While we do not regard this as an especially brilliant effort, either from a literary or logical standpoint, we think that every florist ought to make a "kick" on this matter, and we chose this manner in making ours. W. H. CULP.

WICHITA, KANSAS, JANUARY 6, 1903.

GENTLEMEN:—We, the undersigned florists of Wichita, wish to enter a protest against the change in rates made by your company, in conjunction with other express companies, in which cut-flower packages are charged fifty per cent more than formerly.

We are sure that this change was made without a full understanding of the facts by those fixing the rate. Taking it as a rule, florists give your employes less trouble with cut-flower packages than is given by the general run of packages carried under the single merchandise or regular rate.

Most packages are delivered at depot or R. R. station if an office is maintained there. Receipts are usually written in the book, packages are plainly marked with shipper's card attached, so that such packages give the minimum of work in receiving and billing.

In delivering, we believe that a larger per cent of cut-flower packages are called for at depot or office by consignees than any other single item under the regular merchandise rate.

The matter of express charges is an item of consideration with nearly every customer who has flowers shipped by express, and we find that the new rate is considered unreasonable, and is often declared prohibitive and we are sure that it tends to discourage frequent buying by out-of-town customers.

In addition to this many direct that light packages be sent by mail, thus lessening considerably the business of the express company on local packages, in which there is doubtless a good per cent of profit.

As to loss of packages and claims for damages in transit, we believe that such are as small or smaller than in any other one class of traffic in which the goods carried are perishable or liable to damage by delay in transit. Several other arguments might be used in this case, one of which is that this present rate works a hardship on a class of business which, with few exceptions, is conducted by individuals of moderate means with whom such an item as this is a matter of grave importance in lessening the already too close margin of profit on cut flowers bought at wholesale and sent to the retailer by express.

In conclusion, we say that a rate corresponding to a general special would have been much nearer justice in this matter in giving the florist shipper a rate which the volume and steadiness in his traffic deserves.

So long as the present rate is in force, we believe that florists will expect to receive to the smallest detail the most particular attention to cut-flower shipments, and that all claims for

damaged goods, either by heat, cold, careless handling, or delay, will be presented for collection regardless of personal friendship which may, and usually does exist between the florist and express employes.

We trust that this matter will receive your early consideration and that you will do all possible in your power to readjust it to a satisfactory basis. Respectfully,

HARRY L. HUNT,
W. H. CULP & CO.
CHAS. P. MULLER,
HERSEY GREENHOUSES,
F. KUEHNMEISTER,
C. A. ROSE.

[This protest is in the right spirit. If every shipper and receiver of cut flowers by express will write such a letter to the general superintendent of his express company and also forward a copy to John N. May, Summit, N. J., and to the AMERICAN FLORIST, it will aid greatly in securing a reconsideration of the matter.—ED.]

Write Your Protest To-day.

Excessive express rates on cut flowers do not appear to interest the florists generally throughout the country, judging from the few protests received. Up to last Saturday, January 10, twelve letters only have been received and notices were printed in each of the three trade papers one week prior to above date. This would certainly indicate that the florists, as a body, do not object to paying the excessive additional rates now being charged, and is plain proof that they would rather pay sixty-five to seventy per cent more daily for express for the flowers they may be shipping than take the trouble to write half a dozen lines of protest, costing them at most 4 cents.

A committee has been appointed by the president of the S. A. F. to take the matter up at headquarters here in New York, and the invitation sent out through the papers, as above stated, was a preliminary work necessary for said committee to have something definite to work upon, and it certainly would appear to be of enough interest to the florists, one and all, to do something and that something cannot well be less than to write a couple of letters, one for the use of the committee in New York, the other to the superintendent of the express company in the nearest city to where the writer is located. Furthermore if any concession is to be gained, every florists' club as a body should take the matter up at once and make a vigorous protest to

each company in their respective cities. Thus by united action something may be accomplished but it is useless to suppose the express companies will take any notice whatever of a dozen protests.

In conclusion, if you want the rates reduced, act at once or the matter will fall flat and the first thing you know another jump in rates will follow. Get your protest in at once in as short and concise a manner as possible, but an emphatic protest.

JOHN N. MAY,
55 W. Twenty-sixth street, New York.

Keeping Greens in the Store.

ED. AM. FLORIST:—What is the best way to keep common ferns while on hand as supplies? We use damp sphagnum moss in boxes and set the bunches of ferns on the stem ends in this, with the fronds out, sprinkle a little and keep dry air out with a cover that is tight. We keep them fairly cool in cellar storage. How long can they be kept? What is the best way to keep galax leaves and leucothæ sprays, also English ivy leaves? How long can they be kept? Does all this stock need light to keep the green color from yellowing? Would it be any advantage to keep it in a light place with a glass covering over the box, admitting light to hold the fresh green color? What is the best way to keep *Asparagus plumosus* and *A. Sprengeri* cut? Do they keep best if the stems are constantly in water and is that a necessity? How can smilax strings that are cut be best kept? We have them in a box slightly sprinkled with water and kept from heat and air, occasionally airing them and redamping and closing the box again. Ten to fourteen days is the best we can do. We have no ice but good control of temperature in the cellar.

W. M. B.

The best way to keep common ferns while on hand as supplies is in a cold frame, spread in a thin layer, bedded in and covered with leaves to prevent too hard freezing. But, as "W. M. B." apparently has not the facilities for storing them in this manner, I would recommend the following method, which will also apply to galax leaves and leucothæ sprays: Pack in boxes in layers, not too tightly, using damp sphagnum moss between each layer, and place them in a cool cellar, in which condition they will keep for months. English ivy leaves we always leave on the plants growing underneath the benches or along the greenhouse walls until we are ready to use them; for this reason we have not had any experience in storing them. I might recommend, however, to tie them in bunches and keep them in jars of fresh water, storing them in the cellar, just as you would fresh cut flowers. Light is not at all necessary to keep the color from yellowing; therefore, in my opinion, no advantage would be derived from keeping them in a light box with a glass covering. *Asparagus Sprengeri* will keep best just as you would keep cut flowers, in jars of fresh water placed in the ice box, or in the cellar. The questioner is handling his smilax just right, and the same treatment will do for *A. plumosus*. Kept in a cool cellar, smilax ought not to be expected to last over fourteen days, but *asparagus* will keep much longer. The cellar should not be too damp, but should be kept as nearly as possible at a temperature of 40°.

G.

MICHIGAN CITY, IND.—Charles Kintzele says that 1902 was the best business year in his experience.

Richardia Hybrida Solfatar.

A German contemporary, *De Gartenwelt*, color-plates the above new *Richardia* in one of its recent issues and speaks of it as follows: *Solfatar* is a cross between *R. Elliottiana* and *R. Adlami*. The flowers are from fifteen to twenty centimeters long and ten to fifteen centimeters broad, the edge very often being undulated. The color is a light sulphur-yellow which assumes a greenish sheen at dusk and under artificial light. At the base of the flower is a blotch of deepest black. The leaves are more longish than those of *R. Elliottiana* and have fewer of the white, translucent specks. While *Richardia Elliottiana* will always remain a favorite on account of its effective deep yellow color, and retain its value as a bedding plant, *Solfatar* has a great future before it as a cut flower on account

Fred. Dörner, Jr.

President State Florists' Association of Indiana.

of its pleasing color and almost unlimited durability. The flowers never shrivel like those of the white forms, but if left on the plant they will gradually turn green until they assume the color of the leaves. Cut, they will remain in good condition for a month, and it is therefore impossible for the grower to sustain a loss on account of their fading. Furthermore, this new kind has added value on account of its susceptibility to being forced. If the bulbs are planted at New Year's the plants will be in bloom by the middle of March under moderate heat. They are not fond of extreme heat. In the open ground the flowers will grow much finer and larger than in the house. The bulbs can be planted in the open, like those of the *gladiolus*, in April, and the flowers will then develop in from eight to ten weeks. This durability and hardy constitution of *Solfatar* is a great advantage over *R. Elliottiana*, which is very tender, particularly as a young plant, and will therefore always be expensive. *Solfatar* is vigorous even as a small seedling plant.

ST. LOUIS, MO.—The Townsend Floral Company, which recently purchased the Cannon flower store at 4248 Olive street, reports a very fine business. They have rebuilt their greenhouses, using the most modern methods, and now have everything in fine shape.

Berberis Thunbergii.

Berberis Thunbergii is one of the most useful shrubs a landscape artist can have. In winter its berries are attractive, in spring the leaves are a bright green and the younger ends are usually a lighter color than the older branches. The coloring in autumn is exquisite. It never grows high, is well adapted for border or edging, also does well on terraces to edge a stairway. Besides being so ornamental and dwarf, it is what foresters call "tolerant," which means that it will make shift under other trees, in ravines, or to fill up gaps where old trees or shrubbery have become disfigured at the base. It prefers soil moderately dry rather than constantly wet. C. B. W.

Teas' Weeping Mulberry.

Weeping trees should not be used as promiscuously as others, but there are places for them. Teas' weeping mulberry is one of the most satisfactory, being quite hardy and thrifty. The fruit on this weeping variety is but a secondary consideration, but it is of some consequence. They leaf out late in spring, but are soon covered when once started. It is rather remarkable for the density of its foliage and there are a variety of leaves on the one plant. C. B. W.

Indianapolis.

STATE ASSOCIATION HOLDS ANNUAL ELECTION.—THE NEW OFFICERS.—PROTEST AT EXPRESS RATES.—THE EXHIBITS.—TRADE GOOD.—VARIOUS NOTES.

The annual meeting of the State Florists' Association, which was held January 12, brought the following out-of-town florists to the city: J. S. Stuart and J. A. E. Haugh, of Anderson; Herbert Heller, New Castle, and R. A. McKeand, of Marion. A large delegation from Richmond was expected but, much to the regret of those present, failed to arrive. The election of officers for the coming year resulted as follows: President, Fred. Dörner, Jr., of Lafayette; first vice-president, E. A. Nelson; second vice-president, R. A. McKeand; treasurer, John Heidenreich; secretary, H. Junge; executive committee, John Hartje, Herbert Heller, A. Baur, E. G. Hill and J. S. Stuart. Mr. Haugh, who has been president of the association for three years, emphatically declined re-election. Herbert Heller, Wm. Billingsly, Irvin Bertermann and George Wiegand were appointed a committee to draft resolutions protesting against the exorbitant express rates on cut flowers. The discussion of the matter brought out the fact that the American Express Company has more friends among the florists than any other company. Although most of the evening session was taken up by a very animated discussion of chrysanthemum show matters, no final decision was reached. H. W. Kieman, Wm. Billingsly and F. Huckriede were appointed to judge the exhibits of the evening and reported as follows: They recommended that the S. A. F. silver medal be awarded to the South Park Floral Company for the new yellow rose Franz Deegen and the bronze medal to John Hartje, for his white seedling carnation, Number 473. They awarded a certificate to Baur & Smith for their pink carnation Indianapolis, and to Frank Harritt for an unnamed pink carnation of 1898. Honorable mention was made of Stuart & Haugh's display of Golden Gate and Bride roses and carnations, and of Baur & Smith's carna-

Berberis Thunbergii.

Teas' Weeping Mulberry.

TWO SUBJECTS WHICH FLORISTS MAY WELL RECOMMEND FOR USE ON THE LAWN.

tion seedlings. One of John Hartje's pink seedlings and a vase of mixed seedlings also received honorable mention. The supper tendered by the association to its members proved to be a most enjoyable affair in every way.

Abundance of smallpox and scarcity of coal are the two subjects occupying every one's mind at the present time. Fortunately neither of the two evils has so far seriously interfered with the welfare of the local florists, most of whom are busily occupied in scratching their vaccination and telephoning for more coal.

Trade has continued good since the holidays. Roses, especially the better grades, continue to be scarce and high in price. Carnations and violets are becoming more plentiful. H. J.

SEDALIA, MO.—At the Archias Seed Store they report the season's business much the best on record.

CLYDE, O.—R. C. Arlin has bought the interest of O. F. Horton in the firm of Horton & Arlin and will add one plant house this spring.

ST. CLOUD, MINN.—The Kindler Floral Company report a very fine holiday season and things going nicely now. They are planning to put up a new iron frame house in a few weeks.

SCHENECTADY, N. Y.—Limmer & Evans report their Christmas business far ahead of any previous record despite increased competition. The carnation was the popular flower. There was a big sale on both flowering and decorative plants and holly, green and bells were in larger demand than ever.

Chicago.

STOCK SCARCE AND QUIET BUSINESS CONSUMES THE RECEIPTS.—COLORED CARNATIONS THE ONLY PLENTIFUL ITEM.—VIOLETS HAVE UPS AND DOWNS.—COAL SITUATION AFFORDS CONCERN.—DOINGS OF GROWERS AND OTHERS.

The market has been dull this week, which is, perhaps, not wholly unfortunate, for were trade at all brisk it would be impossible to handle the business satisfactorily. It may be said that stock is scarce, although the word hardly applies to colored carnations. The Beauty crop seems at its lowest ebb. The short-stemmed part of the receipts is very poor, nearly all bullheaded and discolored. Medium lengths are in greatest demand, with a proportionately larger supply of the extra long. Bride is showing up fairly well as to quality, and in general it may be said that Bridesmaid is holding its color well considering the long continued period of gloomy weather. Both items are under the demand and prices have ranged up to \$15 per hundred for the select goods, although that hardly represents the market, for the general range is from \$6 to \$10. Liberty and Meteor are also in very small supply, but are not in so active demand as before the holidays. White carnations have been in demand for funeral work and prices on good stock have ranged up to \$4 per hundred. The various fancy varieties in colors have been in good supply, but it has been possible to move the receipts at any time by a slight concession on price. Violets have had their ups and downs. This is one of the items for which the demand fluctuates heavily, and the sup-

ply is also erratic. One day there will be comparatively heavy receipts and little demand and the next day conditions may be reversed. Such has been the story this week. In general there have been large supplies, particularly of the lower grade, but the demand for first-class goods has been sufficient to hold the price up to \$2. Probably a fair quotation on the average receipts would be 50 cents to \$1.25. Bulbous stock has been moving fairly well because of the scarcity of roses and white carnations. Most of it has found its way into funeral work.

At the meeting Wednesday evening President Thompson appointed J. C. Vaughan and F. F. Bentley a committee to act for the club in the matter of assisting in securing an appropriation from the state legislature for a range of greenhouses for experimental work at the State University. The next meeting, February 11, will be carnation night. All local growers should send exhibits and all introducers of novelties should be represented, for there will be a large number of visitors. F. F. Bentley, E. F. Winterson and Walter Kreitling are the committee in charge. All those from Chicago and the west who will attend the Brooklyn carnation meeting next month should communicate with President J. D. Thompson; he is arranging for a special car from Chicago.

The coal situation continues to afford the growers more or less concern. Few of them have been in any great straits, but when a grower finds himself constantly within a few days of the end of his pile, in zero weather, his alarm is not unnatural. Most of those who had con-

tracts with reliable concerns are now paying in excess of the contract price for their supplies. This they find advisable because it is undoubted that the coal dealers can get big money for their goods, and the growers think it unwise to undertake to hold them to the letter of their contracts, feeling well satisfied if they are able to get steady supplies even at advanced cost.

On January 3 the J. D. Thompson Carnation Company, at Joliet, received a check for \$50 from the Convention Hall Association at Kansas City in payment of the first prize in class 159 at the recent flower show, over which there has been some controversy. This was the class for best named variety, any color, not yet in commerce. The letter accompanying the check says that the premium was awarded to Enchantress.

Joseph P. Brooks, foreman for Pochlmann Brothers, is receiving congratulations over the arrival on Sunday of twin babies, a boy and a girl, each weighing seven pounds and both bright and healthy. Mr. and Mrs. Brooks are happy and proud of the new-born little couple.

There is continued talk of large additions to the greenhouse area, but it is not likely that all of the contemplated houses will develop. For the first time on record considerable French glass is being sold in this market for greenhouse purposes.

O. A. Will, of R. Will, Minneapolis, has been in town this week buying material for a new range of 50,000 feet of glass. They will use the Garland iron gutter.

Emil Buettner is sending Randall some very good white lilac. At first it sold very readily at \$2, but of late it has not been moving so well.

Paul Dailedouze, of Flatbush, is visiting the growers in this vicinity and says that the west has some great carnation-growing plants.

O. P. Bassett and Mrs. Bassett started Monday evening for Pasadena and Los Angeles, expecting to be away about two months.

N. K. Welter, at Evanston, is reported as having decided to stop buying high-priced coal to keep his carnations warm.

William Kidwell welcomed a fourteen-pound boy into his family last Monday.

A. Lunge has been ill with tonsilitis.

New York.

CLUB INSTALLS ITS NEW OFFICERS.—SKETCHES OF THE INCUMBENTS.—STORY OF THE EVENING'S BUSINESS.—COMMITTEES FOR THE YEAR.—STOCK SCARCE BUT DEMAND LIGHT.—VIOLET MARKET SLUMPS.—VARIOUS NOTES.

With this appears a portrait of the newly installed chief executive of the New York Florists' Club, in a pose which some recent presidents, for one reason or another, have had no occasion to practice and which we believe will give sincere pleasure to his many friends and awaken an interest far beyond that which a portrait of the more common style could evoke. Mr. Troy comes of a horticultural ancestry and received when a young man a thorough training in his profession at Abbotstown Gardens in Ireland, at the establishments of Chas. Turner, B. S. Williams, and Eton Hall, England. He came to New York in 1888 and for the past seven years has held the position of manager of the Kosary Flower Company, previous to which he was engaged in landscape work with Bowditch and at Pitcher & Manda's nurseries. In addition to the domestic nursery business so vividly shown in the illustration, Mr.

J. H. Troy.

F. H. Traendly.

PRESIDENT AND VICE-PRESIDENT OF THE NEW YORK FLORISTS' CLUB.

Troy has quite an establishment at New Rochelle, his specialty being fancy decorative planting material. No doubt president Troy's administration of the affairs of the club will be eminently successful. The two vocations of proud father and able president should work well together and we all hope that he may always be blessed with the filial love and respect of his flock in the domestic circle and the club-room alike. The portly gentleman represented in the other illustration is well-known in New York wholesale flower activities and in his capacity as a strenuous bowling enthusiast, once seen (and heard) is never forgotten. Whether in business or pleasure. Mr. Traendly enters heart and soul into whatever he undertakes and the club made no mistake when it placed him in the vice-president's chair.

Having now introduced the two new officers, the story of the first club meeting of the year is in order. Secretary Young and Treasurer Weathered, re-elected for the 999th time, occupied their respective positions with accustomed dignity. The retiring president, W. F. Sheridan, briefly spoke of the events of the past year in the club's history, complimented the organization on its harmony and prosperity and then introduced his successor, bespeaking for him the continued cordial support of the members. President Troy, on taking the chair, made a few remarks touching particularly on the practical questions now uppermost, such as the coal problem, the exorbitant express rates on flowers and the approaching carnation convention, and urged individual effort on the part of each member to maintain in the coming year the high standard of efficiency shown in the club's past history.

Routine business included the annual report of the secretary, showing an increase of twenty-two new members and one death during the year, the treasurer's report showing a generous increase in the treasury, the adjusting of several unfinished items left over from the fall exhibition, and the presentation of resolutions, as authorized at the previous meeting, expressing sympathy with the widow and orphans of the late A. S. McLennon and appreciative of his manliness, industry and integrity.

A letter was received from the Cincinnati Florists' Club expressing a desire to co-operate in any general movement for the repeal of high express rates and a general statement of the situation by Mr. O'Mara was followed by a vote authorizing the appointment of a special committee to work in harmony with the S. A. F. and other organizations in agitating this subject. Wm. Turner, of Oceanic, did the club a good turn by turning into the treasury the amount of premiums won by him at Madison Square Garden, and the club, in turn, returned him a vote of thanks. Alex. Wallace, as secretary of the Brooklyn Horticultural Society, gave interesting details of the preparations for the coming carnation meeting of February 19 and 20. He said that the citizens, as represented by the Brooklyn Academy, are working in harmony with the florists and the prospects are excellent for a record-breaking convention. Wm. J. Stewart announced the death of F. L. Harris, of Wellesley, Mass., an honorary member of the club, and a committee was appointed to prepare resolutions thereon. The list of regular and special committees appointed was as follows: On awards, Messrs. Cook, Siebrecht, Duckham, Leuker and Phillips. On legislation, Messrs. O'Mara, May and Burns. On entertainment, Messrs. Sheridan, Traendly and Kogge. On annual dinner, Messrs. Weathered, Sheridan, Traendly, Hafner and Butterfield. On unfinished show matter, Messrs. O'Mara, Sheridan, Weathered and Young. On death of sister of ex-President P. O'Mara, Messrs. Sheridan, Hafner and Dowsett. On death of Fred. L. Harris, Messrs. Manda, Stewart and Troy.

A sudden scarcity of roses and carnations has struck this market and the fact of a very light demand is all that keeps prices from soaring skyward, as the supply, at present, is totally inadequate to meet any generally lively run of business. As it is, white carnations are bringing fancy returns and American Beauty specials have advanced fifty per cent in value over last week. On the other hand violets are being hard hit, the daily receipts being very heavy and the sales very light. The severe cold makes it impossible for the Greeks to take advantage of the situation and so this

useful outlet for a stagnated market is cut off and the violets are left on the wholesalers' hands until they are valueless. As things are now, it is less a question of price but of a sale at any price and improvement is not in sight until a period of warm weather gets here.

Patrick O'Mara is about to take a sea trip to St. Augustine, Fla., where his sister has already gone for needed rest after the recent bereavement which the family has sustained. Mr. O'Mara will be away about two weeks.

J. W. Withers, who has been confined to his room by sickness for the past six weeks, expects to start next week on a recuperative trip to the West Indies.

Huge birds' nests constructed of twigs and "pussy willows" are a taking ornament in Warendorf's window, filled with violets, lily of the valley and roses.

John H. Taylor had a boiler tube give way one night last week when the temperature was low and one house had a very narrow escape from freezing.

The large greenhouse of George Zeiner, on Clarkson street, Brooklyn, burned January 10, loss \$2,500.

J. D. Thompson, of Joliet, Ill., was a visitor last week.

Philadelphia.

GROWERS HAVE TOUGH TIME BETWEEN GETTING COAL AND MEETING DEMANDS FOR STOCK.—PRICES HIGH.—VARIOUS LOCAL NOTES.

The lot of the florist these days can scarcely be said to be cast in pleasant places. What with the scarcity of coal, which is emphasized by the cold spell now prevailing, and the infinitesimal stock of flowers coming in, it keeps everybody on the jump and there is a constant strain all along the line. The coal situation is getting worse instead of better. Prices are going up and even at the advanced price one is counted lucky if half of his order is delivered. It has to be all cash down now, as the dealers have to put in the cash first to get prompt delivery and keep their cars from being side tracked. Prices range from \$3 to \$5 and even higher at the mines by the carload and \$7 to \$8 and even higher at the yards, and haul it yourself. Hard and soft are about the same. W. K. Harris says his fuel bill will be over \$3,000 more than last year and many others say that they will be satisfied if they come out even on the business of the year.

Flowers are very scarce, there being nothing in full supply except, perhaps, carnations and even these are not plentiful; \$3 is low for stock safe to handle, with extras selling as high as \$8 per hundred. Roses, particularly white stock, are scarcer than I can remember. Everything is grabbed up at sight. The poorest Golden Gates bring \$6, with the specials going as high as \$18. Bridesmaids and Brides ranges from \$6 to \$18, Beauties, \$2.50 to \$7.50 per dozen and very scarce. Bulbous stock \$3 to \$4, Harrisii lilies \$25 per hundred, callas \$12. Violets \$1 to \$1.50 per hundred.

At the flower market the business is all over these mornings in about twenty minutes. The growers are waylaid at the depots and if they can fight off the buyers and keep their stock intact until they reach the market it is simply a question of seeing that none of it gets away without the equivalent, as the buyers fairly swam about each lot as the boxes are opened, and it is hard to keep track of the stock as it goes. D. T. Connor, who represents the Lord & Burnham Company, has fixed up a

nice exhibit of the firm's various appliances and is on the spot every morning.

J. Anderson, of Garrettford, has sold out his greenhouses and business to George Monroe, late with Robt. Scott & Son, who will carry on the same. Mr. Anderson is going back to his old love, the milk business.

Mr. and Mrs. James Verner, Garrettford, celebrated their silver wedding anniversary on January 16. There was a large gathering of friends, with numerous presents.

There will be considerable building the coming season. John Burton will rebuild several large houses and erect some new ones at the new place. K.

Boston.

TRADE REPORTED GENERALLY SATISFACTORY.—SCARCITY OF FUEL SHUTS OFF PRODUCTION—VIOLETS AND RED CARNATIONS LOSE FAVOR.—THOMPSON SECURES MORE FISHER NOVELTIES.—VARIOUS NOTES.

Business matters in general seem to be progressing satisfactorily at present in all branches of floricultural industry. The wholesale markets are receiving their daily shipments of flowers in quantity, quality and variety fully up to the average for the season and the suburban and country demand as experienced by the city wholesale dealers compares favorably with that of former years. In fact it is rather better than usual, the scarcity of fuel and the shutting up of many small establishments being probably a contributing cause. As to prices, they are holding up very well except in the case of violets and red carnations. The latter, which at Christmas stand at the head of the list of desirable goods, have now dropped precipitately to the bottom. It is the usual story and its recurrence each year furnishes the very best kind of an argument justifying double rates on carnations of this color at Christmas time, since the market refuses to support their production during the balance of the winter. At present selling values red carnations, however good, are an unprofitable crop. On the other hand, the white varieties are having an excellent run at paying rates. Violets have dropped to one-half their holiday value. Wholesale and retail florists agree that the unusually high prices charged during the holiday season just passed are largely responsible for the extent of the break and it will take a little time at prevailing low rates to lure the public back into the violet habit. Further, a considerable moderation in temperature is essential before the street men, who use up so many low-priced violets, can do anything outside.

The carnation meeting at Brooklyn next month is likely to attract a larger attendance from this section than these occasions have attracted in the past. The prominence of New England varieties all over the continent and the high standard set by our local seedling raisers has had a healthy and inspiring effect on the carnation interests here. J. D. Thompson, of Joliet, Ill., the purchaser of Peter Fisher's Enchantress, was in town for one day last week and secured control of two more of Mr. Fisher's gems, Mrs. Patten and Nelson Fisher. Mr. Thompson was highly elated over the splendid success attending the sale of Enchantress, which he attributes, in part, to the excellence of the stock now being sent out, a month ahead of contract time. His personal sales of this variety

on the present trip amounted to 14,000 rooted cuttings.

The suggestion to take the Public Garden for a site for Boston's new city hall has met with general popular disapproval.

Visitor last week: L. W. Wheeler, of Vaughan's Seed Store, New York.

Madison, N. J.

The festive litch-string was out last Wednesday night in Madison. It was installation night in the Morris County Gardeners' and Florists' Society and, in accordance with well established custom, the members and their friends made merry. About sixty participated in the "smoker," the number including a fair percentage of guests from New York and intermediate stations, and the hands on the clock sped around entirely too fast for those who "must catch that train." A business meeting preceded the entertainment, when Messrs. C. H. Totty, president; Robt. McMullen, vice-president; Wm. Charlton, treasurer, and C. H. Atkins, secretary, assumed their various chairs and annual reports were presented showing the organization to be strong and harmonious and the treasury well filled with the needful. After the reading of letters from several absent friends an admirable entertainment was presented by the "Foster's Funny Fellows" under the management of the Star Lyceum Bureau, incidentally assisted by Robby Schultz in his specialty of hanging on to the four accs. During the entertainment on the platform, which was thoroughly good and enjoyable, the officers past and present worked assiduously in dispensing good cheer for the inner man. The heavy burden of coal bills and other worries of the gardeners' lot were all forgotten for the time being, as rose growers and private gardeners made merry together and thus furnished an example of that fraternal fellowship which should always prevail. The Madison idea is a blooming success.

Tarrytown, N. Y.

The annual banquet of the Tarrytown Horticultural Society at the Florence Hotel Wednesday evening, January 14, enjoyed a full attendance and proved a jolly affair. After the preliminary exchange of greetings the assembly marched to the dining hall, where the tables were elegantly decorated with the rich products of the various greenhouses in the vicinity. Full justice having been done to an elaborate menu, President David McFarlane called upon the president of the village of Tarrytown, who extended cordial greetings to the society and presented the freedom of the town to the visitors. Clarence Reynolds recited the mycological legend touching on the science of rose colors and Messrs. Withers, Cobb and Butterfield made a good oratorical record for the reporters' table, the latter also contributing songs. D. Raymond and other society members added eloquence and wit so entertainingly that the midnight hour arrived all too quickly. Songs and instrumental music were plentifully interspersed throughout.

LEMINGTON, KY.—John A. Keller says holiday business was full thirty per cent better than a year ago and he will this spring add two houses 30x125. The Lakeview Flower Store also makes a good report and Honaker says 1902 was the best business year on record.

THE AMERICAN FLORIST

EIGHTEENTH YEAR.

Subscription, \$1.00 a year. To Europe, \$2.00.
Subscriptions accepted only from those
in the trade.

Advertisements on all except cover pages,
10 Cents a Line, Agate; \$1.00 per inch.
Cash with G. order.

No Special Position Guaranteed.

Discounts are allowed, only on consecutive inser-
tions, as follows—6 times, 5 per cent; 13 times,
10 per cent; 26 times, 20 per cent;
52 times, 30 per cent.

Cover space sold only on yearly contract at
\$1.00 per inch, net, in the case of the two
front pages, regular discounts apply-
ing only to the back pages.

The Advertising Department of the AMERICAN
FLORIST is for florists, seedsmen and nurserymen
and dealers in wares pertaining to those lines only.
Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to
secure insertion in the issue for the following
Saturday. Address

AMERICAN FLORIST CO., Chicago.

CHAPERON is the name given by the
Chicago Carnation Company to a prom-
ising new white seedling carnation.

It has been stated by a well known
grower that American Beauty roses will
yield \$1.25 per square foot of bench
space per annum.

J. E. JENSEN, foreman for the J. D.
Thompson Carnation Company, says
Apollo is the best keeping carnation
with which he has had experience.

THE yellow address label on your paper
bears the date at which your subscrip-
tion expires. When we receive your
renewal the date on the yellow label will
change within three weeks.

E. G. HILL, of Richmond, Ind., states
that one firm will pay \$8,000 more this
year than last for coal to heat the same
amount of glass and pertinently asks
whether growers, considering this
advance, can sell stock at former prices.

THE coal question is a serious one. In
most cases the supplies have thus far
been sufficient to keep the boilers going,
but the growers are naturally alarmed
when it is possible to keep only a few
hours' or days' supply on hand. A severe
storm, to tie up the railroads, would
mean the freezing up of many establish-
ments.

A Caution.

Subscribers should satisfy themselves
of the trustworthiness of persons to
whom they pay money for subscrip-
tions to the AMERICAN FLORIST. We
have frequent complaints about money
paid to persons who never forward it to
us. Our representatives are well-known
members of the trade in their several
communities. Pay no money to strangers.

Sweet Peas Without Crop Rotation.

ED. AM. FLORIST:—Will you please tell
me whether sweet peas can be grown
successfully on the same ground year
after year? Some authorities say they
will not do well, but a neighbor of mine
has raised fine sweet peas for several
years in the same place. As I have an
ideal place for growing them, I do not
want to change unless it is necessary.

ARTHUR W. HIGGINS.

I think that sweet peas can be grown
on the same ground year after year. I
have grown sweet peas on the same
ground for several years and last year,
the fourth year, the plants and flowers
were better than ever before. The
varieties were *Blanche Ferry*, *Emily
Henderson* and *Countess of Radnor*.

ANT. C. ZVOLANEK.

Can't Do Without It.

AM. FLORIST CO.:—For enclosed dollar
please extend my subscription to the
FLORIST for 1903. We can't be without
your paper. E. C. STAMMERJOHN.
Boonville, Mo.

It All Depends on Ability.

ED. AM. FLORIST:—What salary ought
a man to receive for superintending the
growing and planting of 200,000 bed-
ding plants each year where there are
nine parks of different sizes and several
street centers? Florist has to look after
the details of growing the plants and
designing the beds and take his place at
the work with the rest of the men.

SUBSCRIBER.

[Every man's salary depends upon the
ability with which he performs the task
assigned him.—ED.]

Brooklyn Hotels.

The Brooklyn Horticultural Society
gives out the following list of hotels near
Brooklyn bridge and accessible to the Ger-
mania Club, where the American Carna-
tion Society meets, February 19-20:

Name	Plan	Rates
The Pierpont.		
Montague and Hicks sts.,	Am. (double)	\$2.50
Charlodon.		
Washington st.,	E p'n (single)	2.00
	E p'n (double)	1.50
St. George.		
Clark st.,	Am. (double)	3.00
Aster House.		
Broadway, New York.	E p'n (single)	1.50
	(double)	\$1 to 1.50
Broadway Central.		
667 Broadway, New York.	Am. and E p'n	1 and upwards

Those who wish accommodations
reserved for them are requested to notify
C. G. Weeber, chairman of the reception
committee, 25 Willow Place, Brooklyn.

All About Lilies.

ED. AM. FLORIST:—Will *Lilium longi-
florum* six inches high January 1 be in
bloom for Easter if grown on in 60° of
heat and given hot water once in awhile?
Is *Lilium candidum* hardy outdoors in
Pennsylvania? Should calla lilies have
much or little water? A. M.

As Easter falls on a late date this year,
a temperature of 60° at night will bring
longiflorum into bloom on time, if the
plants were six inches high on the date
mentioned. It will hardly be necessary
to give them warm water, at least not
until you are convinced that stronger
forcing is necessary to bring them in
bloom on time. It takes about six
weeks in a temperature of 60° to develop
the flowers after the buds are set; and
bearing this in mind, if six weeks before
Easter the buds are not set, the tempera-
ture may be raised 5° or even 10° at
night, and water heated to the tempera-
ture of the house may then be copiously
given. We have found *Lilium candidum*
to be perfectly hardy in the extreme
northern part of Pennsylvania. Callas
require plenty of water and feeding at
this time of the year; but if planted on a
solid bed, which in our opinion should
never be, as it induces too rank a growth,
water should be more judiciously applied.
G.

OBITUARY.

MRS. F. L. WASHBURN.

Frank L. Washburn, of A. Washburn
& Son, Bloomington, Ill., mourns the
loss of his wife, who died January 12,
after an illness of nearly a year. Mrs.

Washburn, nee Aldrich, was 31 years of
age and had been married seven years.
The interment took place January 15.

W. T.

CHARLES WINTER.

Charles Winter, a well-known florist of
Mansfield, Mass., died on January 9,
after a long illness.

MRS. JAMES COLE.

Mrs. James Cole, Sr., wife of the senior
partner of the firm of Cole Brothers,
Peoria, Ill., died January 11, after a
long illness. She was born in England
in 1827 and with Mr. Cole came to
America in 1854. Ten years later they
located in Peoria, where they have seen
a thriving city developed from a mere
village. She leaves a husband and three
sons.

NATHAN G. AXTELL.

Nathan G. Axtell, of Evanston, Ill.,
died January 11, aged 76 years. After
long and useful service in a different occu-
pation, he has for ten years been an
enthusiastic and extensive grower of
sweet peas, selling on the Chicago market.
Lately he has also handled hardy vio-
lets. During the entire civil war he was
a Union officer, returning with the rank
of colonel of volunteers.

S. B. SMILEY.

S. B. Smiley, one of the best-known
florists of western New York, died very
suddenly at his home at Lancaster on
January 9. His original venture in busi-
ness was at Bowmansville, but he soon
moved to Lancaster, where he built up a
prosperous establishment, most of his
crops being sold in Buffalo, where Mr.
Smiley was highly esteemed for his genial
disposition. He leaves a wife, three sons,
and a venerable father and mother who
resided with him.

CLAUDIUS M. RAVIER.

Claudius M. Ravier, who died at
Mobile, January 10, was the pioneer
florist and nurseryman of Alabama, and
a recognized authority at the business
which he had carried on successfully for
the past twenty-seven years, and which
to-day stands a monument to his labor
and ability. It is the largest place of its
kind in the state. Born in France, he was
educated for his trade. After a term in
England he came to America, and spent
several years at Rochester, N. V. In 1869
he landed at New Orleans, where he suc-
cessfully engaged in business. In 1875,
in that city, he married Miss Lucy
Thublin, and with her removed to Mobile
a short time afterwards, and engaged in
business at the place where he died. Begin-
ning with a small piece of ground, at the
time of his death he had on his place
50,000 feet of glass. The first house that
he built stands to-day. The deceased is
survived by his wife, three sons, Louis,
Fred, Claud; one daughter and distant
relatives in France.

JOHN DICK.

John Dick died at Philadelphia, Janu-
ary 13, in his eighty-ninth year. Mr.
Dick was born in Edinburgh, Scotland, in
1814. He came to this country in 1834
with no capital but a sturdy constitution
and a determination to succeed in his
chosen calling. He first obtained employ-
ment with Andrew Dryberg. After sev-
eral years he went into partnership with
James Ritchie, his brother-in-law, at
America and Oxford streets, where they
were quite successful. In 1850 he bought
a plot of ground and erected greenhouses
at Fifty-second and Woodland avenue,
where by careful management he built
up a large business, making a specialty

of hardwooded greenhouse plants, such as camellias, daphnes, and so forth. He also conducted a retail store at 1721 Chestnut street. He retired from active business about fifteen years ago. He was a large and successful operator in real estate. Three daughters and one son survive him. Robert and John Halliday, of Baltimore, are grandsons. The interment was on Friday afternoon in West Laurel Hill cemetery. K.

FRED. L. HARRIS.

Fred. L. Harris, former gardener at the H. H. Hunnewell estate, died at his home in Wellesley, Mass., on Sunday, January 11, aged eighty years and twelve days. Thus passes away the "grand old gardener," best beloved in his profession in America. He stood for all that was noble and manly in American horticulture; a shining example to the young gardener, his record is an encouragement and incentive to ambitious industry. Such men are an honor to any calling and an inspiration to their fellows.

He endeared himself to all who came in contact with him by his courteous kindness, his thoughtful sympathy and his unassuming modesty. Many a fellow gardener can trace his own success in life to the kind words and willing generosity of Fred. Harris. The far-famed estate by Lake Waban, the most beautiful example of landscape gardening art on this continent, which under his guidance and art was transformed from an unadorned waste, is an enduring monument to his ability in his profession. During the forty-six years of his service there the most cordial and sympathetic relations existed between him and his employer and co-worker, the late H. H. Hunnewell.

In the spring of 1900, feeling the infirmities of age creeping on and mourning over the death of a beloved wife, he laid down his cares. At that time a notable ovation was tendered him at the Hotel Brunswick, Boston, in which eminent men in horticulture from far and near united to do him honor. A silver loving cup presented to him on that occasion was among his most prized possessions. For the past year he has been a great sufferer, confined to his room by rheumatic and other affections, but always retaining his interest in "the boys," the Massachusetts Horticultural Society, the S. A. F. and other organizations with which he had long been associated. It had been his earnest desire to welcome a few of his old associates at his home on the occasion of his eightieth birthday, but his waning strength forbade.

The funeral on Tuesday, January 13, was attended by a large concourse of sorrowing friends.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1903 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

Situation Wanted—As carnation and mum grower; 5 years at present position. Address A R B, care American Florist.

Situation Wanted—Eight years' experience, all-around; prefer the wholesale selling business. Address LAUT, care American Florist.

Situation Wanted—As working foreman, grower of first-class roses, carnations and mums. Reliable references. J. S. SALMONS, 252 E. Walnut St. Washington, Pa.

Situation Wanted—By a middle aged man, sober and reliable, as assistant florist. Small place preferred, not out of Illinois. Address W H, care American Florist.

Situation Wanted—By good grower of roses, carnations, etc., to take charge of section on good place; first-class recommendations. State wages, etc. Address ALPHA, care American Florist.

Situation Wanted—By single young man on private place as second man; 7 years' experience in orchids, greenhouse plants and general work. First-class references. Address F V, care American Florist.

Situation Wanted—To take charge by experienced grower of roses, carnations and general stock; middle aged, married, sober and industrious. State particulars. A M, Florist 1017 Lawrence St. Philadelphia, Pa.

Situation Wanted—By all-around florist and gardener, first-class references, married, no children; private place preferred; please state wages. Address ANNA House, 102 N. Clark St., Chicago.

Situation Wanted—As head gardener or foreman; German, speaks English, 30 years of age; 14 years' experience. All references; last position with J. Blair, care of Ogden Mills, Staatsburg, N. Y. J. KRAMER, Millbrook, Dutchess Co., N. Y.

WANTED!

A young man, married or single, for general greenhouse work and management; must be of good character and a good propagator of all kinds of greenhouse plants. A permanent position with prospects of quick advancement in wages and position. Give references and wages wanted. Address

INDIANA, care AMERICAN FLORIST.

A grower, desirably located, having conducted a most profitable business for some time, is now obliged to refuse good orders on account of lack of capital.

Parties desiring to become jointly interested in a well paying business that will yield excellent returns on an investment, are requested to correspond with the NATIONAL FLORISTS' BOARD OF TRADE NEW YORK.

We did it! What?

Why, filled your orders for the Holidays, and will continue to do so. Send them along.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Withersfield, Conn., Sec'y and Treas.

VISITED CHICAGO: T. H. Hopkins, with the John H. Allan Seed Company, of Picton, Ont., enroute to Sturgeon Bay, Wis.

THE Kansas City Review of January 5 gives a complimentary notice of the growing business of the Trumbull Seed Company, established in 1872.

THE old Northrup, Braslan, Goodwin Company matter still hangs fire in the U. S. courts because of suit by the National Bank of Waterville to set aside the original assignment.

American Seed Trade Association.

The executive committee of the American Seed Trade Association met at the Shoreham Hotel, Washington, D. C., January 13, there being present President Walter P. Stokes, Secretary S. F. Willard, H. W. Wood, W. H. Grenell, Albert McCullough and F. W. Bolgiano. The programme was arranged for the annual convention to be held at Philadelphia, and Atlantic City June 23-25. Walter P. Stokes and Albert McCullough were appointed delegates to the National Board of Trade.

The European Seed Trade.

The first two or three weeks in December are certainly among the busiest of the whole year, for this is the time when the larger part of the catalogues are dispatched; everyone tries to hurry on its issue as much as possible, so that certain traits take their way by wagon loads. The number of pamphlets and catalogues sent out from Erfurt and Quedlinburg during the season must nearly approach half a million.

On account of the wet autumn, which seriously delayed the gathering and drying of the crops, the prices could not be fixed at the ordinary time and in consequence the catalogues appear this year some days later than usual. The quotations show certain changes compared with last year's, which, generally speaking, was more favorable for the normal development and ripening of the seeds. Our readers will remark that those seeds which came to early maturity, such as chervil, spinach and turnips, show generally lower prices. Then in September the rain commencing spoiled a certain part of the pea crop, which finds its expression in somewhat higher prices, especially the later varieties being quoted far higher than ordinary.

The so-called October crops, such as lettuce, onions, parsley and cucumber, having suffered greatly by the humidity, show generally much higher prices, while cabbage, carrots and radishes are partly cheaper and partly dearer than last year on account of the good crop in France and the Netherlands, otherwise these articles would all have risen, for the crop in Germany turned out at last considerably below the average. In general we dare say the foreign crops have

influenced to a certain extent the prices of the German growers.

Business is slowly commencing and especially for articles in demand, like chervil, large-rooted Magdeburg onions, Zittau and blood-red are also much asked for. The trade will probably get brisk, the greater part of the stocks on hand being cleared out last year.

The French growers and dealers complain much of low prices but the quantities at their disposal, being sufficient, it may be presumed that they will deal at the usual profits.

The quality of the seeds produced this year leaves much to be desired with regard to germinative power. This is the case in almost all Continental seed-growing countries and a consequence of the enormous humidity and low temperatures during the harvest season. The flower seeds seem to have been less influenced by the unfavorable conditions of weather, only the varieties ready in October, such as asters, zinnias, scabiosa and tagetes, will show weaker germinative power than usual but the damage does not appear to be important.

The present year is very rich in novelties, both in vegetables and flowers; some of them, like the Waldersee aster, and Glora dahlia are worthy of note. Generally speaking, Erfurt and Quedlinburg are no places for raising novelties, which has become quite a branch of commerce in certain houses and districts.

We will not close our report without saying a few words concerning the weather during the months of November and December. After an abnormally wet summer and autumn there followed suddenly a long period of heavy frost which came quite unexpectedly and in consequence did much damage. A curious thing is that a good deal of sugar beet froze in the earth, so that it was entirely lost for the manufacturers, a

misfortune occurring very rarely in our climate. The beginning of December brought heavy snowfalls accompanied by cold winds, the temperature fell rapidly, on some nights down to 8° Fahrenheit, a temperature which the renowned "coldest inhabitant" cannot remember since the war of 1870. In the middle of December the weather changed completely, we had some mild and sunny days melting away all ice and snow so that the earth is now again without the protecting snow cover, without which sudden sharp frost might do great damage here.

Poughkeepsie, N. Y.

The eighth annual banquet of the Dutchess County Horticultural Society, January 8, was a record-breaker, taxing the capacity of the banquet hall of the Nelson House to the utmost, 120 participating. The speakers were such past masters of their art as Frank B. Lown, Richard E. Connell, E. Lyman Brown, W. H. Wood, Hon. John I. Platt and A. Lee Wager. There were two toastmasters, Frank Hasbrough and F. B. Lown, and oratory full of wit, satire and wisdom was on tap for several hours, and instructions given in raising everything from Cain to farm mortgages, particularly the former. Tables laden with floral decorations and flowers of rhetoric bloomed freely.

SPECIAL OFFER OF SPIRAEA AND BULBS FOR EASTER FORCING.

SPIREA FOR EASTER FORCING. We offer a few cases each of the following sorts, as below, as long as unsold. These can be shipped safely by freight as it will not injure them in the slightest if frozen. There is plenty of time to get them in for Easter, if wanted, and they also make good stock for Decoration Day. Now is the time to lay in a stock, before they are all sold. **Japonica and Compacta Multiflora**, case of 250 clumps for \$8.00; in less quantities, \$1.00 per 100. **Astilboides Floribunda**, case of 250 clumps for \$10.00, in less quantities, \$5.00 per 100.

JAPANESE FERN BALLS. Best Quality, \$25.00 per 100. The surplus bulb stock recently offered has sold fast, but we can still supply the following in first-class shape as long as unsold at prices named below.

SMALL SIZED NAMED HYACINTHS. These are splendid for Easter forcing, and are fine for growing in pans or pots. Nothing is more readily salable. Price is very low, and the bulbs bare, first class - remarkably good for the low price at which they are offered. They will throw almost as good flowers as the larger and higher priced bulbs. If you have never flowered these, try a thousand or two. You will be pleased with the results; they cannot fail to make money for you.

The following pink varieties at only \$1.50 per 100, \$12.00 per 1000 (worth \$16.00 per 1000), viz.: Baron van Thuyll, Gen Pelissier, Gertrude, Gigantea, Robt. Steiger and Solfatara.

The following blue varieties at only \$1.50 per 100, \$12.00 per 1000 (worth \$16.00 per 1000), viz.: Grand Maitre, King of the Blues, La Peyrouse, Chas. Diekens, Blondin, Czar Peter; also Tamerlan (yellow).

The following white varieties at only \$2.00 per 100, \$16.00 per 1000 (worth \$22.00 per 1000), viz.: Baroness van Thuyll, Grandeur a Merveille, Blanchard, L. Immeuble, Mme. Van der Hoop, and Paix de l'Europe.

FINE NAMED HYACINTHS, Single and Double. We offer a limited stock of the following varieties in a standard bulb, at \$3.00 per 100; \$25.00 per 1000 (worth \$35.00 per 1000), viz.: La Peyrouse, Regulus, Tamerlan, Grand Lilas, La Pluie d'Or, Grandeur a Merveille, Blocksberg, Bouquet Tendre, Czar Nicholas, Crown Prince of Sweden, Flevo, Garriek, Grootvorst, Gen. Antinek, King of Wurtemberg, La Tour d'Auvergne, La Virginite, Lord Anson, Lord Raglan, Othello, Prince of Orange, Prince of Saxe-Weimar, and Princess Royal.

HYACINTHS IN SEPARATE COLORS. We still have a few of these left in singles and doubles, which we offer as long as unsold at \$2.50 per 100, \$20.00 per 1000, (worth \$26.00 per 1000).

WHITE ROMAN HYACINTHS. We still have a few cases of 12-15 cms. bulbs, which we offer as long as unsold at \$15.00 per 1000 (worth \$25 per 1000).

TULIPS, Single and Double. Most of the varieties here offered are among the very best forcing varieties, especially for late or Easter forcing, viz.: Rosamun fi, Huykinan, Bizard Verduet, Couleur Ponceau, La Candeur, Yellow Rose, Lady Grandison, Duke of York, Rose Blanche, and Count Leicester at \$5.00 per 100; Cottage Maid, Joost van Vondel, Brutus, Pannonia Red at \$6.00 per 1000; Tournesol Red and Yellow, Gloria Solis, Le Blason, and Rosine at \$7.00 per 1000; Pottebakker White, Duc van Tholl Searlet and Standard Royal Silver at \$7.50 per 1000, Rose Grisdelin, Belle Alliance, and Marriage de ma Fille at \$10.00 per 1000; Proserpine at \$12.00 per 1000; White Joost van Vondel and Rose Luisante at \$20.00 per 1000.

NARCISSUS. Trumpet Major and Single Von Sion at \$6.00 per 1000; Poeteus Ornatius and Barri Conspectus at \$5.00 per 1000; Silver Phoenix and Grandis Maximus at \$15.00 per 1000.

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.

CHAS. A. ILGENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y. Twenty-eighth annual convention, Detroit, Mich., June, 1903.

PROF. JOHN T. STINSON, of Mountain Grove, Mo., has been appointed superintendent of pomology in the department of horticulture at the St. Louis Exposition.

CRIMSON RAMBLER roses will be very scarce this spring and consequently higher in price. The early frosts killed thousands in Holland, whence we receive considerable of our supply.

THE park board of Memphis, Tenn., is to make extensive improvements in the park lands of that city. Chairman Robert Galloway estimates that an expenditure of \$50,000 per year for ten years will be necessary.

THE Illinois Central Railroad is encouraging the fruit growing industry along its line in Mississippi, much of which land is admirably adapted to peaches and small fruit. Capt. J. F. Merry, A. G. P., at New Orleans is in charge of the work.

THE United States Department of Agriculture, through its pomological division, is carrying on investigations of the underlying principles which govern the keeping of fruits in cold storage. The work is in the immediate charge of G. Harold Powell, the assistant pomologist of the department.

Detroit.

CLUB HOLDS A GOOD SESSION.—NO SHOW NEXT YEAR.—MERITORIOUS EXHIBITS.—GROWERS HAVE NO EASY LIFE.—VARIOUS NOTES.

The club meeting of January 7 was fairly well attended. Only business of a miscellaneous character was transacted. Another candidate was admitted to membership in the club. Consideration of the proposed flower show next fall resulted in the abandonment of the project and the energies of the club will, in the meantime, be directed in the interests of the carnation meeting, which is almost assured for this city in 1904. Several of the local florists will attend the Brooklyn meeting, when the formal invitation of the club will be extended to the carnation society. Chas. Frueh & Son, of Saginaw, Mich., had on exhibition a red seedling carnation. The flowers were not extraordinary in size but of good color and on long, stiff stems and were favorably commented upon. Hopp & Lemke, of Grand Rapids, sent for exhibition a new rose which was not accompanied with pedigree but seemed to bear resemblance to old Bon Silene but showing much stronger growth and large blooms, quite double and was considered a valuable acquisition. S. Alexander, who has served as park botanist for some time, was present at the meeting and gave a review of his work here and outlined some ideas which he was anxious to execute, if retained in the same capacity, whereupon the club endorsed his work and recommended his retention by the Park Commissioner. A practical demonstration of a thermostat was given by its manufacturer, who easily proved its utility.

Zero weather with plenty of snow and wind is adding much hardship to the life of the growers, who are still enduring the high prices and scarcity of coal and some are reducing the temperature of the

most unproductive houses to the freezing point, in their efforts to save fuel. Violets have been and are still quite scarce, while the demand for them continues active. The same is true of roses, while carnations are in fair supply and about equal to the demand.

Robert H. Flowerday, son of Robert Flowerday, leaves this week to accept a position with the American Car and Foundry Company, at St. Louis.

Chas. Schaible has again entered the retail business and has opened a store at 719 Woodward avenue.

Wm. Dilger made a business trip to Toledo last week.

Visitors: C. W. Scott, A. L. Vaughan and A. Ringier, Chicago; Chas. Schwake and Ralph Ward, New York. J. F. S.

Minneapolis.

SCARCITY OF STOCK MAKES GOOD MARKET FOR BULBOUS MATERIAL.—BASKETRY THE FAD.

The scarcity of roses, carnations, and so forth, has caused quite an active demand for Paper White narcissi and Romans. Growers who have had a supply of these old-time favorite bulbous flowers are realizing a good profit on them. The death of some of the most prominent residents of Minneapolis

created a large demand for funeral work the past few days. Northrup, King & Company are doing a large business in raffia and other basketry materials. The basket-making craze seems to have taken a firm hold on Minneapolis. Some months ago this firm secured the services of a competent teacher, who gives lessons in the store, charging 50 cents a person. They have found this to be a profitable move, as it not only attracts people to the store but creates a demand for raffia and other materials as well. D.

JENKINTOWN, PA.—The greenhouses of C. R. Newbold were destroyed by fire January 11, loss \$10,000.

NEW LONDON, CONN.—The newly organized Gardeners' and Florists' Club has elected as officers; President, John Maloney; vice-president, Wm. H. Corkey; secretary, H. H. Appeldorn; treasurer, John Silva. It was decided to hold meetings the first and third Tuesdays of each month.

OTTAWA, ILL.—Fred. J. King has been confined to the house since Christmas through illness. He is now on the way to recovery and will be out again as soon as the weather moderates. His stock is in fine condition, but withal he could not anywhere near supply his Christmas trade.

Hardy Herbaceous Plants.

Japanese Iris, German Iris and Paeonias, Specialties.

Golden Glow, Eulalias, Day Lilies, Hardy Sunflowers, Dragon's Head, Cone Flowers, Boltonias, Sedums and a long list of other valuable kinds in large supply. Please write for lists of varieties and prices; they will probably surprise you.

CLARK FUNERAL MAKES GREAT DEMAND FOR EXPENSIVE DESIGNS.—BUILDING IN PROSPECT.

Several large funerals have kept the florists of Butte very busy since the holidays. One in particular was that of the daughter-in-law of Senator W. A. Clark. It is estimated that there was at least \$5,000 spent for flowers for that occasion. Law Brothers put up several pieces for which they received \$200 each. The Butte Floral Company was very busy turning out floral emblems, while the State Nursery Company had their share. There were some beautiful and expensive pieces from Salt Lake City, turned out by the Salt Lake Floral Company and the Huddart Floral Company.

It is whispered around that there will be considerable building of new greenhouses in Montana the coming season. Law Brothers have already material on the ground for a new house 22x125. They having remodeled their whole plant last year, now have the best equipped place in the state, although the State Nursery Company has the largest glass area.

The Butte Floral Company has the best heating system on record, as they heat their houses by natural hot water and the system has given perfect satisfaction.

There is a move on foot now to organize a florists' society in Butte. There are several good bowlers here who may be heard from later. MOUNTAINEER.

Washington, D. C.

The continued cloudy weather has retarded the flowering of stock in general but now the weather is much colder and the prospects are that we will get a few bright days. Business is not brisk. J. H. Small & Sons had the decoration for the first bachelors' cotillon.

Visitors: Thomas J. Wade, now with August Rhotert, New York. P. G.

SPRINGFIELD, O.—Charles Unglaub's greenhouses were damaged by fire on the night of January 4. They will be rebuilt in the spring, the loss, including injury to stock, approximating \$2,500. It is said that Mr. Unglaub started in business fifteen years ago with a cash capital of just \$6. He had built up a nice business.

Pansy Plants.

MME. PERRET, the finest strain on the market. Large plants that will bloom soon, at 50¢ per 100; \$3.50 per 1000; 3,000 for \$10,000.

TRADE GOOD AND STOCK SHORT OF THE DEMAND.—CLUB MEETS.—A BUSINESS CHANGE IN PROSPECT.

Business is good and stock very scarce, especially roses. Carnations are more plentiful and sell well. The supply of Harrisii lilies is not equal to the demand and \$2.50 per dozen is easily realized for those received. Narcissi and Romans move fairly well at \$3 per hundred. There is a good demand for violets and those received are eagerly sought for. The very cold weather of the past few days has had a tendency to shorten the supply and the buyers had to do some lively skinning to get enough flowers to fill their orders.

At a meeting of the Florists' Society Saturday night a committee was appointed to wait on the express companies in regard to the rates charged for flowers. There is daily complaint at the exorbitant rates charged. The schedule of premiums for the February exhibition of roses was approved and ordered sent to the different growers.

Albert McCullough, of J. M. McCullough's Sons, has purchased the controlling interest in the Cincinnati Cut Flower Company. Mr. McCullough intends to combine the two establishments and will have one of the largest and best equipped wholesale commission houses in the west.

Hardesty & Company came very near losing their store by fire Friday night but fortunately a policeman discovered the fire in time to prevent a serious loss. D.

Columbus, O.

TRADE STEADY AND CUT FLOWER SUPPLIES SHORT.—NOTES HERE AND THERE.

We have all settled down to steady business again. The very severe drop in temperature is being felt in the cut flower supply, which is very short at present. The Fifth Avenue Floral Company is still cutting a fine lot of roses and carnations and will soon be marketing their first lilacs. J. R. Hellenthal's stock is looking fine and there is good evidence on his place that he will show some fine hybrids and Ramblers again for Easter. Gus. Drobish is kept unusually busy with design work. He reports stock for this kind of work very scarce.

A few of our local florists will probably attend the carnation society's meeting in February. CARL.

CLUB HOLDS ITS ANNUAL BANQUET.—IS IN A PERIOD OF UNINTERRUPTED SUCCESS.—THE STATE OF TRADE.

The Florists' Club held its annual banquet on January 8, with a full attendance. President Appleton and Toastmaster Sweeney were in excellent spirits and officiated to the pleasure of the company. Messrs. Bryant, Southwick, Smith and Turner were invited guests and each spoke upon interesting and timely topics. All those present were given an opportunity to speak, and thus the affair was brought to a pleasant finish. If the out-of-town florists only knew the pleasure and instruction they were missing, they would surely hasten to join and attend the club meetings regularly. The meetings now are a great deal better than ever before, and no ambitious florist should neglect them.

Things are averaging a fair January's business, although there are some very dull days. Carnations are \$2 to \$3 per hundred, and bring 60 cents to 75 cents per dozen retail. Roses are off crop with some, and in crop with others, which makes a fluctuating market at from \$3 to \$12 per hundred. Violets are now plentiful at \$1 per hundred and are likely to drop by another week. M. M.

BEATRICE, NEB.—S. H. Dole & Sons report a fair season. Chrysanthemums were slower sale than for years, but Christmas trade made a new record.

BURLINGTON, VT.—C. J. Pringle, the botanist at the University of Vermont, has departed for Cuba where he expects to spend two months in exploration.

COUNCIL BLUFFS, IA.—J. F. Wilcox says that the coal question is a serious one. He is running from hand to mouth and a few days interruption in the supply would mean catastrophe.

JOLIET, ILL.—Ludwig Schmidt suffered an irretrievable loss January 8, when his greenhouse was destroyed by fire caused by defective heating apparatus. He had only recently started in business.

PRELIMINARY LIST OF

New Chrysanthemums

and other NOVELTIES NOW READY.

Will be pleased to mail to those interested.

Nathan Smith & Son
ADRIAN, MICH.

Carnation Gov. Lowndes.

Color, pure white. Size, 3 to 3½ inches in diameter. Calyx, spreading at the top, making it practically non-bursting. Form, the lower or guard petals stand out straight, retaining the full size of bloom. Petals slightly serrated, and beautifully arranged, forming a full, rounded center. Odor, is very sweet and particularly pleasing. Stem, 19 inches to 2½ feet during the season, and always strong enough to carry the large flower erect. Habit, strong and vigorous; thrives well and grows rapidly. Transplants readily and comes into bloom early, and is not a cropper. It will stand closer planting than most varieties. Productiveness, extremely free flowering. More productive than any other large white. A profitable and high grade commercial variety. Price, \$2.50 per doz.; \$12 per 100; \$100 per 1000. 50 at 100 rate; 500 at 1000 rate.

BAD WEATHER CUTS INTO TRADE AND COLD MAKES EXPENSE FOR GROWERS.—VARIOUS NOTES.

With unsettled weather trade has not been rushing. A few receipts, but not very large, were about all that was doing last week. No reports have been received of anyone freezing up but all deplore the scarcity of hard coal and the outrageous price of soft coal. Stock has been fair in supply. Guenther, of Hamburg, is sending in some very fine carnations and so is C. S. Christenson. L. H. Neubek's sweet peas are still as much talked of as Palmer & Son's Bon Silene, the old-time rose which this firm has again started to grow. S. A. Anderson is handling large quantities of valley, which in bunches of twenty-five sells very rapidly. About 3,000 were sold on Christmas and the day before.

Byrne & Slattery opened their new Main street store last Saturday. The store is fitted up very neatly. They are doing a nice trade. Mr. Byrne is a Buffalonian but has been with Thorley, while Mr. Slattery is an old employe of Thorley also.

Thomas Coleman has severed his connection with the H. A. Meldrum Company and is now devoting all his time to his store. Bison.

New Haven, Conn.

SOCIETY HOLDS MEETING.—NEW OFFICERS ELECTED.—YEAR A SUCCESSFUL ONE.

The New Haven County Horticultural Society held its annual meeting January 6. Reports of officers show that the association is prospering. The membership of the society has increased and the recent exhibition in Music hall was a success in every way.

Officers were elected as follows: President, Gustave Amrhn; vice president, William Gardner; treasurer, David Kidd; secretary, Thomas Pettit; board of managers, Robert Paton, William Ferrier, Rubert Angus, J. W. Woodward, John N. Champion.

The annual banquet of the society will probably be held in February and a committee was appointed last meeting to make arrangements. The next meeting will be held January 20, at which time A. J. Thompson, of West Haven, will read a paper on carnations.

RACINE, WIS.—Mrs. C. W. Pike is at Marlow, Fla.

STATE OF TRADE IN THE COLORADO METROPOLIS.—ALL ABOUT SUPPLY AND DEMAND.

Trade has slackened up quite noticeably this week, about the only stir in business being an occasional good call for funeral work. Society has let down for the time being and very little is doing with that set. Stock is rather plentiful and with good bright weather every day quality is generally very fine. There are some excellent Beauties now, the long-stemmed being best. These meet with good sale, while the shorter stock hangs fire. A rose that is proving very popular this season and is now at its best is Chatenay. When well open there is nothing prettier and with us it is a grand keeper, not that we keep them long, but it gives good satisfaction to those who buy them. Carnations are coming in very fast but still command a good price, white ones being in best demand on account of funeral work. Violets are in over-supply. Bulbous stock moves slowly outside of what is used in work. The first tulips are in but as yet are too short-stemmed to do any good. B.

Nashville, Tenn.

HOLIDAY TRADE ECLIPSES ALL RECORDS.—STOCK FOR ALL DEMANDS.—VARIOUS NOTES.

The holiday trade in this city surpassed even the most sanguine expectations. Stock was abundant. Plants were especially in evidence. Gery Brothers had an especially fine stock of azaleas, fine bushy plants, well flowered, and of the choicest colors. Roses were not so abundant, though the trade seemed to get what it wanted. Beauty was particularly scarce. The roses, however, were fine in quality and brought good prices. Joy & Son had a fine stock. Violets were not so plentiful. The prices realized this year were quite an advance over previous years.

TRADE FAIR BUT PRICE OF COAL LEAVES LITTLE PROFIT FOR GROWERS.—FAILURE OF THE MURPHY COMPANY.

Business for the past two weeks has kept up well, there being a good demand for cut flowers, which are coming in plentifully and of good quality, although carnations are a little under-size, owing to lack of coal to keep up the necessary temperature. If the grower breaks even this year he will be a lucky man. There is a good demand for funeral work, helping to use up surplus stock, also a few banquets and hall decorations, keeping the storemen busy. Growers are starting to move plants along for spring sales, which stock is always in good demand here and from reports prices will go a little higher this season.

The Murphy company has filed a petition in bankruptcy with liabilities of \$2,785.93 and assets of \$1,000. The firm consists of Dennis J. Murphy and John I. Bolt, who also filed individual petitions. Some of the larger creditors are A. N. Pierson, Cromwell, Conn., \$695.59; Springfield Fire and Marine Insurance Company, \$367; George Salford, \$347, and about twenty-five smaller creditors. The firm has for assets about \$200 in stock and \$800 in machinery and tools.

L. H. Butts, formerly with W. D. Sloane, of Lenox, Mass., has taken a position with Adams & Son. A. B.

ERIE, PA.—S. Alfred Baur says carnations had a great run at Christmas and all good stock sold, including both flowering and decorative plants. All things considered, it was the best holiday season on record.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.

50,000 FEET of roofing glass.

PIPE.

We are headquarters for pipe. We offer you **100,000 FEET** of 2 to 4-inch wrought iron lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000,000 FEET of standard black wrought iron pipe, size $\frac{3}{8}$ to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, $\frac{3}{4}$ and 1-in. **75,000 FEET** of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 $\frac{1}{2}$ -inch.

VALVES and fittings of every kind.

BOX COILS for heating purposes.

RADIATORS, new and second-hand.

We also offer the following bargains in

Heating Boilers

50 CAST-IRON sectional heaters, capacity from 450 to 5,000 feet.

The S. A. F. Tackles the Express Tariff.

The meeting at the American House in Boston, called to voice the protest of the local growers and shippers against the oppressive tariff recently put in force by the Express Trust, on Saturday, January 17, was an enthusiastic affair and fully met the hopes of its promoters. Secretary W. J. Stewart, of the S. A. F., read the call under which the meeting convened and was then elected chairman, W. W. Tailby being chosen as secretary. The chairman addressed the meeting briefly, stating that the national society as represented by its officers was heartily in sympathy with the objects of the assembly and intimating that if the florists elsewhere throughout the land would likewise get together in their respective centers, the S. A. F. would stand ready to aid and, focusing their individual effort in one united endeavor, if necessary carry the common appeal up to the interstate commerce commission or even to congress for investigation, in case justice should be refused by the express companies and ventured the opinion that the present action of the carrying companies is only the first turn of the screw which, unless decisively met at the outset, would in time be given another twist which would pinch the plant, produce and other "perishable goods" industries as well.

Letters of approval and encouragement were received from numerous organizations, firms and individuals. From the Dutchess County Horticultural Society came the following letter:

We, the undersigned, a committee duly appointed by the Horticultural Society of Dutchess County for the purpose of procuring a reduction in express rates on cut flowers, express our desire of co-operating with your society in its effort to procure such reduction, and we further desire to aid in any way that we may be able to promote the end in view and the common welfare of flower growers in general. We would like to be advised of the action of your society at its meeting and to be kept in touch with its progress.

(Signed) C. F. BARRETT,
PETER T. DEAY,
STANTON ROCKWELL,
W. H. SLOAN,
HELMAN ASHER,
H. C. BARKER.

The Cincinnati Florists' Society sent a petition signed by twenty-four of the leading floral houses of that city, offering cordial assistance in the cause and stating that Messrs. Wm. Murphy, E. G. Gillett and H. B. McCullough had been appointed a special committee with this end in view. H. Barton, of Westfield, Mass., and Mrs. A. C. Mather, Rockland, Me., sent strong letters expressing deep

interest in the movement and complaining of the burden placed upon their business by the increased cost of goods shipped to them from wholesale sources, owing to the exorbitant charges made by this grasping express monopoly. A communication from John N. May, speaking particularly for the growers who ship their product to the large city markets, was received too late to be presented at the meeting. In it Mr. May said pertinently:

When the express companies claim extra special service in the handling of cut flower business they are over-doing it. Fully ninety per cent of the cut flowers shipped are not only delivered to their respective offices throughout the country, but the messengers who deliver these flowers to them have to put them on the trains themselves. Furthermore, the growers ship on nearly the same trains all along the line; thus when they reach the terminals at the large cities they, the express companies, can load their wagons and deliver large blocks of goods all at the same time, while in all ordinary merchandise the express companies have the expense of collecting as well as delivering in scattered sections. Now, if the express companies still persist in charging these unreasonable rates the florists generally are determined to combine and deliver their goods by other means rather than pay such rates. We find also a great complaint as to the way the express companies handle the empties, (these they handle or rather kick about with the full determination of smashing as many of the boxes as possible, yet they charge a good round price for doing so. This occurs not only in the vicinity of New York but complaints on this line are coming in from every section.

P. Welch, on behalf of the firm of Welch Brothers, presented a bunch of protesting letters received by his house, which were read by the secretary, from T. C. Leekey, Portsmouth, N. H.; C. D. Thayer, Worcester, Mass.; F. B. Barrington, Gloucester, Mass.; E. W. Breed, Clinton, Mass.; M. B. Kingman, Amherst, Mass.; John White, Pittsfield, Mass.; Adam Sekenger, Bangor, Me.; Mrs. A. C. Mather, Rockland, Me.; Thornton Brothers, Lawrence, Mass.; C. P. Dow, Laconia, N. H.; W. E. Sargent, Worcester, Mass.; J. J. McManmon, Lowell, Mass.; Mrs. W. C. Stevens, Malone, N. Y.; Mrs. Thos. Allen, Bangor, Me.; Wm. Kennedy, Greenfield, Mass.; John Mack, Beverly, Mass.; H. F. Littlefield, Worcester, Mass.; Royal J. Barter, Ogdensburg, N. Y.; C. H. Hayden, Dexter, Me.; G. H. Hill, Haverhill, Mass.; C. A. Leighton, Skowhegan, Me., and Alex. Em-He, Barre, Vt. The following are examples of the tenor of the various letters:

I would say that for one I protest very strongly against the high rates, discriminating against the florist and his customers. I am also convinced that the number of packages of flowers to be in the future given by the express companies will be 20% diminished and with more than offset the increase of rates. I think the matter should be put at a present time by the express companies, and to continue them, that the high rates

will be against them in the way of returns, and besides bring a set-back to the florist business in general. I hope and trust something may be done so that the business may go on as usual.

Pittsfield, Mass. JOHN WHITE.

In regard to express charges I wish to say that I have already brought the matter before the Bangor Board of Trade and they take action on it to-night. It has hurt my out of town trade terribly. On small orders of \$1.50 and \$2 the express charges were from 40 to 60 cents. There is no other reliable company doing business here, so have to depend on the American.

Bangor, Me. ADAM SEKINGER.

Regarding the excessive express rates, I would say that here we have a minimum rate of 40 cents a package. A package of flowers that it formerly cost me 15 cents to ship by express to Waterville or Augusta, now costs 40 cents. Almost three times as much. This is well high prohibitive on small orders. I will gladly enter my protest against this robbery. With coal at an excessive price, and the present tariff on everything in the shape of flowers expressed, the florist seems to be truly between the devil and the deep sea. Personally, I have no shipping recourse except to use the American, as that is the only company that enters this town. Hoping that you will receive the strongest backing in resisting the demands of the express companies named, I remain,

Skowhegan, Me. C. A. LEIGHTON.

Unless you can find some other way than the Adams Express to ship us, we shall be obliged to cut off our order. Since the advance in rates our shipping trade has practically ceased.

Worcester, Mass. H. F. LITTLEFIELD.

It seems a shame that a business growing like the flower business is at the present time should be handicapped by prohibitive express rates. Just as an illustration, yesterday a lady came into my store and wanted to know what it would cost to send a dozen carnations to Haverhill, a town seven miles out. I told her 38 cents. She

city, a copy of which I enclose to you. All that I can add to this is to say, that I do quite a cut flower trade with the surrounding towns near here, and adding this extra fifty per cent to the already high express tariff makes the small packages cost them so much they will not stand it, and in consequence I lose their trade, which would amount to quite a little sum in six months time. The injury that this increased rate will cause would be hard to estimate, as it has taken years to work up this trade, and when lost will be hard to regain.

Laconia, N. H.

In regard to the advance in express rates, I would say that I am only sorry that there is not another express company that has heated cars to take care of perishable goods between here and Boston. I should certainly patronize them if there was. As it is, the American Express Company has us at its mercy. I had a very severe discussion with their agent in Lowell shortly after they had raised the price on this matter, and he acknowledged that their earnings paid the company eight per cent last year, and still they want more. To charge me 40 cents for a small box from Exeter that used to come for 20 cents I consider extortion. So if I can have my goods reach me through any other company I would much rather than encourage monopoly and extortion.

Lowell, Mass.

As regards the express companies, all that have done business with me are two, American and our local here, Marshall & Moulton. Our local is all right. American roasts us every time. Of course I do not employ them only when I can't help it. I suppose they are like all trusts, even the coal trust, all robbers. If the people will only wake up and send men to Washington that will smash them up, which should have been done years ago, it is the only remedy I can see.

Beverly, Mass.

Mr. Welch addressed the meeting with especial reference to the statements recently put out in the daily papers by

been given these goods. They go on the same car with the other goods, and are, as a rule, delivered from the same teams.

Second—"In the transportation of flowers everyone of our employes realizes that extra precautions must be taken. They must not be exposed to the extreme cold or they will freeze, and if they are placed next to the steam pipes they will be destroyed. One is as bad as the other."

Reply.—If flowers are allowed to freeze, or are placed so close to the steam pipes that they are over-heated, thereby causing the loss of the shipment, this cannot occur except through the carelessness of the messenger. And the fact is that the raising of the rates will not remedy this trouble.

Third—"A large part of the flowers sent to us for delivery arrive at the station just before the departure of the train and must be specially handled. They must be delivered promptly, for many of them are for weddings, funerals or parties."

Reply.—It is true a large part of the flowers carried by the express companies from Boston to cities and towns in New England are delivered to the train a short time before its departure. Shippers are obliged to resort to this means to prevent any delay which might occur through the employes of the express companies setting aside the box, and failing to put it on the first train. Delivery to the train by the shippers should be considered a saving of labor on the part of the express companies in their not being required to call for these goods at the different stores.

Fourth—"If a Boston wholesaler sends flowers to Magnolia in the afternoon they arrive there after the abandonment of the regular delivery service, and must be sent out on a special delivery trip. Boxes are generally very light and bulky and are delivered for very small charges."

Reply. It is seldom that the express companies will accept a package of flowers for delivery out-of-town unless there is an express messenger on the train the box is intended to go on. If an exception is made, it will be done on condition that the shipper pay for a telegram to notify the agent in the city the goods are billed for, or otherwise the purchaser must be notified to meet them at the train. Such arrangements are invariably made with a stipulation releasing the express companies from any liability.

Fifth—"Claims for delay and injury in transit are constantly coming in and everyone of our employes, on each shipment of flowers, must make out a receipt showing time of handling, so that the box may be traced."

Reply.—On the question of claims for flowers injured in transit, we are safe in making the statement that the proportion paid by the express companies in settlement for claims for flowers is not any higher than is paid for loss of other merchandise. Judging from the experience of our house, from which the companies collect \$5.00 or \$6.000 per year in revenue, we are obliged to say that we have seldom, if ever, been successful in prosecuting a claim for loss or damage to flowers against a company.

Messrs. N. F. McCarthy, J. J. Kelley; representing Geo. A. Sutherland; George Patten, of Lowell; E. R. Shaw, of A. Gaedeke & Company, Nashua, N. H.; S. J. Reuter, of Westerly, R. I., and others addressed the meeting in a similar vein. W. W. Tailby called attention to a system in operation on the railroads for suburban parcel delivery within a ten-mile limit of Boston which he had found economical and efficient. He also told of very low rates being enjoyed by certain growers who bring their product to the flower market on a specified train, through a discriminating contract with Adams Express. Messrs. Welch, Shaw and McCormack having been appointed a committee to prepare resolutions, reported the following, which were unanimously adopted:

WHEREAS, The transportation of cut flowers to the Boston market has been carried on for years almost entirely by the Adams, American and National Express Companies, who have always carried cut flowers as first-class matter and have charged the highest rates on their schedule, but who have since December 10, 1902, arbitrarily and unreasonably increased the price of hauling said goods fifty per cent without in any way increasing the efficiency of their services; and

WHEREAS, Experience and modern means of conveyance and the establishment by these companies of local offices and branches in all sections of the country has very much lessened for the express companies the cost of transportation and the risk of handling said goods which are regularly forwarded every day in the year, and consequently they should be transported at reasonable rates instead of the increased rate now levied, and,

WHEREAS, We feel that the present rates are a discrimination against our business and therefore unlawful; and,

WHEREAS, This increase of tariff by the express companies is in line and following the leadership

BASKET OF CECIL BRUNNER ROSES AND ADIANTUM.

(Arranged by the Shanahan Floral Co., San Francisco.)

said she would not send them. The weight would not exceed one pound, yet the rate was as high as for 100 pounds of beef or other merchandise. I trust you will bring your influence to bear on this matter at once that our business relations may be continued.

Ogdensburg, N. Y.

ROYAL J. BARTER.

In regard to the express rates, I wish to say that the advance means much to me, as all my goods come by express and to pay the advance I have had to put the price of flowers up, and so will not sell so much, as my customers will not pay the price. In regard to special delivery, they don't have it here. I have to wait their time for them to deliver, and they won't deliver me anything on the last express. They have never paid me one cent for damages done to my goods.

Haverhill, Mass.

GEO. H. HILL.

I have entered a protest against the American Express Company through their agent in this

the local representatives of the express companies in justification of their action and presented in rebuttal the facts in each case as experienced by him in the carrying on of his shipping business. He took up the various pleas as follows:

First—"Flowers must be rated in a special class. They are extremely perishable and require the greatest care in forwarding and handling them. Then, too, they demand extra quick service."

Reply.—It is estimated on good authority that the revenue collected by the express companies on the carrying of flowers to and from the wholesale markets of New York City alone, amounts to \$17,000 to \$50,000 per annum. The revenue collected in New England for a similar business must be upwards of \$20,000. The majority of this business is done in carrying flowers to and from the city of Boston. Shippers and purchasers of flowers do not admit that any special care has

of the great trusts of this country in increasing their prices, not because better prices are deserved, but to multiply their earnings and because they feel they are powerful enough to force the public to agree to their terms: be it

Resolved, That we, the flower growers, flower shippers and merchants in and about Boston and vicinity, assembled under the auspices of the Society of American Florists, vigorously protest against the unwarranted, unprecedented and oppressive advance by said companies for the expressing of cut flowers.

And that we demand a speedy return to the old rates for the transportation of cut flowers, which amply and sufficiently repay said express companies for any and all risks of handling and the labor and expense of transportation.

Messrs. W. H. Elliott, P. Welch, E. R. Shaw and W. J. Stewart were then appointed a committee to represent the assembly in an interview with the local representatives of the offending express companies, present the above resolutions for their consideration and take such further action as would seem to them wise.

James L. Cowles, secretary of the Postal Progress League, was in attendance at the meeting and, being given the courtesy of the floor, made a ringing speech in favor of the proposed parcels post, postal insurance to the value of produce carried and a postal currency and quite a number of those present enrolled themselves as members of the league.

Representatives of the leading Boston daily newspapers were present and all the evening editions contained extended accounts of the proceedings at the meeting.

A Huge Design.

The accompanying illustration is reproduced from a photograph taken at Westfield, N. Y. The plaque was made by G. Schoenfeld, on the order of the citizens of that place, to be sent to Representative Nixon upon the occasion of the recent assembling of the New York state legislature. Westfield is Speaker Nixon's home town and above the panel bearing the words "From Home" there are, in immortelles, the figures 3424, Mr. Nixon's recent plurality for re-election. The design was five feet wide and seven feet high. The background was galax and ivy leaves. The flowers were roses and white carnations and much of the eagle and shield were immortelles.

The Violet Industry.

It has been remarked, jocularly, that every second building in Rhinebeck, N. Y., is a violet house and that they are now beginning to build others between. The violet center known as Rhinebeck really comprises in addition to Rhinebeck proper, the little places known as Red Hook, Barrytown, Staatsburg and Rock City. This aggregation boasts of upwards of sixty violet-growing establishments. Anyone who will consult the list of these growers in the Florists' Directory will be interested to note how many there are of identical families, three, four or five of one surname being not uncommon. There seems to be a sort of violet germ or contagion rampant in the neighborhood and they drift into the shuffle irresistibly. These growers have been mustered from a remarkable variety of industries, some having been chicken raisers, some farmers, architects, stove dealers, tax collectors, grocers or station agents; one still runs the street sprinklers in addition to his violet business and there are times when he might almost sprinkle the streets with violets, so abundant and cheap are they at certain seasons.

The variety grown in this famous

DESIGN SENT TO SPEAKER OF THE NEW YORK LEGISLATURE.

(By G. Schoenfeld, Westfield, N. Y.)

violet country is almost exclusively Marie Louise, the Imperials, Farquars Campbells and singles being practically out of the running, and no healthier plants, finer flowers or heavier crops can be found anywhere in the world. Everything seems congenial to the violet and disease of any kind is a rarity. Picking of flowers is done as early in the morning as possible and the bunches are put away with stems in water until time to pack up and drive to the New York train, where the goods are taken in charge by the express company. The nearest railroad station is Rhinecliff, two miles from Rhinebeck.

Time was, not very long ago, when, out of about every thousand violets, a good grower would select a hundred as specials that were well-worthy of the honor and would bring a very much higher price than the balance. But in recent years the word "special" has been much abused and, as is also the case with roses, has but little meaning, as variously interpreted by different growers. Some growers in these days, will pick fifteen hundred and bill them all as specials. The retailer cares nothing as to whether

a shipment is labeled "special" or not, neither does the fact that the blooms are bunched in hundreds—a distinction at one time accorded only to genuine specials—impress him as at all sensational, nor does the mere bunching in hundreds instead of fifties have any bearing on the market value, although some growers seem to think it should. One factor does count for something in the ultimate selling value and that is the bunching, as the tyro quickly realizes when he comes to market his awkwardly-finished product.

Good bunching, as understood in the New York market requires dexterity and patience. Much of the best bunching is done by the women of the family, they seeming to acquire the required facility much more readily than do the men. As a rule, each bunch is hooded with a sheet of paraffine paper for protection and to confine the fragrance. In packing, it is customary to lay the bunches close together in single layers on flats which rest on cleats in the packing boxes but with the finest grade of goods, in bunches of 100 flowers, shelves are sometimes used in which round holes have been cut to hold one bunch each.

The great increase in the number of violet-growing establishments within the past few years has entirely changed the aspect of the traffic in New York city. Whereas, some years ago, the bulk of the product passed through the hands of one commission man who made this flower his specialty, there are now nearly a score of operators. Under former conditions violet customers would begin to straggle into Mr. Gunther's about 2 p. m., well-supplied with smoking material to while away the time until the arrival of the regular daily shipment, each clamorous to secure his share, and when the receipts fell short of the demand, which frequently did happen, the question of price was seldom discussed. Now, there are more than enough for all and, instead of the buyer going in quest of the violet, the violet most often has to seek the buyer.

All the growers in "Up-Hudson" localities try to ship on the same train, the larger concerns daily throughout the season, others every second day or semi-weekly, according to capacity. The "Violet special," as this train is known, leaves Rhinecliff at noon and reaches New York city about 3:30 p. m. The Tuesday and Saturday shipments are apt to be the heaviest, 125 boxes from Rhinebeck being a not unusual Saturday cargo, and at Easter hay wagons are brought into service to convey the stuff down to the Rhinecliff railroad station. As the boxes contain anywhere from 1,000 to 3,000 flowers each it will be seen that a day's shipment often aggregates a quarter million blooms.

An American Express double truck is required every afternoon to deliver the violets to their various destinations in New York and, as there are from 100 to 125 waybills to be copied, at arrival of train, before the boxes can be loaded upon the truck it has become the custom, ever since the rivalry between the several commission houses grew so fierce, to send a boy or two from each to the Grand Central station to grab a couple of boxes and bring them by hand for hurry orders. These boys, to the number of fifteen or twenty, do a song-and-dance act until the train arrives and then trudge down Fifth avenue with their boxes, in a grotesque procession.

Half a dozen New York retailers acting in harmony can make or break the price of violets. They learn from the boys or the expressmen how many boxes have "come down" and their willingness to buy is based largely on the information thus obtained and all the "forcing" of values on the part of the wholesalers is futile if the retailers so decree. It is a common practice with some of the retailers to telephone to the various wholesale houses and have each send a couple of boxes of violets as soon as received. Out of the two or three dozen boxes thus secured for inspection three or four of the best are retained and the balance ordered back. The retail dealers do not "order" violets, now-a-days. They don't have to. And the day of fabulous violet prices in New York has undoubtedly gone, forever.

PORTLAND, ME.—Alex. Wallace has bought property at the corner of Danforth and Emery streets and will erect a range of glass in the spring.

CENTRAL FALLS, R. I.—The Lonsdale Botanical and Field Naturalist Society held its monthly meeting on January 5. The newly elected officers were installed and the reports of the auditors showed the affairs of the society to be in a strong condition.

Florists' Plant Notes.

SMILAX.

If you intend to renew your smilax bed this summer, sow the seed now. Many growers prefer to renew their beds every year, and it doubtless pays them to do so, it certainly does not pay to leave them more than two successive seasons without replanting. Sow in flats, place in a warm house until the seed has germinated and keep them well watered. After the plants have formed two or three leaves, pot them into 2½-inch pots and later shift to 3-inch. Until planting out time they may be plunged into soil in a mild hot bed, where the full light and plenty of water are necessary.

ANTIRRHINUMS.

We have found the white variety of antirrhinum, commonly called snapdragon, to be most useful in design work,

The late P. S. Peterson.

besides using the longer-stemmed flowers for many other purposes. Young plants from 3-inch or 4-inch pots planted out in the open ground will produce an abundance of white flowers from early summer until late in the fall. About the time the carnations are housed, a number of plants may be transferred to the greenhouse for stock and for cutting during the winter months. We propagate from cuttings during January, give them small pots when rooted and later a shift to 3-inch or 4-inch, and plant out as soon as the weather permits. They may also be raised from seed, which may be sown during February, but seedlings are not as satisfactory, for the plants are not as compact in growth, nor do they produce as many flowers as those raised from cuttings.

PROPAGATING.

Now is the time to do a great deal of propagating of miscellaneous plants for the spring trade. Heliotrope, lobelias, sweet alyssum, marguerites, Santolina incana, and so forth, root readily now. A batch of geranium cuttings may be struck, if small plants in 2½-inch or 3-inch pots are wanted. These we do not root in sand at all, but pot off immediately into small pots in sandy soil, and after the first watering keep them on the dry side until rooted. For ordinary propagating, a side bench in a house with a temperature of 55° will

strike 100 per cent of all the cuttings put in the sand. See that the bench is well drained to allow the water to pass through freely, and thoroughly white-wash every part that comes in contact with the sand. Use clean bank or river sand, and change it for every new batch of cuttings put in. Keep them well sprinkled and shade from the bright sun by covering the cuttings with paper or cheesecloth. Later in the season, when the sun gets stronger, a light wash may be applied to the glass. Give plenty of air, but no strong draughts over the cutting bed should ever be allowed.

VERBENAS.

Unless you are growing verbenas from cuttings, sow the seed now. When of sufficient size, give them small pots, and later shift to 2½-inch or 3-inch. Early sowings should have the tops pinched out at least once to produce two or more flowers to a plant. A temperature of 45° will be warm enough to grow them, and when you get crowded for room in early April, plunge them out in soil in a mild hotbed, but give plenty of air and the full light or they will grow too tall and spindly. We prefer to grow them from cuttings and for this purpose we propagate in fall from young growths, using these small plants for stock. An abundance of cuttings may be had from now on, which root readily in sand. After they are rooted they are handled precisely as you handle the seedlings. After placing in the hotbed, they should be worked over several times to keep them clean; this will also give you the chance of checking the roots from ramifying in the soil and manure in which they are plunged. This is important, for to allow them unlimited root room will result in a very soft, rank growth that wilts badly when the plants are moved.

GLOXINIAS.

These beautiful summer flowering plants may be started at any time between the first of January and the middle of March. We start them at different times to keep up a succession of salable plants all summer. Start them in 4-inch pots in well-drained soil with some sand and one-third leaf mould added. Plant them just deep enough to cover the tops of the corms, place in a temperature of 60° and water thoroughly, but until they commence to make leaves, be more sparing in watering. When the leaves have reached the sides of the pots, shift to a 5-inch or 6-inch, drain the pots well with broken potsherds, and place them on inverted pots to allow a free circulation of air around them. Give plenty of room and syringe daily to keep down red spider, until the buds begin to open, after which water must be withheld from the foliage, lest in wetting the leaves the flowers will be ruined. In watering, turn on just enough force to allow a small stream of water to come from the end of the hose and water each plant separately. A light shading should be applied to the glass to prevent the hot sun from burning the foliage. G.

QUINCY, ILL.—F. W. Heckenkamp, Jr., welcomed a baby daughter into his family January 15. As one of his friends said, "it makes an even half dozen."

ATLANTA, GA.—The Nunnally Company says that the recurring holiday seasons are bringing increased calls for flowering plants, possibly because there are never enough cut flowers. This year trade again increased twenty-five per cent and all stock was short.

The Prices of Plants.

ED. AM. FLORIST:—Replying to the true story and the query of W. L. Smith, I have to say that I read it carefully; in fact I read it twice, and I can only say that it is as true as gospel; indeed Brother Smith has made it very mild. The only remedy that I can see is that the trade, especially the growers, will work in harmony and unison for one common end. It would help if fifty or sixty per cent of the leading growers of stock, especially of plants, would come to some understanding, first as to a proper grading of stock; that is to say, to establish a uniform value for certain classes of stock; for instance, A1 roses, say, in 4-inch pots, to be worth so much; No. 2, a medium class of stock from the same size pots but not as valuable, at another price and a third class, same size pot at still another price, and so on with all classes of pot plants, and then agree with one another that they will not sell to anyone below these prices, the prices to be set by the dozen, hundred and thousand. Of course this would mean that a plant from a 4-inch or from whatever size of pot should be well rooted through, so as to carry its own soil at the roots and not a freshly-potted or over-potted plant, but a good, honest plant.

Then there is another thing which is most important and that is a time limit of credit. All stock should be sold for

cash, which should mean within thirty days after the sale of the goods. The goods should be settled for either in cash or with a promissory note with interest for a time not to exceed ninety days, and if the bills were not settled within ninety days, then this association, as it might be called, or Trade Exchange Association, whatever title or name it might be known by, should put such a customer or purchaser on the delinquent list. I believe there is no other class of trade that is more loosely and carelessly run and carried on than the wholesale florists' trade, I mean the wholesale growers, the people who grow the stock and then sell it to the trade, especially in the plant line. The cut flower business is in a much better shape; settlements have to be made promptly and at regular intervals; even the nursery business is in much better shape. They get more prompt settlements.

I find that in our line, I mean palms, ferns and stove plants, we are suffering from the same bad and dilapidated conditions; it has been a regular cut-throat business. Palms and ferns a few years ago, when it did not cost near as much to produce them as it does now, sold from twenty-five to fifty per cent higher than they do to-day. Why is it? Because we are all a lot of fools! We ourselves are to blame. I figure up what it costs me to grow a plant under the most favorable conditions and with the least expense. I find that it cost me 35

cents, for example, to grow it. I ought to get at least 50 cents for it. Therefore in order to get 50 cents for it net, it should be sold for not less than 60 cents because it costs something for advertising; it costs for your men on the road to sell them; it costs to pack and ship them from five to ten per cent if done as it should be done.

But now I find that if I offer these plants for 60 cents, somebody else is selling them for 45 cents or 50 cents, and sometimes less than that. Evidently this grower did not figure what it cost him to grow a plant. He simply does the business and he stays long enough in the business to do himself no good but to do a lot of harm to the legitimate grower, who has figured down his expense to a cent. Now we must either sell on the same basis with this man, who perhaps has only lately started in, but who is a competitor, or we must keep the stock. Then we lose here and there an account or we wait six to nine months or even a year and more for our money. Where is the profit?

We are ready to join in and agree with other growers to establish prices on graded stock and to hold to them. If your valuable paper will institute such a movement, employ a first-class man to establish such an association, we will be willing to pay our part of the expense, but something certainly ought to be done in order to protect the grower of potted-plant stock, especially such stock

as can easily be shipped from one part of the country to the other.

How much can a man make, for instance, on growing ferns in 2½-inch pots, or sometimes 3-inch pots, and selling them at 2 cents each, or \$20 per thousand, in fact selling them at \$15 per thousand? Still this is done and done very often, and other things in proportion. It is certainly a deplorable state of affairs, especially at this time. When every industry is at the height for making money, we are selling our stock for less than ever before.

HENRY A. SIEBRECHT.

A New Pot Holder.

One of the season's new devices is the patented pot holder shown in the accompanying illustration. It is made of malleable iron, light and very strong. The holder is constructed so that the support telescopes, allowing the pot to be placed at any height desired. The part holding the pot can be tipped and fastened at any angle, thus making it an indispensable article for decorators. It is being shown by Reed & Keller, New York.

Notes and Comments.

More trouble. Listen and I will read from a letter dated January 17. It is as follows: "Am just in receipt of a catalogue wherein I find a few varieties of chrysanthemums that are new to me, and possibly will need the attention of the Chrysanthemum Society of America. White Lady is described therein as a sport from Christmas Gift. You will remember that Mrs. R. W. Smith is supposed to be a sport from the same variety. Agnes Shellem, a white sport from Maud Dean. You will also remember a similar sport by the name of White Maud Dean, exhibited by John Lewis Childs before the New York committee in 1898." (Catherine Steinhoff is a reputed white sport from the same source, namely, Maud Dean, examined by the New York committee this year.) "The following varieties in the same catalogue are entirely new to me: Indian Maid and F. L. Sunderline. Bronze King, I am under the impression, is also a new name. Thomas H. Spaulding a few years ago disseminated one under the name of Bronze Giant, but I have no recollection of a variety by the name of Bronze King. I may, however, be mistaken, I am sometimes.

"Lady Roberts, an Australian variety, was disseminated, I believe, in 1900. It was a deep crimson with golden reverse. In 1901 a New York firm sent out a white variety under the same name, which was said to have been from the same seed head as was the well-known Timothy Eaton. At all events, from what I can learn, the white Lady Roberts and Timothy Eaton are so nearly identical that it is difficult even for an expert to distinguish the difference between them. The first Lady Roberts are to be offered at 50 cents each the coming season, the other at \$5 per hundred."

Here is where confusion is likely to come in, and if any florist after this warning gets caught, it is his own fault. All seedlings and sports worthy of dissemination are placed before one or more of the committees of the Chrysanthemum Society of America for examination. Or, if not, why not?

Speaking about ivory soap as an insecticide, all soaps, so far as I know, are considered efficacious for that purpose, as whale oil soap, Babbitt's, Fels-napha, Suddall's and may be lots of others. Theoretically, if a red spider is directly

hit with soapy water he ought to die, because he breathes through his hide and grease or anything of an oily nature ought to close up his breathing pores. I know of nothing against ivory soap as an insecticide, only some of us would like to know why it is superior in that respect to other soaps? E. L.

A Back Yard Hedge.

The illustration opposite shows a corner of the hedge of shrubbery inclosing a back yard 30x50 feet, making a charming, secluded retreat. The tall shrubbery, averaging fifteen feet, is principally syringa (philadelphus), Tartarian honeysuckle, lilacs and elders, with some smaller varieties in clusters at the base, also numerous clumps of perennials in variety. There is a fence, at the back and the depth from the fence to the inside border of the lawn averages seven feet, so it does not take as much space as it appears, being perfectly flat on one side. In this way those at the back stretch out longer and faster than would the same plants if put out on the open lawn. The demand for this sort of enclosure is on

A New Adjustable Pot Support.

the increase. It requires four years' growth after planting to produce anything like the desired effect and it is seven years before it is entirely satisfactory.

C. B. W.

Chrysanthemum Mrs. E. Thirkell.

Elmer D. Smith, Adrian, Mich., in writing to the editor of the AMERICAN FLORIST concerning the correct name of the above variety, has not succeeded in thoroughly clearing up the mystery. He says that two blooms of it were shown at Chicago under the name of Mme. Thirkell. Being interested in it he endeavored to localize it, that is, find out its origin. "The correct name," he asserts, "is Mrs. E. Thirkell, one of Thos. Pockett's seedlings."

He found it in the catalogue of the noted Australian raisers, G. Brunning & Sons, and gives their description of it. Then he goes on to say that the English firm of Messrs. Wells & Company catalogued the variety as Mrs. E. Thirkell, but that "Brunning & Sons handle all the Pockett novelties and are likely correct."

Some of the above conclusions are correct and others are otherwise. It is true that Messrs. Brunning handle T. W. Pockett's novelties, which is a very likely

circumstance, seeing that they are near neighbors in Malvern, Australia, and fast friends to boot; but Messrs. Wells & Company have the first handling of Mr. Pockett's novelties, a year in advance of anybody else.

Furthermore the seedlings come to England without name and are mostly named by someone or other in this country, after they have flowered and proved themselves sufficiently large and meritorious to be worthy of preservation and propagation.

The variety in question was named after Mrs. E. Thirkell, the wife of a gentleman in Liverpool, Lancashire, England, so that there can be no doubt about the correctness of the name.—*Gardening World*.

CARNATIONS.

SEASONABLE NOTES.

As the season advances, a nearer approach to natural conditions is met by a quick response on the part of our plants. Already the sun has increased materially in strength and we are enabled to supply a greater proportion of heat directly from nature. The nights, indeed, are cold, and hard firing will continue throughout the months of February and March. A night of zero weather is usually followed by a sunny day.

From now on most of the flowering stems will be more abundantly supplied with side growths than during previous months, and if these are not used for cuttings they should be removed in disbudding, leaving only two or three laterals well down in the body of the plant. In this way you will keep the body of the plant low and produce a better flower on a longer stem. By leaving only a few side growths at the base of the stem, instead of half a dozen or more, you will get a few flowers less late in the season, but it will be at a time when quality rather than quantity counts. None of the side growths on flowering stems that are cut now will bloom before Easter, and after Easter the market is always flooded with large quantities of flowers, many of which, though of fair quality, never find a buyer. The best always sell first, so keep the quality high; and all the more must we strive to do it when we anticipate a glut. Keeping the bodies of the plants low has also the advantage of keeping them well within the capacity of the supports. If allowed to break high up the stem the bench soon becomes a wilderness of crooked stems instead of presenting a neat show of straight, upright stems, as they will if the above point is watched.

Go over the plants every week to keep the growths in their proper places. If allowed to grow at will for three or four weeks it will take much more time to get the long shoots where they belong, with the additional risk of breaking many. Varieties that have very large flowers on rather soft stems, like Marquis and White Cloud, should have the third tier of wires and string put in, if you have not already done so. We always put this off as long as possible, as it proves quite a nuisance in disbudding and cutting the flowers.

Any mulch that has been used should be kept evenly distributed over the surface of the soil by rubbing over with the hand. The water soon washes it up in ridges and piles, and if not kept stirred and leveled off it will but poorly serve the purpose for which it is put on. This is also a good time to remove all weeds

A HEDGE SECURING SECLUSION AT THE REAR OF A CITY HOME

that can be found. They will grow very fast from now on, and, as they will be easier to reach than later on, this is the right time to destroy them.

Snow falling in large quantities sometimes piles itself thickly on the glass. This should not be left to melt off by degrees, as it often takes many days to disappear in this way, with the consequent obscuring of sunlight, but it should be removed with a stream of water or a scraper. Although too early to think of shading most varieties, we find Lawson requires a very light shade after February 1, if in a very light house, to keep the flowers from burning. Be careful to put it on extremely light, for a shade that will do more than temper the brightest rays of the sun will weaken the plants and damage future crops.

Watering and syringing will consume more time from now on. The heat from below at night and from above in daytime will dry out the soil much faster than heretofore. The plants will also be in shape to absorb more water and pass it off through the leaves. So not only should a sharp lookout be kept for dry places, but the soil should also be kept a few degrees wetter. Avoid extremes either way. We do not try to maintain a uniform degree of moisture in the soil at all times, but prefer to watch for just a suspicion of dryness and then give a copious watering. Digging down to the bottom of the bench now and then with a trowel will reveal dry spots that are often not noticed by a glance at the surface.

In watering with liquid fertilizer have the soil in just the condition to need a watering and give it just enough to bring it back to the right degree of moisture. If by any chance the soil hap-

pens to be a little overly dry give a light watering with clear water a few hours before using the liquid manure. On bright days when there is much air in the house it will often be noticed that the plants wilt slightly, and in cases of this kind the plants should have a very light syringing about ten o'clock in the morning.

At this time of the year we syringe for red spiders once a week. If any red spiders appear syringe twice as often and keep it up until the trouble is past. A sharp lookout must be kept for this little pest, as when not looked for their presence is seldom noticed before the plants show it in their physical condition. The trained eye sees much that the beginner overlooks, so if you are a beginner let not the slightest unusual sign escape a thorough investigation.

Rooted cuttings that are shipped in from other growers require careful watching until they are well established. These cuttings are far more apt to wilt than your own that are taken right from the sand. They have been in the box in most cases at least forty-eight hours and will be inclined to be soft. Water no more than you do your own, but put the paper on a little earlier and keep it on a little longer in the afternoon. It is also well to remember that these cuttings, being soft, rot easier than your own. They want a light bench, and in no case should they be robbed of the full daylight when there is no sun, unless the ventilators are wide open and the draught is apt to wilt them. Where it is possible to do so we prefer to ship our cuttings in unrooted and root them ourselves, as then we know their physical condition from start to finish and can give them just the treatment they need. J.

MORE ABOUT HANDLING NOVELTIES.

We buyers of novelties in the shape of rooted cuttings have each and collectively our own woes and troubles and an enumeration of them may not be amiss. Some think that the price of novelties is too high, but the writer is not one of these, as he has experimented with seedlings for some five years without getting a variety worthy of introduction.

Novelty growing is a business in itself and we of the east recognize Ward, Dorner, Fisher and Witterstaetter as being engaged in that business. In the west we have John H. Sievers getting results the equal, if not ahead, of the men named. There are, of course, hundreds of others growing seedlings to a greater or less extent who occasionally get a gem of the first water. When they do we in the natural course of events get to hear of it and more quickly if they are members of the carnation society and bring it to the meetings.

Ordinary growers have to look to both these classes for new varieties to take the place of the older ones that are gradually running out, as they are sure to do in spite of the most careful selection of cuttings. There is something in our method of culture that is sure to kill them as commercial varieties in from five to seven years after their general introduction to the trade, and we must have new ones with new blood to take their places in order to keep up the high standard the carnation has to-day.

Knowing that we are dependent, one upon the other, we should work our interests mutually. The novelty grower should not introduce a variety that he is not reasonably sure will prove a success with the majority of the growers, as it is far better to have no introduction to

make for a year or two than to put out one of those dismal failures we occasionally see. We, as buyers and growers, owe it to ourselves and to the introducer to give these novelties the very best care and attention our place affords and when it comes to housing them they should have the best place we have to give them.

In some instances a variety may be a failure the first season and a success the second. Most of us are observing enough to see the good points of a carnation and judge as to its worthiness of a second trial, but none of us are carnation men enough to condemn a variety with one year's experience unless it be that the flower is no good commercially.

Novelty growers should not court failure by sending out an inferior variety, neither should they assure failure by sending out inferior cuttings. Among my purchased novelties for this season I have two varieties that consist of heavy-foliaged, fine-looking cuttings that apparently have health and vitality to spare, and waste it they do, by throwing up a flower bud, instead of making a plant that will bring results next winter. We as buyers are entitled to good, selected cuttings at the price we pay and the introducer should have judgment enough to turn orders down after he has reached his limit of good stock.

Another point, and one which will no doubt bring some criticism from the introducers, is the date for delivery. Judging from a buyer's point of view, novelties that are selling at good prices should be delivered between the dates of January 1 and March 1. Then if they do not make good plants it is the buyer's fault. After March 1 it seems that it would be just to both parties to have a graded reduction in prices, say for those delivered between March 1 and 15, \$10 per thousand less than the early price, March 15 to April 1, \$25 less than the early price, and for those after April 1 just one-half the early price. The great majority of us cannot get good stock from late cuttings.

Another point of vital interest is the packing of the cuttings for shipment. It is rarely that a box comes here packed for bad weather. The first one received this season had an abundance of paper protection, but the moss used in wrapping the cuttings was very wet and, no lining of tissue paper being used, the other paper became thoroughly saturated with water, making the very best kind of a conductor for frost. It was simply a case of luck that the plants were not all frozen, as a half hour of exposure to the weather at any time during their transit would have frozen them into a solid mass. In the box was a slip reading: "This box was delivered to the express company in good condition and we are not responsible for any damage during transit." Was it delivered in good order? I do not think it was.

The second lot came through in good weather and arrived safely with barely enough protection to keep it from freezing if it had been exposed to the weather for the space of ten minutes. The third lot was better packed than either of the two mentioned, but came in very bad weather and was so badly frozen that out of 500 over 200 have died and the balance are not going to make plants that will be a credit to the variety.

Not only novelty shippers, but all others owe it to their customers to pack their plants so they reach their destination in good order, and if we are going to expect the express companies to assume the responsibility, then we had

better pack them open, with slats across the top, and let them see the perishable nature of the contents, instead of wrapping it with one or two thicknesses of paper and expecting them to know that it is not packed to stand ordinary handling. There could, and should, be several pages written on this one point if we expect to have the same low rate now enjoyed by plants shipped by express and hold the companies responsible for loss by frost. Fortunately the buyer usually pockets the loss, or makes the shipper do it, and the companies get very few complaints, otherwise they would no doubt soon advance rates. There is a movement on foot to have shippers charge a minimum rate for packing. When this goes into effect there will be no reason for saving a few cents on protective material and no reason why the shipper should not be responsible in full for the safe arrival of the plants shipped.

ALBERT M. HERR.

American Carnation Society.

The twelfth annual meeting of the American Carnation Society will be held at the Germania Club house, 122 Schermerhorn street, Brooklyn, N. Y., February 19-20. The exhibition will be staged in the Art Gallery and Association Hall, 174 Montague street, close by.

Owing to the fact that the articles of incorporation will be completed and the formulating of a constitution and by-laws will have to be finished at this meeting, it was thought best not to have any prepared programme, but to devote such time as may be free after the completion of the constitution and by-laws to informal discussion and to the question box.

The premium list provides open classes for the eight colors for 100, for fifty and for twenty-five blooms; the premiums are \$12 and \$6, \$6 and \$3 and \$3 and \$1.50 respectively.

Premiums of \$50, \$30 and \$20 are provided for the best collection of not less than ten or more than fifteen varieties.

The Ward silver cup and a second prize of \$10 are offered for collections of not less than six or more than ten varieties.

The Straus cup and Loeser vase are offered for collections of not less than five or more than eight varieties.

There is a silver cup for the best 200 blooms and for collections of single blooms there are premiums of \$15 and \$10.

The Lord & Burnham premiums of \$50 are offered for collections of commercial varieties.

C. Warburton offers \$25 for the best vase of Cressbrook and Peter Fisher \$25 for the best Wolcott.

The Lawson medals go to the three best vases of 100 blooms any variety.

The S. A. F. medals go to vases of 50 blooms of undisminated varieties.

Copies of the schedule of premiums may be obtained by addressing Albert M. Herr, Sec'y, Lancaster, Pa.

OAKLAND, CAL.—H. M. Sauborn says that his holiday business was seventy per cent greater than a year ago. Roses were wanted but all kinds of plants sold well.

CHATTANOOGA, TENN.—Mrs. J. W. Crouch says that the holiday season brought her more calls for high grade stock, both in plants and cut flowers, than she had ever had before. There has been plenty of stock, carnations the only shortage.

The Gardener's Wail.

Wauken, my muse! yer loolest wail,
Lend to proclaim the waeful tale,
O'er the ills that do assail
The gardener's occupation,
If ere by chance ye meet a chief,
Wi' careworn face and een that reel,
An' doombent head, then mark him weel—
His wark is cultivation.

Auld Milton said—I have heard tell,
When Adam's curses cam' pell-mell,
That waistly on the ground they fell,
As aff his head they gloriol
I weel believe't: the son o' toil,
Wha's lot hae fa'en to till the soil,
For want o' care will never spoil—
His sorrow's never stinted.

Lang syne, when Adam sawed his seeds,
Ere he began his evil deeds,
He ne'er was bathered pu'in' weeds—
Sae says the auld narrator
But noo, as sun's we tak' a spade,
An' get oor bit o' gairden made,
'Gainst us we quickly find arrayed
The very poeers o' nature.

If even the seasons had the grace
To come in turn an' keep their place,
We wadna' hae sae much to face,
Nor view wi' coosternation.
In summer, when we look for heat,
We're curs'd wi' shoovers o' hail an' sleet;
An' autumn's early frosts complete
The work o' devastation.

The rain has ruined oor crap o' Pens,
The blight has spoilt oor Apple trees,
Oor grozers covered wi' green flees;
An' then the festive sunniles
Did quickly seal oor 'Cabbages' doom:
Sna' wunner tho' we fret an' fume
To see oor best 'Chrysthan' munn bloom
Nabbed by the forky-tailies.

Oor foes are mair than mind can grasp—
The grub, the weevil, bug, an' wasp—
Worms for the 'Carrot an' the Rasp—
In truth their name is legion.
But, faith, I'll sluk' the gairden mud
Frae aff my feet afore I'm wud,
An' quickly pack ilk stick an' dud,
An' try some ither region.
—Hortus, in the Peoples' Journal.

The English Chrysanthemum Society.

After considerable discussion, the National Chrysanthemum Society of Great Britain has finally settled on its new home, and I think the majority of members will approve of the selection. The Crystal Palace, London, is to be the future meeting place, and the three shows are to be held there during the coming season. In many ways the Palace is a far more suitable place than the Aquarium, yet the latter had some advantages, its central location being one, and the managers of the Aquarium gave the officers of the society all the assistance possible. The shows held during the past season amply prove that both exhibitors and visitors thoroughly appreciate the exertions of the officers, and there is much cause for regret that it becomes necessary to move from where the society has for so many years held such successful exhibitions. Though perhaps after all, with more space at command we may get even larger and more successful meetings. There certainly seems no diminution in the interest taken by the public in these shows. The horticultural papers have always reported them fully and some of the daily papers have given notices, but the past season's shows have received far more notice from the press generally.

The dates fixed for the exhibitions at the Crystal Palace are October 6-7, November 10-12 and December 2-3. The Crystal Palace Company appears to have offered very advantageous terms and it is to be hoped that all interested will assist in making up a larger and more interesting show than has ever previously been held, and that there will be a greater number of visitors. From what I gather growers are very busy distributing cuttings. Some of the new

STEAM AUTOMOBILE LAWN MOWER USED ON THE ESTATE OF P. A. B. WIDENER, OGONTZ, PA.

varieties are in great demand and the early-flowering varieties are attracting more attention. Last autumn was so favorable for those flowering in the open that it has stimulated the interest in these. The single varieties seem likely to come to the front again. Some wonderfully pretty things were shown during the past season. For exhibition purposes the incurved varieties are being revived, but these find little favor for florists' trade. It is a pity that there is not more encouragement given to growing really decorative sorts. I think the market growers should offer a big prize for collections of best market sorts, grown under similar conditions as is required for trade purposes. H.

The Automobile Lawn Mower.

The illustration herewith is of the automobile lawn mower on the estate of P. A. B. Widener, Ogontz, Pa. As expected, the result of the season's work has again been very satisfactory. The automobile lawn mower, weighing, when fully equipped, some 3,000 pounds, has thoroughly demonstrated the value of constant and heavy rolling to secure good sod.

Wm. Kleinheinz, the head gardener, and a man of wide experience in such matters, speaks highly of its work. The elimination of the fall grass, which has become such a menace to good lawns in the east, is perhaps one of the most gratifying results. The portions of the lawn necessarily done by hand can at once be recognized by the presence of an abundance of fall grass. The firm, even green turf resulting from the use of the mower shows we do not properly roll our lawns; the grass is greener and the absence of weeds especially noticeable. The rapidity of the work, and simple detachments by which it becomes a steam roller, handy for drives, walks and so forth, its easy management, requiring only the intelligence of an ordinary workman, are sufficient merits, when they become well known, to make such a machine an indispensable adjunct to the management of lawn and grounds.

Trouble With Kaiserin.

ED. AM. FLORIST:—We forward under separate cover samples of our Kaiserin. The stock was planted about June 1 in a good clay sod, well rotted, to which well rotted cow manure had been added in the proportion of one wheelbarrow of manure to a wagon load of soil. The temperature at night has been 58° to 62° and we think they have had plenty of air and water. They did well until about the end of November, when the stems began to get weak and the flowers were all bullheads; then the plants began to drop their leaves. Since Christmas they have made fresh breaks but the new growth is soft. What is the trouble and what the remedy, if it is worth applying one? K. & F.

The samples show every indication of club root, one especially being very pronounced. The only remedy known to me is applications of lime water. Take about one-half bushel of fresh lime, slake it in the bottom of about a fifty-gallon barrel. When thoroughly dissolved fill the barrel with water, stir well and let it remain about twenty-four hours, leaving the lime to settle in the bottom. With this clear water give the bed a good soaking. This should be applied four or five times, once each week. Care should be taken to give air on all favorable occasions, as much depends on this to regain a healthy growth.

The Kaiserin is a heavy feeder and I doubt if the correspondent's soil was as rich as it should be for this rose. A wheelbarrow of manure to a wagon load of soil I consider poor diet for Kaiserin, except the soil is richer than any that has ever come under my notice. About one-fourth manure to three-fourths soil I consider much better, and would advise the correspondent to feed these plants with liquid manure or, if not convenient to do this, mulch them with well rotted manure as soon as they show signs of a healthy growth. The Kaiserin will always throw a small per cent of bullheads during January and February but this can be largely overcome by giving them a night temperature of 60° with 70°

during the day, with plenty of air and liberal feeding. My Kaiserins were planted in a solid bed in July 1893 and have bloomed continually, summer and winter, ever since and I consider them profitable, as there is always a demand for them, especially in summer.

W. W. COLES.

Chicago.

ROSE CROPS SHOW SLIGHT INCREASE.—BIG CUTS IN SIGHT.—RED NOW UNOBTAINABLE.—WHITE CARNATIONS IN DEMAND.—PLENTHY OF VIOLETS.—FIRE IN THE WHOLESALE DISTRICT.—BUILDING OPERATIONS.—VARIOUS LOCAL NOTES.

The rose crops have increased slightly under the influence of a few bright days, and it seems only a question of continued fair weather to put the growers all in crop again and give this market supplies of choice rose stock equal to all demands. It is not likely that there was ever a period of equal duration in which the rose supply was so inadequate to the requirements. Trade has not been heavy in the last two weeks, but the shipping demand has been such that not all orders could be filled, and prices have been high for the season. It has been almost impossible to meet the demand for red roses, and Bride has been a pronounced shortage, Bridesmaid, Chatenay and the other specialties more nearly equal to the demand. There has been an adequate supply of long Beauties, from the fact that the call was light. Medium grades have been scarce and the short-stemmed stock of poor quality. Funeral work has made a brisk call for white carnations and it has not been possible to supply them in quantity, with the result that prices must have been a consolation to the growers who are burning high-priced coal. There have been enough colored carnations for all requirements, some of the houses reporting pink a slow sale during the past week. Violets have been in large supply, and prices have eased off considerably in consequence. There continues to be a fair market for the best grade of goods, but the absence of the street salesmen will shortly be felt by the producers of low grade violets. Bulbous stock is on the increase. There are now ample supplies of tulips, white, pink and red, and callas and Harrisii are obtainable in quantity. Paper Whites, Romans and freesias are selling for funeral purposes. Amling is handling considerable quantities of sweet peas. There is a fair market for greens, but the market is amply supplied.

The Atlas Block, where many of the wholesale florists are located, at the corner of Randolph street and Wabash avenue, was the scene of another fire at about 4 o'clock last Monday morning. The blaze started in the show-room of the McCray Refrigerator Company on the street floor and in a few minutes had eaten its way through to John Muno's place on the floor above. By the time the firemen had finished operations there was a foot or more of water in Frank Garland's store in the basement and practically all the other houses on the basement floor were more or less inconvenienced by smoke, water or broken doors and windows, for the firemen broke into nearly every place in the building. Muno, Garland and Victor suffered the greatest loss, in the aggregate about \$500.

Committees of the Horticultural Society of Chicago and the Florists' Club met at 84 Randolph street January 20 to consider the matter of securing state

funds for experiment work with greenhouse crops at the horticultural department of the Illinois experiment station. Prof. J. C. Blair, of the department, was in attendance and the necessary preliminary steps were taken in the matter.

Poehlmann Bros. Company, at Morton Grove, is planning another big increase in its glass area this spring. They have already purchased a part of the material for ten houses 23x350, which will be planted to Beauties and tea roses. The Garland gutter is to be used.

Bentley & Company have ordered the material for a range of 10,000 feet of glass which they propose to push to completion at their plant at New Castle for early planting to Liberty. Later in the season they expect to put up another range of equal size.

Peter Reinberg says that this year's business in rooted cuttings eclipses all previous records. He is shipping carnation cuttings at the rate of several hundred dollars worth daily.

J. H. Bradley, general traffic manager of the American Express Company, has been on from New York and went over the matter of tariff on cut flowers with the local officials.

E. E. Pieser says the dark carnations, like Roosevelt, are not selling the way they should. They are difficult to move at the price obtained for equal qualities of other colors.

The Pittsburg Plate Glass Company has taken George Reinberg's order for 1,500 boxes of French glass 16x18.

J. A. Peterson, of Cincinnati, has been at the Palmer House with his samples this week.

The establishment so long conducted by E. K. McKinney is to be sold.

J. B. Deamud visited his farm at Caro, Mich., this week.

Visitor: F. H. Holton, of Holton & Hunkel, Milwaukee.

St. Louis.

TRADE BETTER THAN IN THE SAME PERIOD LAST YEAR.—GROWERS STILL HAVE THEIR TROUBLES.—AT THE WORLD'S FAIR.—VARIOUS NOTES.

Trade in general shows a decided increase over that of this month a year ago and the usually slack, after the holiday season has not been with us. Several plums were distributed among the big establishments during the past week, the most notable being the decoration at the Columbian Club for the banquet of the N. A. H. C., which was under the supervision of Harry Rieman. Electricity and running water were largely used and to good effect. The less pretentious stores have had a good trade and even the fakir rubs his hands gleefully as he gathers up the "crumbs that fall," etc. In the wholesale district, a few items have had a feverish tendency to advance, but prices in general ruled steady. Violets were in good quality and quantity, as were roses. Berning reports unprecedented demand for wild smilax.

At present little can be judged of future results on the great mound of forty acres at the World's Fair which will be devoted to horticultural interests, but there are already applications on file for more than half that space. Chief F. W. Taylor states that during his late eastern trip, among the florists and nurserymen, he found a decidedly increasing interest, and a generally expressed intention on the part of each one to out do all former exhibits.

The fuel question has not reached an acute stage, as yet, though it may soon.

The down-trodden grower, who has existed in the past despite the glass trust, the extortion of express companies and kindred destroyers of his peace of mind, as well as his use for a pocketbook, as a matter of course, wears a look of resignation, born of long suffering.

Among the growers the order of the day is potting, and from Hans, the foreman, to "Billy," the boy, all are shifting and making room. A fine healthy block of Harrisii was noticed at Bentzen's, and Jablonsky's Peru would make Brother Tinker, of Indiana, feel proud of his creation.

The collector is abroad on his mission, and vainly endeavoring to prove the truth of Dun's assertion that "collections are easier."

C. L. Connor, late of the West End, now occupies the location vacated by Ellison & Tesson.

Miss Lupe has opened a store at 517 Locust street, which should prove a winner.

Visitor: J. A. Peterson, Cincinnati.

New York.

THE MARKET REACTS UNDER SLIGHTLY INCREASED SUPPLIES.—DEMAND MOVES IN INVERSE RATIO TO RECEIPTS OF STOCK.—QUALITIES ON THE IMPROVE.—CARNATION MEETING PREPARATIONS.—VARIOUS NOTES.

After a period of high prices a reaction is bound to come and such a condition prevails this week, prices having gone off twenty-five to thirty-five per cent, due to a falling off in demand and an increase in supply in all lines. The highest grades have suffered the greatest decline, although all grades have gone off in price. Although stock is coming in more freely, the supply is by no means heavy. The cut of Beauties is larger than last week and the demand is in inverse proportion to the supply. The quality of Bridesmaids is improving, a greater number of long stems and better color being in evidence. Golden Gates show up in good shape. Carnations are doing fairly well, but the lower grades begin to drag. Prices on carnations have been fairly well maintained up to the present, white selling best of the medium grades. Prosperity holds its own well. The requirements of both storekeepers and peddlers are met without difficulty so far as violets are concerned. Orchids move quite easily, Cattleya Percivalliana the slowest. Lily of the valley is in the dumps and selling as low as \$2 a hundred. Of other bulbs Golden Spur narcissus is doing best, selling as high as \$5 and \$6 per hundred. Paper Whites and Romans find a little consolation in the patronage of the small store man whose trade would not stand prevailing prices for roses. There is a fair sprinkling of freesia, sweet peas, stevia and mignonette, all of value at present to the economical buyer, and these, with tulips, which are now beginning to come along in acceptable shape, help to make up a good variety and make roses a little less indispensable. Smilax is the poorest seller in the "greens" line, asparagus in its several decorative forms being much more useful and popular.

At the meeting of the Brooklyn Horticultural Society Monday night routine matters occupied the attention of those present, the only subjects of public importance discussed being a report of the treasurer of further donations to the entertainment fund and the announcement by Mr. Langjahr of the donation

of a lamp by Abraham & Strauss, of Brooklyn, as a premium which will most likely be awarded as a third prize in the class for collection of carnations shown by the smaller growers. The list of patrons and patronesses of the exhibition was furnished by Prof. Hooper, of the Brooklyn Institute. The list includes the names of the most prominent ladies and gentlemen of the city, among them Lieut. Gov. Woodruff, who was the choice of the members for toastmaster at the banquet to be given the carnation society. A resolution of sympathy with David Deans, of Astoria, on the death of his daughter, was passed. The next meeting will be held February 2, when the preparatory work, it is expected, will be completed.

The annual meeting of the board of managers of the New York Botanical Garden was held on January 12. The director-in-chief was authorized to have plans prepared for large tanks for the accommodation of aquatic plants. The old officers were all re-elected. Dr. Britton's report indicated that the number of species grown in the herbaceous grounds exceeds 3,000, the fruticetum comprising about 530, the salicetum about fifty and the viticetum about sixty. The number of species of hardy trees represented is about 300. The collection of plants in the conservatories comprises about 5,800 species. The need of another range of plant houses is pointed out.

The dinner committee of the New York Florists' Club requests those who expect to be in attendance at that affair to communicate with the treasurer, C. B. Weathered, and secure their tickets. The date is Saturday, January 31, the hour 7:30 p. m., at the St. Denis Hotel.

Charles Lenker, of Freeport, has been giving the coal dealers in his vicinity lessons in their business. He gets his supply in carload lots and generously helps his neighbors out at a small advance over cost.

W. H. Traendly sprung a handsome new delivery wagon on the Twenty-eighth street fraternity last week. It was christened with appropriate ceremonies.

Roberts & Grnewald, of Columbus avenue, were burned out last Monday morning. The contents of the store were a total loss.

Mr. and Mrs. C. L. Allen will celebrate their golden wedding anniversary on January 27.

Lawrence Hafner mourns the loss of his mother, who died last week.

John Young is receiving lilac of superb quality this week.

Visitor: Mr. Clarke, of Portland, Ore.

LOWELL, MASS.—Paul R. Burtt has filed a petition in bankruptcy.

TROY, N. Y.—John A. Duke is making a great success of Prosperity carnation.

OMAHA, NEB.—Lewis Henderson was held up January 17 by three masked men and robbed of his watch and \$65.

MORRIS COVE, CONN.—The greenhouses of F. G. Horn took fire on the afternoon of January 3, but were saved from destruction by lively work by the "hucket brigade."

NEW CASTLE, IND.—The South Park Floral Company recently had a narrow escape from frost. Lime formed in the feed pipe from one of their boilers and cut off the heat but fortunately an emergency connection with another boiler had been made only the day before the cold wave came.

Philadelphia.

MARKET EASES UP ON LIGHT SUPPLIES AND LIGHT DEMAND.—PRICES STILL WELL HELD BUT CARNATIONS WEAKEN.—THE LILIES.—VARIOUS LOCAL NOTES.

There is a little easing up, not that the demand is less but the supply is better and there is not that great scarcity that has kept the retailers on the jump all the time from early morning until night for the past three weeks, grabbing a handful here and a dozen of something there, taking almost anything without respect to grade, so as to get the orders out. Prices, too, are receding a trifle. Carnations that were firmly held last week at \$4 are now to be had at \$3, and a very fair grade sells as low as \$2. White moves the quickest at \$3 to \$4, with a few fancies at \$5. If the growers would only pick them a little greener and not let them open so full on the plants their returns would be better, as most dealers know a good flower when they see it and fight shy of the full-blown stock. Roses are a shade lower, although all good stock is still either engaged ahead or sold on arrival. Prices are about the same as last week. Violets are now coming in better and the supply bids fair to increase rapidly. Very fair stock is offered at \$1 but for the best \$1.50 is still asked. Daffodils are scarce; in fact Leo Niessen has the market to himself, at \$6 for the single stock. Next week should see the Von Sions and then there will be no scarcity until the Easter season wanes.

Speaking of Easter brings to mind the lily crop. I have seen the stocks of the larger growers and they are in various stages of growth, from one or two inches up to six inches in height. Some are in 3-inch pots, others in 4-inch and some in 6-inch. There has been a general disposition to start them slowly. George Anderson, who has been most successful of late, seems to have the most backward lot, many of them being still in 3-inch pots and just peeping above the soil or rather the bulb, as there is no room for soil. He appears not at all concerned, however, as he generally gets them about the best of any whereabouts. A few in just at this time would sell well as the price for quite small flowers is 25 cents each, and not enough to supply the demand.

The January meeting of the Pennsylvania Horticultural Society, held last Tuesday evening, was very well attended. There were some fine exhibits. Geo. Morrison staged some extra fine specimens of *Primula Sinensis*. Jos. Hurley showed some extra choice cyclamens, the best we have ever seen in 6-inch pots. Francis Canning had fine specimens of *Primula stellata*. George Morrison prepared a paper on the Hawaiian Islands, a very interesting essay, which was read by David Rust, the secretary. After this Mr. Rust was taken completely by surprise, as Robt. Craig, acting as spokesman for a committee of the exhibitors at the recent flower show, presented him with a purse of over \$200 as a token of their appreciation of his efforts in the work done by him. Mr. Rust responded with a few words of thanks. His conduct of the office has always been commendable and his system of management during the various shows is well nigh perfect.

Good green is very scarce just now and very indifferent stock brings 50 cents per bunch. Adiantum is also scarce at \$1 per hundred, while smilax sells for from six to eight strings for a dollar.

Eugene Bernheimer is carrying a fine red carnation, an unnamed seedling which is larger and a more brilliant color than Crane.

Ed. Reid is the sweet pea man and can generally fill his orders with extra long-stemmed stock.

Collish has freesias in pots. There is very little cut as yet.

Harris and Craig are now sending in some nice azaleas. K.

Butte, Mont.

FLORISTS ORGANIZE.—THE GREAT STRIDES OF MOUNTAIN FLORICULTURE.—GOOD COLOR AND SUBSTANCE CHARACTERISTIC OF STOCK.

A florists' club was organized here January 15 and it promises to be a great success. The start was with twenty members. The officers are: President, O. A. C. Oehmler; vice-president, Victor Siegel; secretary, Elmer Law; treasurer, Everton Law. The club will be called the Montana Florists' Club. The object is to promote floriculture in Montana and to provide social benefits for its members. There are several more florists in the state whom we expect to become members of the club. There is no town in the west, and I do not know of one anywhere else, that has made the advancement in floriculture in the last five years that Butte has. Seven years ago there was not more than 20,000 square feet of glass in the state devoted to cut flowers. Now there is at least 150,000 square feet and there are half as many cut flowers shipped into the state as are grown here. Unless the express companies come down from their high perch there will be a large amount of glass put up in Montana in the next two years and less shipping done.

The price of coal has not affected the florists here as far as growing is concerned, as there is plenty of coal and prices have not advanced. The greenhouses of Montana have never been in as good shape at this time of the year as they are now. At Law Brothers' can be seen as good carnations as are grown in this part of the country. They are under the care of Jacob Seitz, who has had many years' experience in growing flowers in this western country. Hugh Connor, who has been foreman of the place for the last three years, is also a man of long experience and a successful grower in this mountainous country. We have as good growers and decorators here as can be found anywhere and the color that we get on our blooms can not be excelled elsewhere. It was thought a few years ago that roses could not be grown in Montana, but that idea has long since been abandoned, like some of our silver mines.

There are no roses or carnations that are shipped in (and they come from all parts of the United States) that will compare with the ones that are grown here for color and substance. Last August the Butte Floral Company cut carnations that would be creditable winter-grown flowers in the east. The State Nursery Company at Helena, cut carnations by the thousands until the first of September and threw the old plants out full of bloom and buds to make room for the new stock.

Chas. Horn, of Helena, is doing a prosperous business. He is centrally located and has remodeled his place until he has it in first-class condition and is growing some very good flowers. D. E. L.

Boston.

TRADE QUIET BUT CROPS LIGHT AND STOCK AVERAGING GOOD MONEY.—VIOLETS TAKE A BRACE.—QUALITIES SUPERIOR.—AGRICULTURAL SOCIETY PROVIDES FREE LECTURES.—NOTES.

Flower values are holding up with a remarkable persistency. Even violets, which were in the dumps last week, have braced up and are doing fully twenty-five percent better. Apparently we are to have no January glut this year. We escaped it last year, too. This time it is certainly due in part to the economical tendencies of the growers, who are wasting no heat at the present price of fuel, and crops are reduced in consequence. Business is not particularly brisk and high prices are due entirely to short supply. Any grower cutting a full crop this month will have no trouble in meeting his coal bill, even though it is high. White carnations continue to lead the colored sorts in sale and value. American Beauty roses are stationary where they were last week and prices will not, in all probability, advance again. The average quality of blooms received cannot be boasted of, the ratio of specials to the entire cut having diminished considerably. Queen of Edgely has not been seen in this neighborhood of late.

The Massachusetts Society for Promoting Agriculture, of which Prof. Chas. S. Sargent is president and Gen. F. H. Appleton secretary, has made arrangements for fifty public lectures with stereopticon illustrations to be presented during January, February and March in any Massachusetts city or town where application is made therefor. The lectures will be of a popular nature, intended to awaken the public to the increasing damage to shade and fruit trees by leaf-eating insects such as the elm-tree beetle, brown-tail, gypsy and tussock moth, and give instruction in the best means of combatting the evil. The services of a lecturer and lantern operator are furnished free, the only charge being the traveling and hotel expenses during the time actually devoted to a town.

H. A. Stevens, of Dedham, brought in a rare curiosity last Monday in the shape of a single carnation stem bearing two flowers. The stem had the flattened shape characteristic of such freaks and divided above the top joint, the twin flowers being each a first-class perfect bloom. The variety was Gov. Wolcott.

Ed. McMulkin is showing Bostonians the art of flower-window decoration. The big front on Boylston street is a poem in yellow this week; to see it is to stop, and to stop is to admire. Last week it was pink, the drapings and accessories being exclusively of tints harmonizing with the flowers, producing a rich effect.

The residence of Thomas F. Galvin, in Brooklyn, was entered by burglars on the evening of January 21 and jewelry to the value of \$1,000 was stolen.

The greenhouse of Jas. L. Little at Brookline was recently damaged by fire to the extent of about \$100. Defective flue.

At the Horticultural Club, on Thursday evening, Warren Ewell lectured on the "Scaptisciscus Didactylinus."

Visitors: H. Thiemann, Manchester, N. H.; Robt. Paterson, Portsmouth, N. H.; J. R. Fotheringham, Tarrytown, N. Y.

WESTFIELD, MASS.—S. E. Barton will build a modern greenhouse, 20x100, in the early spring.

forty-four coal men for conspiring to
maintain unwarranted prices.

THE largest jobbers of window glass
say that the history of the trade shows
an advance in the February allotment
over the January price.

SOME of the finest blooms of the Mrs.
Lawson carnation we have seen were
received at this office from W. W. Coles,
Kokomo, Ind., a few days ago.

J. A. PETERSON, of Cincinnati, whom
some have given the credit of having
grown the best Lorraine begonias seen in
Philadelphia this season, employs only
leaf cuttings in propagating.

It is stated that up to January 16,
seventy-four applications had been
received by the Board of Park Commis-
sioners of Milwaukee, Wis., for the posi-
tion of landscape architect and superin-
tendent.

News comes from Washington that an
earnest effort will be made to have an
item placed in the postoffice appropria-
tion bill providing for an experimental
parcels post similar to the experiments
made in the free rural delivery in 1896-97.
A bill is in course of preparation to that
effect.

THE articles of incorporation of the
American Carnation Society were filed at
Albany, N. Y., January 19. The pub-
lished list of directors is W. G. Berter-
mann, Fred. Lemon, A. M. Herr, Fred.
Dorner, Jr., Wm. Scott, W. J. Vesey, C. W.
Ward, Wm. Swayne and Eugene Daille-
douze.

J. L. DILLON, Bloomsburg, Pa., says
that in the first twelve days of 1902 he
made 104 shipments of cut flowers by
express. In the same period of 1903 the
number of shipments was eighty-six.
The only cause he can assign is the
increased express charge; cut flowers are
the same price.

Greenhouse Building.

Boulder, Col.—Ed. Hubbard, range of
houses.

St. Cloud, Minn.—Kindler Floral Com-
pany, one house.

Alliance, O.—L. L. Lamborn, house
24x100.

Clyde, O.—R. C. Arlin, one house.

Lexington, Ky.—John A. Keller, two
houses 30x125.

Minneapolis, Minn.—R. Will, range of
houses.

New Castle, Ind.—Bentley & Com-
pany, range of houses.

Cost Up and Prices Down.

AM. FLORIST CO.:—Enclosed find check
for the renewal of my subscription to
your valuable paper. And at the same
time please see that we poor fellows out
here get more and better coal very soon,
else we won't have the dollar to pay next
year. With Illinois soft coal at \$6 a ton
and the prices of stock as low as ever
floristing will soon go the dogs.

St. Paul. C. BUSSJAEGER.

The Rapacity of Express Companies.

The flower growers and shippers, the
first victims of the avarice of the com-
bination known as the Express Trust,
owe it to themselves and all those
dependent directly or indirectly upon
horticultural industries, to raise a pro-
test at once, all together, that will be
heard and understood, from Eastport to
the Golden Gate. The struggle in behalf
of justice and fair play which has been
taken up with so much earnestness in
Boston, a detailed account of which
affair appears in this paper, may be a
long one, but its final result cannot be
much in doubt if the example of the Bos-
ton florists be followed promptly in every
business center in the land.

Now, if ever, is the hard-won national
charter of the Society of American Flo-
rists in a way to demonstrate its utility
to the horticulturists of America and for-
tunate, indeed, is our profession that, in
this serious emergency, it finds itself but-
tressed and its vital interests safeguarded
by an organization with the influence
and prestige of the S. A. F.

That the society is able and willing to
make a stubborn fight for the right can
be accepted with certainty. But it is
essential that it have behind its conjoint
effort the individual support of every one
in the profession for which it acts. This
it implores, this it is entitled to. Call
your meetings, either through existing
local organizations or otherwise; get
together and voice your grievance; file
your protests promptly with Secretary
Stewart or with J. N. May, chairman of
the legislative committee, so that when
the executive board convenes at Mil-
waukee, a few weeks hence, the proper
material shall be on hand for that body
to make effective use of.

Discrimination in Freights.

John Pitcairn, president; J. M. Belle-
ville, general freight agent, and W. W.
Heroy, New York agent of the Pittsburg
Plate Glass Company, testified before the
Inter-State Commerce Commission at
Washington on January 6, in substantia-
tion that railroads are discriminating
against American manufacturers in their
import and domestic freight rates. They
submitted comparative statements show-
ing that glass can be transported from
Antwerp, Belgium, to Minneapolis,
Minn., at 25 cents per hundred pounds
less than from Pittsburg to Minneapolis.
Tariffs to other inland cities show similar
wide variations. Mr. Belleville said that
within the past four years it has been
possible to ship plate glass of any size in
carload lots from Antwerp to Chicago at
43.39 cents per hundred pounds, although
the domestic rate from Philadelphia to
Chicago is 57 cents, and from Antwerp
to East St. Louis for 46.11 cents per hun-
dred pounds, against a domestic rate of
67 cents from Philadelphia to East St.
Louis. According to the *Commoner* the
witnesses made deductions to show what
they believed domestic rates should be.

American Carnation Society.

P. J. Fay, gardener to Wm. Seward
Webb, Shelburn, Vt., registers Carnation
Mrs. Wm. Seward Webb, color white, a
sport from Mrs. Bradt that has not
reverted in three years and is therefore
considered as fixed and a distinct variety.
Flower very large, the original being
small in comparison; very double and
deeply fringed. More healthy and vigor-
ous than Bradt, with a longer-stemmed
flower that is fragrant.

Henry Eichholz, Waynesboro, Pa., reg-
isters Tiger, color orange, striped pink;
size two and one-half to three inches,
calyx very strong, seldom splits, type
that of Mayor Pingree, habit stiff, need-
ing no supports, foliage a dark green
and an early and continuous free bloomer.

ALBERT M. HERR, Sec'y.

St. Louis World's Fair.

Announcement is made by the executive
committee of the St. Louis World's Fair
that Frederic W. Taylor, who has been
acting chief for the past year, is to be
chief of the department of horticulture,
dating from January 1. This is in addi-
tion to the appointment made more than
a year ago, by which Mr. Taylor has
been and is to continue chief of the depart-
ment of agriculture.

It seemed desirable to have these two
great departments handled as a har-
monious whole, since the buildings to
house them are close together. The
building devoted to horticulture will
cover six acres and the one devoted to
agriculture twenty acres. Surrounding
these two buildings are forty-one acres
of ground, the entire area of which has
been placed in the hands of the chief for
planting and treatment. Applications
have already been received for outdoor
space to such an extent that it is assured
that the exhibit will be by far the largest
and best ever made at any exposition.
Indoor space has also been applied for in
a thoroughly satisfactory amount and it
is likely that within sixty days there will
be applications on file for the entire area.
The plans of the two buildings are well
under way and bids will be called for
upon one of them within ten days.

OBITUARY.

MRS. C. WARBURTON.

Chatterton Warburton, of Fall River,
Mass., the disseminator of Cressbrook
carnation, mourns the loss of his wife,
who died on January 20.

EMILY C. NORTH.

Emily C. North, widow of the late Jos.
W. North, died at Kimmswick, Mo.,
January 16. For a quarter of a century
Mr. and Mrs. North had been connected
with the trade at St. Louis. J. H.

MARTIN CROFT.

Martin Croft, landscape gardener at
the State Normal School, Indiana, Pa.,
died January 14, aged 32. He was for
several years engaged in newspaper work,
having founded the *Gazette* at McKees
Rocks, Pa.

MRS. F. L. AMES.

Mrs. F. L. Ames, eminent patron of
horticulture, died on Wednesday morn-
ing, January 21. She was a woman of
noble character, charitable and widely
beloved. Her notable estate at North
Easton, Mass., and her extensive orchid
collection, of which W. N. Craig has
charge, have world-wide renown.

CHARLES F. GIBBS.

Charles F. Gibbs, of St. Johnsbury, Vt., died on New Year's day, of neuralgia of the heart. He was a native of Hartford, Conn., born in 1850. He had been in the florist business at St. Johnsbury for more than twenty years. He leaves a widow, with two adopted children. Mrs. Gibbs will carry on the business.

P. S. PETERSON.

P. S. Peterson, proprietor of the Rose Hill Nurseries at Chicago, and who was one of the most widely known and said to be the wealthiest of Scandinavians in America, died January 19. He was born in Sweden, June 15, 1830. After five years in the gardens of his native land he spent three years on the continent, in leading horticultural institutions at Hamburg, Erfurt and Ghent, at which latter place he was with Louis Van Houtte. Coming to Toronto in 1851, he soon saw that the most open chances for success lay in the United States and he went to Rochester, then, as now, the center of the nursery interest of the country. He obtained employment with Frost & Company, beginning at \$8 a month and board. Within three years he had not only acquired the English language but was working for Ellwanger & Barry at the large salary, for those days, of \$100 a month. In 1856 Mr. Peterson established the present business, the Rose Hill Nursery, on a small piece of rented land then some miles outside of Chicago. In the next year a ten-acre tract of woodland was purchased and has since been added to until it now amounts to 496 acres, the largest piece of acre property in Chicago. Mr. Peterson's attainments in horticulture have found appreciation at home and abroad and have been recognized by many scientific societies. He is the second in over half a century to be voted an honorary member of the Horticultural Society of Stockholm. In 1865 Mr. Peterson married Mary A. Gage, of Boston. Their only child is William A. Peterson, a member of the firm and its manager since 1895.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of ten cents a line (six words) each insertion. Cash must accompany order. Plant ads. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1903 is entitled to a five-line WANT ADV. (situations only) free, to be used at any time during the year.

CUT FLOWERS AT WHOLESALE.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

WALTER P. STOKES, Pres.; C. N. PAGE, First Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.
Twenty-first annual convention, Philadelphia and Atlantic City, June 23-25, 1903.

HENDERSON'S Bush Lima beans are scarce, recent sales being reported at \$5 per bushel.

STOWELL'S Evergreen sweet corn is either scarce or some one has cornered the market.

A. J. BROWN, of Grand Rapids, Mich., visited Chicago during the week enroute to the east.

AMERICAN seedsmen will be interested in the group photograph of the seedsmen of Erfurt, Germany, reproduced on page 937 of this issue.

VISITED CLEVELAND: C. W. Scott, representing Vaughan's Seed Store, Chicago; Arnold Ringier, representing W. W. Barnard & Co., Chicago.

VISITED CHICAGO: Chas. Schwake, representing Chas. F. Meyer, New York; Ralph M. Ward, representing Wm. Hagemann & Company, New York.

The John A. Salzer Seed Company, La Crosse, Wis., reports that mail order business the first twenty-one days of January was forty-eight per cent ahead of last year, with catalogues five days later in getting out.

A. TILTON, founder of the firm of A. Tilton & Sons, Cleveland, Ohio, has retired from the business, which will be continued by the sons, G. A. and J. H. Tilton, under the old firm name. The business was established in 1858.

THE H. N. HAMMOND Seed Company, of Bay City, Mich., whose new catalogues were destroyed in the recent fire at the Adventist printing plant at Battle Creek, relet the contract at once in Chicago and lost only about two weeks' time. The catalogues were not insured.

THERE were no bids for the Vail Seed Store stock, effects, etc., when offered for sale at Indianapolis January 22, and the receiver says he intends to dispose of them very soon at public auction. The assets are reported to approximate \$5,000, while the liabilities are likely to exceed this sum.

THE HARVEY Seed Company, Buffalo, N. Y., was established by Harvey Brothers in a small store at 65 Ellicott street in 1858. A few years ago L. H. Manly and George B. Edgerton purchased the business and the firm now occupies three large stores, 65-69 Ellicott street, and a large warehouse on Chicago street.

Cold Storage Decision.

For the deterioration of goods while in cold storage the warehouseman is held, in Marks vs. New Orleans Cold Storage Company (La.) 57 L. R. A. 271, to be responsible, notwithstanding a stipulation, in the receipt issued for the goods, to the effect that he will not be responsible for "damage" to the goods.—Chicago Journal.

Government Seeds.

Pursuant to the resolution passed by the directors of the Wholesale Seedsmen's League, December 18, a committee appointed by them met in Washington, January 14, and called on Secretary Wilson, of the Department of Agriculture. In his absence the committee left a type-written statement of its views, which,

while expressing appreciation of the present methods of purchasing seeds for congressional distribution, deprecated the increased demand for free seeds from the government, and its effect not only on the mail order trade but on the retail seed dealers throughout the country. If in line with past efforts it is found impossible to stop the government seed business, the injury done to the seed trade should be so ameliorated as to work the least possible injury. The committee suggested that if the purchase of seed supplies for distribution be made direct from the merchants after the crops are harvested, surpluses found to be on hand at that time could be used and relieve the holders of stocks which might otherwise depress values and demoralize trade. To this Secretary Wilson responded as follows by letter to the president of the league:

I have before me the statement of the seed trade committee signed by you and other gentlemen interested with regard to the seed purchases of this department. I am pleased with the reasonableness of your propositions and will consult with Dr. Galloway with regard to them. I think there will be no difficulty in meeting most of your requirements. There is no disposition on our part to embarrass the seed trade.

With regard to a modification of the law on the subject, it is doubtful, in my opinion, if anything can be done along that line. We obey the law to the best of our ability in such a way as to do us little harm as possible to the seed trade.

New Bedford, Mass.

Since the holidays there has been a great run of funeral work. Flowers still retail almost as high as at Christmas. People expect to pay more on account of the high price of coal and do not do much kicking. The retailers are using great quantities of Paper Whites for funeral work, instead of carnations, which are scarce.

There will probably be some greenhouse building the coming summer. It is rumored that Wm. Pierce will put up a range of houses to supply his store. There will also be a house built for carnations by an amateur florist.

Joseph Pierce has left the employ of his father and has a good situation at the Lakeview Greenhouses, Jamestown, N. Y.

GLADIOLI...

In order that the Florists of the United States may become familiar with the exceptional high quality of Groff's Hybrid Seedlings (genuine), and as an incentive for them to purchase a trial lot of this stock, I have concluded to submit the following offer:

For \$25.00, CASH WITH ORDER, with mention of this paper, sent to me prior to February 12th, I will send 1000 Groff's Hybrid Seedlings, blooming bulbs, together with your choice of the following, gratis:

500 May Gladioli, 300 Smoky and Slaty Hybrids, 350 Burbank's California Select, 500 Mixed Lemoine.

Under this arrangement, orders sent in the same manner to the following seedsmen will be honored by them and executed here the same as if sent direct to me:

THE NURSERY TRADE.

AM. ASSOCIATION OF NURSERYMEN.
 CHAS. A. LOENFRITZ, Pres.; D. S. LAKE, Vice-Pres.; GEORGE C. SEAGER, Rochester, N. Y., Sec'y.
 Twenty-eighth annual convention, Detroit, Mich., June, 1903.

DANIEL P. PLUMMER is starting in the nursery business near Bellefontaine, O.

P. S. PETERSON, of Chicago, died of pneumonia January 19. His portrait appears in this issue and a brief sketch of his life on page 945.

ISRAEL KINNEY, of Zanesville, O., now nearly 72 years of age, has retired from the nursery business, in which he has been engaged for very many years.

THE Connecticut Horticultural Society has appointed a committee consisting of G. A. Parker, Theodore Wirth, T. J. McDonald, C. M. Rodgers and L. H. Mead to arrange for an exhibit at the St. Louis World's Fair.

THE Elm City Nursery Company, of New Haven, Conn., has recently leased the Cleveland Smith farm adjoining its nurseries on the south. This will be planted largely to ornamentals to grow on into specimens.

Milwaukee.

STOCK IN STRONG DEMAND AND SHORT SUPPLY.—CLUB MEETING.—GENERAL NEWS.

The meeting of the Florists' Club, held at the St. Charles hotel January 15, was well attended. Among other matters given attention was the appointment of an entertainment committee the members of which are F. H. Holton, N. Zweifel and Chas. Zepnick.

Trade has been unusually good for this time of the year. Stock is scarce and the ruling prices are almost as high as were obtained during the holidays. There is certainly an outlet here for good stock just now.

Miss Margaret Edlefsen was married January 19 and will hereafter reside in Chicago. Miss Rose Zennler will succeed her in the store, Mr. Edlefsen attending to the buying.

Frank P. Dilger has the sympathy of the trade in the loss of his daughter, Ruth, who died last week, aged seven and one-half years.

The M. A. McKenney Company has remodeled the Milwaukee street store, which is now one of the most attractive in the city.

A. Billings, of Cudahy, is sending in some very fine Harrisii lilies.

Holton & Hunkel are receiving some good single violets.

Wm. Schutt has gone on the road for Holton & Hunkel.

Barrie, Ont.

Fourteen inches of snow fell here on January 15, completely covering everything. The houses were dark for three days before the sun came to our aid. The thermometer has again touched 20° below zero, but fortunately we have a good supply of wood, although we have to pay about \$2 a cord more for it than two years ago. Trade has been at a standstill since the holidays, only an occasional wedding or funeral order breaking the monotony. L.

CLIFTON SPRINGS, N. Y.—The greenhouse of Dr. Wm. Turck took fire January 12 and the stock was ruined, loss \$500, insurance \$200.

Hardy Herbaceous Plants.

Japanese Iris, German Iris and Paeonias, Specialties.

Golden Glow, Eulalias, Day Lilies, Hardy Sunflowers, Dragon's Head, Cone Flowers, Boltonias, Sedums and a long list of other valuable kinds in large supply. Please write for lists of varieties and prices; they will probably surprise you.

J. T. Lovett, Little Silver, N.J.

Rhododendron Maximum AND Kalmia Latifolia

The two best native Evergreen Shrubs for out-of-door ornamentation. Furnished by car load lots or in smaller quantities. Send for prices, also Special Rhododendron circulars. Fine lot of general nursery stock.

OUR PASTIMES.

Announcements of coming contests or other events of interest to our bowling, shooting and sporting readers are solicited and will be given place in this column.

Address all correspondence for this department to Wm. J. Stewart, 79 Milk St., Boston, Mass.; Robt. Kift, 1725 Chestnut St., Philadelphia, Pa.; or to the American Florist Co., 324 Dearborn St., Chicago, Ill.

At Milwaukee.

The local bowlers will soon get down to work in earnest, preparatory to the national contest next August. A series of games has been started between teams representing the growers and retailers and will be continued for some time on the first and third Tuesdays of the month at the Olympic alleys.

A representative team of bowlers is expected from Chicago this evening, January 24, when the brewer's ball takes place.

At Flatbush.

The annual bowling for unseen prizes took place on Thursday night, January 15, at the club alleys and was productive of the customary amount of pleasure and merriment, the only universally regrettable feature being the absence of the club's honored president, Chas. Zeller. The scores, with the prizes which Dame Fortune brought to each in turn are appended:

Table with columns: Name, Score, Prize. Lists bowlers and their respective scores and prizes.

ALLIANCE, O.—L. L. Lamborn and Mrs. Lamborn left January 22 for a month's sojourn in Cuba.

HARTFORD, CONN.—Supt. Theo. Wirth, of the Public Park department, has just returned from Glen Cove, N. Y., whither he went with his family to spend the holidays with Mrs. Wirth's parents. While there Mrs. Wirth and the children were taken seriously ill with pneumonia and later on Mr. Wirth was also stricken down.

NEW PINK CARNATION

"Success\$"

Will pay more per square foot than any other Carnation grown. Outbloomed Mrs. Joost last season by 35 per cent. and is doing still better this year.

A tremendous producer of fine, large, stiff-stemmed, well-formed flowers of the shade of La France rose.

Rooted Cuttings, \$1.50 per dozen; \$2.50 per 25; \$8.00 per 100; \$70.00 per 1000.

H. WEBER & SONS, Oakland, Maryland

Springfield, Ill.

TRADE GOOD AND STOCK REALIZING VERY FAIR PRICES.—PLACES SHOW UP WELL FOR SPRING.

Since the first of the year trade has been quite active with the exception of four days when the mercury was hovering about the zero line—the coldest reported was 9° below. A. C. Canfield has been sending some fine carnations to St. Louis, where they have brought excellent prices. His roses are somewhat off crop.

A. C. Brown reports the past holiday trade as an increase over former years; the demand for carnations was noticeably heavy and although he had a big lot of them, many more could have been sold. Cyclamens did not sell so well as last season. There were some good *Harrisii* plants at his store this week.

David Wirth's place is looking well. He expects to have a big stock of spring bedding plants. His Boston ferns and carnations are in good condition.

ANON.

Ironton, O.

W. F. Therkildson & Company say this is the best year in their history, the business all they could handle. At the holidays they had more than they could do, with a fair cut in carnations, which were the popular flower. They have a big cut now on and fine prospects for the rest of the season. They lately added a propagating house 12x60 feet. The coal question does not worry them. The place is heated by natural gas at 10 cents per thousand feet. The whole place of 36,000 feet of glass is heated at an average cost of \$1 per day, except in severe weather, when they have to have heat the entire twenty-four hours, when the bill sometimes runs as high as \$2 or \$2.25 per day. Coal is cheap here also, thousands of tons of soft coal being mined for domestic use, selling at \$2 per ton. The city is a thriving one and the future of the greenhouse industry here seems assured.

NEW CASTLE, PA.—M. R. Morgan, who has for two years been carnation grower for Lewis Ullrich, Tiffin, O., is now with Fischer & Sons.

NEW IBERIA, LA.—The residence of Mrs. Robt. Brown, the only florist here, was destroyed, with all its contents, by fire, on the night of December 12.

C. Warburton, FALL RIVER, MASS.

THE FARQUHAR ROSE

A MAGNIFICENT FORCING PLANT FOR EASTER

Awarded the Silver Gilt Medal of the Massachusetts Horticultural Society.

Certificated by the Horticultural Society of New York.

In this new Rose we have at last a worthy companion to the Crimson Rambler, bearing beautiful clusters of pink double flowers.

THE FARQUHAR ROSE is a vigorous and rapid grower. Many of the stock plants, cut down for propagation last July, and then not a year old, have since developed shoots 20 to 22 feet in length.

THE FARQUHAR ROSE has glossy, bright green foliage, which does not drop, and retains its lustre until cut down by severe frost in November or December, a feature which makes it most valuable for covering trellises, pillars, summer houses, fences and rocks. It is perfectly hardy and does not require protection during winter.

THE FARQUHAR ROSE bears magnificent clusters of bright pink double flowers on long stems, which are most serviceable for vases and table decorations, while the individual flowers are useful for bouquets and designs. As an Easter plant, its color alone gives it a decided advantage over the Crimson Rambler.

Mr. Jackson Dawson, of the Arnold Arboretum, who raised the FARQUHAR ROSE, describes it as follows:

"It can be best described as flowering perfectly double in clusters, the individual flowers being similar in size and color to the flowers of Caranation Melba. The plant is of rapid growth, stocky, trailing habit, with bright glossy foliage. All who have seen it pronounce it something extra. In commenting upon it Mr. W. R. Smith, of the United States Botanic Garden, Washington, D. C., says that it is a rose for the millions. Prof. B. M. Watson, of the Bussy Institution, and many private gardeners, have declared it a great success."

TESTIMONIALS AND PRESS COMMENTS:

Mr. W. R. SMITH, Curator United States Botanic Garden, Washington, D. C., writes:

"I saw your new Rose, 'The Farquhar,' when it first bloomed with its raiser, Mr. Jackson Dawson, of the Arnold Arboretum, and was so pleased with it that I at once pronounced it a rose for the people."

DORCHESTER, MASS., May 10, 1902.

GENTLEMEN—I have made a specialty of forcing Roses for the Boston Market for many years, especially Crimson Rambler, which I have considered the finest novelty of recent years.

Your new Rose, "The Farquhar," is a better thing than the Crimson Rambler. Its foliage and its beautiful rose-pink color are unequalled in any climbing rose. I consider it the finest floral novelty in existence.

Yours very truly,

LAWRENCE CUTLER.

MILTON, MASS., May 10, 1902.

GENTLEMEN—"The Farquhar Rose" is a fitting companion to the Crimson Rambler. So many worthless roses have been sent out with the name Rambler that this name has fallen into discredit. Your Rose is a true hardy climber, bearing large trusses of beautiful deep pink double flowers, with a fragrance different from any other rose I know.

Yours very truly,

GEORGE M. ANDERSON.

THE AMERICAN FLORIST Vol. XVIII, No. 728, says: "At the exhibition in Horticultural Hall, on Saturday, May 10, R. & J. Farquhar & Company showed plants in bloom of the new Farquhar Rose, and received therefor a silver gilt medal. This Rose, which was raised by Jackson Dawson, is the result of a cross between Rosa Wichuriana and Crimson Rambler. It is of similar habit to the latter, but the deep pink flowers are larger and it has a slight fragrance."

THE FLORISTS' EXCHANGE, Vol. XIV, No. 23, says: "This Rambler is the largest yet, being quite two inches in diameter, very double, and of the liveliest bright pink imaginable; borne in large clusters and with the individual flowers on longer stems than those of Crimson Rambler, so that they could be used in design work. It will make a magnificent Easter plant, and its vigor, hardiness, etc., make it a sure winner for outside."

AMERICAN GARDENING, Vol. XXIII, No. 387, says: "The attraction of the show (Massachusetts Horticultural Society, Boston, May 10, 1902), however, was the new Farquhar Rose. This is a new pink Rambler, raised by Jackson Dawson of the Arnold Arboretum, from whom the whole stock was purchased by Messrs. Farquhar. The color of the flowers is brilliant rose, the clusters are similar to those of Crimson Rambler, the florets, however, being larger and more double. There is a slight fragrance. The award of a silver gilt medal was thoroughly deserved and measured by the position it is bound to occupy in the near future, might even have been higher."

Strong Plants from 3½-Inch Pots, per 100, \$50.00. Delivery will commence April 1, and orders will be filled in rotation as received. 25 or 50 Plants at 100 rate.

YELLOW EATON

GOOD JUDGES pronounce it the most valuable commercial Chrysanthemum to be introduced in the spring of 1903. Its color captivates everybody and it has all the other good qualities of Timothy Eaton, without the coarseness sometimes attributed to that variety. \$5.00 per doz.; \$30 per 100. Delivery of young stock, March 1, 1903.

ROBERT CRAIG & SON, Market and 49th Streets,
PHILADELPHIA, PA.

Providence, R. I.

COLD WEATHER CUTS DOWN SUPPLIES.—VIOLETS ARE CHEAP.—NOTES.

The week of January 12 furnished fine, clear days, with a corresponding improvement in flower-quality. The week of January 19 started in with zero weather. The rose market has shown a tendency to a shortage temporarily, with a slight increase in prices. Carnations are increasing in numbers but find a ready sale at regular rates. Violets have met with their first comedown and now sell at 50 cents to 75 cents per hundred whole-dale. Bullous stock is plentiful. Smilax is scarce at 15 cents per string. Maidenhair and asparagus are in active demand with small supply. Hardy ferns and galax leaves are the main greens at present.

About the only news worthy of note is W. B. Hazard's removal to the east side of Mathewson street. This is a wise move. The former location had windows that were too unwieldy for general decoration and were too expensive to keep properly filled with fresh cut flowers from day to day. M. M.

Irvington, N. Y.

The Lord & Burnham Company is making extensive additions to its plant here. The additional buildings will comprise a large woodworking mill equipped for the preparation of cypress wood capping, bars, and so forth, for their iron construction greenhouses, also for the manufacture of cypress greenhouse material for the "all sash bar" construction, the demand having outgrown the capacity of the present mill; a power house on their new dock for the installation of new steam boilers and engine; also additions to the foundry and shops for making Burnham boilers. The enlargements referred to, taken in connection with the present works, including the extensive iron working shop built three years since, will nearly double the firm's present facilities.

SPRINGFIELD, MASS.—The Amateur Horticultural Society has elected C. L. Simons president and Charles L. Burr secretary.

GONZALEZ, TEX.—J. G. Bowyer, proprietor of the Gonzalez Greenhouses, will shortly put in seventy acres of fruit at Conrad Siding, about seven miles from town.

TRADE TAKES A DOWNWARD TREND.—PRICES OFF ONE-THIRD.—STOCK ACCUMULATES.—CLUB MEETS.—NOTES.

Business has taken quite a turn since the holidays, for stock has been accumulating in the stores to such an extent as to force prices down into a more normal channel. Violets were the first to feel it and were sold at retail on the streets for 75 cents per dozen bunches three days after Christmas, but by looking closely one could find that the heavy frosts had taken color and odor out of them, but now even the best sell at that figure. Prices on all other stock, excepting valley, have been reduced one-third.

The "high jinks" held by the Pacific Coast Horticultural Society January 3, were a success, the hall being hardly large enough to hold the crowd. Besides three-fourths of all the members, the Gardeners' Club of Oakland showed up with about fifteen present and all enjoyed it heartily. The entertainments were of the best.

"Bob" Forest, who was employed at the Shanahan Floral Company, was killed last week by falling from a bannister, fracturing his skull.

Edw. Schwerin has invested in a very fine talking machine, which produced some fine fun for the boys at their last meeting.

C. H. Baker is doing a lot of duck shooting and promises to ruin the market in butcher supplies.

Chas. F. Fick is feeling very happy since the stork brought a fine little baby boy. GOLDEN GATE.

BATAVIA, ILL.—Wm. Clark is preparing to rebuild his greenhouses, recently destroyed by fire.

BRIDGEPORT, CONN.—John Reck says the holiday business was a nice increase but that there was plenty of stock and prices were lower than usual. There was a good call for scarlet carnations, Jacqueminot and Bon Silene roses. Valley could not be sold.

The Model Extension Carnation Support.

Flushing, Long Island, Dec. 11th, 1901.
MR. THERON N. PARKER, Brooklyn, N. Y.
Dear Sir— I have used your Wire Carnation Support the last two years, in all about 12,000. They fill the bill in every particular. Nothing could be more satisfactory and would give me a great deal of pleasure if I can bespeak a good word for you to the trade and you are at liberty to refer to me at any time. Very truly,
A. L. THORNE.
La Fayette, Ind., July 8th, 1902.

MR. THERON N. PARKER, Harrison, N. J.
Dear Sir:— After using your Model Carnation Support in two of our houses the past winter, we have come to the conclusion that it is perfectly adapted to supporting carnations, and shall use them on all our plants the coming season. We were much pleased with the simplicity, strength and neat appearance of the support
Yours truly

ALWAYS mention the AMERICAN FLORIST when writing to advertisers.

Have You Seen It? The New Duplex Gutter OF 1903.

Examine it fully, and you will never build a house with a wooden or cast iron gutter. It is warranted perfectly drip proof; a bench under it is the best place in the whole house, as it brings the plants closer to the light and has more light. The shade of the gutter, which is very little, is from 3 to 4 feet on the north side of the gutter. The gutter is as straight as a string when set and never breaks at joints, no matter what kind of a strain it may have. Do not confound this gutter with any wood or cast iron gutter. It is self adjusting to any size of glass. Write for Catalogue.

TRADE ON THE IMPROVE AND STOCK SHORT OF THE DEMAND.—WHITE MATERIAL SCARCE.

Business has shown a gradual increase the past week and is back at its normal state. Stock in all varieties is in no way plentiful. Tea roses of all grades do not meet demands, and especially so the white. Prices range from \$6 to \$10 per hundred. The quality is somewhat improved, as the weather conditions have been more satisfactory. In Beauties we are glad to receive orders partially filled. Carnations, which have become one of the most popular flowers, are being taken now in place of roses, especially such fancy varieties as Lawson, Bradt, Enchantress, Crane, Marquis, and so forth, and some fancy prices are secured at retail. Violets are becoming more plentiful. Romans and narcissi are received in quantities for funeral work. R. Wessling has had a very busy week of funeral orders.

Thos. Lynes, of the East Side Floral Store, reports good trade last week. He has a very neat and attractive store, which he finds is receiving good patronage.

A department store here had a sale of 2,000 carnations at 35 cents per dozen Saturday, which caused many expressions of surprise among the retailers.

Rice Brothers are adding a stock of ribbons to their supply list.

R. W. Beatty, of Wahpeton, N. D., was a caller last week. C. F. R.

Bargains FOR Florists.

We are headquarters for a general assortment of the necessary material and supplies that you are looking for. If you are about to improve or construct, consult us.

In connection with the dismantling of the Pan-American Exposition, we have for sale:

20,000,000 FEET of fine seasoned lumber, practically new, consisting of all sizes of joists, timbers, dressed and matched boards and flooring; also sash and doors.

PIPE.

We are headquarters for pipe. We offer you **100,000 FEET** of 2 to 4-inch wrought iron lap welded casing. We can furnish this material in three ways: Either with sleeve or jacket couplings, screwed ends and threaded couplings or with expanded cast iron flanges with bolts and nuts.

1,000 000 FEET of standard black wrought iron pipe, size 3/8 to 12-inch. It is second-hand but has new threads and couplings and is in first-class condition.

1,000 TONS of galvanized wire 9, 10, 11, 12, 13, 14 and 15 guage.

50,000 FEET of 2, 3 and 4-inch cast-iron soil pipe and fittings.

100,000 FEET of garden hose, 3/4 and 1-in. **75,000 FEET** of cotton rubber-lined fire-hose, (rubber-lined in and outside), ranging in sizes 1 to 2 1/2-inch.
